# Foreword

**Councillor Alison Butler – Deputy Leader Statutory - Cabinet Member for Homes, Regeneration & Planning & Councillor Paul Scott – Chair of Planning Committee & Deputy Cabinet Member for Planning**

Increasing housing supply through sustainable growth; building more affordable homes; facilitating employment and economic growth; protecting and enhancing the special character of places; improving and protecting District and Neighbourhood Centres as well as optimising the potential of Croydon Opportunity Area; and an increased emphasis on culture. These are key elements of Ambitious for Croydon that the Croydon Local Plan: Detailed Policies and Proposals (CLP2) will help to deliver up to 2036. CLP2 supplements the adopted Strategic Policies and their Partial Review (CLP1.1) that sets the strategic vision, objectives and policies. CLP1.1, and consequently CLP2 support the Council's Growth Zone and Community Strategy through enabling sustainable and necessary growth, supported by new infrastructure to bring increased opportunities for our residents and businesses.

CLP2 focuses on making Croydon a better borough to live, work and visit from stepping out of your front door, going to the local shop, community hall or school or visiting your Neighbourhood Centre, District Centre or Croydon Opportunity Area for shops, work, restaurants and entertainment. It has a renewed focus on District Centres, designates more local Shopping Parades and creates a new designation, Neighbourhood Centres, where services that support local communities such as shops, pubs, faith or community facilities will be encouraged to locate.

CLP2 demonstrates how sustainable growth of Croydon's suburbs can increase the supply of new homes, including affordable housing whilst continuing to protect the borough's important green spaces and heritage and cultural assets that make Croydon so special and the place that it is. It shows how Croydon will evolve sustainably from 2016 to 2036 setting out the Detailed Policies that will guide development and the sites that we expect to be developed to help meet the need for new homes, jobs, schools and healthcare facilities that the borough will need.

We are pleased that the Croydon Local Plan: Detailed Policies and Proposals have been endorsed by the Council's Cabinet for publication prior to its proposed submission to the Planning Inspectorate for its independent examination in public. We would welcome your comments on the Detailed Policies and Proposals and we are sure your engagement will deliver a better Plan and a borough we can all be proud of. The formal publication period for comment commences on 5 September 2016 and concludes on 17 October 2016.

Proposed development in Green Belt, on Metropolitan Open Land or on Local Green Space	<p>SP7 Green Grid</p> <p>.Policy DM27: Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces</p>
Proposed development affecting a heritage asset (such as Listed Building or Conservation Area)	<p>SP4 Urban Design and Local Character</p> <p>.Policy DM19: Heritage assets and conservation</p>

# What the Croydon Local Plan means in your Place

Throughout the borough most designations are largely unchanged from how they were designated in the Replacement Unitary Development Plan including:

- Most Employment Area designations are unchanged (Policy SP3)
- Conservation Areas, Registered Historic Parks & Gardens and Scheduled Monuments (as these are not designated by the Local Plan) (Policy SP4);
- All of the borough's Local List of Historic Parks and Gardens (Policy SP4);
- Many Local Designated Views and Local Designated Landmarks (Policy SP4);
- The majority of the borough's Metropolitan Green Belt (Policy SP7);
- Almost all the borough's Metropolitan Open Land (Policy SP7);
- The majority of boundaries and designated frontages in the borough's District and Local Centres (Policy DM5);
- Most Shopping Parades are unchanged (Policy DM7); and
- All existing Sites of Nature Conservation Importance (Policy DM28).

This section details the key changes proposed in the Croydon Local Plan in each Place. The key changes are summarised below (not all of which apply to every Place):

- Changes to the approach to delivering affordable housing on major residential developments (Policy SP2);
- There are some changes to Employment designations (Policy SP3);
- Local Heritage Areas replace Local Areas of Special Character (Policy SP4);
- Many new Croydon Panoramas, Local Designated Views and Local Designated Landmarks (Policy SP4);
- Some minor additions to Metropolitan Green Belt (Policy SP7);
- Limited re-designation of Metropolitan Green Belt to Metropolitan Open Land or Local Green Space and Metropolitan Open Land to Local Green Space where the area does not meet the national criteria for designation as Metropolitan Green Belt or the London Plan criteria for designation as Metropolitan Open Land (Policies SP7 and DM27);
- Limited de-designation of Metropolitan Open Land where the area does not meet the criteria the London Plan criteria for designation as Metropolitan Open Land or the local criteria for designation as Local Green Space;
- Some changes to boundaries and frontages in Croydon Metropolitan Centre and some of the District and Local Centres (Policy DM5);
- New Neighbourhood Centre designations (Policy DM6);
- Some new and amended Shopping Parades and some de-designations of Shopping Parades which no longer have a local retail function (Policy DM7);

- A new Restaurant Quarter Parade in the Croydon Opportunity Area (Policy DM8);
- New policy on promoting healthy communities (Policy DM17);
- Local Green Spaces replace Local Open Land providing greater protection to the most important local open spaces in the borough (Policy DM27);
- Nine new Sites of Nature Conservation Importance (Policy DM28);
- Place-specific development management policies for most Places; and
- Detailed Proposals for xx sites in the borough to deliver between xxxx and xxxx new homes, schools, health care facilities and jobs.

Borough as a whole

# BOROUGH MAP TO BE ADDED

31,850 new homes across borough with minimum requirement of 30% of all new homes on larger sites to be affordable (Policy SP2)

New office retention area around East Croydon station to protect the office core of the borough (Policy SP3)

25 new Local Heritage Areas protecting areas which have local historic significance (Policy SP4)

23 new Panoramas, Views and Landmarks across the borough (Policy SP4)

18 additions to Green Belt and Metropolitan Open Land across the borough, 3 re-designations and one area of Metropolitan Open Land de-designated (Policy SP7)

Sustainable growth of the suburbs across Croydon using local character to inform how new development can be accommodated to help meet housing need without loss of open spaces or destruction of local character (Policy DM35)

29 Place-specific policies in locations across the borough to guide the design of new developments in to ensure an improvement to local character (Policies DM36 – DM51)

140 sites allocated across all 16 Places for residential development, new schools, healthcare facilities and other mixed use developments to help meet the need for homes and social infrastructure in Croydon (Policies DM36 – DM51)

1 new Local Centre, 18 new Neighbourhood Centres, 10 new Shopping Parades and 5 de-designated Shopping Parades to meet the needs for local shops, services and community facilities (Policies DM5 – DM7)

85 new Local Green Spaces across the borough to provide the same protection to important local open spaces as applies to Green Belt and Metropolitan Open Land (Policy DM27)

Nine new Sites of Nature Conservation Importance (Policy DM28)

Six areas of focussed intensification in places with existing services and access to public transport (Policy DM35.4)

## Addington

New Croydon  
Panorama designated  
from North Down  
Crescent of Addington  
Palace and Shirley  
Hills (Policy SP4)

Some minor  
extensions of Green  
Belt including  
Addington Vale and  
Milne Park (Policy  
SP7)

Centre at Fieldway  
(Policy DM6)

Amendment to  
Headley Drive  
Shopping Parade  
(Policy DM7)

Place-specific policies  
for New Addington  
District Centre (Policy  
DM36)

# ADDINGTON MAP TO BE ADDED

New Local Green  
Space at Castle Hill  
Avenue providing the  
same level of  
protection as applies to  
Green Belt to this  
important open space  
(Policy DM27)

3 sites proposed for  
development for  
between xx and xxx  
homes, a new  
Secondary School on  
land west of  
Timebridge Community  
Centre to help meet the  
need for school places  
in the borough and a  
new leisure centre,  
retailing and  
community facilities at  
Central Parade West  
(Policy DM36)

Addiscombe

New Local Heritage Areas at Addiscombe College Estate and Bingham Road (Policy SP4)

New Local Designated View from Sandilands of No.1 Croydon (Policy SP4)

Amendments to boundaries and frontages in the District Centre, removing some fringe areas and extending frontages (Policy DM5)

New Neighbourhood Centres at Ashburton Park and Lower Addiscombe Road/ Cherry Orchard Road (Policy DM6)

Place-specific policies for Addiscombe District Centre and the Area between Addiscombe Railway Park & Lower Addiscombe Road (section between Leslie Park Road & Grant Road) (Policy DM37)

# ADDISCOMBE MAP TO BE ADDED

New Shopping Parade at Lower Addiscombe Road/ Davidson Road and de-designation of Morland Road Shopping Parade (Policy DM7)

New Local Green Spaces at Addiscombe Railway Park, Addiscombe Recreation Ground, Ashburton Park, Darnell Road Recreation Ground, Little Road Playground and Whitgift Pond (Policy DM27)

New Site of Nature Conservation Importance at Whitgift Pond (Policy DM28)

3 sites proposed for development for between xx and xxx homes and a new Secondary School on Morland Road (Policy DM37)

Broad Green and Selhurst

Amendments to boundaries and designation of Gloucester Road industrial area (Policy SP3)

New Local Heritage Areas at Henderson Road and London Road (Policy SP4)

Amendments to boundaries and frontages in Broad Green Local Centre, removing some fringe areas and extending frontages (Policy SP5)

Amendments to the Shopping Parade at The Parade, Coulsdon Road and de-designation of Old Lodge Lane Shopping Parade (Policy DM7)

New Local Green Spaces at Bourne Park, Coulsdon Coppice (Bleakfield Shaw), Coulsdon Coppice (Stoneyfield Shaw), the former Godstone Road allotments, Foxley Wood & Sherwood Oaks and Higher Drive Recreation Ground, (Policy DM27)

Area of focussed intensification proposed in the area between Kenley station and Godstone Road (Policy DM35)

30  
1 site proposed for development for between xx and xxx homes (Policy DM42)

Norbury

New Local Heritage Areas at Beatrice Avenue, London Road (Norbury), and Pollards Hill South (Policy SP4)

# NORBURY MAP TO BE ADDED

Amendments to boundaries and frontages in Norbury District Centre, removing some fringe areas (Policy DM5)

Amendments to boundaries and frontages in Pollards Hill Local Centre, removing some fringe areas (Policy DM5)

New Neighbourhood Centre at Green Lane/Northwood Road (Policy DM6)

New Local Green Spaces at Biggin Wood, Green Lane Sports Ground, Norbury Hall, Norbury Park and Pollards Hill (Policy DM27)

New Site of Nature Conservation Importance at Whitgift Pond (Policy DM28)

Place-specific policies for Norbury District Centre and Pollards Hill Local Centre (Policy DM43)

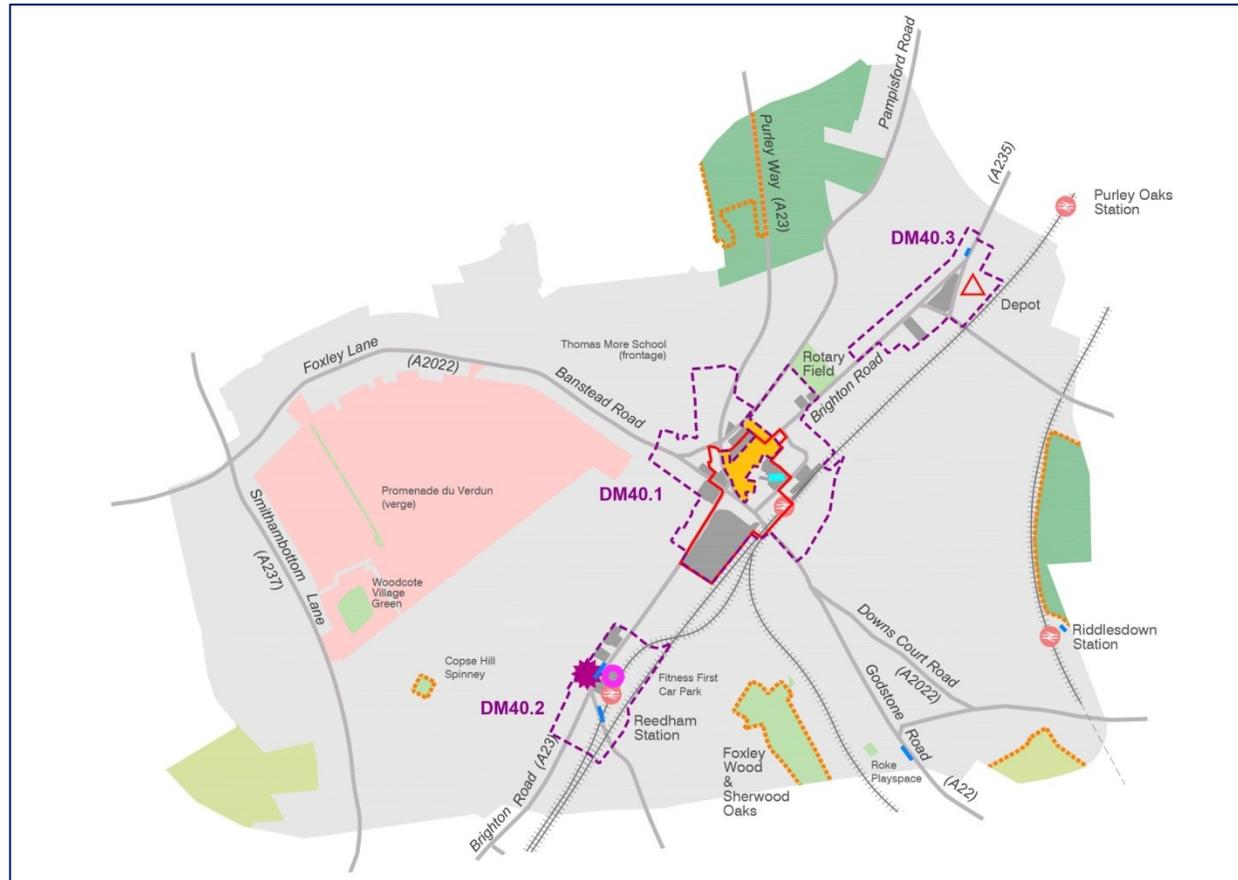

2 sites proposed for development for between xx and xxx homes (Policy DM43)

Purley

New Local Heritage Area (Brighton Road (Purley)) in the town centre (Policy SP4)

Purley Downs re-designated as Metropolitan Open Land with some minor extensions but no change in level of protection (Policy SP7)

Amendments to boundaries and frontages in the District Centre, removing some fringe areas (Policy DM5)

New Neighbourhood Centre at Brighton Road/Downlands Road (Policy DM6)

New Shopping Parade at Brighton Road/Biddulph Road, amendment to Grovelands Shopping Parade and de-designation of Royal Oak Shopping Parade (Policy DM7)

New Local Green Spaces at Copse Hill Spinney, Foxley Wood & Sherwood Oaks, Promenade du Verdun, Roke Playspace, Rotary Field and Woodcote Village Green (Policy DM27)

New Site of Nature Conservation Importance at Copse Hill Spinney (Policy DM28)

Place-specific policies for Purley District Centre & its environs, the environs of Reedham station and the area of the junction of Brighton Road & Purley Downs Road (Policy DM44)

15 sites proposed for development for between xx and xxx homes, a new Primary School on Brighton Road, a replacement swimming pool in the District Centre and a Gypsy and Traveller site at Purley Oaks depot (Policy DM44)

Sanderstead

# SANDERSTEAD MAP TO BE ADDED

New Local Designated View from Limpsfield Road, near Wentworth Way, of All Saints' Church (Policy SP4)

All Saints' Church is a new designated landmark (Policy SP4)

A minor extension of Green Belt to include the Sanderstead Recreation Ground (Policy SP7)

Purley Downs re-designated as Metropolitan Open Land with some minor extensions but no change in level of protection (Policy SP7)

Sanderstead Plantation re-designated as Local Green Space but with no change in level of protection (Policy DM27)

Other new Local Green Spaces at All Saint's Churchyard and Graveyard, Lower Barn Road Green, Purley Beeches and Wettern Tree Garden (Policy DM27)

New Site of Nature Conservation Importance at Hamsey Green Pond (Policy DM28)

Area of focussed intensification proposed around Sanderstead Local Centre (Policy DM35)

Place-specific policies for Sanderstead Local Centre and Hamsey Green Local Centre (Policy DM45)

2 sites proposed for development for between xx and xxx homes and retail use (Policy DM45)

Selsdon

# SELSDON MAP TO BE ADDED

New Local Designated View from Heathfield of Selsdon and New Addington (Policy SP4)

Some minor extensions of Green Belt to include the Courtwood Playground, land between The Bridle Way and Selsdon, and Land between Vale Border and Selsdon (Policy SP7)

Croham Hurst re-designated as Metropolitan Open Land with some minor extensions but no change in level of protection (Policy SP7)

Amendments to boundaries and frontages in the District Centre, removing some fringe areas and frontages (Policy DM5)

New Neighbourhood Centre at Selsdon Park Road/ Featherbed Lane (Policy DM6)

Sanderstead Plantation re-designated as Local Green Space but with no change in level of protection(Policy DM27)

Other new Local Green Spaces at Ashen Grove, Selsdon Recreation Ground and The Ruffet (Policy DM27)

New Sites of Nature Conservation Importance at Falconwood Meadow, Grounds of Heathfield House and Ladygrove (Policy DM28)

Area of focussed intensification proposed around Selsdon Park Road/Featherbed Lane (Policy DM35)

Place-specific policy for Selsdon District Centre (Policy DM46)

1 site proposed for development for between xx and xxx homes and retail use (Policy DM46)

Shirley

# SHIRLEY MAP TO BE ADDED

New Local Heritage Areas at Bishops Walk, Stuart Crescent and Upper Shirley Road (Policy SP4)

Addington Palace and Shirley Windmill are new designated Landmarks (Policy SP4)

Land at Shirley Oaks to be removed from Metropolitan Open Land as it does not meet the criteria for this designation, with some of the land being re-designated as Local Green Space instead

A minor extension of Green Belt to include The Bridle Road (Policy SP7)

Amendments to boundaries and frontages in the Local Centre, removing some fringe areas and extending frontages (Policy DM5)

New Neighbourhood Centres at Shirley Road and Spring Park/Bridle Road (Policy DM6)

Areas of focussed intensification proposed around Shirley Road Shopping Parade and Shirley Local Centre (Policy DM35)

Amendments to the Shopping Parade at Bywood Avenue (Policy DM7)

New Local Green Spaces at Glade Wood, Land to rear of Honeysuckle Gardens, Millers Pond, Parkfields Recreation Ground, Peabody Close playing field and allotments, St John's Church, Shirley Oaks playing field and wood, Shirley Recreation Ground and Spring Park Wood, (Policy DM27)

New Sites of Nature Conservation Importance at Shirley Park Golf Course, the grounds of Heathfield House and Temple Avenue Copse (Policy DM28)

3 sites proposed for development for between xx and xxx homes (Policy DM47)

Place-specific policies for Shirley Local Centre, the area between 518 and 568 Wickham Road and the area of Wickham Road Shopping Parade (Policy DM47)

South Croydon

# SOUTH CROYDON MAP TO BE ADDED

New Local Heritage Areas at Birdhurst Road, St Peters Road and South End with Ye Market (Policy SP4)

St Peter's Church is a new designated Landmark (Policy SP4)

Amendments to boundaries and frontages in Brighton Road (Selsdon Road) and Brighton Road (Sanderstead Road) Local Centres removing some fringe areas and extending frontages (Policy DM5)

New Neighbourhood Centre at South End/Parker Road/St Peter's Church (Policy DM6)

Place-specific policy for Brighton Road (Selsdon Road) Local Centre (Policy DM48)

New Shopping Parade at Southbridge Road and amendments to Brighton Road/Kingsdown Road Shopping Parade (Policy DM7)

New Local Green Spaces at Alder Way Playground, Haling Grove, Normanton Meadow, St Peter's Churchyard and South Croydon Recreation Ground (Policy DM27)

New Croydon Panoramas from Croham Hurst looking south west, of Purley and the Downs (Policy SP4)

Croham Hurst re-designated as Metropolitan Open Land with some minor extensions but no change in level of protection (Policy SP7)

Area of focussed intensification proposed around Brighton Road (Sanderstead Road) Local Centre (Policy DM35)

3 sites proposed for development for between xx and xxx homes and a new Secondary School at Coombe Playing Fields (Policy DM48)

South Norwood and Woodside

# SOUTH NORWOOD & WOODSIDE MAP TO BE ADDED

New Local Heritage Areas at Ingatestone Road, Market Place (Portland Road), Portland Road (Mission Hall), and Portland Road Terrace (Policy SP4)

New Local Designated Views from High Street, south west, of the Clock Tower in South Norwood; from Oliver Grove of the Clock Tower in South Norwood; from South Norwood Hill of the Shirley Windmill; and from the High Street, north east, of the Clock Tower in South Norwood (Policy SP4)

Clock Tower, South Norwood is a new designated Landmark (Policy SP4)

Place-specific policies for the section of Portland Road between the South Norwood Conservation Area and Watcombe Road and for the section of Portland Road between Watcombe Road and Woodside Avenue (Policy DM49)

Amendments to boundaries and frontages in the District Centre, removing some fringe areas and frontages and extending some frontages (Policy DM5)

New Neighbourhood Centres at Portland Road/Watcombe Road/Woodside Road and Woodside Green (Policy DM6)

New Shopping Parade at Portland Road/Sandown Road (Policy DM7)

New Local Green Spaces at Apsley Road Playground, Brickfields Meadow, Heavers Meadow & allotments, South Norwood Recreation Ground and Woodside Green (Policy DM27)

3 sites proposed for development for between xx and xxx homes (Policy DM49)

Thornton Heath

New Local Heritage Area at Thornton Heath High Street (Policy SP4)

New Local Designated View from the High Street of the Clock Tower, Thornton Heath (Policy SP4)

Clock Tower, Thornton Heath is a new designated Landmark (Policy SP4)

Amendments to boundaries and frontages in Thornton Heath District Centre, removing some fringe areas and amending frontages (Policy DM5)

Amendments to boundaries and frontages in Thornton Heath Pond Local Centre, removing some fringe areas and frontages (Policy DM5)

Place-specific policies for Thornton Heath District Centre and its environs and for Thornton Heath Pond Local Centre and its environs (Policy DM50)

# THORNTON HEATH MAP TO BE ADDED

New Local Centre at Beulah Road replacing the existing Shopping Parade (Policy DM5)

New Neighbourhood Centre at Brigstock Road (Policy DM6)

New Shopping Parades at Thornton Road and Whitehorse Lane and de-designation of Northwood Road Shopping Parade (Policy DM7)

New Local Green Spaces at Grangewood Park, Thornton Heath Recreation Ground, Trumble Gardens and Whitehorse Meadow (Policy DM27)

11 sites proposed for development for between xx and xxx homes and a new primary school on London Road and improvements to the Croydon University Hospital (Policy DM50)

Waddon

New Neighbourhood  
Centre at Waddon  
Road/Abbey Road  
(Policy DM6)

Amendments to  
Waddon Road  
Shopping Parade  
(Policy DM7)

New Local Green  
Spaces at Duppas Hill  
and Waddon Ponds  
(Policy DM27)

# WADDON MAP TO BE ADDED

Place-specific policy for Waddon's potential new Local Centre at  
Fiveways (Policy DM51)

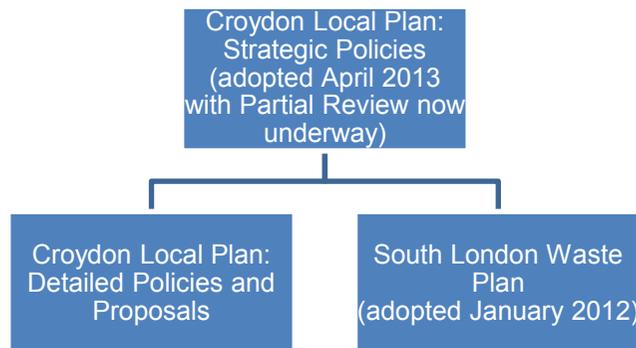

13 sites proposed for development for between xx and xxx homes, retail,  
a creative and cultural industries enterprise centre and a new Secondary  
School at Heath Clark on Stafford Road (Policy DM51)

# 1. Introduction

**1.1** Croydon is a growing borough. It is already the most populous borough in London and aims to be London's most enterprising borough. Planning is critical to ensuring that Croydon meets the needs of its residents, business community and visitors. The Croydon Local Plan sets out the strategy, sites and planning policies necessary to meet these needs.

**1.2** The Croydon Local Plan is split into two documents, the Strategic Policies (formerly known as the Core Strategy) which was subject to independent examination by a planning inspector in September 2012 and adopted on 23 April 2013; and this document, the Croydon Local Plan: Detailed Policies and Proposals. Added to these two plans is the South London Waste Plan adopted in 2012 which provides detailed policies for determining applications for waste facilities.

**Figure 1.1 The Croydon Local Plan**

**1.3** The Croydon Local Plan: Strategic Policies sets out the issues that the Plan as a whole is addressing and the strategic policy framework. A partial review of the Croydon Local Plan: Strategic Policies is being prepared alongside the Detailed Policies and Proposals to extend the period the Local Plan covers so that it

expires in 2036 and not 2031. The partial review will also update the borough's housing targets in the light of changes to the London Plan that were adopted in Spring 2015 and also an updated assessment of Croydon's need for new homes.

**1.4** Detailed planning policies that will help put the strategic policy framework into practice when determining planning applications will be set out in the Croydon Local Plan: Detailed Policies and Proposals. In addition, the Croydon Local Plan: Detailed Policies and Proposals allocates specific sites for development up to 2036 to meet the requirements of the Strategic Policies.

**1.5** The Croydon Local Plan: Detailed Policies and Proposals will assist the regeneration of the borough through the setting of firm planning framework that will provide certainty to the community and developers.

## Preparing the Croydon Local Plan: Detailed Policies and Proposals

**1.6** This document, the Detailed Policies and Proposals (Proposed Submission draft), is the fourth stage of preparing this Plan and follows on from the second consultation on the Detailed Policies and Proposals (Preferred and Alternative Options) that took place in the autumn of 2015 and the 'Call for Sites' that took place in Spring 2012 and again in Spring 2014<sup>1</sup>. Following on from the publication of the Proposed Submission draft of the policies and

<sup>1</sup> The "Call for Sites" was when the Council asked developers, landowners and other interested parties to send in sites that they wished to see developed or safeguarded to be assessed by the Council. There were two Calls for Sites, the second taking place two years after the first.

proposals the Council will submit the draft Detailed Policies and Proposals and all comments made on the Proposed Submission draft to the Planning Inspectorate for a full examination in public. The full timetable is shown in Table 1.1 below.

**Table 1.1 Timetable for preparing the Croydon Local Plan: Detailed Policies and Proposals**

<b>What?</b>	<b>When?</b>
'Call for Sites'	Spring 2012
First consultation on Detailed Policies (Preferred and Alternative Options)	October – November 2013
Second consultation on Detailed Policies and the Proposals (Preferred and Alternative Options)	November – December 2015
Publication for comments of the Detailed Policies and Proposals that the Council intends to submit to Secretary of State	Summer 2016
Submission of the Detailed Policies and Proposals to the Secretary of State	Late 2016
Independent examination	Mid 2017
Adoption of Detailed Policies and Proposals as the Council's planning policies	Late 2017

### About the Detailed Policies and Proposals (Proposed Submission draft)

**1.7** The Detailed Policies and Proposals (Proposed Submission draft) sets out the Council's draft planning policies that it would like to include in the final version of the plan. It also sets out the Council's draft site allocations.

**1.8** The Strategic Housing Market Assessment for Croydon prepared in 2015 has identified that the borough would have to

plan for 42,930 homes between 2016 and 2036 to meet all the need for housing in the borough. In comparison the London Plan (2016) only requires Croydon to build an equivalent of around 28,700 new homes over the same period.

**1.9** The Croydon Local Plan: Strategic Policies (Partial Review), the Proposed Submission draft of which is also being published alongside this document, sets out the draft strategic approach to meeting the London Plan housing target and, as appropriate, exceed this target.

**1.10** The next section of this document explains how the draft policies and proposals are presented.

## 2. Using and commenting on this document

### Using this document

**2.1** This document is set out in the same order as the Croydon Local Plan: Strategic Policies. In this section you can find a guide to how to understand how the policies and proposals are presented.

**2.2** Sections 4 to 10 contain proposed development management policies on various topics from Homes to Transport. Section 11 contains Place-specific policies and the detailed proposals.

**2.3** This document is accompanied by a draft Policies Map which shows the geographical extent of all the designations related to the detailed policies as well as the boundaries of each detailed proposal site.

**2.4** All policies in this document should be used in conjunction with the National Planning Policy Framework (2012), the London Plan (2016) and the Croydon Local Plan: Strategic Policies (2013).

### Guide to the detailed policies

**2.5** For each draft policy (except the Place-specific policies) the following information is provided:

- a) Strategic Objectives and related Croydon Local Plan strategic policies;
- b) Unitary Development Plan policies to be replaced by this policy;
- c) Why we need this policy;
- d) Draft policy wording;
- e) How the draft policy works; and
- f) Key supporting documents.

### Guide to the Place-specific policies (including the detailed proposals)

**2.6** For each Place-specific policy the following information is provided:

- a) A description of the general character of the Place;
- b) The draft policy wording;
- c) A full description of how the draft policy works; and
- d) A list of all the detailed proposal sites in each place including the proposed use on each site.

**2.7** A guide to how the detailed proposals were identified can be found in Appendix 1 and a schedule containing further details of each site including indicative unit numbers and phasing can be found in Appendix 5.

### Commenting on this document

**2.8** The Croydon Local Plan: Detailed Policies and Proposals (Proposed Submission draft) is being published for a six week period. During this time the Council is inviting comments on the draft policies and proposals that are presented in this document.

**2.9** All duly made comments received will be forwarded to the Planning Inspectorate for consideration. To be duly made the comments must:

- a) Be received by the Council on or before the 17<sup>th</sup> October 2016;
- b) Include a name and either an e-mail or postal address all of which must be legible;
- c) Not contain offensive or racist language; and

d) Be related to the draft Policies and Proposals.

**2.10** The publication is not a consultation as the Council is not allowed under the Local Plan regulations to make changes to the Local Plan prior to examination. Only the independent planning inspector can make changes to the Local Plan after publication.

**2.11** In particular the comments should focus on the legal compliance and the four tests of soundness below.

Key Questions
a) Do you think that the draft policies and proposals meet the objectively assessed development and infrastructure requirements of Croydon (and the unmet need of neighbouring authorities) as far as it is sustainable and reasonable to do so?
b) Do you think that the draft policies and proposals are the most appropriate for Croydon to help us meet our Strategic Objectives set out in section 3?
c) Do you think that the draft policies and proposals are deliverable?
d) Do you think that the draft policies and proposals enable the delivery of sustainable development in accordance with the policies of the National Planning Policy Framework?
e) Do you think that the draft policies and proposals have been prepared in compliance with the relevant legislation and regulations?

**2.12** Any comments should be received by the Council on or before **17 October 2016**. Comments may be made by e-mail or in writing and must be sent to the addresses below:

Email: [ldf@croydon.gov.uk](mailto:ldf@croydon.gov.uk)

Post: Croydon Local Plan: Detailed Policies and Proposals  
(Proposed Submission draft)  
Spatial Planning  
Bernard Weatherill House  
8 Mint Walk  
Croydon  
CR0 1EA

**2.13** The Council cannot guarantee that comments sent to any address other than those above will be received in the prescribed period in order to be considered duly made. The date of the representation will be determined based on when it is received at [ldf@croydon.gov.uk](mailto:ldf@croydon.gov.uk) or by the receipted date stamp.

### 3. Strategic Context

#### We are Croydon

**3.1** 'We are Croydon' is the vision for where Croydon will be in 2040 and the work of 20,000 people, imagining the borough in the future.

**3.2** The 'We are Croydon' vision is used by Croydon Council's partners as the basis for future strategies and plans, including the Croydon Local Plan's own spatial vision.

**3.3** 'We are Croydon' has informed the Croydon Local Plan's spatial vision and strategic objectives. These are used to guide the overall strategy and spatial choices about where developments should go in broad terms and how development should take place.

The We are Croydon Vision
<p><b>Connected:</b> A place that is well connected, easy to get to and around, and supported by infrastructure that enables people to easily come together, with one of the best digital, communications and transport networks in the country</p>
<p><b>Sustainable:</b> A place that sets the pace amongst London boroughs on promoting environmental sustainability and where the natural environment forms the arteries and veins of the city</p>
<p><b>Caring:</b> A place noted for its safety, openness and community spirit where all people are welcome to live and work and where individuals and communities are supported to fulfil their potential and deliver solutions for themselves</p>

The We are Croydon Vision
<p><b>Enterprising:</b> A place renowned for its enterprise and innovation with a highly adaptable and skilled workforce and diverse and thriving local economy</p>
<p><b>Learning :</b> A place that unleashes and nurtures local talent, is recognised for its support and opportunity for lifelong learning and ambitions for children and young people</p>
<p><b>Creative:</b> A place that draws people to its culture and creativity – an inspiration and enabler of new artistic and sporting talent in the country</p>

## Croydon Local Plan's spatial vision

In 2036, we will be London's most enterprising borough - a city that fosters ideas, innovation and learning and provides skills, opportunity and a sense of belonging for all; an enterprising city, a Metropolitan Centre, a learning city, a creative city, a connected city, a sustainable city, and a caring city.

The historic legacy of Croydon as a major trading centre within the Wandle Valley and south of central London gives richness to its streets and public spaces. The 'sixties boom' added many buildings with a range of varied and interesting attributes. New development in our borough has been respectful of this historic legacy, including enhancement and intensification of Croydon's distinctive district centres and suburbs. Croydon's suburbs will have sustainably grown to accommodate homes, including affordable homes, to contribute to the borough's housing need.

Croydon Metropolitan Centre has a friendly atmosphere with a retail and commercial centre unrivalled south of the Thames serving the wider Gatwick Diamond economic area following the comprehensive redevelopment of the retail core. The scope for growth and new enterprises to locate is significant and the Council will be continuing to create an environment for inward investment. Large numbers of people use its shops, businesses, leisure and cultural facilities and enjoy returning to it with its compact and convenient arrangement of large stores, (including a choice of department stores), multiples and brand shops as an alternative to central London or out-of-town centres. Historic areas such as Surrey Street, Church Street and George Street, South End and the area around West Croydon station boast bijou, independent and culturally diverse shops, markets and restaurants, all within easy walking distance of North End and Wellesley Road. The cultural offer within Croydon Metropolitan Centre stems from the recently refurbished Fairfield Halls and links through to Exchange Square. The public realm is high quality and encourages outdoor life, vitality and cultural activity. Many existing office blocks have been refurbished, converted or redeveloped into homes and a new residential community now resides in the centre which boasts an environment that is family friendly. The Council will continue to take a flexible approach to offices in the Croydon Metropolitan Centre becoming residential, whilst not undermining the opportunity for economic growth and office development around East Croydon Station and in New Town.

Croydon's connectivity has continued as its main strength, being outer London's largest regional public transport interchange. Access to people, markets and goods, puts Croydon Metropolitan Centre at the top of the list of successful business centres. The upgrades to Brighton Mainline, rebuild of East Croydon station, the metroisation of the suburban services and continued investment into the Tram network have all assisted in retaining this status. The Square Mile and West End can be reached more quickly on public transport from Croydon than from most parts of east and west London. Croydon has the largest economy in the Wandle Valley and is the main business centre serving Gatwick Airport, supplying it with many of the people, skills and facilities it needs. Croydon's relations with both Central

London and the South Coast are stronger, providing an alternative, exciting place to do business, live and visit.

In 2036, the borough's District, Local, neighbourhood centres and local parades still possess their unique characteristics and support the growing communities they serve. The Council's regeneration, capital and public realm programmes will have enhanced the centres vitality and viability. Enterprise and leisure facilities in these areas contribute to diverse local economies. The economic growth of the borough has benefitted all sections of Croydon's community and access to work has been increased. The richness of character of Croydon's suburbs has been respectfully enhanced and intensified through demanding the best design from new development and having a deep understanding of the qualities places have for homes, open spaces, diversity, facilities and natural resources. Their easy access to the beautiful countryside of the North Downs is an important asset and a substantial factor in people's decision to live in the borough.

The borough has experienced an up lift in housing delivery to contribute to borough's pressing housing need and the opportunity for quality affordable housing in the borough has increased. This housing delivery has occurred in sustainable locations, is supported by the necessary infrastructure and the growth has supported the vitality and viability of the borough's centres.

The delivery of critical infrastructure, particularly in Croydon Opportunity Area, has been enabled by Croydon's Growth Zone status and the Council's willingness to embrace the opportunities presented by devolution to ensure delivery.

## Strategic Objectives

**3.4** The strategic objectives form the link between the spatial vision and the Croydon Local Plan. They are the objectives needed to fulfil the spatial vision.

### A Place of Opportunity

**Strategic Objective 1:** Establish Croydon as the premier business location in South London and the Gatwick Diamond.

**Strategic Objective 2:** Foster an environment where both existing, and new, innovative, cultural and creative enterprises can prosper.

**Strategic Objective 3:** Provide a choice of housing for people at all stages of life.

**Strategic Objective 4:** Reduce social, economic and environmental deprivation, particularly where it is spatially concentrated, by taking priority measures to reduce unemployment, improve skills and education and renew housing, community and environmental conditions.

### A Place to Belong

**Strategic Objective 5:** Ensure that high quality new development both integrates, respects and enhances the borough's natural environment and built heritage.

**Strategic Objective 6:** Provide and promote well designed emergency services, community, education, health and leisure facilities to meet the aspirations and needs of a diverse community.

**Strategic Objective 7:** Conserve and create spaces and buildings that foster safe, healthy and cohesive communities.

### A Place with a Sustainable Future

**Strategic Objective 8:** Improve accessibility, connectivity, sustainability and ease of movement to, from and within the borough.

**Strategic Objective 9:** Ensure the responsible use of land and natural resources and management of waste to mitigate and adapt to climate change.

**Strategic Objective 10:** Improve the quality and accessibility of green space and nature, whilst protecting and enhancing biodiversity.

**Strategic Objective 11:** Tackle flood risk by making space for water, and utilising sustainable urban drainage systems.

# A Place of Opportunity

The content of this section is related to the theme of Croydon as 'A Place of Opportunity'. It adds further detail to the Croydon Local Plan: Strategic Policies on planning for homes and employment.

## 4. Homes

Housing choice for sustainable communities

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 3
- Strategic Objective 7
- Policy SP2.1
- Policy SP2.5

- Policy SP2.6
- Policy SP4.1

### Unitary Development Plan policies to be replaced by this policy

- H7 Conversions
- H11 Retaining Small Houses

### Why we need this policy

**4.1** The Council seeks the provision of a mix and range of housing as set out in Strategic Policy SP2.5 of the Croydon Local Plan and it is also the aim of Strategic Objective 3. This will assist in building sustainable communities, in line with paragraph 50 of the National Planning Policy Framework.

**4.2** In line with Strategic Objective 7, residential development should set out to achieve healthy and liveable communities to support the health and wellbeing of residents.

**4.3** The need for larger homes in Croydon was identified in the Croydon Strategic Housing Market Assessment (SHMA) 2015. Croydon has large numbers of households that are overcrowded. Meanwhile there is also a growth in single person households which is driving the requirement for smaller homes

**4.4** Three bedroom residential units are needed to house families and the existing stock retained to assist provision. The London Plan defines family housing as 'generally having three or more bedrooms'. In line with London Plan Policy 3.14 the retention of residential units originally designed with three or more bedrooms is supported by the Council.

**4.5** Croydon's Strategic Housing Market Assessment identified the need for 42,930 new homes to be built between 2016 and 2036. The strategic policy requirement is for 31,850 new homes to be built in the same period, making more efficient use of housing stock a necessity including sub-divisions, conversions and change of use to residential.

**4.6** The Strategic Housing Market Assessment 2015 identifies that 50% of the future requirement for market housing is for larger homes. The Strategic Housing Land Availability Assessment has identified that whilst projections of future housing requirements are rising, levels of building have fallen. Existing three bed residential units should therefore be retained and any conversions should ensure that there is no loss of three bed homes.

**4.7** Within the Croydon Opportunity Area the Croydon Housing Typologies Study has found that the strongest opportunities for homes suitable for families will be associated with the lower and moderate density sites in the Croydon Metropolitan Centre (including the inner residential area in the Croydon Opportunity Area<sup>2</sup>). It indicates that there will be more opportunities for studio, one and two bedroom units on the higher density sites in the Croydon Metropolitan Centre.

---

<sup>2</sup> Paragraph 9.12 of the Croydon Opportunity Area Planning Framework Jan 2013

Policy DM1: Housing choice for sustainable communities

The Council will seek to enable housing choice for sustainable communities by:

- a) Requiring the minimum provision of homes designed with 3 or more bedrooms on sites of 10 or more dwellings as shown in Table 4.1;  
and
- b) Permitting the redevelopment of the residential units where it does not result in the net loss of 3 bedroom homes (as originally built) or the loss of homes smaller than 130m<sup>2</sup>.

**Table 4.1 Minimum percentage of three bedroom or larger units on sites with ten or more dwellings**

Setting <sup>3</sup>	PTAL <sup>4</sup> of 0, 1a, 1b, 2 or 3	PTAL of 4, 5, 6a or 6b
Suburban – areas with predominantly lower density development such as, for example, detached and semi-detached houses, predominantly residential, small building footprints and typically 2 to 3 storeys	70%	60%
Urban – areas with predominantly dense development such as, for example, terraced houses, mansion blocks, a mix of different uses, medium building footprints and typically buildings of 2 to 4 storeys, located within 800 metres walking distance of a District Centre or along main arterial routes	60%	40%
Central – areas with very dense development, a mix of different uses, large building footprints and typically buildings of 4 to 6 storeys, located within 800 metres walking distance of Croydon Metropolitan Centre	This location does not exist in Croydon	20% (minimum of 5% in Retail Core area of Croydon Opportunity Area and 10% in 'New Town' and East Croydon as defined by the Croydon Opportunity Area Planning Framework)

<sup>3</sup> The definition of each setting is the same as that in the London Plan, Table 3.2.

<sup>4</sup> Public Transport Accessibility Level – a rating of accessibility provided by Transport for London. A site with a lower PTAL than the surrounding sites and adjoining streets shall be considered at the higher PTAL.

## How the policy works

**4.8** This policy applies to both market and affordable housing, whether the homes are new build or conversions.

**4.9** To meet the need for three bedroom homes the Council will require a minimum proportion of homes to have three bedrooms or more. London Plan Policy 3.4 Optimising Housing Potential provides the basis of Table 4.1 and the definitions of Suburban, Urban and Central, and relating new development to access to the public transport network.

**4.10** The proportion of homes to have three bedrooms will vary across the borough based on existing character and public transport accessibility and is based upon the London Plan's density matrix<sup>5</sup>. The approach recognises that more central locations with higher density development will not be so compatible for accommodating larger units. The Council's housing allocations scheme gives more priority to households that are working and the use of local letting schemes and the level of housing need will help to balance any issues arising regarding the viability of providing family homes.

**4.11** The Strategic Housing Market Assessment 2015 identifies a difference in the size of housing required between tenures with affordable housing requirement for a greater proportion of smaller homes (particularly one bedroom homes) than market homes.<sup>6</sup> If there is agreement between the Council and an affordable housing provider that it is neither viable nor is there need or demand for larger affordable units on a particular site then the

Council may consider a reduced provision of affordable homes with three or more bedrooms.

**4.12** The Croydon Opportunity Area Planning Framework identifies percentages for levels of three bed housing in six 'character areas' in the Croydon Opportunity Area which are reflected in this policy.

**4.13** It is recognised that the development market will need time to adjust to providing the quantum of larger family homes of three bedrooms or more in line with this policy to meet the identified need in the borough. In the early years of the Plan, it may therefore be acceptable for an element of the requirement for larger homes to be provided in the form of two bedroom four person homes, with a minimum floor area as defined by the Technical Housing Standards nationally described space standard and the Mayor's Housing Supplementary Planning Guidance or equivalent. The exact proportion of two bedroom four person units that will be acceptable in lieu of the larger family homes will be agreed on a site by site basis taking into account evidence of the impact on viability and sales. The viability assessment needs to demonstrate that the percentage of three bedroom homes would not be viable.

**4.14** This policy is also intended to ensure that the conversion of single family houses into flats does not further reduce provision of three bedroom homes. Any dwelling house with a gross internal floor area of less than 130m<sup>2</sup> cannot be redeveloped, demolished or sub divided, that would result in the loss of this type of property.

**4.15** The gross original internal floor area does not include general storage areas such as lofts, cellars, fuel stores, garages or conservatory type structures. Parts of rooms with ceilings less than 1.5 metres are excluded unless used solely for storage. The

---

<sup>5</sup> London Plan Policy 3.4

<sup>6</sup> Table 34, para 9.22, Fig.68 Strategic Housing Market Assessment, June 2015

calculation of the Gross Internal Area must comply with the National Technical Housing Standards or equivalent 2015.

- Policy 7.4

### Unitary Development Plan policies to be replaced by this policy

- H5 Back Land and Back Garden Development

### Why we need this policy

**4.16** One of the core planning principles set out in the National Planning Policy Framework encourages the effective use of land by reusing land that has previously been developed (brownfield land), provided that it is not of high environmental value. This policy seeks to resist inappropriate development in residential gardens where it would cause harm to the local area in accordance with paragraph 53 of the Framework. The policy aligns with the Local Plan's Strategic Objective 5 ensuring new development integrates, respects and enhances the borough's natural environment and built heritage.

**4.17** The London Plan, Policy 3.5, states that boroughs may introduce a presumption against development on back gardens or other private residential gardens where this can be locally justified. In addition to this, the London Plan also states that new

development, including that on garden land should avoid having an adverse impact on sites of European importance for nature conservation.

**4.18** Poorly planned piecemeal development of garden land can have significant negative impacts on local biodiversity, amenity, and character. It can also result in noise and visual intrusion into neighbouring property, interrupt predominant building lines along streets and weaken the predominant built form and architecture. In landscape terms it can also result in weakened landscape character with loss of trees, including street trees, to make way for new access roads.

**4.19** The Borough Character Appraisal and the Character Typology identify the predominant type of building form and range of plot sizes for different residential forms. The Typology shows that nine per cent of the borough area is made up of buildings and

thirty five percent occupied by residential garden space. Overall, sixty percent of the borough is made up of residential garden space, recreational space and woodland.

#### Policy DM2: Protecting back garden land

Proposals for residential buildings within the rear garden of an existing dwelling will be permitted where:

- a) It would complement the surrounding character of the area and each new building must be subservient to the original dwelling;
- b) A minimum length of 10m and no less than  $\frac{1}{2}$  or 200m<sup>2</sup> (whichever is the smaller) of the existing garden area is retained for the host property, after the subdivision of the garden; and
- c) There would not be a detrimental impact on existing and future occupants in terms of overlooking and outlook.

#### How the policy works

**4.20** Proposed new developments need to ensure that existing infrastructure has the capacity to support additional people living in the area in order to deliver sustainable communities in line with the National Planning Policy Framework.

**4.21** The need to deliver 31,850 homes does not outweigh the need to respect the local character, and amenity and to protect biodiversity.

**4.22** The Mayor of London's Housing Supplementary Planning Guidance (2016) states that, alongside new build provision and turnover within the existing housing stock, extensions to existing homes and sensitive renewal and intensification of existing residential areas is likely to play an important role in meeting demand for larger properties in the capital, helping to address overcrowding and affordability issues.

**4.23** The Mayor of London's Housing Supplementary Planning Guidance March 2016 provides guidance on private garden land development (paragraph 1.2.44) and the implementation of London Plan Policy 3.5 Quality and Design of Housing Developments. It advises boroughs and developers of the strategic and local aspects and objectives when considering development of gardens and to strike a balance between these and other objectives when seeking to optimise housing provision on a particular site.

**4.24** Designers should consider the position and aspect of habitable rooms, gardens and balconies, and avoid windows facing each other where privacy distances are tight. Planning guidance has, in the past, been concerned with achieving visual separation between dwellings by setting a minimum distance of 18-21m between facing homes (between habitable room and habitable room as opposed to between balconies or terraces or between habitable rooms and balconies/terrace). These can still be useful yardsticks for visual privacy, but adhering rigidly to these measures can limit the variety of urban spaces and housing types

and can sometimes unnecessarily restrict density. The design of the new building and the access road from the existing highway to the new development must consider the impact on the street scene and reference should be made to Policy DM11: on Design and Character and its supporting text in paragraphs 6.28 and 6.29.

**4.25** Proposals for development in rear gardens should be subservient to the original dwelling, should not be visible from the public highway or dominate the existing plot. New development should be of a reduced scale when compared to the host dwelling. Account should be taken of the Borough Character Appraisal.

**4.26** It is likely that rear gardens will need to be at least 200m<sup>2</sup> long in order to accommodate this type of development and be considered acceptable in terms of character.

**4.27** Policy DM11.8 on landscape and Policy DM29: Trees should be referred to with regards to the protection of existing trees and vegetation in gardens. British Standard 5837, 2012 or equivalent, should be referred to with regard to the protection of existing trees in relation to design, demolition and construction.

**4.28** Gardens are important sources of vegetation and open space for wildlife. They also provide the opportunity to grow food and benefit public health through exercise. Housing in parts of Croydon have long gardens with mature planting which may be part of wildlife corridors or adjoin local open space in the borough and provide valuable habitats. It is important that any proposed development ensures the retention of habitats or wildlife corridors' ecological value.

**4.29** Development should accord with the provisions set out in DM26 Biodiversity. The Council may require an ecology report to be submitted as part of a planning application for development

within the curtilage of a dwelling. The applicant will be required to pay for an independent assessment to be carried out on behalf of the local authority.

**4.30** Croydon Local Plan: Strategic Policy SP6.3 Sustainable Design and Construction requires that new-build development complies with the National Technical Housing Standards (2015) and London Plan requirements or equivalent.

**4.31** The conversion of an outbuilding to a self-contained unit is development that requires planning permission. If the outbuilding is required for a purpose incidental to the enjoyment of the dwelling house, then, subject to compliance with the other requirements of the legislation, it would be permitted development under Schedule 2, Part 1 Class E of the Town and Country Planning (General Permitted Development) (Amendment) (England) Order 2015. Development is not permitted by Class E if the total area of ground covered by buildings, enclosures and containers within the curtilage would exceed 50% of the total area of the curtilage.

## Residential care and nursing homes

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 3
- Strategic Objective 5
- Strategic Objective 7

- Policy SP2
- Policy SP5

### Unitary Development Plan policies to be replaced

- H12 Residential Care Homes

### Why we need this policy

**4.32** The Council seeks the provision of a mix and range of housing as set out in Strategic Policy SP2.5 of the Croydon Local Plan and it is also the aim of Strategic Objective 3. This will assist in building sustainable communities, in line with paragraph 50 of the National Planning Policy Framework.

**4.33** In line with Strategic Objective 7, residential development should set out to achieve healthy and liveable communities to support the health and wellbeing of residents.

**4.34** Croydon has a very high number of nursing and residential care homes compared to other London boroughs. Analysis of changing needs for services supplied by the nursing and residential care home market evidences a 'saturation point' has been reached for some customer groups or categories of people in need. At the same time there is a greater public policy focus on supporting people to remain living at home safely whenever

possible. It is therefore necessary that Croydon plans to enable it to supply care provision to meet current and future needs of Croydon residents. A change in policy ensures:

- a) Croydon's planning policy supports its commissioning intentions;
- b) The Council has first-hand knowledge of the services operating in the borough as required by the Care Act 2014; and
- c) The provision is in alignment with emerging care needs.

**4.35** Croydon experiences a range of challenges arising from the significant number of nursing and residential care homes that continue to be sited in the borough. These challenges include excess demand on a range of local health and social care services which is not reflected in national funding formulae for central Government funding towards local services.

**4.36** As of September 2015 the 142 care homes in Croydon have a total capacity of 2,796 bed spaces. Between April 2014 and November 2014, 761 of those bed spaces were occupied by people placed by Croydon Council and Croydon Care Commissioning Group (the grouping of GPs in Croydon that provides primary health care services in the borough). It was estimated that between 1,000 and 1,150 bed spaces were occupied by self-funders. The remainder of the bed spaces were either vacant or occupied by people placed from outside of Croydon. This has an adverse impact on the provision of health services in Croydon.

**4.37** Services provided by care homes within the borough do not fully meet the needs of Croydon residents with more specialised or urgent needs. As a consequence between April and November 2014, 382 people were placed in nursing and residential care homes outside the borough. This is an undesirable outcome because vulnerable people risk losing their natural family and community support networks when placed at distance from Croydon.

#### Policy DM3: Residential care and nursing homes

**DM3.1** Planning permission for new residential care or nursing homes will only be granted if there is a need for the particular services provided by the home in supporting with the care of residents of Croydon.

**DM3.2** Proposals for supported living and sheltered accommodation will generally be supported in the borough.

#### How the policy works

**4.41** Where there is an identified demand for residential care and nursing home bed spaces, the Council will support provision of this type of housing. This policy seeks to meet this need, however does not support an over-provision of care and nursing

**4.38** Croydon has produced a Market Position Statement (2015) to ascertain the level of future need. As need changes, it is projected that 1,118 beds spaces will be needed by 2020 and 1,450 by 2030 across learning disability, mental health, older people and physical disability services, to meet the increased complex and dual care needs of people placed by the Council or the Croydon Care Commissioning Group.

**4.39** The National Planning Policy Framework (paragraph 50) states that local planning authorities should plan for a mix of housing based on current and future demographic trends, market trends and the needs of different groups in the community.

**4.40** In accordance with the London Plan, the need for this type of accommodation has been identified taking into account the indicative requirement benchmarks set out in Annex A5: Specialist housing for older people.

home bed spaces. This is the preferred approach as set out in the care home forecast.

**4.42** The Care Act 2014 places a duty on all local authorities to meet the need for residential care and nursing home bed spaces within their own area. The policy accords with Annex Five: Specialist Housing for Older People of the London Plan.

**4.43** According to Croydon's Market Position Statement there are ample care and nursing home bed spaces within the borough to satisfy demand up to 2031. The policy therefore seeks to address the current over-provision and supply this type of accommodation only where there is an identified need.

**4.44** Croydon's Market Position Statement will be used to assess applications for new residential care and nursing homes to determine whether there is a need.

**4.45** Proposals for supporting living will generally be supported in accordance with Annex A5: Specialist Housing for older people of the London Plan.

**4.46** This policy does not apply to accommodation for children (under the age of eighteen).

**4.47** It is considered preferable that people within the borough that require care are cared for within their community, close to their networks of friends and family.

## Vacant building credit

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 3

- Policy SP2

### Unitary Development Plan policies to be replaced

- None

### Why we need this policy

**4.48** A Ministerial Statement on 28<sup>th</sup> November 2014 introduced a vacant building credit for developers of vacant buildings such that a reduced provision of affordable housing should be required. This vacant building credit only applies to buildings which have not been made intentionally vacant in order to redevelop them and to sites which do not have an extant or recently expired permission for the same or similar development. A policy is required to set out

how it will be determined that a building has not been made intentionally vacant, to define a same or similar development and a recently expired permission.

**4.49** The Mayor of London's Draft Interim Housing SPG encouraged boroughs to have policies in their local plans that set out the criteria for how the vacant building credit will be applied. In particular it suggests minimum vacancy periods and marketing requirements should be set.

### Policy DM4: Vacant building credit

**DM4.1** The Council will promote the re-use or redevelopment of existing buildings by applying a vacant building credit such that affordable housing requirements will only apply to the net increase in floor space resultant from development of buildings which have been:

- a) Vacant for a period of at least eighteen months prior to the granting of planning permission; and
- b) Marketed for their lawful use (or uses which could be lawful under the General Permitted Development Order) throughout the period they have been vacant.

**DM4.2** Vacant building credit will not be applied to development proposals for schemes which are the same as or similar to an extant or recently expired planning permission where:

- a) A similar planning permission is one in which the resident and non-residential floor space are each less than 25% greater than and the

residential floor space is more than half that of the existing or recently expired permission; and

b) A recently expired permission is one that lapsed within the previous two years prior to the granting of consent of the new planning permission.

### **How the policy works**

**4.50** The policy should ensure that only genuinely vacant buildings benefit from the vacant building credit and thus encourage their return to use.

**4.51** Buildings that have been made intentionally vacant, including those made redundant through estate rationalisation will not benefit from the vacant building credit.

**4.52** Vacant building credit does not apply to abandoned buildings. There is no planning definition of abandoned buildings; however an abandoned building cannot be marketed.

**4.53** The threshold for a similar proposal is set to prevent applications for developments with marginal increases or decreases in floor space, or changes of use or reduction in size of non-residential floor space avoiding providing needed affordable housing.

**4.54** Likewise a two year period as the definition of a recently expired permission is set to provide a disincentive to simply let existing permission expire so that vacant building credit can be applied for thus reducing the amount of affordable housing provided.

**4.55** Where vacant building credit is applicable to a development proposal the full affordable housing requirements set by Policy SP2.4 of the Croydon Local Plan will apply to the net increase in

floor space. This means that the Council will negotiate for 50% of the net increase in floor space to be for affordable housing and the current minimum requirements will apply in full. The Council will expect overall scheme viability to improve with the application of vacant building credit and this will be reflected in negotiations around any planning obligations including affordable housing.

**4.56** The Council will not entertain the resubmission of planning applications in order to benefit from vacant building credit where there is no material change from a scheme with an extant planning permission. Neither will the Council renegotiate existing signed Section 106 agreements to take into account vacant building credit if there is no other material change in circumstances warranting a review of planning obligations for a development.

# 5. Employment

Development in Croydon Metropolitan Centre, District and Local Centres

## Strategic Objectives and related Croydon Local Plan strategic policies

- Policy SP3.6
- Policy SP3.7
- Policy SP3.8
- Policy SP3.9
- Policy SP3.10

- Policy SP3.11
- Policy SP3.12
- Policy SP3.13

## Unitary Development Plan policies to be replaced by this policy

- SH3 Control of Retail Units outside Primary Shopping Areas
- SH4 Retail Vitality within Main Retail Frontages and Shopping Area Frontages

- SH5 Retail Vitality within Secondary Retail Frontages

## Why we need this policy

5.1 Retailing is at the heart of the borough's town centres. However, they are also places where a wide range of other uses help to ensure vitality and viability is maintained. This policy sets out the approach to uses by location within a centre. For this purpose it sets the following designations:

- a) Boundaries of the Croydon Metropolitan Centre, District and Local Centres (the borough's town centres);
- b) Primary Shopping Areas;
- c) Main Retail Frontages; and
- d) Secondary Retail Frontages.

**5.2** These boundaries have been reviewed during the preparation of this Plan to ensure they meet the needs of the borough. The review has been supported by an Assessment of boundaries and designations for Croydon Metropolitan Centre, District and Local Centres including analysis of mixed use developments (2012 and 2015) and a Review of Town Centre Designations (2013).

**5.3** London Plan policy 2.15 identifies a range of measures boroughs should undertake in relation to town centres, including setting out policies for each type of area within centres.

**5.4** Paragraph 23 of the National Planning Policy Framework states 'Planning policies should be positive, promote competitive town centre environments and set out policies for the management and growth of centres over the plan period'.

**Policy DM5: Development in Croydon Metropolitan Centre, District and Local Centres**

**DM5.1** The Council will ensure that the vitality and viability of Croydon Metropolitan Centre and the borough's District and Local Centres is maintained and increased by not permitting new developments or changes of use which would result in a net loss of ground floor<sup>7</sup> Class A uses within Main Retail Frontages (unless it relates to the expansion of an existing community use).

**DM5.2** Within Croydon Metropolitan Centre and the borough's District and Local Centres development proposals and changes of use on the ground floor must accord with Table 5.1.

**DM5.3** Outside of Main and Secondary Retail Frontages, but within centres, proposals for mixed use developments will be required to either:

- a) Demonstrate that a specific end user will be occupying the ground floor unit upon completion; or
- b) Provide a free fitting out of all ground floor units for the eventual end occupier to ensure that the unit is capable of occupation and operation by the end user and ensure that the ground floor units are capable of conversion to the same use as the remainder of the building if after two years, subsequent to completion, no end user has been found for the ground floor unit.

**Table 5.1 New development proposals and changes of use in Croydon Metropolitan Centre and District and Local Centres**

Part of the town centre	Use	Expansion of existing uses or newly proposed uses
Main Retail Frontage	A1	Acceptable in principle
	A2 – A4	Acceptable in principle as long as it does not result in more than 60% of the ground floor of units falling outside the A1 Use Class

<sup>7</sup> For the purposes of this policy all floors within purpose built shopping centres are considered to be ground floors.

Part of the town centre	Use	Expansion of existing uses or newly proposed uses
	A5	Acceptable in principle as long as it does not result in more than 60% of the ground floor of units falling outside the A1 Use Class and does not result in two or more adjoining A5 units
	All Other Uses	All changes of use to a non Class A ground floor space within Main Retail Frontages will be refused. Expansions of existing non Class A uses will be refused unless it relates to a Community Use.
Secondary Retail Frontage	A1 – A4 and Community Uses	Acceptable in principle with a ground floor limit on Community Uses in these locations of 250m <sup>2</sup> (gross)
	A5	Acceptable in principle as long as it does not result in two or more adjoining A5 units at ground floor
	B1	Acceptable in principle as long as it results in an active frontage and does not undermine the retail function of the frontage
	All Other Uses	Unless it relates to a Community Use proposals involving an increase of existing non A Class ground floor space within Secondary Retail Frontage will be refused
Outside a Frontage but within Primary Shopping Area	All Uses	Acceptable in principle subject to the requirements of Policy DM5.3
Rest of Centre	A1	See .Policy DM9: Development in edge of centre and out of centre locations
	All Other Uses	Acceptable in principle subject to the requirements of Policy DM5.3

### Proposed amendments to the Policies Map

designations of the same name in the Unitary Development Plan<sup>8</sup>.

Each of the designations set by this policy are shown on the Policies Map. These designations are generally the same as the

However there are a number of proposed amendments to the boundaries.

Table 5.2 Amendments to designations (see *The draft Policies Map* for full details)

Centre	Boundary of Centre	Primary Shopping Area	Main Retail Frontage	Secondary Retail Frontage
Croydon Metropolitan Centre		✓	✓	✓
<b>District Centres</b>				
Addiscombe	✓	✓		✓
Crystal Palace (formerly Upper Norwood)		✓		✓
Norbury (preferred option)	✓		✓	✓
Norbury (alternative option)	✓		✓	✓
Purley	✓		✓	
Selsdon	✓	✓	✓	✓
South Norwood	✓	✓		✓

<sup>8</sup> The Croydon Local Plan: Strategic Policies altered the designation of Coulsdon, Norbury, Purley and Thornton Heath Town Centres and Addiscombe Local Centre to District Centres with no boundary changes.

Centre	Boundary of Centre	Primary Shopping Area	Main Retail Frontage	Secondary Retail Frontage
Thornton Heath	✓	✓	✓	✓
<b>Local Centres</b>				
Beulah Road <sup>9</sup>	✓	✓	✓	✓
Brighton Road (Sanderstead Road)	✓	✓	✓	✓
Brighton Road (Selsdon Road)	✓	✓		
Broad Green	✓	✓	✓	✓
Pollards Hill	✓	✓	✓	
Shirley	✓	✓	✓	
Thornton Heath Pond	✓	✓		✓

### How the policy works

**5.5** In part, this policy sets thresholds for uses within the Main and Secondary Retail Frontages. For the purposes of calculating the percentage of units within a given frontage, the Council will apply the rule of seven units either side of the subject property and an equal number of units on the opposite side of the road (if the frontage designation extends there also). Further guidance on this point is available in Appendix 2. This policy limits the saturation of

<sup>9</sup> Beulah Road is proposed as a new Local Centre

A5 uses as the associated waste and delivery issues can cause harm to residential amenity. The clustering of hot-food takeaways can have an adverse impact on the vitality and viability of town centres, therefore limiting hot-food takeaways will help to ensure residents have a greater choice of retail services.

**5.6** Studies have identified that one in three children is overweight or obese by the time they leave primary school and in 2014, an estimated 62% of the adult population were overweight or obese<sup>10</sup>. Croydon was selected as a pilot for the Mayor of London's Food Flagship program and one of the aims of the program is to improve the quality of food available to schools and communities. Limiting the number of hot food takeaways in the borough's town centres will support the public health agenda of tackling obesity and associated health problems and will promote access to healthier food options.

**5.7** Proposals for B1 uses will be supported in Secondary Retail Frontages to create opportunities for office, research & redevelopment and light industrial workshops within town centres. However, these uses should not undermine the retail function of the frontages and will be only permitted if they provide an active frontage.

**5.8** The reason why 250m<sup>2</sup> is the threshold for community uses within Secondary Retail Frontages in Croydon Metropolitan Centre and District and Local Centres is that it would allow uses such as dentist surgeries and a High Street police office to operate but would deter larger scale activities from potentially undermining the A Use Class focus of these locations.

---

<sup>10</sup> Building the foundations: Tackling obesity through planning and development (Town and Country Planning Association, March 2016)

**5.9** Across the borough there are many examples of mixed use developments in town centres but outside of Main and Secondary Retail Frontages where the ground floor units have been left as an empty shell. The costs of fitting out these units to a standard that allows them to be used for their intended purpose can be prohibitive and the resultant boarded up units harm the vitality of the centre. To avoid this all mixed use developments within a town centre but outside of a designated frontage will be required to have either an end user for the unit (evidenced by a pre-let agreement or by the applicant being the end user) at the time of granting permission or to provide a free fitting out of the unit for the first occupier.

**5.10** All speculative schemes in town centres but outside of Main and Secondary Retail Frontages will also be required to be designed in a way that would allow conversion of the ground floor unit to residential or the same use as the remainder of the building if not residential. In some cases the Council may enter a legal agreement with the applicant to ensure that the ground floor unit is let and if not then converted to the same use as the remainder of the building.

**5.11** For the purposes of Part 3 Class M of the General Permitted Development Order (2015), which sets out the circumstances where planning permission is not required for changes of use from retail to residential use, Main Retail Frontages and Secondary Retail Frontages are considered to be key shopping areas. In these locations any change of use from a retail use to residential will require an application to be made for planning permission which will be considered against the requirements of this policy.

## Development in Neighbourhood Centres

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 6
- Strategic Objective 7
- Policy SP4.9
- Policy SP5.3

- Policy SP5.4
- Policy SP5.5
- Policy SP5.6
- Policy SP5.7

### Unitary Development Plan policies to be replaced

- None

### Why we need this policy

**5.12** The Council seeks to provide a range of services and community facilities to contribute to its aim of creating healthy and liveable neighbourhoods as set out in the Croydon Local Plan Strategic Policy SP5.3 and Strategic Objectives 5, 6 and 7. This will help in promoting healthy communities in line with paragraphs 69 and 70 of the National Planning Policy Framework.

**5.13** In appropriate areas, the Council will seek to promote development of community facilities that will serve a neighbourhood demand for these uses.

**5.14** Community facilities are defined in the Croydon Local Plan: Strategic Policies as facilities providing for the health and

wellbeing, social, educational, spiritual, recreational, leisure and cultural needs of the community.

**5.15** Neighbourhood Centres are not intended to compete with designated District or Local Centres, and should serve a local need smaller in scale to that of a Local Centre. They should be able to meet the day-to-day needs of the local community and allow for modest growth in order to accommodate local needs.

**5.16** Typically more limited in retail offer to Local or District Centres, Neighbourhood Centres may contain a place of worship, playground, school, public house, GP and pharmacy.

**5.17** Neighbourhood Centres serve the whole community, but are particularly important to those who do not have access to a car, are unable to travel far or those with a disability.

**5.18** The London Plan states that boroughs should identify and promote the complementary offers of the other smaller centres in the network including neighbourhood centres and local shopping parades. These play a key role in meeting 'walk to', everyday needs and are often the core of local 'Lifetime' neighbourhoods.

**5.19** Neighbourhood Centres typically serve a localised catchment often most accessible by walking and cycling and include local parades and small clusters of shops, mostly for convenience goods and other services. They may include a small supermarket, sub-post office, pharmacy, launderette and other useful local services. They can play a key role in addressing areas deficient in local retail and other services.

**5.20** The London Plan sets out its ambitions to plan for a range of social infrastructure required for London's communities and neighbourhoods to support a high and improving quality of life. It supports a city of diverse, strong, secure and accessible neighbourhoods and seeks to ensure that neighbourhoods provide convenient access, especially by foot, to local goods and services needed on a day to day basis. . Local neighbourhoods should act as a focal point for local communities and enhance their overall attractiveness.

**5.21** Surplus commercial capacity should be identified and brought forward to meet housing and local community needs, recognising that this process should contribute to strengthening the 'offer' of the Centre as a whole.

**5.22** The London Plan advocates a light touch approach regarding neighbourhood centres in order to sustain and improve

their convenience offer while supporting redevelopment of surplus units for housing.

**5.23** The Urban Design Compendium notes that 'local facilities bring residents together, reinforce community and discourage car use'. Furthermore, it states that newsagents should be within a five minute walk, and local shops, health centres and other services which serve a local need, should be a ten minute walk. This approach is also considered appropriate in Shaping Neighbourhoods: A Guide for Health, Sustainability and Vitality.

## Policy DM6: Development in Neighbourhood Centres

**DM6.1** The Council will ensure that the vitality and viability of Neighbourhood Centres are maintained and enhanced and that they continue to provide a level of service of neighbourhood significance.

**DM6.2** In the vicinity of Neighbourhood Centres, development proposals must:

- a) Accord with Table 5.3; and
- b) Demonstrably relate to the Neighbourhood Centre, be in scale and be within reasonable walking distance to other retail and community uses within the centre.

**Table 5.3 New development proposals and changes of use in the vicinity of Neighbourhood Centres**

Part of Neighbourhood Centre	Use	Expansion of existing units or newly proposed units
Within a Shopping Parade	All	See .Policy DM7: Development in Shopping Parades
Outside of a Shopping Parade	A1 – A4, B1 and town centre community uses	Acceptable in principle with a limit of floor space of 280m <sup>2</sup> (net)
	All other community uses	Acceptable in principle
	C3	Acceptable in principle
	All other uses (including A1 – A4, B1 and town centre uses with more than 280m <sup>2</sup> (net) floor space)	Not acceptable

### Proposed amendments to the Policies Map

In all instances the Neighbourhood Centres that have been identified do not appear in the Unitary Development Plan. The proposed Neighbourhood Centres are listed in Table 5.4 below. The proposed location of each Neighbourhood Centre can be found on the draft Policies Map.

**Table 5.4 Proposed Neighbourhood Centres (see *The draft Policies Map* for full details)**

Neighbourhood Centre	New
Ashburton Park	✓
Brighton Road/Downlands Road	✓
Brigstock Road	✓
Coulsdon Road/Court Avenue	✓

Neighbourhood Centre	New
Fieldway	✓
Green Lane/Northwood Road	✓
Kenley (Godstone Road)	✓
London Road/Kidderminster Road	✓
Lower Addiscombe Road/Cherry Orchard Road	✓
Portland Road/Watcombe Road/Woodside Avenue	✓
Selhurst Road	✓
Selsdon Park Road/Featherbed Lane	✓
Shirley Road	✓
South End/Parker Road/St Peter's Church	✓
South Norwood Hill	✓
Spring Park/Bridle Road	✓
Waddon Road/Abbey Road	✓
Woodside Green	✓

### How the policy works

**5.24** This approach is the preferred approach as it assists in promoting the development of community facilities to serve neighbourhood areas and complies with the National Planning Policy Framework and the London Plan.

**5.25** Neighbourhood Centres are not town centres (unlike District and Local Centres). Thresholds are applied to specific uses within Neighbourhood Centres to ensure that proposed developments only serve a neighbourhood need and should not be to the detriment of designated Local or District Centres whilst

enabling development of town centre uses that serve the local community.

**5.26** This policy seeks to ensure that flexibility is granted to community facilities that wish to locate in Neighbourhood Centres in order to serve a local identified need.

**5.27** Within Neighbourhood Centres, development proposals for A1 – A5 uses, B1 uses and community facilities should be of a reasonable scale proportionate to serve a neighbourhood need and have a clear relationship to other facilities within the centre.

**5.28** Development of A1 – A5 uses, B1 uses and community facilities should not have a detrimental impact on neighbouring amenity or traffic safety.

**5.29** Proposals for A1 – A5 uses, B1 uses and community facilities should be within a five or ten minute walk from the centre, have a clear visual relationship to the centre and should not be disconnected from the centre by physical barriers. Further guidance is available in Appendix 4.

**5.30** Neighbourhood Centres typically serve their immediate residential properties, and as such a five to ten minute walk is considered an appropriate distance.

**5.31** The Council will not permit the development or expansion of retail or commercial premises that would significantly increase the 'offer' of the Neighbourhood Centre to the detriment of a Local or District Centre. For this reason, development of retail and town centre community uses with a floor space above 280m<sup>2</sup> will still be subject to a sequential test in accordance with Policy DM9: Development in edge of centre and out of centre locations.

**5.32** For the purposes of Part 3 Class M of the General Permitted Development Order (2015), which sets out the circumstances where planning permission is not required for changes of use from retail to residential use, designated Shopping Parades within Neighbourhood Centres are considered to be key shopping areas. In these locations any change of use from a retail use to residential will require an application to be made for planning permission which will be considered against the requirements of this policy which would not allow for the conversion.

## Development in Shopping Parades

### Strategic Objectives and related Croydon Local Plan strategic policies

- Policy SP3.6
- Policy SP3.7
- Policy SP3.8
- Policy SP3.9

- Policy SP3.10
- Policy SP3.11
- Policy SP3.12
- Policy SP3.13

### Unitary Development Plan policies to be replaced by this policy

- SH6 Retail Vitality within Shopping Parades

### Why we need this policy

**5.33** The primary function of Shopping Parades is to provide local convenience shopping facilities. This policy sets out the policy approach to different uses within Shopping Parades and also designates each Shopping Parade in the borough.

**5.34** In relation to drawing up Local Plans, paragraph 23 of the National Planning Policy Framework states that local planning authorities should 'set policies for the consideration of proposals

### Policy DM7: Development in Shopping Parades

The Council will ensure that the vitality and viability of the borough's Shopping Parades is maintained and increased and that they continue to serve local communities by ensuring new development proposals and changes of use on the ground floor are in accordance with Table 5.5.

for main town centre uses which cannot be accommodated in or adjacent to town centres'.

**5.35** A review of all retail units outside any town centre or Shopping Parade based on the Croydon Monitoring Report 2014/15 has identified that there are a number of locations in the borough that could benefit from designation as a Shopping Parade.

**Table 5.5 New development proposals and changes of use in Shopping Parades**

Use	Expansion of existing uses or newly proposed uses
A1	Changes of use or proposals which do not result in an increase in floor space of the overall Parade are acceptable in principle. Other development will be subject to the provisions of Policy DM9: Development in edge of centre and out of centre locations.
A2 – A4 and Community Uses	Acceptable in principle as long as it does not result in more than 50% of the ground floor of units (within the entirety of the Parade) falling outside the A1 Use Class
A5	Not acceptable
B1 (Change of use only)	Changes of use to office, research & development and light industrial workshops are acceptable in principle as long as it does not result in more than 50% of the ground floor of units (within the entirety of the Parade) falling outside the A1 Use Class and provides an active frontage.
All Other Uses (including new development of B1)	Unless it relates to a Community Use or change of use to B1 use, proposals involving an increase of non Class A ground floor space within parades will be refused

**Proposed amendments to the Policies Map**

In most instances the proposed Shopping Parade is unchanged from that included within the current Unitary Development Plan. Those that have changed are detailed in Table 5.6 below.

**Table 5.6 Amendments to Shopping Parades designations (see *The draft Policies Map* for full details)**

Shopping Parade	New	Amended boundary	De-designated <sup>11</sup>
Beulah Road			✓
Brighton Road/ Kingsdown Avenue		✓

Waddon Road		✓	
Whitehorse Lane	✓		
Whitehorse Road		✓	

### How the policy works

**5.36** This policy seeks to ensure that at least 50% of the units within the Shopping Parade are within Class A1 use. Under certain circumstances when one or more units within a Parade are much larger than the other units (for example, when there is an ‘anchor’ store) the 50% threshold may be applied to the gross floor space within the Parade rather than the number of units. Unless it relates to a community use, proposals involving the net loss of ground floor A Class floor space within Shopping Parades will be refused. The Council's annual land use surveys suggest this threshold is generally effective in securing a predominance of

A1 Class activity in Shopping Parades but does not render them prone to issues of long-term vacancy.

- Assessments of boundaries and designations for Shopping Parades (2012 and 2015)

**5.37** The policy limits the opening of new A5 units or changes of use to A5 in shopping parades. This will help to ensure residents have a greater choice of local retail services and will limit associated waste and delivery issues that can cause harm to residential amenity. Controls on the opening of new hot food takeaways support access to healthier food options outside town centres as shopping parades are often located in residential areas in close proximity to open spaces and schools.

**5.38** Sui generis activities which serve the local area (such as a laundrette) and community facilities are also acceptable uses within Shopping Parades. Shopping Parades can also provide space for small start-up companies who need office or workshop space so changes of use to Class B1 uses are also acceptable to facilitate this. However all other uses (including sui generis which serve a wider catchment) are not acceptable uses. New development of Class B1 uses are also unacceptable as new development of this type could threaten the retail character of a Shopping Parade in a way that change of use would not.

**5.39** For the purposes of Part 3 Class M of the General Permitted Development Order (2015), which sets out the circumstances where planning permission is not required for changes of use from retail to residential use, Shopping Parades are considered to be key shopping areas. In these locations any change of use from a retail use to residential will require an application to be made for planning permission which will be considered against the requirements of this policy.

## Development in Restaurant Quarter Parades

### Strategic Objectives and related Croydon Local Plan strategic policies

- Policy SP3.6
- Policy SP3.7
- Policy SP3.8
- Policy SP3.9
- Policy SP3.10

- Policy SP3.11
- Policy SP3.12
- Policy SP3.13

### Unitary Development Plan policies to be replaced by this policy

- None

### Why we need this policy

**5.40** The Restaurant Quarter in South End has grown over many years into a popular collection of largely independent bars and restaurants. The area is also home to Scream Studios, a recording studio and live music venue, which, along with other complementary activities, helps to diversify the cultural/leisure offer.

**5.41** This policy applies to the ground floor only and seeks to encourage more bar and restaurant activity. The policy differs from that which relates to Shopping Parades by not placing a limit on the number of A3 and A4 uses within the frontage. It creates a new designation, a Restaurant Quarter Parade, to be shown on the Policies Map.

**5.42** In relation to drawing up Local Plans, paragraph 23 of the National Planning Policy Framework states that local planning authorities should 'set policies for the consideration of proposals for main town centre uses which cannot be accommodated in or adjacent to town centres'.

**5.43** A survey of South End indicated that the cluster of bars and restaurants is significant not only in terms of the cultural and leisure offer, but also as a generator of direct and indirect employment.

**5.44** Policy 4.6c of the London Plan encourages the designation and development of cultural quarters.

## Policy DM8: Development in Restaurant Quarter Parades

The Council will designate and ensure that the vitality and viability of the borough's Restaurant Quarters is maintained and increased and that they continue to serve local communities by ensuring new development proposals and changes of use are in accordance with Table 5.7.

**Table 5.7 New development proposals and changes of use in Restaurant Quarter Parades**

Use	Expansion of existing uses or newly proposed uses
A3 - A4	Acceptable in principle
A5	Proposals for new A5 uses or extensions to existing A5 uses will be refused
All Other Uses	Unless it relates to a Community Use (up to 250m <sup>2</sup> gross) proposals involving an increase of non A3 - A4 Class ground floor space within Restaurant Quarter Parades will be refused

### Proposed amendments to the Policies Map

Restaurant Quarter Parades are a new designation that will be on the Policies Map. A list of proposed Restaurant Quarter Parades can be found in

Table 5.8 below.

**Table 5.8 Proposed Restaurant Quarter Parade designations (see *The draft Policies Map* for full details)**

Restaurant Quarter Parade	New
South End	✓

### How the policy works

**5.45** This policy seeks to promote bar and restaurant activity by limiting the amount of other uses that can occupy (or extend) the ground floor of premises. A new Restaurant Quarter Parade has, therefore, been designated at 6 - 78 (even) and 1 - 77 (odd).

**5.46** The policy limits Class A5 activity (which could undermine the area's function if restaurants and bars are replaced with hot-

food takeaways). This will help to safeguard and promote the Restaurant Quarter.

**5.47** Allowing community uses to locate here but limiting their size will enable complementary activities to move into the area but not dominate it.

## Development in edge of centre and out of centre locations

### Strategic Objectives and related Croydon Local Plan strategic policies

- Policy SP3.6
- Policy SP3.7
- Policy SP3.8
- Policy SP3.9
- Policy SP3.10

- Policy SP3.11
- Policy SP3.12
- Policy SP3.13

### Unitary Development Plan policies to be replaced by this policy

- SH3 Locations for Shopping Development
- EM4 Offices outside Croydon Metropolitan Centre and town centres
- EM7 Redevelopment or Extension for Offices outside Croydon Metropolitan Centre and the Town, District and Local Centres

- HT1 Visitor Accommodation
- LR2 Development of Leisure and Indoor Sports, Arts, Culture and Entertainment Facilities outside of Croydon Metropolitan Centre and Town and District Centres

### Why we need this policy

**5.48** In line with the 'Town Centres First' principle, commercial activity should be directed to town centres to take advantage of their better transport functions and so as not to undermine the established centres. However, there are circumstances when proposals for town centre uses in edge of centre and out of centre locations may be acceptable.

**5.49** In relation to drawing up Local Plans, paragraph 23 of the National Planning Policy Framework states that local planning authorities should 'set policies for the consideration of proposals for main town centre uses which cannot be accommodated in or adjacent to town centres'.

**Policy DM9: Development in edge of centre and out of centre locations**

The Council will ensure the vitality and viability of the borough's town centres is maintained and increased by:

- a) Ensuring new development proposals for main town centre uses in edge of centre and out of centre locations are in accordance with Table 5.9; and
- b) Applying planning conditions to control the subdivision of units, extensions (including mezzanines), and the range and mix of convenience and comparison goods sold.

**Table 5.9 Development of main town centre uses in edge of centre and out of centre locations**

Use	Development in edge of centre locations	Development in out of centre locations
A1 – A4	<p>Where a sequential test satisfactorily demonstrates such uses cannot be accommodated within a town centre or existing vacant units in edge of centre locations, proposals will be acceptable in principle, provided the site is accessible and well connected to the town centre</p> <p>An impact assessment will be required for proposals which result in a unit greater than 2,500m<sup>2</sup></p>	<p>Where a sequential test satisfactorily demonstrates such uses cannot be accommodated within a town centre or edge of centre location or existing vacant units in any location, proposals will be acceptable in principle, provided the site is accessible and well connected to the town centre</p> <p>An impact assessment will be required for proposals which result in a unit greater than 2,500m<sup>2</sup></p>
A5	Not acceptable	Not acceptable
Offices and other main town centre uses	<p>Where a sequential test satisfactorily demonstrates such uses cannot be accommodated within a town centre or existing vacant units in edge of centre locations, proposals will be acceptable in principle, provided the site is accessible and well connected to the town centre</p> <p>An impact assessment will be required for proposals which result in a unit greater than 2,500m<sup>2</sup></p>	<p>Where a sequential test satisfactorily demonstrates such uses cannot be accommodated within a town centre or edge of centre location or existing vacant units in any location, proposals will be acceptable in principle, provided the site is accessible and well connected to the town centre</p> <p>An impact assessment will be required for proposals which result in a unit greater than 2,500m<sup>2</sup></p>
Non town centre community uses	Acceptable in principle	Acceptable in principle

## How the policy works

**5.50** This policy applies to all commercial uses equating to the National Planning Policy Framework's main town centre uses. Together these are defined as the following:

- a) Retail development (including warehouse clubs and factory outlet centres);
- b) Leisure, entertainment facilities and the more intensive sport and recreation uses (including cinemas, restaurants, drive-through restaurants, bars and pubs, night-clubs, casinos, health and fitness centres, indoor bowling centres, and bingo halls);
- c) Offices; and
- d) Arts, culture and tourism development (including theatres, museums, galleries and concert halls, hotels and conference facilities).

**5.51** For the purposes of this policy edge of centre and out of centre locations are defined as shown in Table 5.10. 'Well connected' is defined as a location benefiting from a Public Transport Accessibility Level of 4 and above.

**Table 5.10 Definition of edge of centre and out of centre location  
(informed by Annex 2 of the National Planning Policy Framework)**

Use	Edge of centre when...	Out of centre when...
Retail development	Within 300m of the boundary of the centre's Primary Shopping Area and well connected	More than 300m from the boundary of the centre's Primary Shopping Area
Offices	Within 300m of the boundary of the centre or within 500m of East Croydon, West Croydon, Norbury, Thornton Heath, Norwood Junction, Purley or Coulsdon Town stations.	More than 300m from the boundary of the centre and more than 500m from East Croydon, West Croydon, Norbury, Thornton Heath, Norwood Junction, Purley or Coulsdon Town stations.
Other commercial use	Within 300m of the boundary of the centre	More than 300m from the boundary of the centre

**5.52** When undertaking a sequential test, applicants will be required to demonstrate there is no town centre or edge of centres sites or units that accommodate their proposal. For out of centre locations they will be required to assess whether there are any existing vacant out of centre units which can accommodate the proposal as it is sequentially preferable to occupy an existing unit in an out of centre location than develop a new unit.

**5.53** Extensions to existing, changes of use to or new A5 uses will not be permitted in edge of centre or out of centre locations which will prevent the opening of hot food takeaways in close

proximity to schools and open spaces. This will support the public health agenda of tackling obesity, particularly for children and young people, and promotes access to healthier food options.

**5.54** As set out in the National Planning Policy Framework, the purpose of an impact assessment is to understand the impact of the proposal on existing, committed and planned public and private investment in a centre or centres in the catchment area of the proposal. It also assesses the impact of the proposal on town centre vitality and viability, including local consumer choice and trade in the town centre and wider area, up to five years from the time the application is made.

**5.55** Where a proposed extension results in a unit greater than 2,500m<sup>2</sup> of floor space, an impact assessment will be required. Impact assessment will be required to assess the impact of the whole unit and not just the proposed extension.

**5.56** For major schemes where the full impact will not be realised in five years, the National Planning Policy Framework states impact should also be assessed up to ten years from the time the application is made. Impact assessments will be required to assess the impact of the whole unit if it results in a floor space greater than 2,500m<sup>2</sup>.

**5.57** The use of planning conditions on the subdivision, extensions and the range of goods and mix of convenience and comparison goods sold ensures that developments in edge of centre and out of centre locations do not have any significant adverse impact of the vitality and viability of the Metropolitan, District and Local Centres.

**5.58** New community facilities in edge of centre or out of centre locations are acceptable in principle. This does not apply to

facilities considered to be a D2 use. These main town centre uses will require a sequential test and an impact assessment.

- Croydon Metropolitan Centre Retail Strategy (2009)

## Expansion of industrial and warehousing premises in Strategic, Separated and Integrated Industrial Locations

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 1
- Policy SP3.1

- Policy SP3.2

### Unitary Development Plan policies to be replaced by this policy

- EM2 Industry and Warehousing in Employment Areas

### Why we need this policy

**5.59** Croydon continues to lose industrial/warehouse capacity at a rate which exceeds the forecast decline in demand. A natural response to this situation could be to adopt a more restrictive approach to the loss of such premises than was previously the case. However, such an approach would not be consistent with the London Plan or the National Planning Policy Framework.

**5.60** Alternatively, the Council could seek to allocate more land for industrial/warehouse activities by extending one or more of the existing Strategic, Separated or Integrated Industrial Locations. However, the physical constraints associated with the Locations (railway lines, quarry walls, Metropolitan Open Land and neighbouring residential uses) means this is not practical.

**5.61** The Office, Industrial & Warehousing Land/Premises Market Assessment recommends that the Council promote improved estate management at Purley Way North (Mill Lane area), Selsdon Road (north and central parts of estate) and

Vulcan Way with the intention of encouraging redevelopment and intensification of land use, and improving environmental quality.

**5.62** The Employment Land Review Update (2013) found that forecasts for demand and supply of industrial/warehousing land in Croydon was broadly consistent with the Office, Industrial & Warehousing Land/Premises (2010) and the Land for Industry and Transport Supplementary Planning Guidance (2012).

**5.63** The Mayor of London's Supplementary Planning Guidance on Land for Industry and Transport sets out an annual indicative industrial land release benchmark for Croydon of 0.5 hectare with a total release benchmark for 2011 – 2031 of 9ha. However, as Croydon lost 9ha of industrial land in a single 5 year period between 2006 and 2010, it is likely that expansion in Strategic and Separated Industrial Locations will be required to compensate for losses to the industrial stock elsewhere.

## Policy DM10: Expansion of industrial and warehousing premises in Strategic, Separated and Integrated Industrial Locations

Within the Strategic, Separated and Integrated Industrial Locations identified in Table 4.3 of the Croydon Local Plan: Strategic Policies, the Council will encourage the redevelopment of low density industrial and warehousing premises with higher density industrial and warehousing premises.

### How the policy works

**5.64** The approach promoted by this policy is to encourage greater density of occupation within the current boundaries of the Strategic, Separated and Integrated Industrial Locations. There are isolated examples where higher densities have been achieved without compromising the operational ability of the premises and the Council is keen to see more of this type of development.

### Key supporting documents

- Office, Industrial & Warehousing Land/Premises Market Assessment (2010)

- Land for Industry and Transport Supplementary Planning Guidance (2012)

## A Place to Belong

The content of this section is related to the vision theme of Croydon as 'A Place to Belong'. It adds further detail to the Croydon Local Plan: Strategic Policies on local character and community facilities and considers how the borough can become a place noted for its openness, safety and community spirit where all are welcome to live and work, in an attractive environment, where the past is valued and where the community is supported.

## 6. Urban Design and Local Character

### Design and character

#### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 7
- Strategic Objective 8
- Strategic Objective 10

- Policy SP1
- Policy SP2.2
- Policy SP4
- Policy SP5.2

#### Unitary Development Plan policies to be replaced by this policy

- UD2 Layout and Sitting of New Development
- UD3 Scale and Design of New Buildings
- UD5 Advertisements
- UD6 Safety and Security
- UD7 Inclusive Design
- UD8 Protecting Residential Amenity

- UD9 Wooded Hillside and Ridges
- UD11 Views and Landmarks
- UD12 New Street Design and Layout
- UD13 Parking Design and Layout
- UD14 Landscape Design

#### Why we need this policy

**6.1** The Council recognises that the built environment and landscape play a vital role in creating and reinforcing positive perceptions, and engendering a sense of place. Croydon Local Plan Strategic Policy SP4, 'Urban Design and Local Character'

supports the creation of places that are well designed, safe, accessible, inclusive and enrich the quality of life for all those who live in, work in and visit the borough. To achieve this, the Council will encourage and continue to work with developers to ensure

that all developments are of high quality. Croydon has strategic objectives to ensure that high quality new development both integrates respects and enhances the borough's natural environment and built heritage, to create spaces and buildings that foster safe, healthy communities. The borough has the largest population of any London borough. Provision of outdoor amenity space is important for health and wellbeing, particularly as the north of the borough is urban in character and has less open space compared to south, where most of the borough's Metropolitan Green Belt can be found. Private and communal outdoor amenity space can assist in mitigation of climate change with vegetation that contributes to biodiversity and space that is multi-functional; for socialising, play, and sport, food growing and gardening. The provision of space that is easily accessible and designed in the context of local character will assist in providing a sense of ownership to the local community and will contribute to the health, well-being and perception of the security of Croydon's community.

**6.2**A fundamental part of achieving high quality built environments is through understanding the local character and the qualities which contribute to local distinctiveness.

**6.3** The National Planning Policy Framework paragraph 58 directs local authorities to develop a set of robust and comprehensive policies which are based upon objectives for the future of the area and an understanding and evaluation of its defining characteristics.

**6.4** Paragraph 56 of the National Planning Policy Framework states that 'Good design is indivisible from good planning'. It advocates good design to ensure attractive, usable, durable, adaptable and sustainable development.

**6.5** The Croydon Local Plan Strategic Policy SP4.1 and London Plan Policy 7.6 set out the need to ensure that developments are of a high quality.

**6.6** The Croydon Local Plan: Strategic Policies provides policy on urban design, local character and public realm. However, in line with the National Planning Policy Framework, there is a need to provide detailed guidance on scale, density massing, height, landscape, layout, materials and access. This will provide greater clarity for applicants.

**6.7** Paragraph 57 of the National Planning Policy Framework advises planning authorities to 'plan positively for the achievement of high quality and inclusive design for all developments, including individual buildings, public and private spaces and wider area development schemes. Good design should contribute positively to making places better for people. Design which is inappropriate in its context, or which fails to take available the opportunities for improving the character and quality of an area and the way it functions, should not be accepted.'

**6.8** Additionally a review of the borough's existing Unitary Development Plan, carried out by the Council's Development Management and Spatial Planning services, identified a need for policies relating to layout, form and design

**6.9** The existing policy review identified a need for a roofscape policy that acknowledges the visual contribution roof-forms make and the need to provide guidance on the way in which the transition between new and old developments are addressed. Guidance for roof-form (roofscape) has not been included within the National Planning Policy Framework or the Croydon Local Plan: Strategic Policies.

**6.10** The National Planning Policy Framework in paragraph 50 encourages local authorities to plan for the delivery of a wide

choice of high quality homes and sustainable communities. It advises that in doing so, development plans should be based on evidence of local needs and demands. The notions of balance and risk are also recognised in the National Planning Policy Framework, which states that the cumulative impact of standards and policies should not put the implementation of the plan at serious risk (paragraph 174).

**6.11** The London Plan's Policy 3.2D introduces an additional requirement for new development to be mindful of health issues. New developments should be designed, constructed and managed in ways that improve health and promote healthy lifestyles to help to reduce health inequalities. The provision of communal outdoor amenity space will provide opportunities for increased outdoor activity and social interaction.

**6.12** The London Plan (in Policy 3.5B) also requires that 'all new housing developments should enhance the quality of local places, taking into account physical context, local character, density; tenure and land use mix; and relationships with, and provision of public, communal and open spaces, taking account of the needs of children and old people'. This supports the need to increase the communal amenity space standards from those identified in the Mayor of London's Housing Supplementary Planning Guidance for sites in the borough to reflect local character or where there is a deficiency in open space.

**6.13** The Mayor of London's Housing Supplementary Planning Guidance expands on the London Plan's Policy 3.5 and Chapter 7 policies on design and acknowledges the need for site layout and design to consider the provision of useable amenity space alongside the siting of the building. This is incorporated in the preferred option.

**6.14** The Mayor of London's Housing Supplementary Planning Guidance in Annex 1 'Summary of the Quality and Design

Standards for private outdoor space' has a minimum standard of 5m<sup>2</sup> of private outdoor space for 1-2 person dwellings and an extra 1m<sup>2</sup> to be provided for each additional occupant.

**6.15** Paragraph 4.10.2 of Annex 1 of the Mayor of London's Housing Supplementary Planning Guidance applies to all the borough and states that private outdoor spaces should have level access, and in 4.10.3 that the minimum depth and width of all balconies and other private external spaces is 1.5m.

**6.16** The minimum standard of 10m<sup>2</sup> per child of children's play space, where there are 10 or more children living in the development is from the Mayor's Housing Supplementary Planning Guidance (2.16) and, although it applies to publicly funded housing development and that on GLA land, it is considered best practice. The Mayor's Supplementary Planning Guidance Providing for Children and Young People's Play and Informal Recreation also recommends a minimum benchmark of 10m<sup>2</sup> of dedicated play space per child.

**6.17** The Mayor's Housing Supplementary Planning Guidance refers to the Baseline Standard 1.2.3 for communal open space which states that development proposals should demonstrate that the communal open space is overlooked by surrounding development, is accessible to wheelchair users and other disabled people, is designed to take advantage of direct sunlight, and has suitable management arrangements in place. It also refers to the Baseline Standard 2.2.8 which explains that this will ensure the outdoor space remains useful and welcoming to all its intended users. With the exception of management arrangements which are a matter for residents and the body managing the building, this is incorporated in the preferred option.

**6.18** The London Housing Design Guide in 5.1.1 Standards – identified that ‘in the past, planning guidance for privacy has been concerned with achieving visual separation between dwellings by setting a minimum distance of 18-21m between facing homes.’ It

says that ‘these are still useful yardsticks for visual privacy, but adhering rigidly to these measures can limit the variety of urban spaces and housing types in the city, and can sometimes unnecessarily restrict density’.

**Policy DM11: Design and character**

**DM11.1** To ensure that development enhances and sensitively responds to the predominant built form and spaces that define the character of places, proposals should be of high quality and respect:

- a) The development pattern, layout and siting;
- b) The scale, height, massing, and density;
- c) The appearance, existing materials and built and natural features of the surrounding area, and
- d) Where an extension or alteration is proposed, comply with Supplementary Planning Document 2 Residential Extensions and Alterations or equivalent.

**DM11.2** To improve the quality of the borough’s public, private and semi-public spaces, proposals should create clear, well defined and designed public and private spaces.

**DM11.3** To ensure the important contribution that historic street furniture plays in reinforcing local character and distinctiveness is recognised, the Council will seek to support proposals that restore and incorporate historic street furniture within the development.

**DM11.4** All proposals for new residential development will need to provide private amenity space that.

- a) Is of high quality design, and enhances and respects the local character;
- b) Complies with Supplementary Planning Document 3 Designing for Community Safety or equivalent;
- c) Is sited to ensure private outdoor amenity space can be adequately screened;
- d) Provides functional space;
- e) Provides a minimum amount of private amenity space of 5m<sup>2</sup> per 1-2 person unit and an extra 1m<sup>2</sup> per extra occupant thereafter; and
- f) All flatted development and developments of 10 or more houses must provide a minimum of 10m<sup>2</sup> per child of new play space, calculated using the Mayor of London's population yield calculator and as set out in Table 6.1 below. The calculation will be based on all the equivalent of all units being for affordable or social rent unless a signed Section 106 Agreement states otherwise.

**DM11.5** In addition to the provision of private amenity space, proposals for new flatted development and major housing schemes will also need to incorporate high quality communal outdoor amenity space that is designed to be flexible, multifunctional, accessible and inclusive.

**DM11.6** The Council will support proposals for development that ensure that the amenity of the occupiers of adjoining buildings are protected and that they do not result in direct overlooking of private outdoor space (with the exception of communal open space) or significant loss of existing sunlight or daylight levels of adjoining occupiers.

**DM11.7** To create a high quality built environment, proposals should demonstrate that:

- a) The architectural detailing will result in a high quality building;
- b) High quality, durable and sustainable materials that respond to the local character are incorporated; and
- c) Services, utilities and rainwater goods will be discreetly incorporated within the building envelope<sup>12</sup>.
- d) To ensure the design of roof-form positively contributes to the character of the local and wider area; proposals should ensure the design is sympathetic with its local context.

---

<sup>12</sup> The building envelope (also known as the building shell) refers to the outer structure of a building.

**DM11.8** To help improve the health and wellbeing of future occupants', proposals for high density developments and/or developments with building separation distances less than 18 metres should have increased ceiling heights (at least 2.5m).

**DM11.9** To ensure a cohesive approach is taken to the design and management of landscape within the borough the Council will require proposals to:

- a) Incorporate hard and soft landscaping in accordance with Supplementary Planning Guidance 12 Landscape and the Croydon's Public Realm Design Guide, or equivalent;
- b) Provide spaces which are visually attractive, easily accessible and safe for all users, and provide a stimulating environment;
- c) Seek to retain existing landscape features that contribute to the setting and local character of an area;
- d) Retain existing trees and vegetation including natural habitats<sup>13</sup>; and
- e) In exceptional circumstances where the loss of mature trees is outweighed by the benefits of a development, those trees lost shall be replaced with new semi-mature trees of a commensurate species, scale and form.

**DM11.10** To ensure a creative, sensitive and sustainable approach is taken to incorporating architectural lighting on the exterior of buildings and public spaces the Council will require proposals to:

- a) Respect enhance and strengthen local character;
- b) Be designed in accordance with Croydon's Public Realm Design Guide;
- c) Seek opportunities to enhance and emphasise the key features of heritage assets and local landmark buildings; or seek to encourage the use of public spaces and make them feel safer by incorporating lighting within public spaces; and
- d) Ensure lighting schemes do not cause glare and light pollution.

---

<sup>13</sup> Natural Habitats are defined as the natural home or environment of an animal, plant or other living organism.

**Table 6.1: Private amenity and play space standards in all flatted developments and all schemes of ten or more units**

<b>Unit size</b>	<b>Minimum private amenity space</b>	<b>Minimum play space (for affordable or social rented housing)</b>	<b>Minimum play space (for private market or intermediate shared ownership housing)</b>
1 bedroom house or flat	5m <sup>2</sup>	0.8m <sup>2</sup> per unit (based on 0.08 children per unit)	0.3m <sup>2</sup> per unit (based on 0.03 children per unit)
2 bedroom houses or flats	6m <sup>2</sup> or 7m <sup>2</sup> (depending on size of second bedroom)	8.1m <sup>2</sup> per unit (based on 0.81 children per unit)	1.2m <sup>2</sup> per unit (based on 0.12 children per unit)
3 bed houses or flats	Between 7m <sup>2</sup> and 9m <sup>2</sup> (depending on size of second and third bedrooms)	18.5m <sup>2</sup> per unit (based on 1.85 children per unit)	4.6m <sup>2</sup> per unit (based on 0.46 children per unit)
4 bed houses or flats	Between 8m <sup>2</sup> and 11m <sup>2</sup> (depending on size of second, third and fourth bedrooms)	19.0m <sup>2</sup> per unit (based on 1.9 children per unit)	10.4m <sup>2</sup> per unit (based on 1.04 children per unit)

**Why we are proposing this approach and how the preferred option would work**

Site context

**6.19** All proposals will be expected to clearly demonstrate that they positively respond to the opportunities and constraints of the site and local area.

Character

**6.20** When assessing the local character the Council will require proposals to show that they have paid special attention to and positively responded to the established:

- a) Form including layout, scale (height and massing), appearance (materials and details), density, building lines and landscape;
- b) Townscape rhythm, symmetries and uniformities; and
- c) Composition of elevations and roofscape.

**6.21** In areas where the predominant character is weakly defined or of poor quality, it is important that applicants take the opportunity to improve the overall quality of the area.

**6.22** To ensure developments positively contribute to or improve local character, the Council will consider the cumulative impact that proposals may have upon the local area.

**6.23** The Council will assess whether a proposed conversion or house in multiple-occupation will affect local character and street scene and whether this will impact adversely on amenities of neighbouring properties through change of appearance, noise and disturbance or parking issues. Conversions of large residential properties and the use of front gardens for car parking can cause unacceptable harm to the setting of building and the character of the local area. For this reason, the Council will seek to support proposals to incorporate parking within the rear, to the side or underneath buildings.

**6.24** The Council will only consider parking within the forecourt of buildings, in locations where forecourt parking would not cause undue harm to the character or setting of the building and where forecourts are large enough to accommodate parking and sufficient screening without the vehicle encroaching on the public highway.

**6.25** The Council will support proposals that take the opportunity to incorporate cycle parking within the building envelope, in a safe, secure, convenient and well lit location. Where it is not possible to incorporate cycle parking within the existing building envelope, the Council will require cycle parking to be located within the setting of the building, in a visually unobtrusive location. They should also be located within, safe, secure, well lit and conveniently located weather proof shelters.

**6.26** In line with the London Plan Policy 7.4, the local character of the borough's 16 Places has been mapped. The Borough Character Appraisal, the Opportunity Area Planning Framework and the Council's masterplans should be considered in conjunction with these policies. The applicable Place-specific development management policies should also be taken into account. Where the proposed development is located within a Conservation Area further guidance should also be sought from Croydon's Conservation Area Appraisal Management Plan and the Conservation Area General Guidance.

#### Layout

**6.27** Streets form an integral part of a place, creating movement networks that serve the built form rather than dominate it. Consideration should be given at a sufficiently early stage of the design process to how the development site links to the local and wider area. Additionally, the creation of routes punctuated by landmark buildings or features, public squares or spaces helps to make a place easy to understand.

**6.28** The Council will require detailed design of roads, footpaths and cycleways to be clearly communicated. Early planning of road and site layouts enables applicants to incorporate parking and servicing in locations where their presence will not dictate the urban form and their visual impact can be minimised. When designing parking and road layouts, careful consideration should be given to creating layouts that are safe, secure, accessible, and permeable and balance the needs of all users. Particular attention should be paid to ensure safe and accessible pedestrian routes are accommodated within the development.

**6.29** When considering the layout, proposals should demonstrate a clear and logical arrangement of buildings that provides a high quality design solution on the site. Buildings, other than on back land developments, should positively address the street and the public realm and particular care should be taken to address how they enclose private secure spaces, car parks and servicing areas.

**6.30** When considering the layout of new development, the Council will support proposals that minimise the amount of blank and inactive frontages, increase the amount of natural surveillance, and avoid dark and secluded areas. Supplementary Planning Document 3 Designing for Community Safety or equivalent should be referred to for aspects of safety in layout, and design. The provision of sufficient lighting, in line with EU lighting uniformity requirements, will encourage greater pedestrian access, movement and reduce opportunity for undesirable behaviour.

**6.31** The Council considers the health and wellbeing of those living and working within the borough to be of the utmost importance. New developments can impact upon the amenity of the occupants of neighbouring properties. Site layouts should be designed to protect or improve conditions for occupants of nearby properties and future occupants. In line with the Housing

Supplementary Planning Guidance, when assessing site layouts the Council will consider a development's impact on visual amenity, overlooking, outlook, and sunlight and daylight.

#### Amenity space

**6.32** This policy will apply to all new residential developments and conversions. Croydon's local character is the leading consideration on the quantum of private and communal open space to be provided for developments. The minimum standards in the Mayor's Housing Supplementary Planning Guidance for private open space may need to be exceeded in order to achieve a design solution that respects local character. When calculating the amount of private and communal open space to be provided the following elements should be excluded:

- a) Footpaths;
- b) Driveways;
- c) Front gardens;
- d) Vehicle circulation areas;
- e) Parking areas;
- f) Cycle parking areas; and
- g) Refuse areas.

**6.33** Private open space is defined as amenity space which is accessible only to, useable for and screened for the purposes of individual dwellings at the rear or in the case of flatted schemes within the grounds.

**6.34** Communal open space is defined as amenity space that is shared, accessible to all within the development and could be for their exclusive use.

**6.35** Balconies, winter gardens or roof terraces may be included as the development's private amenity space provision where they are not detrimental to the privacy of adjoining occupiers and may be an innovative way of providing private or communal amenity

space in areas of high density. The minimum width and depth of balconies should be 1.5m. Where there are privacy issues balcony enclosures should not be transparent.

**6.36** Private amenity space can be indoors in exceptional circumstances where site constraints make it impossible to provide private outdoor space for all dwellings. The area provided should be equivalent to the private outdoor amenity space requirement and this area added to the minimum Gross Internal Area.

**6.37** The provision of private and communal amenity space per unit, including child play space of 10m<sup>2</sup> per child, based on the calculation of numbers of children yielded from the development as set out in the Table 6.1 may be pooled to create a communal amenity space for a flatted development that meets all the requirements of this policy.

**6.38** The amenity space provided for play space can be part of the shared amenity area; it may be a void deck within a tall flatted development, possibly on the ground floor and in small developments of less than ten dwellings it could be part of the shared or private garden.

**6.39** The Play Space Standards are based on Wandsworth yield calculator which the London Plan Supplementary Planning Guidance (Supplementary Planning Guidance) Shaping Neighbourhoods: Children and Young People Play and Informal Recreation is based on. This Supplementary Planning Guidance should be referred to for the allocation and design guidance for play space. The requirements for play space will be calculated on the basis that all units are for affordable or social rent. This is because many applications are made by private developers which are then later sold, prior to occupation, to a Registered Provider of affordable housing and let on an affordable rent basis. In order to ensure that these affordable homes have sufficient play space for

all the child occupiers it is necessary to require that all developments meet the higher play space requirements of affordable and social rented homes unless there is a signed Section 106 agreement specifically stating a different mix of housing tenures in a development.

**6.40** Evidence will be required to demonstrate that privacy is protected, and the character of the area is respected in the layout of private and communal amenity space as part of development proposals. There should be a minimum separation of 18-21m between directly facing habitable room windows on main rear elevations. This distance is a best practice 'yardstick' in common usage and should be applied flexibly, dependent on the context of the development to ensure that development is provided at an acceptable density in the local context. For new major developments as long as the perimeter buildings take account of this local context, the density may vary within the development

**6.41** Overlooking of a portion of a private outdoor space may be permissible provided that a distance of 10m perpendicular from the rear elevation of the property is screened to ensure the immediately accessible area, where sitting outside the property is more likely, has some privacy from overlooking.

**6.42** A planning condition may require a management plan to provide the Council with some assurance that the communal amenity space will be maintained, and therefore continue to be useable. A well maintained appearance will assist with enhancement of the development, with a sense of ownership of residents, and increase the perception of safety in the neighbourhood.

**6.43** Amenity, including sunlight and daylight need to be considered in the layout of private and communal open space and Building Research Establishment Guidelines referred to.

## Design

**6.44** The need for good design is supported in Paragraph 56 of the National Planning Policy Framework. Both the London Plan (policy 7.4b) and the Croydon Local Plan Strategic Policy SP4.1 identify the need for high quality design. To achieve high quality designs, proposals should consider the physical appearance and functionality of the development site and local area. In accordance with the London Plan, Croydon is committed to working with applicants to create modern, high quality innovative and well-designed buildings and places that are, safe, accessible, and inclusive and enrich the quality of life for all those who live, work and visit them.

**6.45** The quality of materials can play an important role determining whether the integrity of the design concept is realised. The choice of materials and the quality of craftsmanship is vital to the overall success of the development in terms of function and appearance. When assessing proposed materials the Council will consider the quality, durability, attractiveness, sustainability, texture, colour and compatibility with existing buildings. Additionally, when working with existing buildings, original architectural features; such as mouldings, architraves, chimneys or porches that contribute to the architectural character of a building should, whenever possible, be retained.

**6.46** The design, position and rhythm of windows and doors can contribute or detract from the overall appearance of the building and the character of an area. The Council will seek to encourage applicants at an early stage of the design process to give careful consideration to the detailing of the overall design (including setbacks and reveals) of windows and doors. The Mayor of London's Housing Supplementary Planning Guidance provides guidelines on window sizes and the required levels of light to protect the residential amenity and well-being of future residents.

**6.47** Servicing equipment such as plant, utility boxes, ventilation systems (including heating and cooling), lift, mechanical equipment, fire escapes and rainwater goods form an integral part of the operational components of a building. Early consideration will enable it be incorporated within the building envelope without compromising the integrity of the original design concept.

**6.48** Roof-form plays an important role in creating and contributing to the visual character of an area and in some instances their visual prominence creates local landmarks or frames designated views. When considering the pitch, shape and materials of roofs, care should be taken to ensure that design is of high quality and appropriate to neighbouring buildings. The Council will also consider the impact of a scheme in terms of its effect on Local Designated Views (as shown on the Policies Map).

**6.49** Information and guidance about the relationships of proposed extensions to neighbouring properties is available in the Residential Extensions and Alterations Supplementary Planning Document or equivalent.

**6.50** The design of our built environment can affect our health and psychological and physiological well-being, and can have long-term implications for quality of life. Good house design should not be limited to the appearance of building and setting, it should also consider the wellbeing of the end user.

Croydon's Local Plan Strategic Policies SP5.2b set out the Council's objective to ensure new development provides healthy living by encouraging good house design. This is increasingly important in locations where densities are increased and/or separation distances are reduced. In these locations, to assist in the creation of buildings that improve the health and wellbeing of future occupiers, developments will be expected to exceed the minimum standards outlined in the Housing SPG. Public Realm

**6.51** A well-designed, cared for and high quality public realm<sup>14</sup> plays an important role in reinforcing the perception of Croydon as a welcoming, safe and accessible place. Croydon's aspirations for its public realm are outlined in the Croydon Local Plan Strategic Policies SP4.6 to SP4.10.

**6.52** Most proposals include an element of public realm. This can range from large scale public realm improvements such as the design of hard and soft landscaped areas (including footways) throughout a site or smaller scale public realm improvements to the forecourt; and in some cases, the area adjoining it.

**6.53** Where public realm improvements have been included within a proposal, these should result in a high quality public realm that is usable, permeable, legible and accessible.

**6.54** As outlined in the Strategic Policy SP4.10, the Croydon Public Realm Design Guide sets out materials and layout guidelines. Further details, including a materials palette can be found in the Croydon Public Realm Design Guide.

**6.55** Historic street furniture such as traditional red telephone boxes, post boxes, ornamental lamp columns, drinking fountains, cattle troughs, monuments and memorials can make a positive

---

<sup>14</sup> The public realm is defined as public spaces that are accessible to all without charge. These can include public, semi-public and privately owned spaces.

contribution to local character by reinforcing a sense of place. Opportunities to retain, restore and incorporate historic street furniture should be taken.

### Landscape

**6.56** The character of a place can be significantly affected by the quality of the landscape and the way it is maintained. Sensitively designed landscape can enrich and reinforce existing wildlife habitats and improve the ecological value of sites and their surroundings. The Council considers landscape as an integral part of all development and would therefore require proposals for new developments and extensions to be accompanied by plans detailing all existing and proposed hard and soft landscaping affected by or to be incorporated into the scheme.

**6.57** Supplementary Planning Guidance 12 Landscape Design is referenced in the policy and provides detailed guidance and clarity on what the Council is seeking from development proposals on providing safe well-designed landscaped schemes. The Croydon Public Realm Design Guide also sets out detailed guidance and clarity on what the Council is seeking from the public realm components of development proposals. If these documents are superseded the equivalent Council documents should be referred to.

### Lighting

**6.58** Lighting plays an important role in creating the perception of safe and welcoming place for people to use and interact with. A well-designed lighting scheme can improve the borough's image and if creatively implemented can give dimension to a building and the landscape surrounding it.

**6.59** Architectural lighting is most effective when used to highlight a few structural elements such as colonnades, towers spires, sculpture or walls or by emphasising texture, such as brick, stone and steelwork rather than flooding every surface with light.

### Design and Access Statements

**6.60** The Council will require applicants to justify and fully demonstrate how the principles of good design are being met. Design and Access Statements should be proportional to the size of the scheme and should fully demonstrate:

- a) A thorough understanding and analysis of the physical, social and economic and policy context;
- b) A clear understanding of the development objectives and brief;
- c) Clear design principles and design concept; and
- d) The evolution of the design and how the final design solution was arrived at.

**6.61** The Statement should refer to By Design, Supplementary Planning Document 3 Designing for Community Safety or equivalent and Supplementary Planning Guidance 12 Landscape Design or equivalent, and demonstrate how the National Planning Policy Framework, the London Plan and the Croydon Local Plan design policies are being met. Advice on the content of the Design and Access Statements can be found in the Council's advisory note 'Preparing Design Statements Advice Note for Applicants and Agents' and CABE's 'Design and Access Statements, How to write, read and use them'.

## Shop front design and security

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 7

- Strategic Objective 10
- Policy SP4

### Unitary Development Plan policies to be replaced by this policy

- UD4 Shopfront Design

### Why we need this policy

**6.62** Given the renewed interest in shop front security brought about as a result of the civil unrest on 8 August 2011, the Council acknowledges the key benefits of a robust shop front design. It is necessary to develop a security policy that will enable the delivery of secure well-designed shop fronts which improve Croydon's public realm, urban environment, and vitality of its town centres.

**6.63** There is a need to ensure that opportunities are taken to promote a succinct and cohesive approach to shop front design and security. Additional guidance that provides clear and concise policies is required to help commercial premises across the borough to incorporate shop front designs which maintain local distinctiveness and provide adequate levels of security whilst reducing the requirement for enforcement action.

**6.64** The new Shop Front Policy will apply greater emphasis in favour of quality shop front design and security in line with the revised addendum to Supplementary Planning Guidance No.1 Shop Fronts & Signs.

**6.65** Over recent years, changes in retail patterns and a growing demand for housing have led to many of these shops being converted in residential accommodation. Many of these conversions have been carried out in a way which often destroyed the inherent adaptability of shop units and the shop fronts. This policy will provide guidance to ensure that conversions are carried out sympathetically and flexibly to allow for future change.

**6.66** Paragraph 56 of the National Planning Policy Framework (requiring good design) outlines the need for robust and comprehensive policies that 'establish a strong sense of place, using streetscapes and buildings to create attractive and comfortable places to live, work and visit'. Furthermore policies should aim to 'create safe and accessible environments where crime and disorder, and the fear of crime, do not undermine quality of life or community cohesion'.

**6.67** The Council's Shop fronts and Signs Supplementary Planning Guidance No.1 was published on 27<sup>th</sup> March 1996 and Shop Front Security Addendum to Supplementary Planning Guidance No.1 Shop Fronts & Signs was adopted in April 2012. The Addendum provides advice on shop front security technology

and innovation and offers greater clarity regarding acceptable forms of shop front security.

**6.68** The Converting Shops into Homes Addendum to Supplementary Planning Guidance No.1 Shop Fronts & Signs was adopted October 2004. This addendum provides guidance on how to sympathetically convert shops to residential development.

**6.69** The Croydon Local Plan: Strategic Policies makes no reference to detailed policies on shop front design.

**6.70** The existing policy requires updating to align with the Council's recently revised Shop Front Security Addendum to Supplementary Planning Guidance No.1 Shop Fronts & Signs adopted April 2012.

### Policy DM12: Shop front design and security

**DM12.1** To ensure shop fronts are attractive, secure and of a high quality design, the Council will support proposals for new shop fronts and related alterations that respect the scale, character, materials and features of the buildings of which they form part.

**DM12.2** To ensure shop fronts are attractive, secure and of a high quality design, the Council will support proposals for new shop fronts and related alterations in the Metropolitan Centre, District and Local Centres, Shopping Parades and Restaurant Quarter Parades that do not include solid, perforated/pinhole external shutters; or consist of a mix of solid and open grille which conform to Supplementary Planning Guidance No.1 Shopfronts and Signs and the Shop Front Security Addendum to SPG No.1 or its equivalent.

**DM12.3** To ensure shop fronts are sympathetically incorporated and to provide future flexibility, developments that convert shops into residential accommodation should:

- a) Respect the scale, character, proportions, materials and features of the buildings of which they form part;
- b) Retain and incorporate historic shop fronts, including signboards, roller blind boxes, corbels, stall risers, cornices, fanlights, console brackets, transoms, pilasters and lobbies into the design;
- c) For new elements, adopt and reinterpret the language of shop front design; and
- d) Optimise window and door openings
- e) Ensure the design includes elements that provide privacy for the occupiers

## **How the policy works**

**6.71** The Council expects all shop front design to be of a high design quality and craftsmanship and whenever possible, use sustainable or recycled materials.

**6.72** The Council encourages improved shop front security and public realm through the integration of innovative technologies.

**6.73** By encouraging shop owners to consider the inclusion of internal shop front shutters during the early stages of the design process. Proposals will respect the distinctive local character of an area whilst maintaining a welcoming environment and public realm.

**6.74** Those seeking planning permission for shop front improvements and new shop fronts should seek additional guidance from the Council's Shopfronts and Signs Supplementary Planning Guidance No.1 published on 27th March 1996 and Shop Front Security Addendum to Supplementary Planning Guidance No.1 Shop Fronts & Signs adopted in April 2012 or equivalent guidance.

**6.75** Changes in retail patterns and a growing demand for housing have led to the piecemeal change of shops converted to residential. Construction works often associated with these changes in use (usually brick-infill) often destroy the inherent adaptability of shop units and shop fronts and detract from the character of the area.

**6.76** Wherever possible it is preferable to keep and adapt existing historic shop fronts. Key features such as large windows, details and proportions of the shop front can make for unique, adaptable and attractive home that enhance and compliment the character of the local area.

**6.77** When designing conversions of retail units to residential use, careful consideration should be given to the designing-in of privacy, given that retail units are commonly hard against the pavement. This could include retention or replacement of existing shop fronts and integration of a winter garden space at the front of the former retail unit to create a degree of environmental protection, privacy and private amenity space. Those seeking planning permission to convert shops into homes should seek additional guidance from Addendum to Supplementary Planning Guidance No.1 Converting Shops into Homes Adopted October 2004.

## **Key supporting documents**

- Shop fronts and Signs Supplementary Planning Guidance No.1 (1996)
- Shopfronts Security Addendum to Supplementary Planning Guidance No.1 (2012)
- Converting Shops into Homes Addendum to Supplementary Planning Guidance No.1, Addendum No. 2

## Advertisement hoardings

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5

- Strategic Objective 7

### Unitary Development Plan policies to be replaced

- UD5 Advertisements

### Why we need this policy

**6.78** Advertising is closely associated with urban life and can be one of the most dominant elements of the environment. In the right context advertisement hoardings can enhance the appearance and vitality of an area. However, where they are poorly designed or located and where too many signs have been installed they can cause considerable damage to visual amenity by cluttering the built environment and detracting from the quality of the area.

**6.79** Changes in legislation and national policy have resulted in the need for updated guidance. The provision of a policy for advertisement hoardings would align with paragraph 67 of the National Planning Policy Framework which highlights a need for controls on advertisements to be efficient, effective and simple in concept and operation. This policy provides guidance that is clear and concise.

**6.80** The National Planning Policy Framework acknowledges the impact that advertisements can have on the appearance of the built and natural environment. It highlights the importance of the need for detailed assessment where 'advertisements would have an appreciable impact on a building or on their surroundings. Advertisements should be subject to control only in the interests of

amenity and public safety, taking account of cumulative impacts'<sup>15</sup>. The Advertisement and Hoardings & Other Advertisements Supplementary Planning Guidance No.8 (February 2003) provided guidance about acceptable locations, number, scale and type of advertisements such as wall mounted and Free standing hoardings and 'A' boards, panels, signs and window advertisements. The Supplementary Planning Guidance highlights the need to ensure advertisements are sensitively located and design to minimise the impact on residential areas and on heritage assets.

---

<sup>15</sup> National Planning Policy Framework paragraph 67.

## Policy DM13: Advertisement hoardings

**DM13.1** To ensure advertisement hoardings positively contributes to the character and appearance of existing and new streets, the Council will require advertisement hoardings to:

- a) Be designed to improve the public realm;
- b) Demonstrate that the rear of the signs are well designed;
- c) Reinforce the special character of heritage assets and other visually attractive parts of the borough; and
- d) Ensure the location and size of hoardings does not harm amenity or conflict with public safety.

**DM13.2** To ensure advertisement hoardings positively contribute to the character and appearance of the building on which they are attached:

- a) The design and proportions should complement the symmetry and proportions of the host structure;
- b) They should be located where they do not obscure or destroy interesting architectural features and detailing; and
- c) They should be located where they do not cover windows or adversely impact on the functioning of the building.

### How the policy works

**6.81** Larger hoarding sizes are becoming increasingly prevalent, with new displays now incorporating high level brightly illuminated or flashing LCD screens. These are often mounted on large, poorly designed and unsightly platforms and gantries or on exposed flank brick walls which are intrusive in the street scene and can be a potential distraction for motorists. When assessing proposals for advertising hoarding, the Council will expect signs and their supporting structures to be of a high quality architectural design that positively enhances its setting.

#### Hoardings affecting heritage assets

**6.82** In sensitive locations such as Conservation Areas, Local Heritage Areas, and adjacent to Listed Buildings and Locally

Listed Buildings, an excessive number of advertisements and signs in close proximity can lead to visual clutter and can detract from their character, appearance and setting. To reduce their impact on the significance of these heritage assets in these locations, the number of advertisements will be restricted and proposals will need to demonstrate that they positively enhance and respect their immediate setting and context.

#### Wall mounted hoardings

**6.83** Wall mounted advertisement hoardings are often difficult to sensitively integrate on buildings because they can be overbearing in scale, dominate the street scene and can create a poor relationship with building on which they are located. To ensure wall mounted hoardings can be sensitively incorporated on the

side of buildings or on boundary walls the Council will need to be satisfied that their design, scale, and siting would not have an adverse impact on the host building or structure on which it will be located.

#### Areas of Special Advertisement Control

**6.84** To protect the open character of and visual amenity of the Metropolitan Greenbelt and the Bradmore Green Conservation Area, the Secretary of State designated these locations as Areas of Special Advertisement Control. This designation prohibits the display of certain advertisements without the consent of the Council.

**6.85** When assessing proposals, it will need to demonstrate that it would not:

- a) Significantly detract from residential amenity;
- b) Affect the setting or character of a heritage asset;
- c) Have a significant impact on the character of Metropolitan Green Belt, Metropolitan Open Land, Local Open Land or other rural spaces;
- d) Have a significant impact on public safety including potential for traffic hazards;
- e) Have a significant impact to environmentally sensitive and major gateway approaches to the borough;
- f) Visually separate areas such as car parks and other locations where safety issue may arise as a result of obscured views into an area; and
- g) Result in numerous hoardings in an area where the cumulative impact would be detrimental to the visual amenity.

**6.86** Assessments relating to amenity and safety will need to comply with Town and Country Planning (Control of advertisements) (England) (Amendment) Regulations 2012.

#### **Key supporting documents**

- Advertisement and Hoardings & Other Advertisements Supplementary Planning Guidance No.8 (2003)

## Refuse and recycling

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 7

- Policy SP4.5
- Policy SP4.6

### Unitary Development Plan policies to be replaced by this policy

- UD15 Refuse and Recycling Storage

### Why we need this policy

**6.87** Most residential and non-residential developments generate waste which will need to be temporarily stored on site. The current kerbside recycling scheme necessitates the need to provide sufficient room to store separated waste within all developments.

**6.88** Both the London Plan and the National Planning Policy Framework do not contain policies relating to refuse and recycling within developments. Additionally the Croydon Local Plan: Strategic Policies refers to the Detailed Policies and Proposals for specific design guidance.

**6.89** This policy will provide developers working on residential and non-residential schemes greater clarity about what the Council will expect them to provide.

**6.90** The Croydon Local Plan: Strategic Policies does not provide specific design guidance and refers to the Detailed Policies and Proposals for specific design guidance.

**6.91** The existing Unitary Development Plan policies have proved useful to both the Council and those applying for planning permission by providing guidance about the location and design of facilities which are integral to the functional running of each development.

**6.92** The London Housing Design Guide provide some general guidance, however, it states that the Guide should be used in conjunction with local guidance. The Housing Design Guide does not address non-residential development.

Policy DM14: Refuse and recycling

**DM14.1** To ensure that the location and design of refuse and recycling facilities are treated as an integral element of the overall design, the Council will require developments to:

- a) Sensitively integrate refuse and recycling facilities within the building envelope;
- b) Ensure facilities are visually screened;
- c) Provide adequate space for the temporary storage of waste (including bulky waste) materials generated by the development; and
- d) Provide layouts that ensure facilities are safe, conveniently located and easily accessible by occupants, operatives and their vehicles.

**DM14.2** To ensure existing and future waste can be sustainably and efficiently managed the Council will require a waste management plan for major developments and for developments that are likely to generate large amounts of waste.

## How the policy works

### Design considerations

**6.93** The Council considers the layout, siting, function and design of recycling and refuse storage facilities to all be of equal importance. It is important that these facilities are considered as an integral part of the development process.

**6.94** If considered at the initial stage of the design process, proposals for new developments can integrate refuse and recycling within the building envelope without causing undue noise and odour nuisance.

**6.95** Conversions of existing buildings will also be expected to provide sufficient facilities. However, where integration within the building envelope is not possible, designs that locate refuse and recycling facilities behind the building line and are well integrated within the landscape may be supported. The Council will expect facilities to be covered and located where they will not be visually intrusive or compromise the provision of shared amenity space.

### Technical considerations

**6.96** It is important that refuse facilities are located in an area where they are easily accessible to all residents, including children and wheelchair users. This would include the provision of a safe route for those on foot as well as ensuring facilities are located on a hard level surface. Facilities must also be easily accessible for waste collectors.

**6.97** It is essential that developments incorporate enough suitable space to store the amount of waste and recycling likely to arise from the development once they are occupied and to build in capacity to meet future demand. This ensures that problems with rubbish being left on footways are minimised, occupants have space to recycle, commercial and household waste are kept separately and waste collection services can operate safely and

efficiently. To ensure this demand can be met, major developments or those which are likely to generate large amounts of refuse and recycling will be required to submit a waste management plan.

**6.98** Additional guidance should be sought from Croydon's Public Realm and Safety Department.

- The Building Regulations 2000 – Approved Document H, Drainage and Waste Disposal (2000 edition)

## Public art

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 7

- Policy SP4.5
- Policy SP4.6

### Unitary Development Plan policies to be replaced by this policy

- UD16 Public Art

### Why we need this policy

**6.99** Despite its size there are relatively few examples of public art within the borough. The Council acknowledges the important role that public art can play in enhancing the setting of a building and creating a visually stimulating public realm and strengthening local distinctiveness.

**6.100** There is a need to ensure that opportunities to incorporate public art within new developments or public realm improvements are taken and that it relates to the local character contributes to the sense of place and reinforces local distinctiveness.

**6.101** The incorporation of public art offers the opportunity to work with the local community to create distinctive works that help engender a sense of ownership and strengthen the sense of place.

**6.102** Supplementary Planning Guidance 19 provides a useful guidance for those wishing to incorporate public art within their development. However, this document provides references to 'percent for art' a policy that is no longer live. This amended policy

provides link to the Council's Public Realm Design Guide which provides more detailed guidance.

## Policy DM15: Public art

To enhance and express local character, the Council will support the inclusion of public art and require all major<sup>16</sup> schemes to include public art that:

- a) Is integrated into proposals at an early stage of the design process;
- b) Enhances and creates local distinctiveness and reinforces a sense of place;
- c) Responds to local character;
- d) Makes a positive contribution to the public realm; and
- e) Engages the local community in its creation.

---

<sup>16</sup> Major schemes are defined as being over 0.5 hectares or residential schemes over 10 units or developments over 1000m<sup>2</sup>

## **How the policy works**

**6.103** By considering public art during the early stages of the design process and clarifying the scope at the beginning of the Design Team Service process, opportunities can be taken to integrate public art into the fabric of the development itself in more imaginative ways. Public art should not be confined to statues, but can be incorporated in imaginative, simple and cost effective ways such as bespoke paving, gates, lighting, signage, street furniture, playground equipment, railings and landscaping, murals (painted or ceramic), decorative bargeboards or works of art incorporated on elevations where they will be visible to pedestrians.

**6.104** The Council expects all public art to be of the highest design quality and craftsmanship and whenever possible, encourage the use of sustainable or recycled materials. When commissioning public art, developers should place equal weight on creating the right piece of work, the craftsmanship of the artist and those installing the piece and the maintenance after it has been installed.

**6.105** Those commissioning public art should seek additional guidance from Croydon's Public Realm Design Guide.

## Tall and large buildings

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 7

- Policy SP4.5
- Policy SP4.6

### Unitary Development Plan policies to be replaced by this policy

- None

### Why we need this policy

**6.106** The Council acknowledges the positive contribution that well-designed tall buildings of high architectural quality can make. If sensitively and appropriately located, these buildings can facilitate regeneration through the provision of new jobs, homes and community facilities and an attractive built environment.

**6.107** The need for this policy has been identified in the borough's Croydon Local Plan: Strategic Policies which sets out the Council's intention to include detailed tall buildings policies within the Detailed Policies and Proposals plan. The Detailed Policies and Proposals also provide a link to the Croydon Opportunity Area Planning Framework and contain the Place-specific development management policies which identify areas suitable for tall buildings.

**6.108** The borough's Open Space Needs Assessment identified significant gaps in the provision of amenity green space, particularly in the north of the borough. To address this there is a need to ensure tall and large residential developments are located

in areas with sufficient green infrastructure or provide new green infrastructure to meet the increased demand.

**6.109** London Plan Policy 7.7 refers to tall and large buildings. This policy advises boroughs to work with the Mayor to identify areas that are appropriate, sensitive or inappropriate for tall or large buildings.

**6.110** The Croydon Opportunity Area Planning Framework identifies locations within the OAPF that are suitable for tall buildings. It provides guidance on indicative tall building heights, form and typologies. This approach reflects the Mayor's aspirations for new residential development within the Croydon Opportunity Area.

**6.111** The base line information used to select locations outside of the Croydon Opportunity Area included mapping of the

residential and non-residential character analysis and mapping,  
PTAL<sup>17</sup> ratings and open space deficiency mapping.

---

<sup>17</sup> Public Transport Accessibility Level – a rating of accessibility provided by Transport for London

## Policy DM16: Tall and large buildings

**DM16.1** To ensure tall or large buildings respect and enhance local character, and do not harm the setting of heritage assets, proposals will be permitted where they:

- a) Are located in areas identified for such buildings in Policies DM36 to DM51, in masterplans and in the Croydon Opportunity Area Planning Framework;
- b) Are located in areas meeting a minimum Public Transport Accessibility Level (PTAL) rating of 4 with direct public transport connections to the Croydon Opportunity Area;
- c) The design should be of exceptional quality and demonstrate that a sensitive approach has been taken in the articulation and composition of the building form which is proportionate to its scale; and
- d) To improve the quality and access to open space buildings taller than 40 storeys will need to incorporate amenity space such as sky gardens, atriums and roof terraces that is accessible to the public as well as residents of the development.

**DM16.2** To ensure tall and large buildings are well integrated with the local area, the ground and first floors should incorporate a mix of publically accessible uses and spaces.

### How the policy works

**6.112** Tall and large buildings have been defined as those which are significantly taller and larger; in terms of scale, mass and height than the predominant surrounding buildings, causing a significant change to the skyline.

**6.113** When considering whether a development can be considered to be tall or large, the context within which the building is situated must be considered. This would mean that a proposal for six storeys; in an area where predominant building heights are two storeys, would be considered to be a tall building. In an area where an urban block<sup>18</sup> comprises of buildings with narrow

<sup>18</sup> An urban block is a rectangular area in a city surrounded by streets and usually containing several buildings.

frontages, a proposal for a building with a scale that differs from this would be considered to be large.

**6.114** This definition closely aligns with the Croydon Local Plan Strategic Policy SP4.5, London Plan Policy 7.25 and CABE and Historic England's guidance which refer to tall and large buildings.

**6.115** There is a need to expand the current definition of tall buildings to include large buildings. This policy will expand the definition of tall buildings to include large buildings and ensure development is sensitive to its local context.

**6.116** This policy in conjunction with the Place-specific development management policies (Policies DM32 to DM47) will establish clear principles and more certainty for developers about the locations for tall and large buildings.

**6.117** Proposals for tall or large buildings will need to include urban design analysis that demonstrates how they align with the Opportunity Area Planning Framework and the Fair Field, Mid Croydon, Old Town and East and West Croydon Masterplans. In locations outside of these areas proposals for tall or large buildings will be expected to demonstrate that they will not cause unacceptable harm to the character of the surrounding area and to the wider setting of heritage assets and meet all policy requirements, including those relating to tall buildings.

**6.118** Proposals for tall or large developments within sensitive locations<sup>19</sup> will be expected to demonstrate that it meets the requirements of the London Plan Policies 7.6 and 7.7.

**6.119** Paragraph 6.23 of the Croydon Opportunity Area Framework outlines the importance of creating slender tall buildings in locations where the proposed building will be taller than the predominant surrounding development heights. This criterion will help to minimise the impact that the proposed building will have upon the setting and character in terms of microclimate, overshadowing and wind turbulence. This criterion is equally applicable in locations outside of the Croydon Opportunity Area (as listed in the Places of Croydon Policies DM32 to DM47) where opportunities for tall or large buildings may be available.

**6.120** Due to their size and scale and the increased densities arising from tall buildings, their impact on surroundings are greater than those of more conventionally sized buildings. Tall and large buildings, in areas such as the Metropolitan Centre that have been identified for growth, will place additional pressure on existing resources such as community facilities and public space. There is

an opportunity to address the shortage space by incorporating high quality public amenity spaces such as sky gardens, atrium spaces and roof terraces in tall buildings. To ensure that these buildings address current and future need for amenity space provision full public access to these spaces will be supported. The Council will work with developers to secure legal agreements for this type of amenity space provision.

**6.121** The design quality of the top of tall buildings is equally as important as the base. A base with a design that has been carefully considered can have a significant impact on the streetscape, local views and how the building physically and visually integrates with the street and the spaces surrounding it. To ensure tall buildings that are well integrated within its immediate local area it should incorporate active and publically accessible ground and first floors and a stimulating and inclusive public realm. To make the public realm around the building feel safe and attractive for pedestrians, the façade should be transparent with sufficient openings to assist overlooking and passive supervision.

<sup>19</sup> Sensitive locations, include sites close to heritage assets, residential amenity spaces, schools, or where topography changes would result in the development crowding or blocking designated views or viewing corridors.,

## Promoting Healthy Communities

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 4
- Strategic Objective 6
- Strategic Objective 7
- SP5.2
- SP5.4

#### Why we need this policy

**6.122** The links between planning and health are well established. Chapter 8 of the National Planning Policy Framework (NPPF) sets out the role of the planning system in promoting healthy communities, facilitating social interaction and creating healthy and inclusive places. The Planning Practice Guidance (PPG) recommends that health and wellbeing and health infrastructure are considered in Local Plan and planning decisions.

**6.123** Policy 3.2 of the London Plan Improving health and addressing health inequalities states that boroughs should work with key partners to identify and address significant health issues facing their areas and that new developments should be designed, constructed and managed in ways that improve health and promote healthy lifestyles to help reduce health inequalities. It recommends that Health Impact Assessments are used to consider the impact of major developments on health and wellbeing of communities.

**6.124** SP5.2 of the Croydon Local Plan: Strategic Policies sets out the Council will work in partnership with health authorities to improve health in Croydon and will ensure new developments provide opportunity for healthy living.

**6.125** Croydon, like many places, has a number of health inequalities. These health inequalities can be addressed by ensuring the planning system and new developments are considering health and wellbeing. This will allow local communities to lead healthy lifestyles and adopt healthy behaviours through living quality homes, participating in physical activity and have access to quality open spaces.

## Policy DM17: Promoting Healthy Communities

**DM17.1** The Council, working with relevant organisations, will ensure the creation of healthy communities which encourage healthy behaviours and lifestyles by requiring developments to:

- a) Consider health and wellbeing during the design of a development to maximise potential health gains and ensure any negative impacts can be mitigated;
- b) Ensure access to open spaces and facilities for sport, recreation, play and food growing;
- c) Promote active travel and physical activity through cycling and walking opportunities that are well linked to existing pedestrian and cycling infrastructure;
- d) Create spaces for social interaction and community engagement which are designed to be safe and accessible to all; and
- e) Assess and mitigate pollutants and other environmental impacts on health.

**DM17.2** The Council will work with NHS partners to support the provision of new healthcare facilities and improvements to existing facilities which provide services important for the physical health, mental health and general wellbeing of communities.

### How the policy works

**6.126** Considering health and wellbeing as early as possible into the design of a development presents greater opportunities for maximising positive gains, addressing health inequalities and mitigating any negative impacts. For example, to ensure a positive impact on mental health, developments should consider exceeding internal space standards, provide private or semi-private open spaces, ensure a sense of privacy for residents but also provide opportunities for social interaction and should ensure access to natural daylight.

**6.127** Developments can support physical activity, promote healthy weights and address health problems associated with obesity. This can be done by considering the layout and access to stairwells, ensuring the provision of accessible cycle storage in

both homes and workplaces and providing changing facilities to encourage people to cycle to work. Developments should provide quality open spaces, particularly in areas identified as being deficient, for sport, recreation and play whilst improving links to existing spaces and sport facilities. The design of a development can also promote access to healthy food opportunities by providing food growing opportunities whilst protecting existing facilities.

**6.128** Air pollution affects everyone living and working in the borough but can have greater impact on children, older people and those with heart and respiratory conditions. Developments must assess and mitigate the impacts of pollution and look for opportunities to improve air quality. Developments should also be designed to be energy efficient and well insulated to ensure

residents are able to live in warm homes and are protected against noise pollution

**6.129** Health Impact Assessments are a tool which can be used to assess the impact of development proposals on health and wellbeing. They should be used to set out how health and wellbeing have been considered during the design of a development, how positive impacts have been maximised and how any negative impacts have been mitigated, particularly where developments are located in the borough's most deprived wards. Health Impact Assessments should be undertaken as early in the process as possible to ensure the assessment is meaningful and can involve engagement from Croydon Public Health and NHS partners.

**6.130** New development in the borough needs to be supported by health and social infrastructure to ensure communities have access to facilities and services they require at every stage of their lives. Facilities should be accessible to all and should be easily reached by walking, cycling or public transport. The Council will continue to work with NHS partners to identify requirements for new facilities to meet the need arising from the borough's growing population. It will support improvements to existing facilities and will also work with NHS partners to identify opportunities for facilities to come forward as part of mixed-use schemes, particularly where there is an identified need. The impact of developments on existing healthcare facilities should be considered through a Health Impact Assessment.

## Views and Landmarks

### Strategic Objectives and related Croydon Local Plan strategic policies

- Policy SP4.2
- Policy SPS4.6

- Policy SP4.9
- Policy SP4.13

### Unitary Development Plan policies to be replaced

- UD11 Views and Landmarks

### Why we need this policy

**6.131** Croydon has compiled a list of Local Designated Views of significance for the borough. These include Croydon Panoramas that reinforce Croydon's sense of local place and identity and Local Designated Landmarks that assist with way finding and contribute to local character of the borough.

**6.132** The Unitary Development Plan Policy UD1 contained a list of Views and Landmarks. These have been assessed alongside others suggested in the Borough Character Appraisal and by Development Management Officers and from the previous consultation on the Croydon Local Plan: Detailed Policies (Preferred and Alternative Options) in 2013. The proposed Views and Landmarks are detailed in the Croydon Local Plan: Strategic Policies.

### Policy DM18: Views and Landmarks

**DM18.1** The Council will consider the proposed development in relation to its impact on protected Local Designated Views such that developments should not create a crowding effect around, obstruct, or appear too close or high in relation to any Local Designated Landmarks identified in the Local Designated View.

**DM18.2** Developments should enhance Croydon Panoramas as a whole and should not tightly define the edges of the viewing corridors from the Croydon Panoramas. Developments should not create a crowding effect around, obstruct, or appear too close or high in relation to any Local Designated Landmarks identified in the Croydon Panoramas.

## How the policy works

**6.133** When new development is proposed it should consider the effect on a Local Designated View to avoid detrimental impact on the quality of the View and ensure it is not sited too close to avoid overcrowding the View of a Local Designated Landmark. This is considered in the Croydon Local Plan Strategic Policy SP4.2 which states that development will be required to protect Local Designated Views, Croydon Panoramas, the setting of Local Designated Landmarks, other important vistas and skylines.

**6.134** The London Plan Policy 7.11 'London View Management Framework' is reflected in the Croydon Local Plan Strategic Policy SP4.13 which states that the Council and its partners will strengthen the protection of and promote improvements to local views, Croydon Panoramas and Local Designated Landmarks.

**6.135** The Croydon Opportunity Area Planning Framework refers to the potential impact of tall buildings on views and assessment of impact on the skyline. It identifies townscapes along which people have generous views of the Croydon Opportunity Area. Further to this, it identifies the need for development to demonstrate that it integrates with and improves the local character and, that new buildings will be assessed against their impact on these views to ensure they do not result in an overbearing wall of development.

**6.136** The Panoramas selected (listed in table 5.2 of the Croydon Local Plan: Strategic Policies) are the wide expansive views of substantial parts of Croydon where public access to a view point to view the Panorama should be maintained.

**6.137** The important Local Designated Landmarks in the views are noted in the list of Croydon Panoramas and Local Designated Views in table 5.2 of the Croydon Local Plan: Strategic Policies. This policy aligns with the London Plan, Policy 7.12.

**6.138** To enhance the Croydon Panoramas and Local Designated Views new development will be assessed against their impact on the Local Designated Views and the Landmarks identified within the views.

**6.139** For all Croydon Panoramas, any development that prevents the retention of a public access to the viewpoint and any development that does not comply with this policy in relation to the Local Designated Landmarks will be considered intrusive and unacceptable. Elevations of the proposed development seen from the viewpoint of the Croydon Panorama will be required as part of an assessment of impact of new development on these views.

## Key supporting documents

- Borough Character Appraisal (2015)
- Croydon Opportunity Area Planning Framework (2013)

## Heritage assets and conservation

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 7

- Policy SP2.2

- Policy SP4.1
- Policy SP4.12
- Policy SP4.13

### Unitary Development Plan policies to be replaced

- UC2 Control of Demolition on Conservation Areas
- UC3 Development Proposals in Conservation Areas
- UC4 Changes of Use in Conservation Areas
- UC5 Local Areas of Special Character
- UC8 Use of Listed Buildings
- UC9 Buildings on the Local List

- UC10 Historic Parks and Gardens
- UC11 Development Proposals on Archaeological Sites
- UC13 Preserving Locally Important Remains
- UC14 Enabling Development

### Why we need this policy

**6.140** Croydon has a rich and varied heritage that provides depth of character to the borough's environment. The historic environment contributes to local character and distinctiveness and enables an understanding of the pattern of historic development of an area. In order to maintain the borough's character it is vital that heritage assets are protected and sensitively adapted and that

their setting is not harmed. The historic environment is a finite resource and, once lost, cannot be replaced.

**6.141** The Council recognises the value of the historic environment, especially in relation to the positive contribution it can make to creating and maintaining sustainable communities, and considers it to be important to conserve the valued components of the borough's historic environment for the future. This view is supported by the National Planning Policy Framework

(Chapter 12), the London Plan (Chapter 7) and the strategic objectives and policies of the Croydon Local Plan. The strategic policies state that 'Croydon needs to ensure protection of its heritage assets and their settings, to retain local distinctiveness and character'. This is particularly important given the context of the significant change that Croydon, in particular the Croydon Opportunity Area, has seen in the last century and is likely to continue to experience. The Council also supports the principles of heritage-led regeneration.

**6.142** This policy seeks to improve the protection afforded to heritage assets in the borough. Heritage assets are the valued elements of the historic environment and make an important contribution to the quality of the borough's architectural, historic and townscape character. A heritage asset is a building, monument, site, place, area or landscape identified as having a degree of significance meriting consideration in planning decisions, because of its heritage interest. Heritage assets can be identified in various ways, for example through statutory designation as heritage assets of national significance, such as Listed Buildings, Conservation Areas, Scheduled Monuments, and Registered Historic Parks and Gardens, or through designation by the Local Planning Authority, which includes Locally Listed Buildings, Local Heritage Areas and Locally Listed Historic Parks and Gardens. Heritage assets can also be identified through area assessments, master planning or during the planning process itself.

**6.143** Through the planning process the Council will consider the significance of all sites and areas identified as having heritage significance. The Council will monitor proposed removals and additions to the established lists of heritage assets as and when appropriate. The Council will continue to make information relating to heritage assets available to view on the Croydon Council website.

**6.144** The special character of a heritage asset is the principle reason for why the asset is considered to have a degree of significance. It is usually defined by its architectural character or other distinguishing features, for example landscape features, historic importance, or, in the case of an historic area, the distinctive character of the area as a whole.

**6.145** The setting of a heritage asset is defined in the glossary of the National Planning Policy Framework as 'the surroundings in which a heritage asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve.'

**6.146** This policy addresses detailed issues that relate to the detailed application of Croydon Local Plan: Strategic Policies to heritage assets in the borough and fulfils the aim outlined in strategic Policy SP4 to strengthen the protection afforded to heritage assets in the borough.

**6.147** The National Planning Policy Framework paragraph 126 states that 'local planning authorities should set out in their Local Plan a positive strategy for the conservation and enjoyment of the historic environment'.

**6.148** The London Plan Policy 7.8G states that boroughs should 'include appropriate policies in their LDFs for identifying, protecting, enhancing and improving access to the historic environment and heritage assets and their settings where appropriate, and to archaeological assets, memorials and historic and natural landscape character within their area'.

**6.149** The Croydon Local Plan: Strategic Policies provides general policies SP4.11-15 that relate to the historic environment. However, there is a need to provide detailed policy on specific issues in order to provide additional policy protection to the borough's heritage assets and to enable the Council to meet its statutory duties.

## Policy DM19: Heritage assets and conservation

**DM19.1** To preserve and enhance the character, appearance and setting of heritage assets within the borough, the Council will determine all development proposals that affect heritage assets in accordance with the following:

- a) Development affecting heritage assets will only be permitted if their significance is preserved or enhanced;
- b) Proposals for development will only be permitted if they enhance the setting of the heritage asset affected or have no adverse impact on the existing setting;
- c) Proposals for changes of use should retain the significance of a building and will be supported only if they are necessary to keep the building in active use;
- d) Where there is evidence of intentional damage or deliberate neglect to a heritage asset, its current condition will not be taken into account in the decision-making process; and
- e) Proposals for enabling development must have public benefits that outweigh the detriment of departing from other planning policies and the proposed development must be the minimum necessary to secure the heritage asset's long-term future.

**DM19.2** Applications for development proposals that affect heritage assets or their setting must demonstrate:

- a) How particular attention has been paid to scale, height, massing, historic building lines, the pattern of historic development, use, design, detailing and materials;
- b) That it is of a high quality design that integrates with and makes a positive contribution to the historic environment; and
- c) How the integrity and significance of any retained fabric is preserved.

**DM19.3** To preserve and enhance Listed Buildings, Scheduled Monuments and Registered Parks and Gardens within the borough, the Council will determine all development proposals that affect these heritage assets in accordance with the following:

- a) Substantial harm to or loss of a Grade II Listed Building or Registered Park and Garden should be exceptional;
- b) Substantial harm to or loss of a Grade I or II\* Listed Building or a Scheduled Monument should be wholly exceptional; and
- c) All alterations and extensions should enhance the character, features and setting of the building or monument and must not adversely affect the asset's significance.

**DM19.4** To preserve and enhance the character, appearance and setting of Conservation Areas within the borough, the Council will determine all development proposals that affect Conservation Areas in accordance with the following:

- a) The demolition of a building that makes a positive contribution to the special character and appearance of a Conservation Area will be treated as substantial harm;
- b) Where the demolition of a building in a Conservation Area is considered to be acceptable, permission for its demolition will only be granted subject to conditions linking demolition to the implementation of an approved redevelopment scheme; and
- c) All proposals for development must have regard to the development principles in the Conservation Area General Guidance Supplementary Planning Document and Conservation Area Appraisal and Management Plan Supplementary Planning Documents or equivalent.

**DM19.5** To protect and enhance the character, appearance and setting of Locally Listed Buildings within the borough, the Council will determine all development proposals that affect Locally Listed Buildings in accordance with the following:

- a) Substantial weight will be given to protecting and enhancing Locally Listed Buildings; where demolition is proposed, it should be demonstrated that all reasonable attempts have been made to retain all or part of the building;
- b) All alterations and extensions should enhance the building's character, setting and features and must not adversely affect the significance of the building; and
- c) All proposals for development must have regard to Croydon's Local List of Buildings of Historic or Architectural Importance Supplementary Planning Document or equivalent.

**DM19.6** To preserve and enhance the character, appearance and setting of Local Heritage Areas within the borough, the Council will determine all development proposals that affect a Local Heritage Area in accordance with the following:

- a) Substantial weight will be given to protecting and enhancing buildings, townscape and landscape features that make a positive contribution to the special character and appearance of a Local Heritage Area; and
- b) All proposals for development must have regard for the development principles in the Conservation Area General Guidance Supplementary Planning Document and the Local Heritage Area evidence base.

**DM19.7** Substantial weight will be given to conserving and enhancing landscape features or planting that makes a positive contribution to the special historic character and original layout of Registered and Locally Listed Historic Parks and Gardens.

**DM19.8** All development proposals must preserve and enhance War Memorials and other monuments, and their settings.

**DM19.9** In consultation with the Greater London Archaeological Advisory Service, or equivalent authority, the Council will require the necessary level of investigation and recording for development proposals that affect, or have the potential to affect Croydon's archaeological heritage. Remains of archaeological importance, whether scheduled or not, should be protected in situ or, if this is not possible, excavated and removed as directed by the Greater London Archaeological Advisory Service or equivalent authority.

### **How the policy works**

**6.150** While the Council recognises that many non-designated heritage assets do not benefit from statutory protection, the Council will seek to protect all heritage assets from demolition due to their national or local historic and architectural significance and the contribution they make to the borough's townscape character. The Council will seek to retain original features and detailing present on buildings and ensure that alterations and extensions to historic buildings are carried out in a manner that does not harm their significance and respects the scale, character, detailing and materials of the original building and area. Proposals that include the reinstatement of significant lost architectural or landscape features or the removal or harmful alterations, where this can be demonstrably undertaken without harm to the significance of the heritage asset, will be supported in principle.

**6.151** In addition to the collective value of buildings and their relationship to each other, the character of Conservation Areas and Local Heritage Areas may be defined by the wider townscape, land uses, public realm, open spaces, road layout or landscaped areas. This character can be relatively consistent or in larger areas may contain several 'character areas' within the Conservation Area or Local Heritage Area. In addition to protecting individual buildings the Council will ensure that the wider character of an area is protected and enhanced.

**6.152** All planning applications submitted that relate to heritage assets should include a description of the significance of the heritage asset affected and analysis of the resultant impact of the development on the heritage asset and its setting. The level of detail of this statement should be proportionate to the significance of the asset affected and will, if necessary, be directed by the Council.

**6.153** All development that relates directly to heritage assets or affects their setting must be of a high quality design that enhances their special character and must pay special attention to the area's established height, scale, massing, building lines, detailing and materials. New development will be discouraged from copying existing buildings but rather must be informed by and well integrated with the established character of the area.

**6.154** Development will be encouraged to enhance the setting of heritage assets, or at the very least not have any adverse impact on the current setting. In some cases there may be opportunities to better reveal the setting of heritage assets; however this must not have adverse impacts on local character or other heritage assets.

**6.155** Historic buildings should be maintained in their original use wherever possible unless fully justified by demonstration that this is necessary to secure its long term future viability. Where a proposed change of use is fully justified, it should be

demonstrated how the building's original fabric and character is to be preserved.

**6.156** Historic landscapes, including Registered and Locally Listed Historic Parks and Gardens may have interest from: their age, connection with historic buildings, events or people, presence of ornamental features and artefacts, style of layout, or work of an important designer. The Council will ensure that Historic Parks and Gardens are not adversely affected by new development.

**6.157** Croydon's archaeological heritage comprises of both above and below ground remains, previously identified through individual finds, evidence of previous settlements and standing structures. At present approximately a quarter of the borough is covered by archaeological priority zones, which are areas that have a high likelihood of archaeological significance. Due to its nature, much of the borough's archaeological heritage is likely to have been undiscovered and as a result is very sensitive. If a site is identified as having potential archaeological significance applicants will be required to undertake an archaeological desk-based assessment and, if necessary, a field investigation. Any discovered archaeological remains will be required to either be preserved in situ or through a programme of excavation, recording, publication and archiving, undertaken by an archaeological organisation approved by the Council, prior to the commencement of any development. The Council will consult with and follow the guidance of the Greater London Archaeological Advisory Service, or equivalent authority, on the archaeological implications of development proposals.

**6.158** Where development proposals affect heritage assets the submission of a full planning application will be sought as opposed to an outline planning application, unless the Local Planning Authority has sufficient comfort that the level of detail submitted will ensure that the proposed development will preserve or enhance the affected asset or assets.

**6.159** The Council supports the principle of improving access to historic buildings but will ensure that works undertaken to achieve this are done so in the most creative manner possible and that any harm to significance is minimised and outweighed by the public benefit of securing access.

**6.160** The Council will maintain the 'Heritage at Risk Register', which is managed by Historic England, and monitors the condition of heritage assets where possible. If deemed appropriate, the Council will exercise its legal powers to ensure that essential maintenance of designated heritage assets is undertaken. The Council will seek to work with partners to secure creative solutions that would contribute positively to local character and vitality

**6.161** When, in exceptional circumstances, a heritage asset cannot be retained, the development will be required to conduct a full recording survey (including photographs) and deposit the information in the Croydon Local Studies Library and Archives Centre. This should be secured through a planning condition. This is in addition to the recording requirements imposed in respect of the loss of nationally significant designated heritage assets

**6.162** This policy should be read in conjunction with existing and future Council guidance documents including the:

- a) Conservation Area General Guidance Supplementary Planning Document;
- b) Conservation Area Appraisal and Management Plan Supplementary Planning Documents;
- c) Local List of Buildings of Historic or Architectural Importance Supplementary Planning Document; and
- d) Residential Extensions and Alterations Supplementary Planning Document.

# 7. Community Facilities

Providing and protecting community facilities

## Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 4
- Strategic Objective 6
- Strategic Objective 7

- Strategic Objective 8
- Policy SP5

## Unitary Development Plan policies to be replaced

- CS1 Development of New Community Facilities
- CS2 Retaining Existing Community Facilities

### Why we need this policy

**7.1** The National Planning Policy Framework in paragraph 69 states that the planning system can play an important role in facilitating social interaction and creating healthy, inclusive communities. The Council recognises the benefits of a healthy community and with the expected growth in the borough's population, existing community facilities that serve their current and future needs should be retained and new facilities provided.

**7.2** Croydon's population, as it grows, will put increasing pressure on community facilities. Consequently, a changing approach towards locating services and facilities is needed, especially to ensure they are provided in sustainable locations.

**7.3** The London Plan Policy 3.16 cites the protection and enhancement of social infrastructure which includes community

uses and encourages London boroughs to develop policies to protect these uses.

## Policy DM20: Providing and protecting community facilities

**DM20.1** The Council will ensure the provision of a network of community facilities, providing essential public services throughout the borough by protecting existing community sites that still serve, or have the ability to serve, the needs of the community.

**DM20.2** The Council will permit the loss of existing community facilities where:

- a) It can be demonstrated that there is no need for the existing premises or land for a community use and that it no longer has the ability to serve the needs of the community;
- b) The existing use is located on the ground floor within a Main Retail Frontage, a Secondary Retail Frontage, a Shopping Parade or a Restaurant Quarter Parade; or
- c) Community facilities for a specific end user (either on site or off site as part of a comprehensive redevelopment) that meet current or future needs are provided.

**DM20.3** The Council will support applications for community use where the proposals:

- a) Include buildings which are flexible, adaptable, capable of multi-use and, where possible, enable future expansion;
- b) Are accessible to local shopping facilities, healthcare, other community services and public transport or provides a community use in a location and of a type that is designed to meet the needs of a particular client group; and
- c) Are for a use that is a town centre use, as defined by the National Planning Policy Framework, are located within Croydon Metropolitan Centre or a District or Local Centre, have no more than 280m<sup>2</sup> of floor space (net) and are in the vicinity of a Neighbourhood Centre, or are a change of use of an existing unit in a Shopping Parade.

### How the policy works

#### Protection of existing community facilities

**7.4** Proposals involving the loss of a community facility will need to:

- a) Explain why the current use is no longer needed if the building/site is occupied; and
- b) Show that the loss would not create, or add to, a shortfall in provision of floor space/sites for the existing community use by

providing details of a marketing exercise that meets the criteria below or provide a replacement community facility for a specific end user either on site as part of a mixed use development or elsewhere on a site with no current community use.

**7.5** Exceptions to this policy may include proposals involving the loss of an existing profit-making community use (such as a private gym or cinema) which would require evidence to be submitted to

demonstrate that the existing community use is not financially viable. This evidence will be assessed on behalf of the Council by an independent RICS valuer (paid for by the applicant).

**7.6** The marketing exercise associated with this policy should be for a minimum period of eighteen months. Space should be offered at a reasonable charge for community groups/voluntary sector organisations reflecting its existing use value unfettered by any hope value. In the event that a community facility is listed on the Assets of Community Value register and is offered for sale, the local community is given six months to prepare a bid to buy it. In such circumstances the marketing statement could be reduced to a period of a minimum continuous period of twelve months in addition to the six months that the community has to prepare a bid to buy it.

**7.7** In cases where a community use ceases it has to be successfully demonstrated that there is no local need or demand for alternative community uses.

**7.8** The protection of community facilities will not apply to Main Retail Frontages, Secondary Retail Frontages, Shopping Parades and Restaurant Quarter Parades as these are locations where Class A uses are the preferred uses.

#### Proposals for new community facilities

**7.9** The use of a building and the needs of communities can change over time. Therefore, new community facilities should be designed to be flexible and adaptable to changing circumstances including being capable of multi-use and expansion.

**7.10** New community facilities should be located so that they are close to schools, local shopping facilities and public transport and other community services to reduce the number of trips people need to make to access them. However, it is acknowledged that there may be circumstances where the needs of a particular group

or client base mean that it that it does not need to be located close to other services. In such instances applications would need to be supported with information demonstrating how the lack of access to other services will not have a negative impact on the end users of the new community facility and the amenity of the surrounding area.

## Supporting Selhurst Park as the home stadium of Crystal Palace Football Club

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 1

### Unitary Development Plan policies to be replaced

- RO16 Selhurst Park

### Why we need this policy

**7.11** Selhurst Park has been home to Crystal Palace Football Club since 1924

**7.12** The Council recognises the existing role that CPFC has in the community identifying it as a large scale community and

leisure facility that continues to make a significant contribution to local area regeneration, creating opportunities for people to share a sense of pride in where they live, as well as delivering initiatives that support community cohesion and facilitate greater social inclusion.

### Policy DM21: Supporting Selhurst Park as the home stadium of Crystal Palace Football Club

The Council will continue to support Selhurst Park as the home stadium of Crystal Palace Football Club and ensure that any redevelopment would enhance the club's position with a football stadium which makes a significant contribution to the Borough

### How the policy works

**7.13** The presence of a major Football Club within Croydon brings many economic, social and cultural benefits. It is therefore important to protect the facilities that are considered necessary for the retention of such a club.

**7.14** London Plan policy 4.6 provides support for the continued success of professional sporting enterprises and the cultural, social and economic benefits that they offer to residents, workers and visitors.

## Protecting Public Houses

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 6
- Policy SP5

### Unitary Development Plan policies to be replaced

- CS1 Development of New Community Facilities
- CS2 Retaining Existing Community Facilities

### Why we need this policy

**7.15** The National Planning Policy Framework in paragraph 69 states that the planning system can play an important role in facilitating social interaction and creating healthy, inclusive communities. The loss of public houses over recent years has increased due to rising property values. The importance of public houses as a community asset has been acknowledged through the National Planning Policy Framework which requires local authorities to 'plan positively' for such uses. There is also a body of evidence produced by organisations such as CAMRA (The Campaign for Real Ale), the All Party Parliamentary Beer Group and the Institute for Public Policy Research which also supports this view.

### Policy DM22: Protecting Public Houses

The Council will not grant planning permission for the demolition or change of use of a public house, unless the Council is satisfied that there is not a defined need for a public house. Even where the Council is satisfied that there is not a defined need for the public house, the Council must be satisfied that:

**7.16** The Institute of Public Policy Research's 'The Social Value of Community Pubs' details the social and community importance of public houses and their importance as hubs for development of social networks. It notes the significant long term consequences and associated costs for communities with a lack of social infrastructure which can support the wellbeing of individuals and communities. In May 2013 CAMRA advised that public house losses had been running at 26 per week in the six months to March 2013.

**7.17** The London Plan Policy 3.16 cites the protection and enhancement of social infrastructure which can include public houses and encourages London boroughs to develop policies to protect public houses as a community asset.

- a) The loss of the public house would not result in a shortfall of local public house provision of this type;
- b) That the public house is no longer considered economically viable when considered against the CAMRA's Public House Viability Test; and
- c) The public house has been marketed as a public house, at a market rate for public houses, for a consistent period of 18 months.

### **How the policy works**

**7.18** Proposals involving the loss of a public house will need to demonstrate that there is not a defined need for a public house.

**7.19** A defined need can be demonstrated in no particular order of preference by:

- a) The public house being statutorily Listed;
- a) The public house being Locally Listed;
- b) The public house being a non-designated heritage asset;
- c) The public house having other local contextual significance;
- d) There being sustained and documented local objection to the loss of the public house; and
- e) The public house being used for a wider variety of ancillary uses such as functions, social events and other community activities.

**7.20** The Council will resist the loss of these facilities unless it can be demonstrated that is no longer required in its current use. Evidence will be required to show that the loss would not create, or add to, a shortfall in provision for the public house and demonstrate that there is no demand for such a use on the site. This would include the submission of evidence of suitable marketing activity for a period of eighteen months. In the event that a public house is listed on the Assets of Community Value register and is offered for sale, the local community is given six

months to prepare a bid to buy it. In such circumstances the marketing statement could be reduced to a period of a minimum continuous period of twelve months in addition to the six months that the community has to prepare a bid to buy it. This evidence should demonstrate that the existing use is no longer financially viable through the submission of financial evidence. Marketing details need to include a site description, photographs and reasonable terms commensurate with public house use. In cases where a public house use has ceased it has to be successfully demonstrated that there is no local need or demand.

- The Social Value of Community Pubs (2012)

## Providing for cemeteries and burial grounds

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 6
- Policy SP5

### Unitary Development Plan policies to be replaced

- CS1 Development of New Community Facilities

#### Why we need this policy

**7.21** In 2012 Croydon had less than two years supply of burial space remaining in its cemeteries within the borough and at Greenlawns Memorial Park in Tandridge district and Bandon Hill Cemetery in the London Borough of Sutton.

**7.22** A planning application was made to Tandridge District Council to extend the existing burial ground at Greenlawns Memorial Park following consideration of all known options within

the London Borough of Croydon itself. The planning application was refused and the refusal was upheld upon appeal.

**7.23** Therefore, Croydon needs to find an alternative site for a new burial ground and a policy is proposed to guide the search for a site and to help determine any subsequent planning application.

**7.24** The Burial Land Need and Provision Study identifies that space needs to be found for 1,900 burial spaces in the borough up to 2031.

#### Policy DM23: Providing for cemeteries and burial grounds

The Council will support applications for new cemeteries and burial grounds where the proposals:

- a) Have good means of access from roads and are near bus routes or other transport nodes;
- b) Are located in areas of with no risk of flooding from all potential sources of flooding;
- c) Are not located in a Groundwater Source Protection Zone;
- d) Would not have unacceptable adverse impact on the biodiversity of the borough; and
- e) Are not located in Metropolitan Green Belt or on Metropolitan Open Land unless it has been demonstrated that there are no suitable sites that are not in Metropolitan Green Belt or on Metropolitan Open Land, there is no impact on openness and existing provision of public

access is maintained.

### **How the policy works**

**7.25** A new cemetery or burial ground needs to be well accessed from roads and bus routes or other transport nodes in order to be accessible for residents of the borough to visit and attend to gravestones.

**7.26** Cemeteries and burial grounds would be particularly adversely affected by flooding. Therefore, they must not be located in areas of flood risk (from any source of flooding). Applications will be refused if there is any risk of flooding to the site irrespective of whether a sequential test demonstrates that there are no other suitable sites within the borough.

**7.27** They also have a greater potential to contaminate groundwater supplies. Groundwater provides a third of our drinking water in England and Wales, and it also maintains the flow in many rivers. In some areas of Southern England, groundwater supplies up to 80% tap water. It is crucial that these supplies and sources are looked after and ensure that tap water is completely safe to drink. The Environment Agency has defined Groundwater Source Protection Zones for groundwater sources such as wells, boreholes and springs used for public drinking water supply. These zones show the risk of contamination from any activities that might cause pollution in the area. The closer the activity, the greater the risk. Maps are available from the Environment Agency (on their website) showing the extent of Groundwater Source Protection Zones in Croydon.

**7.28** The National Planning Policy Framework lists facilities for cemeteries as potentially being acceptable in Green Belt. However, the presumption is that this is for existing cemeteries and that new cemeteries and burial grounds need to demonstrate

exceptional circumstances before being permitted in Green Belt (and by default, Metropolitan Open Land).

**7.29** Therefore, a new cemetery or burial ground will only be permitted in Metropolitan Green Belt or Metropolitan Open Land if it has first been demonstrated that there are no suitable sites outside of Metropolitan Green Belt or Metropolitan Open Land. These sites do not have to be within the borough boundary of Croydon. Furthermore, any ancillary facilities associated with a new cemetery or burial ground must be kept to a minimum so that there is no impact on openness of Metropolitan Green Belt or Metropolitan Open Land. Existing public access to any site in Metropolitan Green Belt or Metropolitan Open Land must also be maintained.

**7.30** Cemeteries and Burial Grounds are not acceptable on Local Green Space.

### **Key supporting documents**

- Burial Land Need and Provision Study (2010)

## A Place with a Sustainable Future

The content of this section is related to the theme of Croydon as 'A Place with a Sustainable Future.' It adds further detail to the Croydon Local Plan: Strategic Policies on how the borough can become a sustainable, well connected place and an environment prepared for the impacts of a changing climate.

## 8. Environment and Climate Change

Development and construction

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 9
- Strategic Objective 10

- Strategic Objective 11
- Policy SP6.2
- Policy SP6.3

### Unitary Development Plan policies to be replaced

- EP1 Control of Potentially Polluting Uses

### Why we need this policy

**8.1** As part of its commitment to achieving sustainable development and promoting the economic and social wellbeing of the borough, the Council needs to ensure that there is effective

protection of the environment and prudent use of natural resources. To do this the Council needs to assess the environmental impacts of development and take action to ensure that sustainable development objectives are met. The entire borough of Croydon is also an Air Quality Management Area.

### Policy DM24: Sustainable Design and Construction

The Council will promote high standards of development and construction throughout the borough by:

- a) Ensuring that future development, that may be liable to cause or be affected by pollution through air, noise, dust, or vibration, will not be detrimental to the health, safety and amenity of users of the site or surrounding land;
- b) Ensuring that developments are air quality neutral and do not lead to further deterioration of existing poor air quality;
- c) Ensuring mitigation measures are put in place to reduce the adverse impacts to acceptable levels. Where necessary, the Council will set planning conditions to reduce the impact on adjacent land uses to acceptable levels, relative to ambient noise levels and the character of the locality; and

d) Encourage the use of sustainable and innovative construction materials in buildings.

### How the policy works

**8.2** In Croydon developments of 10 or more new homes or 500m<sup>2</sup> or more of non-residential floor space are expected to meet high sustainable construction standards in accordance with the Croydon Local Plan.

**8.3** Developers should seek to minimise the adverse environmental impacts of development during construction in line with the Sustainable Design and Construction Supplementary Planning Guidance 2014 and by considering the following best practice measures:

- a) Identifying potential sources of dust and other air pollution as early as possible from the earliest stages of project design and planning;
- b) Locating activities likely to generate air pollution or dust away from sensitive uses such as hospitals, schools, housing and wildlife sites where possible;
- c) Minimising dust generation by dampening stockpiles and covering skips;
- d) Dampening and sweeping construction sites, access roads and dust generating activities such as stone cutting as required;
- e) Accommodating wheel washer facilities as necessary; and
- f) Making use of techniques such as framed construction and prefabricated components in order to minimise construction noise and disruption on site.

**8.4** Solid wall insulation will also be encouraged in existing developments where planning permission may be required.

### Air quality

**8.5** The entire borough of Croydon is an Air Quality Management Area (AQMA) and therefore developers should give careful consideration to the air quality impacts of their proposed development through an Air Quality Assessment.

**8.6** Since very few developments are 'zero emission' developments, most development will have a negative impact on air quality. As Croydon is an AQMA new developments should be at least 'air quality neutral'. Developers should consider measures to minimise emissions of air pollution at the design stage and should incorporate best practice in the design, construction and operation of the development. Where a development has a negative impact on air quality, developers should identify mitigation measures that will minimise or offset the emissions from the development. These mitigation measures should be implemented on-site. This is especially important where provision has been made for a large number of parking spaces, where the development will generate a significant number of trips, will give rise to other potentially significant sources of pollution or will be used by large numbers of those particularly vulnerable to poor air quality, such as children or older people. Poor air quality is linked to the development of chronic diseases and can increase the risk of respiratory illness. Tackling poor air quality can improve health problems and minimise the impacts on vulnerable groups, especially asthma in children and heart and respiratory diseases in older people.

**8.7** The Council has produced an Interim Policy Guidance (Standards and Requirements for Improving Local Air Quality) on requirements for improving local air quality, which sets out situations when an assessment may be required and suggests methods of undertaking such an assessment within the Croydon area. Developers or architects involved in new residential

development, new industrial and commercial development, or mixed use development with housing should consult the Interim Planning Guidance on Improving Local Air Quality and the Mayor of London's Control of Dust and Emissions Supplementary Planning Guidance.

### Noise

**8.8** There is a need to ensure that residents and businesses are protected from environmental disturbance during the construction of major developments.

**8.9** The Council's Code of Practice has been prepared to help developers and their contractors ensure that they undertake their works in the most considerate manner, in order to reduce the impact of the work on local communities. It also provides guidance on a Construction Logistic Plan required for major developments and the assessment of traffic movements.

**8.10** Most planning applications received by the Council are assessed for the impact of environmental noise on the new development. This to ensure that the proposed development has adequate sound insulation in order to minimise the adverse impact of noise from a railway or a busy road, aircraft or an industrial activity. Residential developments close to railways and other noise sensitive sites will need a noise assessment.

### **Key supporting documents**

- Standards and Requirements for Improving Local Air Quality Interim Policy Guidance (2014)
- The Mayor of London's Sustainable Design and Construction Supplementary Planning Guidance (2014)
- The Mayor of London's Control of Dust and Emissions Supplementary Planning Guidance (2014)

## Land contamination

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 9

- Policy SP6.3

### Unitary Development Plan policies to be replaced

- EP2 Land Contamination – Ensuring land is suitable for development
- EP3 Land Contamination – Development on land known to be contaminated

### Why we need this policy

**8.11** Whilst a site may contain elevated levels of ‘contaminants’, it may or may not be defined in legislation as contaminated land.

**8.12** The legislation defines contaminated land as ‘any land which appears to the local authority in whose area it is situated, to be in such a condition, by reasons of substances in, on or under the land that:

- a) Significant harm is being, or there is a significant possibility of such harm being caused; or
- b) Pollution of controlled waters is being or is likely to be caused.’

**8.13** Land contamination is likely to have arisen from the activities of past industrial and waste disposal practices. Elevated levels of heavy metals, oils, pesticides, and asbestos or landfill gas are a few examples of substances or materials which could be considered contaminants and which, where not properly managed, could cause harm to health or the environment.

**8.14** The planning system aims to ensure that the effects of historical contamination do not cause any harm to the future users of a site. Provisions in the planning process ensure that, where contamination is an issue on a site, it is cleaned up or remediated before or as part of its redevelopment. Contaminated sites can be redeveloped into uses such as housing, schools and hospitals.

**8.15** It is the responsibility of the Council to determine whether it considers the site to be contaminated. Planning controls through the imposition of conditions assists in helping to govern these sites.

**8.16** Before the introduction of the Environmental Protection Act 1990, there were instances where the previous controls dealing with contamination were not so effective, and going back further in time, controls were, themselves limited or non-existent. This may have resulted in contamination not being addressed or satisfactorily dealt with prior to or during the site’s development. It is these sites that the legislation aims to deal with by ensuring that, where potentially contaminated sites do exist, they are found and cleaned up. It is the responsibility of the Council to determine

whether it considers the site to be contaminated. Planning controls through the imposition of conditions assists in helping to govern these sites.

### Policy DM25: Land contamination

**DM25.1** The Council will permit development proposals located on or near potentially contaminated sites, provided that detailed site investigation is undertaken prior to the start of construction in order to assess:

- a) The nature and extent of contamination; and
- b) The production of landfill gases and the potential risks to human health, adjacent land uses and the local environment.

**DM25.2** Where the assessment identifies unacceptable risks to human health, adjacent land uses or the local environment, site remediation and aftercare measures will be agreed or secured by condition to protect the health of future occupants or users.

**DM25.3** All development proposals on contaminated sites should be accompanied by a full risk assessment, which takes into account existing site conditions.

#### How the policy works

**8.17** In addressing contamination, it is recognised that retrospective remedial actions, carried out after a site has been developed, will be significantly more expensive and difficult, than if the remediation is carried out prior to or as part of a site's development. As a consequence of this, when a site is to be developed, the Council will seek to ensure that any issues of contamination are addressed through the imposition of planning conditions prior to its development. The scale of remediation of the land should reflect the nature and risk posed by any contaminants. The Council's Contaminated Land Officer will advise on remedial measures and that measures are successfully implemented.

#### Key supporting documents

- Environmental Protection Act 1990

## Sustainable Drainage Systems and Reducing Flood Risk

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 9
- Strategic Objective 11

- Policy SP6.4
- Policy SP6.5

### Unitary Development Plan policies to be replaced

- None

#### Why we need this policy

**8.18** The National Planning Policy Framework states that development should be directed away from areas at a highest risk of flooding and that Local Plans should apply a sequential, risk-based approach to the location of development. Where development is required in areas at risk of flooding, it should be safe for the lifetime of development without increasing flood risk elsewhere.

**8.19** The National Planning Policy Framework and Planning Practice Guidance state that sustainable drainage systems should be given priority in major developments unless demonstrated to be inappropriate. However, the use of sustainable drainage systems in all developments provides the opportunity to manage surface water as close to the source as possible and provide wider amenity and biodiversity benefits.

## Policy DM26: Sustainable Drainage Systems and Reducing Flood Risk

**DM26.1** The Council will ensure that development in the borough reduces flood risk and minimises the impact of flooding by:

- a) Steering development to the areas with a lower risk of flooding;
- b) Applying the Sequential Test and Exception Test in accord with Table 8.1; and
- c) Taking account of all sources of flooding from fluvial, surface water, groundwater, sewers, reservoirs and ordinary watercourses.

**DM26.2** In areas at risk of flooding development should be safe for the lifetime of development and should incorporate flood resilience and resistant measures into the design, layout and form of buildings to reduce the level of flood risk both on site and elsewhere.

**DM26.3** Sustainable drainage systems are required in all development and should:

- a) Ensure surface run-off is managed as close to the source as possible;
- b) Accord with the London Plan Sustainable Drainage Hierarchy;
- c) Achieve better than greenfield runoff rates;
- d) Be designed to be multifunctional and incorporate sustainable drainage into landscaping and public realm to provide opportunities to improve amenity and biodiversity;
- e) Achieve improvements in water quality through an sustainable drainage system management train; and
- f) Be designed with consideration of future maintenance.

**Table 8.1 Application of Sequential test and Exception test to applications in Croydon**

<b>Flood Zones</b>	<b>Land uses</b>	<b>Sequential Test</b>	<b>Exception Test</b>	<b>Flood Risk Assessment</b>
Flood Zone 1	All uses are permitted	Required if identified at risk from other sources of flooding	Not applicable	All major developments and in areas identified at risk from other sources of flood risk
Flood Zone 2	<p>Highly vulnerable uses will only be permitted if the Exception Test is passed</p> <p>More vulnerable and Highly vulnerable uses should set Finished Floor Levels a minimum of 300mm above the known or modelled 1% annual probability flood level (1 in 100 year) including climate change</p>	Required for all development unless allocated in the Croydon Local Plan: Detailed Policies and Proposals	Required for highly vulnerable uses	All development

Flood Zones	Land uses	Sequential Test	Exception Test	Flood Risk Assessment
Flood Zone 3a	<p>Highly vulnerable uses will not be permitted</p> <p>More vulnerable uses should set Finished Floor Levels a minimum of 300mm above the known or modelled 1% annual probability flood level (1 in 100 year) including climate change</p> <p>Basements dwellings will not be permitted</p>	<p>Required for all development unless allocated in the Croydon Local Plan: Detailed Policies and Proposals</p>	<p>Required for essential infrastructure and more vulnerable uses</p>	<p>All development</p>
Flood Zone 3b	<p>Water compatible uses will be permitted</p> <p>Highly vulnerable, more vulnerable and less vulnerable uses will not be permitted</p> <p>Basements dwellings will not be permitted</p>	<p>Required for all development unless allocated in the Croydon Local Plan: Detailed Policies and Proposals</p>	<p>Required for essential infrastructure</p>	<p>All development</p>

### How the policy works

**8.20** When preparing Flood Risk Assessments regard should be had to the Strategic Flood Risk Assessment, Surface Water Management Plan, Local Flood Risk Management Strategy, other local flood history, relevant flood defence asset information and

Environment Agency flood maps. Flood Risk Assessments should assess the risk from all sources of flooding.

**8.21** The Sequential Test and Exception Test are not required for sites allocated in this Plan, for minor development<sup>20</sup> or change of use<sup>21</sup>. For all other development in Flood Zones 2 and 3 the Sequential test and Exception Test should form part of the Flood Risk Assessment, having regard to the guidance in the Strategic Flood Risk Assessment. A Sequential Test is required for development in Flood Zone 1 if the area has been identified at risk from other sources of flooding.

**8.22** For residential development, proposals should be assessed against the Council's published five year supply of housing land and should demonstrate that the five year supply of housing land cannot be met on sites with a lower risk of flooding. For all other uses the Sequential Test should be based on the catchment of the proposed use. The design and layout of development should also take account of the sequential approach, with the most vulnerable uses located in parts of the site at the lowest risk of flooding.

**8.23** Where a site is at risk of groundwater, the Council will request a Basement Impact Assessment as part of the Flood Risk Assessment for any basement application. These assessments should be informed by ground investigations to help assess the flood risks to basement development.

**8.24** Croydon has experienced a number of surface water flood events and has been ranked by Defra as the 4<sup>th</sup> settlement in

---

<sup>20</sup> In relation to flood risk minor development means: minor non-residential extensions with a footprint less than 250 square metres; alterations that do not increase the size of buildings; household development within the curtilage of the existing dwelling and physical extensions to the existing dwelling itself. This excludes the creation of a separate dwelling within the curtilage of the existing dwelling.

<sup>21</sup> This excludes change of use to a caravan, camping or chalet site or to a mobile home or park home site.

England most susceptible to surface water flooding<sup>22</sup>. The Local Flood Risk Management Strategy identifies up to 33,614 residential properties at risk from surface water in the borough<sup>23</sup>. Extensive records are held of surface water flooding across the borough with particularly significant episodes at Purley Cross roundabout and Brighton Road, Kenley station, Brighton Road (Coulsdon), Hamsey Green, Purley Oaks Road, Norbury and Thornton Heath<sup>24</sup>. Due to the risk posed by surface water flooding in Croydon development should utilise sustainable drainage systems to achieve better than greenfield runoff rates from the site. Greenfield runoff rates are defined as the runoff rates from a site, in its natural state, prior to any redevelopment and are typically between two and eight litres per second per hectare<sup>25</sup>. If better than greenfield runoff rates cannot be achieved this should be justified to the Local Planning Authority and Lead Local Flood Authority as part of a drainage strategy. In these instances greenfield runoff rates should be achieved as a minimum in line with the London Plan.

**8.25** Sustainable drainage systems should always be considered as early in the design process to inform the design of the development. Proposals should demonstrate an understanding of how surface water will flow across the site, taking account of topography and locating drainage features accordingly. A drainage strategy should demonstrate that the site will achieve better than greenfield runoff rates and that sustainable drainage systems have been designed in line with the London Plan drainage hierarchy. Drainage design should follow the

---

<sup>22</sup> National Rank Order of Settlements Susceptible to Surface Water Flooding, Defra 2009

<sup>23</sup> London Borough of Croydon Local Flood Risk Management Strategy

<sup>24</sup> London Borough of Croydon, Merton, Wandsworth Strategic Flood Risk Assessment Level 1

<sup>25</sup> London Plan Sustainable Design and Construction Supplementary Planning Guidance

principles of water sensitive urban design and demonstrate a sustainable drainage management train. A sustainable drainage management train identifies the different stages of movement of water through and across a site, identifying suitable sustainable drainage techniques for each stage. For example, a management train could consist of a green roof, a soakaway and permeable paving used in different parts of a development. The drainage strategy should also demonstrate how the drainage system will be managed and maintained for the lifetime of the development.

**8.26** Sustainable drainage systems provide wider benefits than just reducing surface water runoff from a site. They provide opportunities to improve water quality by removing pollutants, improve the quality and attractiveness of public realm and open spaces and enhance biodiversity through the creation of habitats such as ponds and wetlands. Sustainable drainage systems should be designed to manage water as close to the source as possible and include treatment stages which not only manage the flow of water but provide wider benefits to the site. Detailed guidance on sustainable drainage systems is to be produced by the Lead Local Flood Authority.

## 9. Green Grid

Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 9
- Strategic Objective 10

- Policy SP7.2

### Unitary Development Plan policies to be replaced by this policy

- RO1 Maintaining open character of Metropolitan Green Belt and Metropolitan Open Land
- RO2 Control of Development Associated with Residential Properties in Metropolitan Green Belt and Metropolitan Open Land
- RO3 Changes of Use of Existing Buildings in Metropolitan Green Belt and Metropolitan Open Land
- RO4 Conversions of buildings to residential use in Metropolitan Green Belt and Metropolitan Open Land

- RO6 Protecting the Setting of the Metropolitan Green Belt and Metropolitan Open Land
- RO8 Protecting Local Open Land
- RO9 Education Open Space
- RO15 Outdoor Space and Recreation

### Why we need this policy

**9.1** Croydon has a strategic objective to ensure the responsible use of land and natural resources and also to increase the quality of, and access to, green spaces and nature. The borough's trees and green spaces are also important in mitigating higher temperatures as a result of climate change. Protecting the

borough's Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces ensures communities have access to open space for physical activity, recreation and play. The Croydon Local Plan: Strategic Policies seeks to protect and safeguard the extent of the borough's Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces

## Policy DM27: Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces

**DM27.1** The Council will protect and safeguard the extent of the borough's Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces as designated on the Policies Map by applying the same level of protection afforded to Metropolitan Green Belt in national planning policy to Metropolitan Open Land and Local Green Spaces in the borough.

**DM27.2** Extensions to existing buildings in Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces should not be more than 20% of their original<sup>26</sup> floor space or volume, or 100m<sup>2</sup> (whichever is the smaller) unless they are for agricultural use, forestry, or facilities for outdoor sport, outdoor recreation or cemeteries.

**DM27.3** Extensions to existing buildings in Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces that are less than 20% of the original floor space or volume, or less than 100m<sup>2</sup> in extent (whichever is the smaller) and extensions for agricultural use, forestry, or facilities for outdoor sport, outdoor recreation or cemeteries may still be disproportionate. In considering whether they are disproportionate and also whether a new replacement dwelling is materially larger or, if any proposed structure harms the openness of Metropolitan Green Belt, Metropolitan Open Land or Local Green Spaces, the Council will have regard to:

- a) Changes in the floor space and volume of buildings;
- b) The floor space and volume of all previous extensions (since 1948), alterations and developments within the curtilage of the dwelling;
- c) Use of basements and roof spaces as living areas;
- d) Whether there is an increase in the spread of buildings across the site, in particular where visible from public vantage points;
- e) The size of the curtilage and character of the surrounding area; and
- f) Whether ancillary structures have an urbanising effect.

---

<sup>26</sup> The original floor space and volume is as built, or as existed in 1948 for all buildings built prior to this date.

## Proposed amendments to the Policies Map

Local Green Space is a new designation and all areas so designated will need to be shown on the Policies Map. There are also a number of minor additions to Metropolitan Green Belt arising from the deletion of the current Local Open Land designation. A list of all proposed Local Green Spaces is shown in Table 9.1 and a list of all the proposed minor additions to Metropolitan Green Belt is shown in Table 9.2.

**Table 9.1 Proposed Local Green Spaces (see *The draft Policies Map* for full details)**

## How the policy works

### Metropolitan Green Belt

**9.2** Metropolitan Green Belt is a national designation which aims to check the unrestricted sprawl of London, prevent Croydon from merging with towns in neighbouring local authorities, safeguard Croydon's countryside from encroachment, to preserve the setting and special character of Croydon, and to assist in the regeneration by encouraging the recycling of derelict and urban land.

### Metropolitan Open Land

**9.3** Metropolitan Open Land is a London designation which aims to protect land that either contributes to the physical structure of London, includes open air facilities which serve either the whole or significant parts of London, contains features or landscapes (historic, recreational, biodiversity) of either national or metropolitan value, or forms part of a Green Chain or a link in the network of green infrastructure.

### Local Green Space

**9.4** Local Green Space is a new national designation that aims to protect green spaces which are demonstrably special to a local community and hold a particular local significance, for example because of their beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of their wildlife, and where the green space is in reasonably close proximity to the community it serves and local in character (rather than an extensive tract of land).

### National planning policy

**9.5** Between them the National Planning Policy Framework and London Plan apply the same level of protection to the Metropolitan Open Land and Local Green Spaces as is afforded to Metropolitan Green Belt.

**9.6** The National Planning Policy Framework says that new buildings in the Green Belt are inappropriate with the exception of:

- a) Buildings for agriculture and forestry;
- b) Provision of appropriate facilities for outdoor sport, outdoor recreation and for cemeteries, as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it;
- c) The extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building;
- d) The replacement of a building, provided the new building is in the same use and not materially larger than the one it replaces;
- e) Limited infilling in villages, and limited affordable housing for local community needs under policies set out in the Local Plan; or
- f) Limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings), which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.

**9.7** The National Planning Policy Framework also says that the following uses are also not inappropriate in the Green Belt provided they preserve the openness and do not conflict with the purposes of including land within the Green Belt:

- a) Mineral extraction;
- b) Engineering operations;
- c) Local transport infrastructure which can demonstrate a requirement for a Green Belt location;
- d) The re-use of buildings provided that the buildings are of permanent and substantial construction; and

e) Development brought forward under a Community Right to Build Order.

- f) Cemetery, church yard or burial ground;
- g) Site of Nature Conservation Importance; or
- h) Playing field or recreation ground.

**9.8** At a local level cemeteries, burial grounds and telecommunications development may be acceptable in Metropolitan Green Belt and on Metropolitan Open Land if it can be demonstrated that there are no other suitable sites and that there is no impact on the openness of the Green Belt or the reason for the site being designated as Metropolitan Open Land. In addition for cemeteries and burial grounds existing levels of public access to sites in Metropolitan Green Belt and Metropolitan Open Land need to be maintained. Neither cemeteries, burial grounds nor telecommunications development are acceptable on Local Green Space.

#### Local Green Space in Croydon

**9.9** Local Green Space is designated by the Croydon Local Plan. Sites have been designated based on the following criteria which reflect the National Planning Policy Framework's definition of Local Green Space.

**9.10** Sites designated as Local Green Space are in close proximity to the land that they serve.

**9.11** Sites designated as Local Green Space are local in character and not part of an extensive tract of land.

**9.12** Sites designated as Local Green Space are at least three of the following or are publically accessible and at least one of the following:

- a) Historic Park or Garden;
- b) Community garden;
- c) Children's play area;
- d) Tranquil area;
- e) Natural and semi-natural open space;

#### Extensions and replacement of existing buildings

**9.13** The policy defines disproportionate extensions for development proposals which are considered to be inappropriate development in the Green Belt, Metropolitan Open Land and Local Green Space. Any extension of more than 20% of the original floor space or volume, or greater than 100m<sup>2</sup> in extent (whichever is smaller) of an existing building will be considered disproportionate.

**9.14** It does not apply to proposals to extend uses that the National Planning Policy Framework considers to be acceptable in Green Belt. For these uses, development proposals will still be required to preserve the openness of the Green Belt and not conflict with the purposes of including land within it.

**9.15** In considering applications for the replacement of existing buildings in Metropolitan Green Belt, on Metropolitan Open Land or in Local Green Space the Council may seek alterations in the position of the footprint on the site, or other changes that will reduce the impact on the open character of the area.

**9.16** Where a proposed change of use of an existing building in Metropolitan Green Belt, on Metropolitan Open Land or in Local Green Space involves extensions or changes to the use of the surrounding land the Council will exercise strict control to ensure that the proposal does not conflict with openness or the purposes of including land in the designation. The form, bulk and general design of any new structures should be in keeping with their surroundings. In considering such proposals, the Council will have regard to the history of the building and will not look favourably on the conversion of buildings constructed under permitted development rights, if it is considered that there was an intention of early conversion to another use. Conditions removing permitted

development rights and legal agreements may be sought to achieve these aims.

#### Visual amenity of Metropolitan Green Belt and Metropolitan Open Land

**9.17** Openness is a primary consideration in designating Metropolitan Green Belt and Metropolitan Open Land. Its openness can be harmed by development not actually located within the designations. Therefore, development conspicuous from the Metropolitan Green Belt or Metropolitan Open Land will not be permitted if it would harm their visual amenity.

#### **Key supporting documents**

- Review of potential Local Green Spaces (2016)

## Protecting and enhancing our Biodiversity

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 9
- Strategic Objective 10

- Policy SP7.4
- Policy SP7.5

### Unitary Development Plan policies to be replaced by this policy

- NC1 Sites of Nature Conservation Importance
- NC2 Specially Protected and Priority Species and their Habitats

- NC3 Nature Conservation Opportunities throughout the borough
- NC4 Woodlands, Trees and Hedgerows

### Why we need this policy

**9.18** Croydon has strategic objectives to ensure the responsible use of land and natural resources to mitigate and adapt to climate change, to increase the quality of and access to green space and nature, and to protect and enhance biodiversity.

**9.19** The Review of Sites of Nature Conservation Importance identified a nine areas not currently designated as Sites of Nature Conservation Importance that are of an equivalent standard to those already designated.

## Policy DM28: Protecting and enhancing our biodiversity

To enhance biodiversity across the borough and improve access to nature, development proposals should:

- a) Incorporate biodiversity on development sites to enhance local flora and fauna and aid pollination locally;
- b) Incorporate biodiversity within and on buildings in the form of green roofs, green walls or equivalent measures;
- c) Incorporate productive landscapes in the design and layout of buildings and landscaping of all major developments<sup>27</sup>;
- d) Have no adverse impact on land with biodiversity or geo-diversity value as designated on the Policies Map; and
- e) Have no adverse impact on species of animal or plant or their habitat protected under British or European law, highlighted within a local/regional Biodiversity Action Plan, or when the Council is presented with evidence that a protected species would be affected.

---

<sup>27</sup> Developments of 10 or more residential units, 1,000m<sup>2</sup> or more of non-residential floor space or sites more than 0.5ha in extent.

## Proposed amendments to the Policies Map

Each of these designations set by this policy are shown on the Policies Map. These designations are generally the same as the designations of the same name in the Unitary Development Plan. However there are a number of proposed amendments to the boundaries. These changes are summarised in Table 9.3 and full details including maps of each amendment can be found on the draft Policies Map.

**Table 9.3 Changes to Sites of Nature Conservation Importance (see *The draft Policies Map* for full details)**

Site of Nature Conservation Importance	New
Copse Hill Spinney	✓
Falconwood Meadow	✓
Grounds of Heathfield House	✓
Hamsey Green Pond	✓
Ladygrove	✓
Shirley Park Golf Course	✓
Spices Yard	✓
Temple Avenue Copse	✓
Whitgift Pond	✓

### How the policy works

**9.20** The borough's natural wildlife heritage, including individual species of particular interest or scarcity, is not confined to the designated Sites of Nature Conservation Importance. Small open spaces, ponds, streams, back gardens, hedgerows, trees, unimproved grassland, heathland or 'wasteland' habitats can be important support for the borough's biodiversity and enable people to access and enjoy nature.

**9.21** Creating a patchwork of flower-rich meadows, field edges and flowery road verges, and extending this into urban gardens,

parks and open spaces, would assist bees and other pollinating insects and could reverse their decline.

**9.22** Development proposals provide opportunities for protecting and enhancing existing habitats and incorporating new wildlife attracting habitats into landscaping and on buildings. In the built environment 'green roofs' can be a particularly useful way of providing a new wildlife habitat as they have a number of other benefits. These include absorbing rainfall and reducing storm water run-off, helping cool buildings and reducing the 'urban heat island' effect. The plants absorb air pollution and dust and green roofs provide green oases amongst built-up areas. They can provide health benefits, protect the building structure from sunlight and temperature fluctuations and they can cut the cost of drainage, heating and air conditioning. Carefully chosen plants can also provide a habitat and meet the needs of local wildlife.

**9.23** Incorporating productive landscapes into the design and layout of buildings and landscapes provides opportunities for local food growing, supports the creation of healthy and active communities, improves the quality of open spaces and enhances biodiversity. Productive landscapes can take the form of allotments, community garden & growing spaces, green roofs & walls and productive planting.

**9.24** Where there is limited outdoor space, there are opportunities for providing productive landscapes in roofs, walls and balconies in the form of rooftop allotments or raised beds. Productive planting can be incorporated into green roofs & walls through the planting of herbs, fruit, vegetables and edible plants. Productive planting can also be incorporated in soft landscaping where fruit and nut trees could also be used.

**9.25** In major developments where productive landscapes can be managed by a school, community group or residents'

associations, opportunities for the provision of allotments, and community gardens and growing spaces should be explored.

**9.26** Croydon contains many sites of biodiversity or geo-diversity value from Sites of Nature Conservation Importance which are of local importance to Sites of Special Scientific Interest (SSSIs) which are of national importance. The borough also contains four Local Nature Reserves and one Regionally Important Geological site (the Croham Hurst Cemented Blackheath Pebble Beds).

**9.27** The Review of Sites of Nature Conservation Importance carried out in 2013 and 2014 provides details on all sites with a rating of Grade I and Grade II, and all sites of local importance.

**9.28** Some types of habitats are rare in Croydon compared with other parts of London and are therefore particularly valuable here, for example open and running water. The size and shape of a site is also a consideration. Long, narrow sites, such as railway corridors and 'fingers' of open land, are more valuable than their size alone would suggest as they bring wildlife close to a larger number of adjacent properties and people.

**9.29** Proposals that might affect such sites will therefore need to be carefully assessed. Any assessment should take into account both operations during construction and the changes likely to be brought about by the new use.

**9.30** Occasionally, protection of nature conservation features may be outweighed by the need to provide essential infrastructure to support growth in the borough and beyond when there is no other suitable site. When assessing whether there are no other suitable sites the cost of site acquisition is not a consideration and applicants will need to demonstrate that the proposed infrastructure cannot be disaggregated on to smaller sites within the borough or elsewhere. In circumstances where it is deemed that the need to provide essential infrastructure outweighs the

protection of nature conservation features harm may be permitted. Compensatory measures of an equivalent nature conservation value will be required to offset the harm caused by the development. It should be noted that some habitats take hundreds of years to become established in their current form and therefore it may be impossible to secure a like-for-like replacement.

**9.31** Some species of flora and fauna are protected by national and international legislation. The habitats of certain wildlife species are also specifically protected, although the retention of the habitats and adequate foraging areas of all protected species are considered essential for their survival. Specially protected species can be found throughout the borough, they are not restricted to designated sites of nature conservation interest. It is therefore always necessary to consider the presence of specially protected species.

**9.32** An ecological assessment will be required for developments which will impact land with biodiversity or geo-diversity value. An assessment is also required if a development impacts on species or habits protected by British or European law, included within a Biodiversity Action Plan or when the Council is presented with evidence of protected species. Where an ecological assessment is needed to support a planning application the Council will require the applicant to pay for an additional independent assessment to be carried on out on behalf of the local authority.

### **Key supporting documents**

- Review of Sites of Nature Conservation Importance (2013 and 2014)

## Trees

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 9
- Strategic Objective 10
- Policy SP7.3

- Policy SP7.4
- Policy SP7.5

### Unitary Development Plan policies to be replaced by this policy

- NC4 Woodland, Trees and Hedgerows
- UD14 Landscape Design

### Why we need this policy

**9.33** Croydon has strategic objectives to ensure the responsible use of land and natural resources to mitigate and adapt to climate change, to increase the quality of and access to green space and nature, and to protect and enhance biodiversity.

### Policy DM29: Trees

The Council will seek to protect and enhance the borough's woodlands, trees and hedgerows by:

- a) Ensuring that all development proposals accord with the recommendations of BS5837 2012 (Trees in relation to design, demolition and construction) or equivalent;
- b) Not permitting development that results in the loss or the excessive pruning of preserved trees or retained trees where they make a contribution to the character of the area;
- c) Not permitting development that could result in the future loss or excessive pruning of preserved trees or trees that make a contribution to the character of the area; and

- d) Not permitting development resulting in the loss or deterioration of irreplaceable habitats, including ancient woodland, hedgerows and veteran trees; and
- e) Producing a tree strategy outlining how the local authority will manage its tree stock and influence the management of those trees subject to a Tree Preservation Order.

### **How the policy works**

**9.34** The London Plan and the London Tree and Woodland Framework outline the Right Place Right Tree approach. Available space, the relationship to buildings and ultimate mature tree size will be taken into account by the Council when designing/accepting layouts to avoid causing future relationship issues. The presumption should be in favour of larger trees.

**9.35** Examples of types of development that could result in the future loss or excessive pruning of preserved trees or trees that make a contribution to the character of an area include new buildings in close proximity to the tree; or new roads within or accessing a development that pass within close proximity to a tree.

**9.36** In all cases where the proposed development could result in the future loss or excessive pruning of preserved trees or trees that make a contribution to the character of an area, an application will need to be accompanied by sufficient information in accordance with BS5837 Trees in relation to design, demolition and construction (2012), or any successor British Standard to determine the future impact upon the trees.

**9.37** Exceptionally the Council may permit development where the loss of the tree is unavoidable and there are clear benefits that outweigh the harm caused by the loss of the tree. In such cases the Council may impose a condition to require its replacement either, if practicable and acceptable on-site, and if not possible nor acceptable on-site, in another location where it might contribute to

the amenity and biodiversity of the local area. When replacing trees proposals should meet the requirements of Policy DM11.8.

### **Key supporting documents**

- BS5837 Trees in relation to design, demolition and construction (2012) or any successor British Standard

# 10. Transport and Communication

Promoting sustainable travel and reducing congestion

## Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 8
- Policy SP8.3
- Policy SP8.4

- Policy SP8.6
- Policy SP8.7

## Unitary Development Plan policies to be replaced by this policy

- UD13 Parking Design and Layout
- T2 Traffic Generation from Development
- T4 Cycling

### Why we need this policy

**10.1** Croydon has a strategic objective to improve accessibility, connectivity, sustainability and ease of movement to, from and within the borough.

**10.2** Strategic Policy SP8 provides a strategic overview for reducing congestion and improving highway safety. This policy extends this approach to ensure that individual developments consider these matters.

**10.3** Cycling, walking and increasing use of public transport promote physical activity, improve mental health and reduce physical obesity.

**10.4** Croydon suffers from congestion in a number of locations identified in the Croydon Opportunity Area Planning Framework - Strategic Transport Study. Congestion hinders Croydon's economic regeneration and development. A study from Portland, USA has calculated that congestion costs it \$844m annually<sup>28</sup>. Congestion and use of private transport also leads to increased carbon emissions in the borough. Croydon produces 1,660kt of CO<sub>2</sub> a year which puts it at seventh highest out of 33 London boroughs. The London Plan includes a target to reduce CO<sub>2</sub> emissions by 60% by 2025, the Climate Change Act sets out that

<sup>28</sup> [http://www.portofportland.com/PDFPOP/Trade\\_Trans\\_Studies\\_CoC\\_Report1128Final.pdf](http://www.portofportland.com/PDFPOP/Trade_Trans_Studies_CoC_Report1128Final.pdf)

emissions will be reduced by 80% by 2050 (based on 1990 levels).

### Policy DM30: Promoting sustainable travel and reducing congestion

To promote sustainable growth in Croydon and reduce the impact of traffic congestion development should:

- a) Promote measures to increase the use of public transport, cycling and walking;
- b) Have a positive impact and must not have a detrimental impact on highway safety for pedestrians, cyclists, public transport users and private vehicles; and
- c) Not result in a severe impact on the transport networks local to the site.

#### How the policy works

**10.5** All development has an impact on traffic movement in the borough. In order to reduce the impact on traffic movement the Council will require new development to promote measures to increase the use of public transport, cycling and walking. This includes ensuring new development has good access to public transport and has good links to main pedestrian and cycle routes in the borough. The design of new developments should prioritise walking and cycling routes into and through developments over routes for cars. Designs should also prioritise access to public transport over accessibility to private motor cars.

**10.6** Some development would result in a severe impact on the local transport networks. A severe impact is one which would detract from the economic and environmental regeneration of the borough by making Croydon less accessible and a less attractive location in which to develop. Such development will not be permitted. Transport for London and Network Rail will be consulted on planning applications that could result in such an impact on the borough.

**10.7** All major development proposals<sup>29</sup> should demonstrate by means of a Transport Assessment, Travel Plan, Construction Logistics Plan and Delivery & Servicing Plan, or equivalents, how they will promote measures to increase the use of public transport, cycling and walking and that they will not result in a severe impact on the local transport networks.

**10.8** The extent of the local road network will vary depending on the location, scale and type of the development but will always include the routes from the development site to the Strategic Road Network. For developments located on a Strategic Road the local road network will include the entire Strategic Road Network within and leading into the borough.

**10.9** The extent of the local public transport network includes bus routes within a 10 minute walk, tram routes and train stations within a 15 minute walk and cycle and walking routes within 15 minutes of the development. The exact extent of the local transport networks should be considered in the Transport Assessment.

<sup>29</sup> Residential development of 10 or more units, 1,000m<sup>2</sup> of non-residential floor space or a development of 0.5ha or more in extent

**10.10** The Croydon Local Plan: Strategic Policies require new developments to increase the permeability and connectivity for pedestrians and cyclists of their sites and to create new cycle routes in their developments.

## Car and cycle parking in new development

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 8
- Strategic Objective 9
- Policy SP8.15

- Policy SP8.16
- Policy SP8.17

### Unitary Development Plan policies to be replaced by this policy

- UD13 Parking Design and Layout
- T8 Car Parking Standards in New Development

### Why we need this policy

**10.11** Croydon has strategic objectives to improve accessibility, connectivity, sustainability and ease of movement to, from and within the borough and to ensure the responsible use of land and natural resources and management of waste to mitigate and adapt to climate change.

**10.12** Croydon Local Plan Strategic Policy SP8 sets basic car parking standards by referring to pan-London standards set by the London Plan. These are sufficient for managing the overall provision of car parking in new development. However as some potential users of car parking have particular requirements these need to be covered in a Croydon-specific policy.

**10.13** This policy provides further requirements in terms of the quality of provision and how the parking should be provided.

**10.14** Occupiers of affordable housing also require car parking spaces although on average car ownership is 30-60% less than that of owner occupied homes.

## Policy DM31: Car and cycle parking in new development

To promote sustainable growth in Croydon and reduce the impact of car parking new development must:

- a) Reduce the impact of car parking in any development located in areas of good public transport accessibility<sup>30</sup> or areas of existing on-street parking stress;
- b) Ensure that the movement of pedestrians, cycles, public transport and emergency services is not impeded by the provision of car parking;
- c) Ensure that highway safety is not compromised by the provision of car parking including off street parking where it requires a new dropped kerb on the strategic road network and other key roads identified on the Policies Map;
- d) If the development would result in the loss of existing car parking spaces, demonstrate that there is no need for these car parking spaces;
- e) Provide car and cycle parking spaces as set out in Table 10.1;
- f) Ensure that cycle parking is designed so that it is secure and can also be used for parking for mobility scooters and motor cycles; and
- g) Provide car parking for affordable homes at an average rate not less than  $\frac{2}{3}$  that of other tenures.

**Table 10.1 Car parking in new development**

<b>Development type</b>	<b>On-site car club/Pool car parking spaces</b>	<b>Electric charging points and parking bays</b>	<b>Disabled car parking</b>	<b>Overall number of car parking spaces</b>	<b>Overall number of cycle parking spaces including motor cycles and mobility scooters</b>
Minor Residential <sup>31</sup>	n/a	Enable the future provision of electric charging points and parking bays for electric vehicles	n/a	As per London Plan Table 6.2 with no provision for higher levels of car parking in areas with low	As per London Plan Table 6.3 with cycle parking in major development to

<sup>30</sup> Public Transport Accessibility Level (PTAL) rating of 4 or more.

<sup>31</sup> Nine or fewer residential units on a site less than 0.5ha in extent.

<b>Development type</b>	<b>On-site car club/Pool car parking spaces</b>	<b>Electric charging points and parking bays</b>	<b>Disabled car parking</b>	<b>Overall number of car parking spaces</b>	<b>Overall number of cycle parking spaces including motor cycles and mobility scooters</b>
Major Residential <sup>32</sup>	At least 5% of the total number of spaces with a minimum of 1 parking space plus additional spaces at a rate of 1 space for every 20 spaces below the maximum overall number of car parking spaces set out in Table 6.2 of the London Plan.	Enable the future provision of electric charging points and parking bays for electric vehicles with half of car club bays to have an actual charging point	10% of visitor parking with a minimum of 1 space plus 1 disabled car parking space for each new dwelling designed to be wheelchair accessible or adaptable with half of bays to have electric vehicle charging	Public Transport Accessibility Levels	include charging for electric bicycles
Minor Non-residential <sup>33</sup>	n/a	n/a	As per London Plan Table 6.2	As per London Plan Table 6.2

<sup>32</sup> 10 or more residential units or a site of more than 0.5ha

<sup>33</sup> Less than 1,000m<sup>2</sup> of non-residential floor space on a site less than 0.5ha in extent

<sup>34</sup> A site of more than 0.5ha or more than 1,000m<sup>2</sup> of non-residential floor space

## How the policy works

**10.15** In locations such as Croydon Metropolitan Centre or District Centres with a minimum Public Transport Accessibility Level<sup>35</sup> rating of 5, the Council will consider developments with a reduced amount of parking. If a reduced amount of car parking is provided then a corresponding proportionate increase in car club or pool car spaces will need to be provided to compensate for the reduction in private car parking. This will need to be at a rate of one car club or pool car space for every twenty private car parking spaces that haven't been provided.

**10.16** Growth will take place throughout the urban area of the borough through development that complements and enhances the character of each area. As each area of the borough becomes more sustainable through growth it should encourage greater provision of public transport in areas that currently have a low Public Transport Accessibility Level. Therefore, no allowance is proposed for higher levels of car parking in residential development in these areas.

**10.17** It is recognised that sustainable growth of the suburbs will take place over the whole Plan period and that in the early years the public transport infrastructure necessary to support that growth may not exist in all areas with a low Public Transport Accessibility Level of 0, 1a or 1b. Therefore, in the early years of the Plan, it may therefore be acceptable for an increased provision of private car parking to be provided in developments in areas with a low Public Transport Accessibility Level if justified by a transport assessment. The transport assessment needs to demonstrate that the public transport provision will not be sufficient to service the development within the first three years following granting of

planning permission, that it is not reasonable to walk or cycle to the nearest railway station, and that there is no interest from car clubs in operating from the location at the time planning permission is sought.

**10.18** Car parking in new development can be visually intrusive and reduce the amount of land available for outdoor private amenity space within developments. In areas of good public transport accessibility new developments must reduce the visual impact of car parking. This may include use of underground car parking, reduced provision of car parking spaces within the development or active promotion of alternatives to private car use including car clubs, encouraging use of public transport by residents and enhanced provision of covered and secure cycle parking.

**10.19** Car parking, when integrated into new development, can enhance the street scene. However, car parking can also be a barrier to pedestrians, cycles and emergency services as well as detracting from the character of an area. Therefore, it is important that car parking provision is considered at the outset of a development and fully integrated in the design.

**10.20** Some areas of the borough already have a street parking permit system in operation and existing on-street parking is at a premium. In these locations developments will also need to promote alternatives to private car use, again including car clubs, encouraging use of public transport by residents and enhanced provision of covered and secure cycle parking.

**10.21** Not all existing car parking is needed and sometimes the redevelopment of an existing car park (either public or private) will help to provide much needed homes, social infrastructure and employment. In order to ensure that sufficient car parking is provided in schemes involving the redevelopment of an existing car park, applicants will need to demonstrate that there is no need

---

<sup>35</sup> Public Transport Accessibility Level – a rating of accessibility provided by Transport for London

for any car parking spaces that are proposed to be lost. Need should be demonstrated through occupancy surveys of both the existing car park and other car parks serving the same area and must cover a range of times and dates such that peak operating times are surveyed.

**10.22** It is important that spaces provided for an on-site car club or pool car are used by a provider of these vehicles. The Council will enter a legal agreement with developers of qualifying developments to ensure that the spaces are used for their intended purpose.

**10.23** The London Plan sets out maximum car parking standards for residential developments based on public transport accessibility levels and local character. In many schemes in areas such as the Croydon Opportunity Area and District Centres where there are higher levels of public transport accessibility schemes with reduced levels of overall car parking may be acceptable. However, where there are reduced levels of overall car parking there should be a commensurate increase in provision of car club or pool car parking spaces. This is to ensure that reduced overall levels of car parking do not result in increased pressure on street parking, particularly in those areas without Controlled Parking Zones.

**10.24** In circumstances where the car club is not accessible to the wider community, in low density areas or where it is not commercially viable, the Council will expect developers to work with a car club operator to find a suitable site from which a car club would operate. In these circumstances the developer will be expected to fund a Traffic Regulation Order and the lining and signing of an on-street parking bay. This will ensure the parking space will be used by a car club operator and is accessible to both the development and the wider community.

**10.25** Croydon recognises that in many residential developments parking spaces are allocated to particular units and that electric car charging points may not be provided in the correct spaces. Therefore, all spaces in residential developments need to be enabled for future use by electric cars by ensuring the necessary infrastructure with the exception of actual charging points is integrated from the start.

**10.26** Non-residential developments are less likely to have a single assigned parking space per unit. Therefore, electric car parking spaces should be provided in accord with London Plan standards.

**10.27** New development should also provide cycle parking in accord with the standards set out in the London Plan.

**10.28** The Croydon Opportunity Area Planning Framework provides further guidance on provision of car parking within the Croydon Opportunity Area.

### **Key supporting documents**

- Croydon Opportunity Area Planning Framework

## Restricting temporary car parks

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 1
- Strategic Objective 5

- Strategic Objective 9
- Policy SP1.1

### Unitary Development Plan policies to be replaced by this policy

- None

### Why we need this policy

**10.29** Croydon has strategic objectives to be the premier business location in South London and the Gatwick Diamond, to ensure that new development is high quality and integrates with the borough's built heritage, and to ensure the responsible use of land. Croydon Local Plan Strategic Policy SP1.1 requires all new development to contribute to enhancing a sense of place and improve the character of an area.

**10.30** The Croydon Local Plan: Strategic Policies encourages temporary uses to use under used and vacant spaces and buildings in the borough. This approach to the re-use of vacant spaces would be undermined if temporary car parks were allowed on these spaces as they can be easier to set up compared to other temporary uses. Temporary car parks could also undermine future car parking strategies for the borough.

**10.31** The Croydon Local Plan: Strategic Policies supports the use of vacant buildings and cleared sites by cultural and creative industries and community uses. It also supports their use for food growing and tree planting.

### Policy DM32: Restricting temporary car parks

To enhance a sense of place and improving the character of an area, permission will only be granted on empty spaces for temporary uses that are not temporary car parks.

### How the policy works

**10.32** Cultural and creative industries and community uses are considered preferable to temporary car parks as they are likely to

bring greater economic and regeneration benefits to the borough. Temporary car parks are also less likely to improve the character of an area or contribute to enhancing a sense of place.

**10.33** Temporary uses can include both specialist organisations such as ACAVA and Acme Studios and community groups, along with temporary landscaping or urban agriculture.

**10.34** Where a temporary car park is required because a nearby permanent car park is undergoing redevelopment (including replacement car parking), the Council may accept a proposal for a temporary car park to ensure that there is continued provision of car parking in a locality whilst redevelopment takes place.

## Facilitating rail and tram improvements

### Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 8

- Policy SP8

### Unitary Development Plan policies to be replaced

- None

#### Why we need this policy

**10.35** Network Rail, as part of a programme of capacity improvements on the Brighton Mainline railway, are proposing to construct an additional island platform at East Croydon station complete with two additional tracks. In addition a new track is proposed to run from East Croydon station to Windmill Bridge Junction (where the routes to London Victoria and London Bridge divide as well as a new grade separated junction. This will mean that trains running to and from London Victoria and London Bridge will be able to run into and out of East Croydon station simultaneously which they cannot do at the moment.

**10.36** The additional platform at East Croydon station, additional track to and grade separated junction at Windmill Bridge Junction will each require some land currently outside of Network Rail's ownership. To ensure that developments which would prevent the upgrading of this section of the Brighton Mainline from taking place do not occur in this area a policy is proposed to safeguard the land for works required to upgrade the railway line.

**10.37** Network Rail also requires additional land whilst the improvement works are underway to support them (such as supply sites and access points). Therefore, additional land is

identified on which Network Rail must be consulted about all proposals for development and safeguard against any development which would have a negative impact on the ability to upgrade the Brighton Mainline.

**10.38** Tramlink is currently developing a number of improvements to support frequency and capacity increases on the network including

- A loop around Dingwall Road;
- The Wandle Flyover Doubling proposal involving double-tracking of the single-track tramway between Wandle Park and Reeves Corner tram stops;
- The Old Town Loop/Reeves Corner Turnback proposal;
- A Reeves Corner westbound tram stop;
- Double-tracking of part or all of the tramway between Harrington Road and Beckenham Junction;
- Elmers End line enhancements; and
- Potential for a Tramlink extension beyond New Addington tram stop and twin tracking as part of the redevelopment and regeneration of New Addington District Centre

## Policy DM33: Facilitating rail and tram improvements

Development will not be supported where it might prejudice the implementation of:

- a) Station improvement schemes or other proposals to upgrade train services along the Brighton Main Line corridor; or
- b) Infrastructure extensions or other operational improvements to increase capacity of the Tramlink network.

### How the policy works

**10.39** A prejudicial impact on the upgrading of the Brighton Mainline is defined as any impact which would prevent improvement works taking place including but not limited to conflicting construction works or use that would not be compatible with works associated with the construction of the Brighton Mainline.

**10.40** Likewise a prejudicial impact on infrastructure extensions or other operational improvements to increase capacity of the Tramlink network is defined as any impact which would prevent improvement works taking place including but not limited to conflicting construction works or use that would not be compatible with Tramlink improvements.

## Telecommunications

### Strategic Objectives and related Croydon Local Plan strategic policies

- Policy SP8

### Unitary Development Plan policies to be replaced

- CS6 Telecommunications

### Why we need this policy

**10.41** A policy on telecommunications is proposed as there are specific locational criteria regarding telecommunications equipment that would not be adequately covered by other policies of the Plan.

### Policy DM34: Telecommunications

**DM34.1** When planning permission is required proposals for telecommunications development will be permitted provided that:

- a) If proposing a new mast, it has been demonstrated that there are no existing buildings, masts or other structures on which the proposed apparatus can be sited;
- b) If proposing telecommunications development in Metropolitan Green Belt it has been demonstrated that there are no suitable sites that are not in Metropolitan Green Belt and there is no impact on openness;
- c) If proposing telecommunications development on Metropolitan Open Land it has been demonstrated that there are no suitable sites that are not on Metropolitan Open Land and there is no impact on the existing purpose of the site and its reason for it being designated as Metropolitan Open Land; and
- d) The siting of the proposed apparatus and associated structures minimises the impact on the operation of other electronic devices within the surrounding area.

**DM34.2** Telecommunication development on a building or other existing structure should be sited and designed to minimise impact to

the external appearance of the host building or structure.

### How the policy works

**10.42** Not all telecommunications development requires planning permission. Part 16 of the General Permitted Development Order (2015) sets out the circumstances when planning permission is required and when this policy will, therefore, apply. Under the General Permitted Development order most masts under 10m in height do not require planning permission and all masts over 15m will require planning permission.

**10.43** Telecommunications equipment should be located on existing structures where possible. If locating equipment on an existing telecommunications structure then information will need to be submitted with any application for prior approval or planning permission that the cumulative exposure, when operational, will not exceed International Commission on non-ionising radiation protection guidelines.

**10.44** The National Planning Policy Framework does not list telecommunications equipment as being acceptable in Green Belt. Proposals for new telecommunications equipment need to demonstrate exceptional circumstances before being permitted in Green Belt (and by default, Metropolitan Open Land).

**10.45** Therefore, new telecommunications equipment will only be permitted in Metropolitan Green Belt or Metropolitan Open Land if it has first been demonstrated that there are no suitable sites outside of Metropolitan Green Belt or Metropolitan Open Land. These sites do not have to be within the borough boundary of Croydon. Furthermore, any ancillary facilities associated with a new telecommunications equipment must be kept to a minimum so that there is no impact on openness of both Metropolitan Green Belt or Metropolitan Open Land and its reason for being

designated as Metropolitan Open Land, if it is a site on Metropolitan Open Land.

**10.46** Telecommunications equipment is not acceptable on Local Green Space

# The Places of Croydon

The content of this section is related to the theme of Croydon as 'A Place of Opportunity'. It adds further detail to the Croydon Local Plan: Strategic Policies on planning for the sixteen Places of Croydon. It contains the Council's policies that would specifically apply to a Place and all the Detailed Proposals.

# 11. The Places of Croydon

The Place-specific policies

## Strategic Objectives and related Croydon Local Plan strategic policies

- Strategic Objective 5
- Strategic Objective 7
- Strategic Objective 8
- Strategic Objective 10

- Policy SP1
- Policy SP2.2
- Policy SP4.1

## Unitary Development Plan policies to be replaced by these policies

- H3 Planning Commitments and Identifying Housing Sites
- RO7 Cane Hill Hospital Site
- Schedule 1a Housing Sites

- Schedule 1b Mixed Use Sites with a Housing Element
- Schedule 1c Other Non-Residential Proposal Sites
- Schedule 1d Proposal Sites within the Croydon Metropolitan Centre, Town, District or Local Centres

## Why we need these policies

**11.1** The main objective of these policies will be to provide additional Place-specific development management policies to provide greater clarity and certainty that proposed developments are in line with the objectives of Croydon Local Plan Strategic Policy SP4. These policies should be read in conjunction with the Borough Character Appraisal including the Character Typology.

**11.2** The aspiration to achieve good design while retaining and improving the distinctiveness of each of Croydon's Places has

created the need to provide further design detail in the form of Place-specific development management policies. These additional policies will provide greater clarity and provide management guidelines for proposals within District and Local Centres and in locations outside of the masterplan areas, Conservation Areas, Local Heritage Areas or the Croydon Opportunity Area.

**11.3** An evaluation of local character was conducted to identify the locations in each of Croydon's 16 Places where Place-specific development management policies would be beneficial.

**11.4** The consistent theme within these Places was the need to identify management guidelines for major junctions, District Centres and Local Centres. These additional Place-specific development management policies will only be applicable within the areas identified on the Policies Map.

**11.5** In specific areas where it is unclear which predominant character should be referenced, additional place specific development management policies have been included.

**11.6** In other areas where no Place-specific development management policy applies the character can be managed through other policies within this Plan along with the masterplans, Conservation Area Appraisal and Management Plans, Local Heritage Areas and the Croydon Opportunity Area Planning Framework.

**11.7** The Place-specific policies also include all the Detailed Proposal sites in each Place. Full details of each Detailed Proposal including the reasons why particular uses are proposed can be found in Appendix 5.

#### Policy DM35: Positive character of the Places of Croydon

**DM35.1** To ensure that the Council's aspirations and objectives for each of Croydon's 16 Places is clearly reflected in the built environment proposals should complement and enhance the predominant positive character types identified in each of the 16 Places.

**DM35.2** The Council encourages the minimum height of 3 storeys for developments across the borough, subject to high quality design, other policies' compliance and cumulative impact on community and transport infrastructure.

**DM35.3** In specific locations identified on the Policies Map development should also refer to and be informed by the Place-specific policy.

**DM35.4** In specific locations identified on the Policies Map to maximise the potential for sustainable growth in the 16 Places, the Council will support the intensification of areas which are developable, where there is adequate provision of community infrastructure, good accessibility to public transport and open space and schools.

#### Proposed amendments to the Policies Map

The Place-specific development management policies identify specific locations with less consistent character where the criteria

of Policies DM36 to DM51 apply. As these are new designations they will need to be shown on the Policies Map. A list of all proposed Place-specific policies is shown in Table 11.1 and *The draft Policies Map* has details of all proposed areas where a

proposed Place-specific development management policy will apply, including maps.

**Table 11.1 Proposed Place-specific development management policies (see Policies DM32 to DM47 and *The draft Policies Map* for full details)**

Place-specific development management policy	Policy ref	New
New Addington District Centre	DM36.1	✓
Addiscombe District Centre	DM37.1	✓

Settings of Shirley Local Centre and Shirley Road Neighbourhood Centre	✓

### How the policy works

**11.8** The Council recognises the need to proactively plan for the population growth. The challenge for the Croydon Local Plan: Strategic Policies is to respect local character and distinctiveness whilst accommodating growth. Croydon's aspiration is for this to be done in a way that contributes to the improvement of each of Croydon's 16 places and accommodated in the following ways as set out in Table 11.3 below:

**Table 11.3 Accommodating growth and improving Croydon**

Method of accommodating growth and improving Croydon	How it works	Applicable policies
Evolution without significant change of area's character	Each character type has a capacity for growth. Natural evolution is an ongoing process where development occurs in a way that positively responds to the local context and seeks to reinforce and enhance the existing predominant local character. Most development throughout the borough will be of this nature.	DM35.1 DM35.2

Method of accommodating growth and improving Croydon	How it works	Applicable policies
Guided intensification associated with enhancement of area's local character	Areas where the local character cannot be determined as a result of no one character being dominant further growth can be accommodated through place specific enhancement policies.	DM36 – DM51
Focused intensification associated with change of area's local character	Further growth can be accommodated through more efficient use of infrastructure. Due to the high availability of community and commercial services intensification will be supported in and around District, Local and potential Neighbourhood Centres which have sufficient capacity for growth.	DM35.4
Redevelopment	In larger areas where growth would result in a change to the local character it must be supported by masterplans or design codes.	DM38.2 DM40.1 DM51.1

### Evolution without significant change of area's character

**11.9** There are existing residential areas which have the capacity to accommodate growth without significant impact on their character. In these locations new residential units can be created through the following interventions.

- a) Conversion – The conversion or subdivision of large buildings into multiple dwellings without major alterations to the size of the building.
- b) Addition – This can include one or more extensions to the side, rear, front or on the roof, and is often combined with conversion of the existing building into flats.
- c) In-fill including plot subdivision – Filling in gaps and left over spaces between existing properties. It can also include subdivision of large plots of land into smaller parcels of land with a layout that complements the existing urban pattern.
- d) Rear garden development – The construction of new buildings in rear gardens of the existing properties. Houses must be subservient in scale to the main house.
- e) Regeneration – The replacement of the existing buildings (including the replacement of detached or semi-detached houses with flats) with a development that increases the density and massing, within the broad parameters of the existing local character reflected in the form of buildings and street scene in particular.

**11.10** The level of growth is depends on existing local character. The capacity for natural evolution is dependent upon the local character typology. The new development should not adversely impact on the predominant character.

**11.11** Table 11.4 below shows the types of interventions suitable for each type of local character:

**Table 11.4 Interventions suitable for each type of local character**

Local character types	Conversion	Additions	In-fill and Plot Subdivision	Rear garden development	Regeneration
-----------------------	------------	-----------	------------------------------	-------------------------	--------------

Shopping Centres Precincts & Town Centres					
Transport Nodes		✓	✓		✓

**11.12** To accommodate growth which would complement the existing individual character of Places of Croydon and improve efficiency of land use, The Council promotes the minimum buildings' height of three storeys. This applies to existing and new constructions across the borough, in suburban areas predominantly developed with 2 storey buildings in particular.

Focussed intensification associated with gradual change of area's local character

**11.13** Focussed intensification aims to maximise use of the existing growth capacity and to support sustainable spatial vision for the borough.

**11.14** New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. Height increase should be up to double the predominant height of buildings in the area.

**11.15** The promoted character types for the areas of focussed intensification are: 'Medium-rise Blocks With Associated Grounds', 'Large Buildings With Spacing' and 'Large Buildings With Continuous Frontage Line'. Their gradual introduction will alter over time the predominant character of intensified areas. The existing local character, site context and proximity to services determine whether concentrated (urban) or spacious (suburban) form of intensification would be appropriate. The list below explains the differences between the two.

- a) Urban type of focussed intensification would be appropriate in the central sections with shopping parades – New developments that form continuous street frontages are more appropriate in an urban context. This type of growth is acceptable in locations with a high to good PTAL, level 4 and higher. Access to public open space should be within the 400m walking distance. The new development should positively interact with public realm and be accessible directly from the street scene.
- b) Suburban type of focussed intensification would be appropriate for the areas surrounding central sections with shopping parades – Buildings with spacing between are more appropriate in a suburban context. This type of growth is acceptable in locations with a good to moderate PTAL, level 3 to 4, and moderate access to open space, within 800m walking

distance. The new development should retain vistas and physical connections to green open spaces between buildings in order to enhance the openness of the local character.

**11.16** Parts of the area between Kenley station and Godstone Road and Brighton Road (Sanderstead Road) Local Centre with the setting are located in Flood Zones 2 or 3. A Strategic Flood Risk Assessment is being prepared which will assess whether these areas can be made safe for the lifetime of any development from any risk of flooding.

## Addington

### General character

**11.17** The character of Addington is defined by extensive areas of Metropolitan Green Belt such as Birch Wood, Frith Wood, Rowdown Wood and North Downs. These green areas provide the setting for the Addington Village; and the 20th century housing estates in New Addington which comprise of 'Local Authority Built Housing with Public Realm' and 'Compact Houses on Relatively Small Plots' in Fieldway, both with scattered sections 'Medium Rise Blocks With Associated Grounds' and 'Tower Buildings'.

**11.18** Apart from the historic Addington Village, the Place is served by two 'Suburban Shopping Character Areas', Central Parade in New Addington (the District Centre) and Wayside in Fieldway.

**11.19** The spine of Central Parade separates the less green 'Suburban Shopping Character Area' of New Addington's District Centre from the area containing leisure and community facilities, with a character of 'Institutions with Associated Grounds'. In addition to these character types, Addington has a number of areas, located to the west and east of Central Parade, with an 'Industrial Estate' character. With the exception of Central Parade, these character areas are generally consistent and can be successfully managed through the policies of this Plan.

**11.20** The Addington Village Conservation Area incorporates a historic village with medieval origins in a rural setting. The village's architecture represents a variety of character types from various historical periods. The predominant types are: 'Scattered Houses on Large Plots' and 'Detached Houses on Relatively Large Plots'.

### Policy DM36: Addington

**DM36.1** Within the New Addington District Centre, to ensure that the District Centre characteristics are respected and enhanced proposals should:

- a) Make use of opportunities to create buildings with a larger footprint to the west of Central Parade; or
- b) Create buildings with smaller footprints that complement existing predominant building heights of 3 storeys up to 12 storeys within Central Parade.

**DM36.2** Within Addington allocate sites for development as set out in Table 11.5.

### How the policy works

#### New Addington District Centre

**11.21** The area in which DM36.1 applies is shown on the draft Policies Map.

**11.22** The 'Suburban Shopping Area' character on Central Parade is characterised by consistent building lines, setbacks and rhythm of facades and fenestration. This uniformity can be managed through other policies in the Croydon Local Plan. However, additional policies are required to manage the area to the west of Central Parade where there are precedents of large

and tall buildings. This location presents opportunities for growth through the creation of large or tall buildings.

Allocating land for development

**11.23** Table 11.5 below sets out the proposed use on specific sites in Addington. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.5 Proposals for uses of land of specific sites in Addington**

<b>Ref no</b>	<b>Site name</b>	<b>Proposed use</b>
44	Central Parade West, Central Parade	Mixed development including residential, community, healthcare facility, leisure, retail and open space
120	Timebridge Community Centre, Field Way	Residential development including replacement community facilities. Any loss of playing fields must be reprovided and provision of a family centre shall be continuous during the construction stage.
636	Land west of Timebridge Community Centre, Lodge Lane	Secondary school

## Addiscombe

### General character

**11.24** Addiscombe is a suburban residential settlement, framed by green areas on the eastern side and the high density Croydon Opportunity Area to the west. This Place is influenced by and evolved as an extension of the Croydon Metropolitan Centre. The non-residential character consists of 'Urban Shopping Areas' (concentrated along the Lower Addiscombe Road corridor and the Shirley Road/Bingham Road Junction); and 'Industrial Estates' within the interiors of blocks, interlaced with houses.

**11.25** The residential character consists of a varied yet balanced mix of 'Terraced Houses and Cottages' in the north west of this Place, mix of 'Medium Rise Blocks With Associated Grounds' and 'Compact Houses on Relatively Small Plots' in the south west (between East Croydon and the Addiscombe tram stop and Lloyd Park, 'Detached Houses on Relatively Large Plots' in south east and 'Local Authority Housing With Public Realm' in the north. Some isolated residential 'Tower Buildings' and 'Large buildings With Spacing' are scattered in the centre, in the vicinity of Lower Addiscombe Road.

**11.26** The East India Estate Conservation Area protects and preserves the historic character of 'Large Houses on Relatively

Small Plots'. The Conservation Area covers a distinctive layout and architecture of residential suburb built on land owned and occupied by the former East India Trading Company Military Academy.

**11.27** The St Bernards Conservation Area contains 'Compact Houses on Relatively Small Plots'. It is a notable section of the Park Hill Estate completed in 1971 to an award winning international design by Swiss firm Atelier 5.

**11.28** The Addiscombe College Estate Local Heritage Area designation recognises the historical significance of the collection of preserved Victorian houses built between 1862 and 1900 on the land belonging to East India Trading Company. It represents mix of 'Terraced Houses and Cottages' and 'Large Houses on Relatively Small Plots'.

**11.29** Bingham Road Local Heritage Area designation recognises the heritage significance of the authentic and distinctive architecture of the Edwardian Addiscombe, 'Planned Estates of Semi-Detached Houses'.

### Policy DM37: Addiscombe

**DM37.1** Within the Addiscombe District Centre, to ensure that the Distinct Centre characteristics are respected and enhanced proposals should:

a) Complement existing predominant building heights of 2 storeys up to 4 storeys and a maximum of 5 storeys around the Lower

Addiscombe Road and Blackhorse Lane Junction;

- b) Retain the rhythm, size and the continuity of ground floor active frontages<sup>36</sup>;
- c) Allow flexibility at first floor and above for mixed use;
- d) Retain, enhance and positively reference corner features such as the articulation of corner buildings and architectural features such as domed projecting bays with finials and the projecting double gable ends running at 90 degree angles interrupting the running cornices;
- e) Incorporate or retain traditional shop front elements such as stall riser's fascias and pilasters; and
- f) Incorporate multi-stock brick as the predominant facing materials of the whole building.

**DM37.2** In the area between Addiscombe Railway Park & Lower Addiscombe Road (Section between Leslie Park Road & Grant Road), to ensure changes to the character of this area are carried out in a way that strikes a balance between enhancing the existing character and facilitating growth, proposals should:

- a) Retain the predominant residential building lines and the open character of front gardens;
- b) Respond to the fine grain<sup>37</sup> of the existing residential developments;
- c) Complement the existing predominant building heights of 3 storeys up to 4 storeys;
- d) Incorporate multi-stock brick and white render as the predominant facing materials of the whole building; and
- e) Enhance existing and provide new direct public walking and cycling routes to Addiscombe Railway Park by working with the Council and its partners to incorporate sections of the route as part of schemes.

**DM37.3** Within Addiscombe allocate sites for development as set out in Table 11.6.

---

<sup>36</sup> These buildings have few or no blank facades. At ground floor the buildings contain uses that frame the street or space and active upper floors with little or no obscure or frosted glazing. Active frontages encourage visual and/or physical interaction between the private uses inside and the public uses outside. Visual interaction is achieved by creating views or glimpses through windows, projecting bays, balconies and doors into or out of a building. Physical interaction encourages people to come into a building or has indoor uses that spill out onto the street.

<sup>37</sup> Grain also called urban grain. It describes the pattern of the arrangement and size of buildings within a settlement and the degree by which an area's pattern of streets-blocks and junctions are respectively small and frequent (fine grain) or large and infrequent (course grain).

## How the policy works

**11.30** The areas in which Policies DM37.1 and DM37.2 apply are shown on on the draft Policies Map.

### Addiscombe District Centre

**11.31** The character of Addiscombe District Centre is defined by the predominance of the 'Urban Shopping Area' character along the northern side of Lower Addiscombe Road. The beginning and end of this character is marked by two triangular urban spaces.

**11.32** Addiscombe District Centre has managed to retain the village feel that contributes to its distinctive sense of place. The fine urban grain and consistent rhythm, frontage widths and setback of the buildings reinforce the relationship with the architecturally consistent Victorian and Edwardian 'Terraced Houses and Cottages' sited on the southern side of Lower Addiscombe Road.

**11.33** The Lower Addiscombe Road/Inglis Road junction area has a distinctive block composition and architectural detailing. The junctions are defined by symmetrical buildings with consistent heights and strongly defined corners. Detailing, such as domed projecting bays with finials and the projecting double gable ends running at 90 degree angles interrupting the running cornices, contributes to Addiscombe's distinctiveness. Additionally, features, such as the articulation of corner buildings including ground floor entrances that address corners, are a characteristic feature throughout the District Centre and should be referenced.

**11.34** The western section of the 'Urban Shopping Area' has a distinct non-residential appearance. This is reflected in the building heights and facing materials which are predominantly red multi stock brick. The eastern side mirrors the character of the adjacent residential areas. These buildings have ground floors that have been converted into commercial premises, whilst

preserving the residential appearance of the upper floors. The treatment of facades of these buildings gradually changes from multi stock brick to render. In order to preserve the distinction in appearance between the residential areas and the District Centre, new development should be encouraged to incorporate multi-stock brick.

**11.35** The Lower Addiscombe Road/Blackhorse Lane junction area is a formal, well defined urban public space framed on three sides by buildings with a predominant height of two to five storeys.

**11.36** The District Centre location and good transport links provides opportunities for densification of up to 5 storeys, preferably in locations on corner plots. It is considered that the retention of small traditional type shop frontages (including stall riser's fascias and pilasters) reinforces the distinctiveness of Addiscombe District Centre. Therefore it would not be appropriate to incorporate large and tall buildings within this location. Policy DM37.1 balances the need to facilitate growth and respect the existing character.

**11.37** This policy seeks to retain the continuity of plot widths, setbacks and traditional shop frontages (in line with the Shopfront Security Addendum to Supplementary Planning Guidance No.1 Shopfronts & Signs). This should not preclude growth, as growth may be still be achieved through creative design solutions such as amalgamating shop units to create one larger unit.

### Area between Addiscombe Railway Park & Lower Addiscombe Road (Section between Leslie Park Road & Grant Road)

**11.38** In this area the character of consists of 'Industrial Estates', 'Mixed Flats and Compact Houses', and sections of 'Terraced Houses and Cottages' and 'Local Authority Housing with Public Realm'.

**11.39** The character of this area has become fragmented as a result of development with an (urban) grain that is not in keeping with the character of the neighbouring buildings. This area is still undergoing change which will need to be managed. Policy DM37.2 will provide guidance to enable this to be carried out in a sensitive way.

Allocating land for development

**11.40** Table 11.6 below sets out the proposed use on specific sites in Addiscombe. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.6 Proposals for uses of land of specific sites in Addiscombe**

<b>Ref no</b>	<b>Site name</b>	<b>Proposed use</b>
68	130 Oval Road	Residential development
116	Rees House & Morland Lodge, Morland Road	Secondary School
474	Rear of The Cricketers, 47 Shirley Road	Residential development

## Broad Green and Selhurst

### General character

**11.41** Broad Green is a heavily urbanised area consisting of a variety of local character types. The south-western edge is defined by large 'Retail Estates and Business and Leisure Parks' along Purley Way and the greenery of Archbishop Lanfranc's playing field and Croydon Cemetery. The dominant and high density area along London Road corridor identifies the centre of this Place. The eastern edge is dominated by the railway and associated 'Industrial Estates' of the Selhurst area. Smaller scale historical industrial estates are often interlaced within the urban fabric. The predominant residential character type is 'Terraced Houses and Cottages', with scattered areas of 'Local Authority Housing with Associated Public Realm' with sections of 'Compact Houses on

Relatively Small Plots' and 'Medium Rise Blocks With Associated Grounds' scattered in the east and in the vicinity of Whitehorse Road. 'Large Buildings With Strong Frontage Line' and 'Large Buildings With Spacing' dominate along London Road.

**11.42** The London Road Broad Green Local Heritage Area represents an 'Urban Shopping Character Area'. It includes buildings with unique Arts and Crafts inspired architectural design from the beginning of the 20<sup>th</sup> century.

**11.43** Henderson Road Local Heritage Area is a distinctive example of 'Terraced Houses and Cottages' character. The designation recognises the heritage significance these well-preserved terraces of small Victorian maisonettes adjacent to the Local Historic Park of Whitehorse Recreational Ground.

### Policy DM38: Broad Green and Selhurst

**DM38.1** Within the Broad Green Local Centre, to ensure that proposals positively enhance and strengthen the character of Broad Green Local Centre, and facilitate growth, developments should:

- a) Sympathetically relate to the predominant building massing within the Local Centre boundaries;
- b) Positively reference, respect and enhance architectural features such as the consistent rhythm and articulation of windows and doors;
- c) Complement the existing predominant building heights of 2 storeys up to a maximum of 4 storeys; and
- d) Incorporate multi-stock brick as the predominant facing materials of the whole building.

**DM38.2** Within the area of the potential new Local Centre at Valley Park, to ensure development opportunities including public realm improvements are undertaken in a cohesive and coordinated manner and that they result in the creation of a Local Centre with a sense of place and distinct character, a masterplan with elements of design code will be developed.

**DM38.3** In the area of the Lombard Roundabout, to facilitate growth and to enhance the distinctive character of the Lombard

Roundabout Area proposals should:

- a) Complement the existing predominant building heights of 3 storeys up to a maximum of 6 storeys;
- b) Create a sense of continuity by setting back buildings from the street and create building lines and frontages which positively reference and respond to the junction;
- c) Address the deficiency in green infrastructure within the area by incorporating tree planting and greenery within the development; and
- d) Retain the extent and enhance the quality of the existing public realm within the development, including introducing large trees and other vegetation to balance the impact of large or tall buildings.

**DM38.4** In the area north of Broad Green Local Centre, to ensure that proposals enhance and strengthen the character of the area north of the Broad Green Local Centre, and facilitate growth, developments should:

- a) Retain and create glimpses and separation distances between buildings in order to improve the openness of London Road;
- b) Incorporate main pedestrian entrances onto London Road;
- c) Complement the existing predominant building heights of 3 storeys up to a maximum of 8 storeys; and
- d) Retain the extent and enhance the quality of the existing public realm within the development, including introducing large trees and other vegetation to balance the impact of large and tall buildings.

**DM38.5** In the area of the junction of Windmill Road and Whitehorse Road, to create a sense of place of this area proposals should:

- a) Create building lines and frontages which positively reinforce and respond to the form of the junction;
- b) Use tree planting to reinforce the street alignment; and
- c) Complement the existing massing of the immediate area around the Windmill/ Whitehorse Road Junction, by ensuring that the overall height of the building does not exceed 5 storeys; or complement the existing predominant building heights of 2 storeys up to a maximum height of 3 storeys; or ensure the ridge line is no taller than those adjacent to it.

**DM38.6** Within Broad Green and Selhurst allocate sites for development as set out in Table 11.7.

## How the policy works

**11.44** The areas in which Policies DM38.1 to DM38.5 apply are shown on the draft Policies Map.

### Broad Green Local Centre

**11.45** Broad Green Local Centre is dominated by the London Road traffic. It is an area with potential for growth.

**11.46** The edge of the Broad Green Local Centre is eroding and is beginning to lose its separate identity and sense of place. This could lead to the Local Centre being amalgamated into the homogenous urban form of the London Road.

**11.47** The detailed policies in DM38.1 will help to strengthen the identity of the Local Centre by setting design parameters such as consistent scale, street frontage treatment and public realm requirements.

### Potential new Local Centre at Valley Park

**11.48** The area is currently dominated by large scale 'Retail Estates and Business and Leisure Parks' and associated parking, separated from the adjoining area by embankments, Purley Way and the tram infrastructure.

**11.49** There is a mix of uses similar to an urban centre. However, large amounts of car dominated spaces make this area less pedestrian and cycle friendly. Additionally, the presence of large undefined spaces has contributed to this area's lack of a sense of place.

**11.50** There is potential for growth and for transformation into a new Local Centre. To enable potential development opportunities to be undertaken in a cohesive and coordinated manner, a masterplan will be considered.

### Lombard Roundabout area

**11.51** This is an area at the edge of two character types that contrast in scale. These are 'Terraced Houses and Cottages' and 'Large Buildings in an Urban Setting'. The area has potential for growth. The Place-specific development management policy is required to facilitate growth that enhances the distinctive character of the Lombard Roundabout Area.

**11.52** These policies will encourage new developments to establish a transitional zone between the existing uniform low rise residential areas and the larger scale structures around the Lombard Roundabout.

### Area north of Broad Green Local Centre

**11.53** The edge of the Broad Green Local Centre is eroding and is beginning to lose its separate identity and sense of place. This could result in its being absorbed into the homogenous urban form of London Road.

**11.54** The area north of Broad Green Local Centre is already experiencing growth. A cohesive approach needs to be taken to ensure that Local Centre edge is well defined and that the buildings along London Road have spacing.

### Area of the junction of Windmill Road and Whitehorse Road

**11.55** There is a poor relationship between the street layout and the building frontages at the Windmill Road/Whitehorse Road junction area. This has resulted in an area lacking a sense of place. The character within this area is a mix of low rise 'Terraced Houses and Cottages', 'Industrial Estates' and 'Retail Estates and Business and Leisure Parks'.

**11.56** There is a potential for growth and an opportunity for improving the definition of frontages and street edge, as well as overall quality of urban environment. This could include

addressing the deficiency in green infrastructure by ensuring tree planting and greenery is an intrinsic part of the development.

#### Allocating land for development

**11.57** Table 11.7 below sets out the proposed use on specific sites in Broad Green and Selhurst. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.7 Proposals for uses of land of specific sites in Broad Green and Selhurst**

Ref no	Site name	Proposed use
78	114-118 Whitehorse Road	Residential conversion and extension
119	Amenity land at Croydon AFC stadium, Mayfield Road	Primary school with access to playing field for community use outside of school hours
157	Canterbury Mill, 103 Canterbury Road	New primary school
314	Valley Park (B&Q and Units A-G Daniell Way), Hesterman Way	Redevelopment of this area to a mixture of residential, retail, healthcare facility (if required by the NHS), community and leisure to form the basis of a new residential community and local centre.

Ref no	Site name	Proposed use
334	Valley Leisure Park, Hesterman Way	Redevelopment of this area to a mixture of residential, retail, healthcare facility (if required by the NHS), community and leisure to form the basis of a new residential community and local centre.
337	Zodiac Court, 161-183 London Road	Residential redevelopment
348	Homebase & Matalan stores, 60-66 Purley Way	Mixed use residential and retail development
396	Praise House, 145-149 London Road	Redevelopment for mixed use residential and community use
404	Vistec House & 14 Cavendish Road, 185 London Road	Residential development
416	Challenge House, 618 Mitcham Road	Residential redevelopment or conversion. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development.
471	Masonic Hall car park, 1-1B Stanton Road	Residential development
517	Milton House, 2-36 Milton Avenue	Residential and employment uses

## Coulsdon

### General character

**11.58** Coulsdon is a small suburban settlement surrounded by areas of Green Belt. The Green Belt in this area is characterised by open views of open spaces and wooded mature tree belts. Coulsdon's District Centre has a well-defined and consistent 'Urban Shopping Area' character and two parallel strips containing 'Retail Estates and Business and Leisure Parks' and 'Industrial Estates' separated by the bypass and railway lines.

**11.59** Coulsdon's built environment is located within the valleys alongside railway lines and main roads. The predominant residential characters are 'Detached Houses on Relatively Large Plots With Minimum Public Realm' to the north and east, an estate of 'Compact Houses on Relatively Small Plots' to the east, 'Planned Estates of Semi Detached Houses' with garages, and low density, 'Scattered Houses on Large Plots' in the south.

### Policy DM39: Coulsdon

Within Coulsdon allocate sites for development as set out in Table 11.8.

### How the policy works

**11.63** Coulsdon has the potential for growth. Much of this is concentrated within the Cane Hill area.

**11.64** The District Centre and environs is an area with a broad mix of uses. This has resulted in a variety of character areas with diverse set of transitions between characters.

**11.65** Coulsdon District Centre is well served by public transport. This provides an opportunity for it to function as a destination. The

**11.60** The Chipstead Valley Road (St Dunstan's Cottages) Local Heritage Area designation recognises the distinctive architecture of workers' houses from c.1900 representing the 'Terraced Houses and Cottages' character. Their layout reveals the location of the historic site of the former Surrey Iron Railway.

**11.61** The Station Approach (Coulsdon) Local Heritage Area represents the 'Terraced Houses and Cottages' character. It contains modest Victorian railway cottages with aesthetic style inspired features set in the distinctive townscape.

**11.62** The Dutch Village Local Heritage Area has the 'Detached Houses on Relatively Large Plots' character. This distinctive estate was designed by the Dutch architect Wouter Hamdorff as a 'modern Dutch garden village' in late 1930's.

sense of place requires strengthening and enhancing of its attractiveness to residents and those visiting the area.

**11.66** Each of the character areas within Coulsdon is well defined and consistent. Future development can be successfully guided by general policies and there is no place specific development management policy for this area.

### Allocating land for development

**11.67** Table 11.8 below sets out the proposed use on specific sites in Coulsdon. The location and boundary of each detailed proposal can be found on the draft Policies Map and further

details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.8 Proposals for uses of land of specific sites in Coulsdon**

<b>Ref no</b>	<b>Site name</b>	<b>Proposed use</b>
60	Cane Hill Hospital Site, Farthing Way	Residential development with new community, health and educational facilities
372	Car park, Lion Green Road	Mixed use development comprising leisure, community facilities and retention of car parking spaces. Also retail so long as the current planning permission is extant.
764	Land to the east of Portnalls Road, Portnalls Road	Secondary school
945	Waitrose, 110-112 Brighton Road	Residential and healthcare facilities

## Croydon Opportunity Area

### General character

**11.68** Croydon Opportunity Area is an urban area with diverse character types. It is the only one of Croydon's 16 Places to contain all nine non-residential character types, each of which influences the way in which this Place has developed. The centre of Croydon is typically characterised by the dominant intersecting 'Linear Infrastructure' of the roads (such as the Wellesley Road, Park Lane and the Flyover) rail and tram lines which create distinct separations between the different character types. The 'Shopping Centres and Precincts' and 'Tower Buildings' are located to the west and east of the central spine along Wellesley Road. These areas have a larger grain and predominantly contain modern and contemporary buildings. The character of Wellesley Road has also been influenced by the number of 'Large Buildings in an Urban Setting' which are concentrated to the north and east of this road and in close proximity to the 'Transport Nodes'. There are also a small number of 'Large Buildings With Strong Frontage Line' located to the south. Radiating southwards from the 'Shopping Centres and Precincts' are the 'Urban Shopping Area' character. The urban grain of these areas reflects the surrounding residential character with a smaller finer grain.

**11.69** The residential areas are located around the edge of this place and consist of a predominant mix of 'Large Houses on Relatively Small Plots', 'Terraced Houses and Cottages' and 'Medium Rise Blocks With Associated Grounds'. Interspersed amongst the residential areas are small pockets of 'Industrial Estates', 'Retail Estates and Business and Leisure Parks', and 'Institutions with Associated Grounds'.

**11.70** The Central Croydon Conservation Area represents the historic character of 'Urban Shopping Character Areas'. It is

focused on Croydon's historic municipal and commercial heart, including a great variety of historic Listed and Locally Listed Buildings from several centuries.

**11.71** The Church Street Conservation Area represents the historic character of 'Urban Shopping Character Areas'. It is focused on the historic thoroughfare which curves through Croydon's Old Town, linking the High Street with the area around the Croydon Minster. The Conservation Area has a number of Listed and Locally Listed Buildings dated from the early 18<sup>th</sup> century onwards.

**11.72** The Croydon Minster Conservation Area represents the historic character of 'Urban Shopping Character Areas' and 'Institutions with Associated Grounds'. It is focused on the heart of Croydon's old town, encompassing the highly significant medieval and Victorian Parish Church of St John and the former Archbishop's Palace, both Grade I Listed Buildings.

**11.73** The Chatsworth Road Conservation Area represents the authentic residential character of 'Large Houses on Relatively Small Plots'. It contains well-preserved large Victorian and Edwardian houses, in a range of notable styles.

**11.74** The Wellesley Road (North) Conservation Area represents the authentic residential character of 'Large Houses on Relatively Small Plots'. It is a collection of early/mid Victorian houses, which are some of the oldest surviving properties in the town centre and a remarkable contrast to the redeveloped adjacent modernist areas.

**11.75** The Laud Street Local Heritage Area recognises the heritage significance of its well-preserved historic architecture and townscape of 'Terraced Houses and Cottages' character.

## Policy DM40: Croydon Opportunity Area

**DM40.1** To enable development opportunities; including public realm improvements, to be undertaken in a cohesive and coordinated manner a Croydon Opportunity Area Planning Framework complemented by masterplans with elements of design code for Fair Field, Mid Croydon, West Croydon, East Croydon and Old Town have been adopted.

**DM40.2** To ensure development opportunities positively transform the local character and include public realm improvements that are undertaken in a cohesive and coordinated manner, a masterplan with elements of design code will be considered for the area within New Town and the Retail Core<sup>38</sup>.

**DM40.3** In the London Road area to ensure that proposals positively enhance and strengthen the local character and setting of Locally Listed Buildings, the development should:

- a) Complement the existing maximum height of 4 storeys;
- b) Incorporate multi-stock brick as the predominant facing material;
- c) Retain, enhance and positively reference existing setbacks of the major massing above ground floors; and
- d) Retain, enhance and positively reference architectural detailing on Locally Listed Buildings.

**DM40.4** In the area along Sydenham and Lansdowne Road, to facilitate growth and enhance the sense of place, developments should retain and create glimpses and separation distances between buildings in order to improve openness within the edge of the town centre.

**DM40.5** Within Croydon Opportunity Area allocate sites for development as set out in Table 11.9.

---

<sup>38</sup> As defined in the Croydon Opportunity Area Planning Framework, pg 167

## How the policy works

**11.76** The areas in which Policies DM40.2 to DM40.4 apply are shown on the draft Policies Map.

**11.77** The extent of Croydon Opportunity Area is mostly covered by the Masterplans for Fair Field, Mid Croydon, Old Town, West Croydon and East Croydon which address the complex issues within these areas. With the exception of the London Road area and along Sydenham and Lansdowne Roads the character elsewhere in the opportunity area can be successfully managed by the general policies.

### London Road area

**11.78** London Road is the northern gateway to Croydon Metropolitan Centre. Buildings range from Listed Victorian high street buildings to large modernist residential and commercial buildings along with run down and derelict units. Similarly, there is a mixed quality public realm, from the welcoming and colourful entrance at West Croydon station to large unused spaces and car yards to the north of London Road. West Croydon station, the Lidl supermarket and the proximity of the Retail Core and the University Hospital are some of the major attractions that draw people into the area. The area has been undergoing change due to proximity to the town centre and a major transport interchange of West Croydon station. Additionally a number of redevelopment opportunities have arisen from the civil unrest damages.

**11.79** The London Road area has a variety of fine examples of architecture which has been recognised by being designated as Locally Listed Buildings. Though their articulation varies, they have a number of common characteristics such as: regular rhythm of elevations marked by windows and the way they are framed, high quality workmanship and materials. There are fine examples of brickwork and render. A number of buildings, which were originally set back from the street, have been extended on the

ground floor. These create a feel of openness, more human scale and introduce formal diversity to the street.

**11.80** In order to accommodate growth in a way that respects and enhances the diversity of the London Road character, new development should be informed and inspired by these qualities.

### Area along Sydenham and Lansdowne Road

**11.81** Areas along Sydenham and Lansdowne Road have a very mixed character due to undergoing densification and redevelopment. The original character of 'Large Buildings on Relatively Small Plots' is being gradually replaced with 'Mixed Type Flats'. Residential buildings of a detached form, with spacing between them, set back and forecourts are key features of urban pattern in the area.

**11.82** In order to maintain and enhance the distinctive character of the residential edge of the town centre, and to prevent further erosion of it, a cohesive approach needs to be taken to ensure new developments retain and reference this urban pattern.

### Allocating land for development

**11.83** Table 11.9 below sets out the proposed use on specific sites in Croydon Opportunity Area. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.9 Proposals for uses of land of specific sites in Croydon Opportunity Area**

Ref no	Site name	Proposed use
--------	-----------	--------------

Ref no	Site name	Proposed use
21	Former Royal Mail Sorting Office, 1-5 Addiscombe Road	Mixed use development incorporating residential, hotel and/or office. Also retail so long as the current planning permission is extant.
31	Croydon College car park, College Road	Mixed use redevelopment comprising hotel & residential
32	4-20 Edridge Road	Residential development
50	44-60 Cherry Orchard Road	Residential development
104	Former Taberner House site, Fell Road	Residential development
123	Prospect West and car park to the rear of, 81-85 Station Road	Residential (with healthcare facility if required by NHS). It is recommended that basements are not considered at this site. Further ground investigations would be required at this site to confirm the likelihood of groundwater occurrence. There is one historic record of surface water flooding held by the Council in this location.
138	Cherry Orchard Gardens and site between railway line and Cherry Orchard Road, Cherry Orchard Road	Mixed use development comprising residential, offices, restaurant/café, hotel and community facilities

Ref no	Site name	Proposed use
142	1 Lansdowne Road	Mixed use development comprising residential, offices, leisure and hotel
155	St Anne's House & Cambridge House, 20-26 Wellesley Road	Conversion of building to residential and hotel
162	St George's House, Park Lane	Conversion and extension of existing building to provide retail and other Class A activities (such as food and drink) on the ground floor with residential accommodation on upper floors. There is one historic record of surface water flooding held by the Council in this location.
172	Ruskin Square and surface car park, 61 Dingwall Road and Lansdowne Road	Mixed use development comprising residential, offices, restaurant/café and fitness centre
173	28-30 Addiscombe Grove	Redevelopment to provide more homes

Ref no	Site name	Proposed use
174	30-38 Addiscombe Road	Residential development. It should be noted that ordinary watercourses have not have been included in the fluvial modelling of the River Wandle and therefore a fluvial flood risk from this watercourse may be present. As set out in Section 11.3.2 of the Level 1 SFRA, applicants considering development of this site may need to prepare a simple hydraulic model to enable a more accurate assessment of the probability of flooding associated with this ordinary watercourse to inform the site specific FRA. This should be carried out in line with industry standards and in agreement with the LLFA.
175	Stephenson House, Cherry Orchard Road	Primary school with residential and/or office on upper floors
176	Exchange Court, 3 Bedford Park	Offices and residential and/or hotel (with healthcare facility if required by the NHS)
178	Arcadia House, 5 Cairo New Road	Residential development and Class B business use

Ref no	Site name	Proposed use
182	St Mathews House, 98 George Street	Redevelopment for residential and/or offices and/or retail (on George Street frontage)
184	1-19 Derby Road	Residential development above, community uses on lower floors
186	Jobcentre, 17-21 Dingwall Road	Offices and/or residential and/or hotel and/or replacement Class A2 (Finance) premises (with healthcare facility if required by the NHS)
187	28 Dingwall Road	Offices and residential and/or hotel (with healthcare facility if required by the NHS)
189	Car parks, Drummond Road	Residential development
190	Car park to the rear of Leon House, 22-24 Edridge Road	Residential development. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface' (BGS Susceptibility to Groundwater Flooding).
192	Suffolk House, George Street	Mixed use redevelopment with offices or residential dwellings above retail units at ground level

Ref no	Site name	Proposed use
193	100 George Street	Mixed use development with offices or residential dwellings above retail units at ground level
194	St George's Walk, Katharine House and Park House, Park Street	Residential and retail with new civic space.
195	Leon House, 233 High Street	Conversion to residential or mixed use residential/office with retention of retail on the ground floor. It should be noted that ordinary watercourses have not have been included in the fluvial modelling of the River Wandle and therefore a fluvial flood risk from this watercourse may be present. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface' (BGS Susceptibility to Groundwater Flooding).
196	Stonewest House, 1 Lamberts Place	Residential development
197	Emerald House, 7-15 Lansdowne Road	Office and residential and/or hotel (with healthcare facility if required by the NHS)

Ref no	Site name	Proposed use
199	20 Lansdowne Road	Residential development with light industrial workshops and studio spaces
200	Multi-storey car park, Lansdowne Road	Mixed use, public car park and residential.
201	Lidl, Easy Gym and car park, 99-101 London Road	Primary school with residential development on upper floors
203	West Croydon station and shops, 176 North End	Remodelling of station and redevelopment to provide an improved transport interchange, cycle hub, retail & office units with residential development above. In the surrounding area, surface water flood risk is generally low. However, Station Road and the A212 have areas shown to be at high risk from surface water flooding. There are two historic records of surface water flooding held by Croydon Council in this location.
211	Poplar Walk car park and, 16-44 Station Road	A more intensive use of the site with 232 residential units as part of an overall redevelopment of the site which includes reprovision of retail uses, car and cycle parking and a public square.

Ref no	Site name	Proposed use
218	Lunar House, Wellesley Road	Office and residential and/or hotel (with healthcare facility if required by the NHS) if the site is no longer required by the Home Office.
220	9-11 Wellesley Road	Residential and/or hotel and/or retail and/or finance
222	Multi-storey car park, 1 Whitgift Street	Residential with community facilities commensurate in size and functionality to that currently on the site
231	Segas House, Park Lane	Residential conversion with cultural uses if required (with town centres uses considered if there is no interest in delivery of cultural uses).
234	Southern House, Wellesley Grove	Offices and residential and/or hotel (with healthcare facility if required by the NHS)
236	Apollo House, Wellesley Road	Offices and residential and/or hotel (with healthcare facility if required by the NHS) if the site is no longer required by the Home Office. There is one record of sewer flooding.
242	Davis House, Robert Street	Residential development with limited retail to replace existing floor space

Ref no	Site name	Proposed use
245	Mondial House, 102 George Street	Office and/or residential development or offices or hotel and/or retail (on George Street frontage)
247	Norwich Union House, 96 George Street	Offices with residential development or hotel and/or retail (on George Street frontage)
294	Croydon College Annexe, Barclay Road	Residential redevelopment with community uses and Creative and Cultural Industries Enterprise Centre. There is one record of sewer flooding.
311	Mott Macdonald House, 8 Sydenham Road	Offices and residential and/or hotel (with healthcare facility if required by the NHS)

Ref no	Site name	Proposed use
374	Reeves Corner former buildings, 104-112 Church Street	Mixed use with residential to upper storeys and retail on ground floor. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface' (BGS Susceptibility to Groundwater Flooding). A high risk of surface water flooding surrounds the site, particularly across the road network such as Cairo New Road and Church Street. There is one historic record of surface water flooding held by Croydon Council in this location.
375	Northern part of, 5 Cairo New Road	Residential redevelopment above community use. The surrounding areas of Cairo New Road and Roman Way are shown to be at a high risk of surface water flooding.
392	Carolyn House, 22-26 Dingwall Road	Offices and residential and/or hotel (with healthcare facility if required by the NHS)

Ref no	Site name	Proposed use
393	Whitgift Centre, North End	Expansion of shopping centre, improved public realm and residential development and car parking provision. The majority of the site is shown to be at a very low risk. The surrounding areas are generally at a low risk of surface water flooding with the areas of the road network (i.e. Wellesley Road) being shown to be at high risk. There are three historic records of surface water flooding and one historic record of sewer flooding.

Ref no	Site name	Proposed use
398	Coombe Cross, 2-4 South End	Residential development. It should be noted that ordinary watercourses have not have been included in the fluvial modelling of the River Wandle and therefore a fluvial flood risk from this watercourse may be present. There are further areas of medium risk of surface water flooding to the west of the site. The surrounding area is generally an area of low to medium surface water flood risk. However, there are areas of high risk in regards to surface water flooding in areas such as Parker Road and South End. There are two historic records of surface water flooding.
417	Stonemead House, 95 London Road	Residential
450	Lennard Lodge, 3 Lennard Road	Residential development
488	Canis House, 1 Scarbrook Road	Residential conversion
489	Corinthian House, 17 Lansdowne Road	Retention of offices with residential conversion, and/or hotel (with healthcare facility if required by the NHS)
492	5 Bedford Park	Residential conversion

Ref no	Site name	Proposed use
493	Pinnacle House, 8 Bedford Park	Mixed use of residential with offices (or a healthcare facility if required by the NHS) on the ground floor
522	Surface car park, Wandle Road	Bus stand underneath the flyover and a district energy centre and residential development on the remainder of the car park. The majority of the site is within Flood Zone 3a to the south-west and the rest of the site are within Flood Zone 1. This More Vulnerable development should be preferably located in Flood Zone 1. If it is essential to build on Flood Zone 3a, then all residential uses should be located in the first floor level or above. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface' (BGS Susceptibility to Groundwater Flooding).
950	Norfolk House, 01-28 Wellesley Road	Mixed use development to include retail, residential, office and hotel uses (up to 7000sqm commercial floorspace).

## Crystal Palace & Upper Norwood

### General character

**11.84** Crystal Palace and Upper Norwood are historic Victorian settlements, picturesquely located on green hills. It has a number of significant landmarks such as the Croydon television mast visible from long distances and various locations across London.

**11.85** Crystal Palace and Upper Norwood is primarily residential Place where houses are interlaced with large parks such as The Lawns, Beaulieu Heights, Stambourne Woodland and Upper Norwood Recreation Grounds which were laid out in Victorian and Edwardian times. The original local character contained 'Large Houses on Relatively Small Plots'. Much of the historical architecture has been transformed into contemporary residential characters types such as 'Planned Estates of Semi Detached Houses' and 'Medium Rise Blocks With Associated Grounds' and 'Compact Houses on Relatively Small Plots'. There are areas where high quality examples of the original character have survived. These have been designated as Conservations Areas.

**11.86** The Upper Norwood Triangle Conservation Area predominantly contains the historic character of 'Urban Shopping Character Areas'. It is focused around the historic district centre where several London boroughs meet. The Upper Norwood Triangle Conservation Area adjoins the Crystal Palace Park Conservation Area in Bromley and the Westow Hill Conservation Area in Lambeth and contains a wide variety of historic buildings.

**11.87** The Church Road Conservation Area predominantly encompasses the character of 'Large Houses on Relatively Small Plots' mixed with the historic green open areas of Westow Park, Stambourne Woodland and Beaulieu Heights. It is focused on one of Upper Norwood's grandest and most historic streets in a stunning landscape setting, the area also encompasses Beaulieu

Heights, Sylvan Hill and Grange Hill as well as several Listed and Locally Listed Buildings.

**11.88** The Harold Road Conservation Area predominantly encompasses the character of 'Large Houses on Relatively Small Plots'. It is an area centred on one of Upper Norwood's grandest residential streets with associated Upper Norwood Recreation Ground, and formed of large Victorian villas which were built for residents drawn to the area in the late 19<sup>th</sup> century by the relocated Crystal Palace.

**11.89** The Beulah Hill Conservation Area encompasses the mix of 'Large Houses on Relatively Small Plots' and 'Detached Houses on Relatively Large Plots'. It is a significant grouping of Georgian and Victorian Villas within the historic affluent Beulah Spa area, partly located in the woodland setting, including a number of Listed and Locally Listed Buildings.

**11.90** The Auckland Road and Howden Road Local Heritage Area consists of 'Large Houses on Relatively Small Plots'. It contains early vernacular houses with well-preserved original features dating from the 1880's. These include some bespoke Gothic inspired detailing.

## Policy DM41: Crystal Palace and Upper Norwood

Within Crystal Palace and Upper Norwood allocate sites for development as set out in Table 11.10.

### How the policy works

**11.91** Crystal Palace and Upper Norwood has a predominately consistent character which, can be managed by other policies. Additionally the high concentration of heritage assets within this Place will enable its character to be managed through Conservation Area Appraisals and Management Plans and Croydon's Conservation Area General Guidance.

### Allocating land for development

**11.92** Table 11.10 below sets out the proposed use on specific sites in Crystal Palace and Upper Norwood. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.10 Proposals for uses of land of specific sites in Crystal Palace and Upper Norwood**

Ref no	Site name	Proposed use
28	Bowyers Yard, Bedwardine Road	Cultural and Creative Industries Enterprise Centre
80	Victory Place	Ground floor retail, restaurant and studio space with hotel, office/or and residential uses on other floors
82	St John The Evangelist Vicarage, Sylvan Road	Redevelopment to provide new hall and residential dwellings

Ref no	Site name	Proposed use
357	Norwood Heights Shopping Centre, Westow Street	Retail, replacement community use and residential
420	87-91 Biggin Hill	Residential development

## Kenley and Old Coulsdon

### General character

**11.93** Kenley and Old Coulsdon is a suburban area with green wooded hillsides (Dollypers Hill, Roydons Wood) and green open spaces (Kenley Common, Riddlesdown, Kenley Aerodrome) located within and around it. There is a strong link between the green infrastructure and the built environment. This creates a feeling of spaciousness or openness can be seen in the layout of the built environment.

**11.94** The built areas of Kenley and Old Coulsdon predominantly consist of the following residential character types: 'Detached Houses on Relatively Large Plots' and 'Planned Estates of Semi-Detached Houses'. The residential character is reinforced by consistent building lines and setbacks that create large green front gardens or (in the case of flatted development) grounds and rear gardens with tree planting.

**11.95** Kenley and Old Coulsdon's shopping and community facilities are concentrated in the area between the Godstone Road and Kenley station. The area is framed by green space of Riddlesdown to the north and railway to the south.

**11.96** Kenley's public realm, with features such as grass verges with tree planting, reflects the close coexistence of nature and built environment. Narrow lanes with extensive tree canopy cover and streets often with one footway and green areas of planting on the opposite side are all characteristic features of the public realm.

**11.97** In areas where there are no grass verges, mature trees located within front gardens of residential developments provide extensive tree canopy cover, contributing to the impression of tree lined streets.

**11.98** The Bradmore Green Conservation Area is the heart of the historic Old Coulsdon. It preserves the historic village character made by the green spaces of Bradmore Green and Grange Park mixed with 'Suburban Shopping Character Area', 'Detached Houses on Relatively Large Plots' and 'Planned Estates of Semi-Detached Houses'. The area contains a number of historic Listed and Locally Listed Buildings such as the 18<sup>th</sup> century farmhouse and the 13<sup>th</sup> century Grade I Listed church of St John.

**11.99** The Kenley Aerodrome Conservation Area is one of the most complete fighter airfield associated with the Battle of Britain to have survived, making it a battlefield site of particular national historic significance. The Conservation Area includes a number of scheduled monuments.

### Policy DM42: Kenley and Old Coulsdon

Within Kenley and Old Coulsdon allocate sites for development as set out in Table 11.11.

## How the policy works

**11.100** Kenley and Old Coulsdon has a predominantly consistent character with capacity for growth managed by other policies.

### Allocating land for development

**11.101** Table 11.11 below sets out the proposed use on specific sites in Kenley and Old Coulsdon. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.11 Proposals for uses of land of specific sites in Kenley and Old Coulsdon**

<b>Ref no</b>	<b>Site name</b>	<b>Proposed use</b>
937	Kempsfield House, 1 Reedham Park Avenue	Residential development with community use

## Norbury

### General character

**11.102** Norbury is a suburban town with its District and Local Centres located along the long linear route of London Road. The built form of 'Large Buildings With Strong Frontage Line' and 'Medium Rise Blocks With Associated Grounds' emphasises this linear route and its dominance on the area.

**11.103** Norbury has a residential character that predominantly consists of 'Terraced Houses and Cottages', 'Large Houses on Relatively Small Plots' and 'Local Authority Housing with Public Realm', enriched by green spaces of Norbury Park through which Norbury Brook flows, Biggin Wood, Norbury Hall Park and Pollards Hill Park

**11.104** The Norwood Grove Conservation Area is focused around the historic Grade II registered landscape of Norwood Grove predominantly surrounded by 'Detached Houses on Relatively Large Plots'. It contains a number of well preserved and distinctive Listed and Locally Listed Georgian and Edwardian houses. The Conservation Area adjoins the Streatham Common Conservation Area in Lambeth.

**11.105** The Norbury Estate Conservation Area represents the unified and consistent residential character type of 'Local Authority Built Housing with Public Realm'. This dense development from 1914-1921 represents a unique example of Arts and Crafts terraces and is the first outer London cottage estate built by the London County Council..

**11.106** The London Road Norbury Local Heritage Area is an example of an 'Urban Shopping Area' character type. The shopping parades represent a high quality cross-section of architectural styles from the turn of C19 and C20, with the unified form of shopfronts at ground floor level and rhythms of red brick facades with decorative brick and sandstone features above.

**11.107** The Beatrice Avenue Local Heritage Area predominantly consists of 'Terraced Houses and Cottages'. It has a good range of well-preserved late Victorian suburban houses laid out between 1900 and 1936, with many original and bespoke Arts and Crafts inspired features. The prominent St Phillip's Church terminates views from the tree-lined residential street.

**11.108** The Pollards Hill South Local Heritage Area consists of terraced houses which complement the predominant character of the area of 'Planned Estates of Semi-Detached Houses' in a particularly creative way. This distinctive grouping represents a unique example of individual Arts and Crafts terraces laid out to appear as large U-shaped buildings with a number of distinctive architectural features. The well preserved and distinctive 1930's townscape is an example of an innovative approach to defining street frontages through sequence of courtyards.

### Policy DM43: Norbury

**DM43.1** Within Norbury District Centre, to facilitate growth and to enhance the distinctive character, developments should:

- a) Complement the existing predominant building heights of 2 storeys up to a maximum of 5 storeys;
- b) Ensure proposal for large buildings are visually consistent with the predominant urban grain; and
- c) Seek opportunity to provide direct access from the south of London Road to Norbury railway station.

**DM43.2** Within Pollards Hill Local Centre, to ensure that proposals positively enhance and strengthen the character developments should:

- a) Retain the edge and separation of Pollards Hill Local Centre from other adjoining character areas by limiting the urban grain within its boundaries;
- b) Complement the existing predominant building heights of 3 storeys up to a maximum of 4 storeys;
- c) Incorporate multi-stock brick as the predominant facing materials of the whole building; and
- d) Retain the extent and enhance the quality of the existing public realm within the development, including reinforcing a consistent building line.

**DM43.3** Within Norbury allocate sites for development as set out in Table 11.12.

### How the policy works

**11.109** The areas in which Policies DM43.1 and DM43.2 apply are shown on the draft Policies Map.

**11.110** The areas identified for Place-specific development management policies are Norbury District Centre and Pollards Hill Local Centre. These Place-specific development management policies are required to ensure the distinctions, edge and separation between the centres and adjoining areas are maintained.

**11.111** These areas have potential for growth. There are precedents on London Road of large and tall buildings however these are mainly located outside designated centres. In order to

retain the distinctiveness of each of Norbury’s centres and to reinforce the prominence of the scale of built environment within these areas policies DM43.1 and DM43.2 identify the maximum buildings heights along with key architectural features to enable growth and retain local distinctiveness.

#### Allocating land for development

**11.112** Table 11.12 below sets out the proposed use on specific sites in Norbury. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.12 Proposals for uses of land of specific sites in Norbury**

Ref no	Site name	Proposed use
--------	-----------	--------------

<b>Ref no</b>	<b>Site name</b>	<b>Proposed use</b>
284	Asharia House, 50 Northwood Road	Residential development including replacement community facility
320	S G Smith, 409-411 Beulah Hill	Retail supermarket on ground floor with residential above
951	1485-1489 London Road	Redevelopment for residential and retail

## Purley

### General character

**11.113** Purley is a suburban market town located on wooded hillsides and in the valley. Its spatial structure is organised along the strong dominant corridor of the Brighton Road and Godstone Road where a wide variety of character types coexist. These are 'Urban Shopping Areas', 'Industrial Estates', 'Retail Estates and Business and Leisure Parks' and moderate density residential areas such as 'Terraced Houses and Cottages', 'Medium Rise Blocks With Associated Grounds', 'Compact Houses on Relatively Small Plots', and 'Planned Estates of Semi-Detached Houses'. 'Large Buildings With Strong Frontage Line' dominate in the District Centre and its vicinity.

**11.114** The residential character outside of Brighton Road is fairly uniform and consists of large detached houses on relatively large plots with minimal public realm and low density scattered houses on relatively small plots.

**11.115** The Webb Estate and Upper Woodcote Village Conservation Area with its consistent character of 'Scattered Houses on Large Plots' is a notable Edwardian garden suburb created by developer William Webb based upon his Garden First Principles. The model village, laid out around Woodcote Green, is the focus of the area. Both Conservation Areas are rich in historic buildings which are set amidst mature landscaping.

**11.116** The Brighton Road (Purley) Local Heritage Area has an 'Urban Shopping Area' character. It contains collection of shopping parade buildings from the late 19<sup>th</sup> and 20<sup>th</sup> century, that demonstrate a variety of styles with well-preserved and distinctive architectural features.

### Policy DM44: Purley

**DM44.1** Within Purley District Centre and its environs, to ensure that proposals positively enhance and strengthen the character and facilitate growth, developments should:

- a) Reinforce the continuous building line which responds to the street layout and include ground floor active frontages;
- b) Complement the existing predominant building heights of 3 to 8 storeys, with a potential for a new landmark of up to a maximum of 16 storeys; and
- c) Demonstrate innovative and sustainable design, with special attention given to the detailing of frontages.

**DM44.2** In the environs of Reedham station, to create the sense of place and facilitate growth proposals should:

- a) Complement the existing predominant building heights of 2 storeys up to a maximum of 4 storeys;

- b) Reinforce the predominant building lines and frontages which positively respond to the form of the Brighton Road/Old Lodge Lane junction;
- c) Improve pedestrian and cycle permeability, accessibility and connectivity across the railway between Brighton Road, Watney Close, Aveling Close and Fairbairn Close; and
- d) Enhance the suburban shopping area character of this section of Brighton Road.

**DM44.3** In the area of the junction of Brighton Road and Purley Downs Road, to reduce the impact of Brighton Road as a linear route, clearly differentiate the area from Purley District Centre and Brighton Road (Sanderstead Road) Local Centre and strengthen the sense of place, proposals should:

- a) Retain and create open glimpses and vistas between buildings;
- b) Introduce building with landscapes that respond and reflect the layout of the 1930s blocks of Lansdowne Court and Purley Court; and
- c) Complement the existing predominant building heights of 2 storeys up to a maximum of 5 storeys.

**DM44.4** Within Purley allocate sites for development as set out in Table 11.13.

### How the policy works

**11.117** The areas in which Policies DM44.1 to DM44.3 apply are shown on the draft Policies Map.

#### Purley District Centre and its environs

**11.118** Purley District Centre is a well-defined urban town with a high concentration of commercial and community uses. The road network and a large scale roundabout divide the centre.

**11.119** This area has a varied topography which presents opportunities for tall buildings and the availability of vacant land creates the potential for growth. Policy DM44.1 facilitates this and identifies architectural features that should be referenced in the design of the development to enhance the distinctive character of Purley District Centre.

#### The environs of Reedham station

**11.120** The environs of Reedham station have good public transport accessibility and a varied character including 'Urban Shopping Area', 'Large Buildings in an Urban Setting', 'Medium Rise Blocks With Associated Grounds' and 'Planned Estates of Semi-Detached Houses'.

**11.121** A Place-specific development management policy is required to facilitate growth, improve pedestrian and cycle permeability across the railway line and to create the sense of place.

#### The area of the junction of Brighton Road and Purley Downs Road

**11.122** The Brighton Road/ Purley Downs Road junction area forms the edge between South Croydon and Purley. Capella Court forms a visual marker which closes the vistas along the

Purley and South Croydon sections of Brighton Road. The massing of Capella Court dominates the residential and industrial buildings within the surrounding area. This area's distinct qualities are informed by the landmark building surrounded by low rise structures set in greenery.

**11.123** Detailed policies are required to strengthen the character of the Brighton Road and Purley Downs Road junction area.

Allocating land for development

**11.124** Table 11.13 below sets out the proposed use on specific sites in Purley. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.13 Proposals for uses of land of specific sites in Purley**

Ref no	Site name	Proposed use
30	Purley Leisure Centre, car park and former Sainsbury's Supermarket, High Street	Mixed use redevelopment incorporating public car park, new leisure facilities, including a swimming pool, and other community facilities, healthcare facility, creative and cultural industries enterprise centre, retail or residential accomodation.
35	Purley Baptist Church, 2-12 Banstead Road	Mixed use redevelopment comprising new church, community facility and residential, with development located outside Flood Zone 2 and 3a.
61	Car park, 54-58 Whytecliffe Road South	Residential use with retention of car parking spaces
66	1-3 Pampisford Road	Residential development
130	1-9 Banstead Road	Residential
324	Purley Oaks Depot, 505-600 Brighton Road	Gypsy and Traveller pitches
325	Telephone Exchange, 88-90 Brighton Road	Conversion of existing building to residential use if no longer required as a telephone exchange in the future

<b>Ref no</b>	<b>Site name</b>	<b>Proposed use</b>
347	Tesco, 2 Purley Road	Mixed use residential, healthcare facility (if required by the NHS) and retail development
405	Capella Court & Royal Oak Centre, 725 Brighton Road	Residential development and health facility, with no net loss of flood storage capacity
409	Beech House, 840 Brighton Road	Conversion of the office building to residential uses.
410	100 Brighton Road	Mixed use residential and retail development
411	Palmerston House, 814 Brighton Road	Residential redevelopment
490	95-111 Brighton Road	Primary school
495	Dairy Crest dairy, 823-825 Brighton Road	Conversion of buildings fronting Brighton Road to studio space (with potential for a Creative and Cultural Industries Enterprise Centre serving Purley) with new light industrial units to the rear
683	Purley Back Lanes, 16-28 Pampisford Road	Residential development and public car park including new industrial units to replace those currently on the site

## Sanderstead

### General character

**11.125** Sanderstead is a suburban Place located on a hilltop, with residential areas of Purley Downs, Riddlesdown, Hamsey Green and Sanderstead surrounded by large scale green open spaces such as Mitchley Wood, Riddlesdown and Kings Wood.

**11.126** The predominant residential character consists of detached 'Housing on Relatively Large Plots' on the hillsides leading to the Local Centre, 'Planned Estates of Semi-Detached Houses' at the top of Sanderstead Hill, and some local authority 'Planned Estates with Public Realm' towards the Local Centre of Hamsey Green.

### Policy DM45: Sanderstead

**DM45.1** Within Sanderstead Local Centre, to respect and enhance the distinctive qualities proposals should:

- a) Reinforce the suburban shopping area character;
- b) Reference, respect and enhance architectural features such as the consistent rhythm of pairs of buildings with identical frontages and the articulation of openings;
- c) Retain features such as the projecting bay windows;
- d) Retain wide vistas and strengthen visual connections to green open spaces; and
- e) Improve walking and cycling connectivity and access to open space.

**DM45.2** Within Hamsey Green Local Centre, to respect and enhance the distinctive 'Suburban Shopping Area' character of Hamsey Green, proposals should:

- a) Reinforce the suburban shopping area character;
- b) Positively reference, respect and enhance architectural features such as the consistent rhythm and articulation of window and doors;
- c) Ensure the extent of the public realm within the vicinity of the development is retained and improved; and
- d) Incorporate multi-stock brick or white render as the predominant facing material.

**DM45.3** Within Sanderstead allocate sites for development as set out in Table 11.14.

## How the policy works

**11.127** The areas in which Policies DM45.1 and DM45.2 apply are shown on the draft Policies Map.

### Sanderstead Local Centre

**11.128** Sanderstead Local Centre has visual and physical links onto neighbouring green areas to the west. It has a consistent building line to the east. The character of the low rise 'Urban Shopping Area' is enriched by 'Institutions with Associated Grounds', 'Retail Estates' and 'Terraced Houses and Cottages'.

**11.129** The 'Urban Shopping Area' contains distinctive architectural features such a consistent rhythm created by pairs of multi-stock brick buildings with matching facades containing windows and doors identically articulated. Within this area detailed policies are required to strengthen the identity of the Local Centre.

### Hamsey Green Local Centre

**11.130** Hamsey Green is defined by its 'Suburban Shopping Area' character with Green verges and tree planting. Sections of the Local Centre have a consistent character. This can be seen through elements such as rhythm and articulation of window and doors. In areas where the character is inconsistent the Place-specific development management policy in DM45.2 will help enhance Hamsey Green's local identity and encourage growth.

### Allocating land for development

**11.131** Table 11.14 below sets out the proposed use on specific sites in Sanderstead. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.14 Proposals for uses of land of specific sites in Sanderstead**

Ref no	Site name	Proposed use
306	The Good Companions Public House site, 251 Tithe Pit Shaw Lane	Mixed use of residential and retail
947	359-367 Limpsfield Road	Residential with 1 - 3 commercial units on ground floor.

Ref no	Site name	Proposed use
--------	-----------	--------------

## Selsdon

### General character

**11.132** Selsdon is a suburban residential Place with a well-defined District Centre, surrounded by large scale green open spaces such as Selsdon Wood, Heathfield and Littleheath Woods. The predominant residential character types consist of 'Planned Estates of Semi-Detached Houses', some local authority 'Planned Estates with Public Realm', 'Compact Houses on Relatively Small Plots' and 'Medium Rise Blocks With Associated Grounds'.

### Policy DM46: Selsdon

**DM46.1** Within Selsdon District Centre, to enhance the character of Selsdon District Centre proposals should:

- a) Complement the existing predominant building heights of 3 storeys up to a maximum of 4 storeys;
- b) Ensure large buildings are sensitively located and of a massing no larger than buildings within this area;
- c) Ensure that the front elevation of large buildings are broken down to respect the architectural rhythm of the existing street frontages; and
- d) Should incorporate red multi-stock brick as the predominant facing material.

**DM46.2** Within Selsdon allocate sites for development as set out in Table 11.15.

### How the policy works

**11.133** The area in which Policy DM42 applies is shown on the draft Policies Map.

#### Selsdon District Centre

**11.134** Selsdon District Centre has a strong 'Urban Shopping Area' character. Both ends of which are marked by retail outlets, creating a well-defined edge and a distinct start and finish to this character area.

**11.135** There are two intermingled and competing architectural styles of buildings. The mock Tudor facades pays reference to the residential surroundings, however these are of a low quality and have aged visibly. The second, modernist style buildings have red multi-stock brick facades. These are of a slightly higher quality and better express the distinctiveness of the District Centre and are therefore, more appropriate for this location. Detailed policy is required to strengthen the sense of place.

**11.136** In the western part of the centre the public realm is fragmented and dominated by the overwhelming scale of the Addington Road and Old Farleigh Road junction. There is an opportunity to improve the walking and cycling experience in this area.

Allocating land for development

**11.137** Table 11.16 below sets out the proposed use on specific sites in Selsdon. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.15 Proposals for uses of land of specific sites in Selsdon**

<b>Ref no</b>	<b>Site name</b>	<b>Proposed use</b>
948	230 Addington Road	Residential with retail on ground floor (up to 3 units).

## Shirley

### General character

**11.138** Shirley is predominantly a suburban residential settlement surrounded by natural areas of Green Belt. This place is defined by the tree lined streets, the regular rhythm of well-spaced buildings with well-kept landscaped areas to the front, that allow oblique long range views beyond the rear gardens.

**11.139** Shirley's residential character predominantly consists of 'Planned Estates of Semi-Detached Houses' with garages and 'Compact Houses on Relatively Small Plots' set in large green spaces. This combination creates an open varied and interesting skyline and roofscape. The southern part is dominated by 'Scattered Houses on Large Plots' surrounded by expansive areas of greenery, including woodland of Addington Hills.

**11.140** Shirley has three urban and one suburban shopping area characters along Wickham and Shirley Roads. The suburban feel of these shopping areas are strengthened by tree lined streets, green verges with planting and small green spaces and parking accommodated in slip roads. These features play a vital role in creating Shirley's sense of place.

### Policy DM47: Shirley

**DM47.1** Within Shirley Local Centre, to retain the unique qualities development should:

- a) Retain the continuity of ground floor active frontages and allow flexibility at first floor and above for mixed use;
- b) Reference, respect and enhance architectural features such as the consistent rhythm and articulation of fenestration and retain features such as the triangular bay windows;
- c) Complement the existing predominant building heights of 2 storeys up to a maximum of 4 storeys; and

**11.141** The Upper Shirley Road Local Heritage Area predominantly consists of the 'Terraced Houses and Cottages' character type. Buildings represent a range of styles and architectural forms dating from the 18<sup>th</sup> century, with well-preserved original features. The grouping, its design and layout are a record of the local history of building design and development in this area.

**11.142** The Stuart Crescent Local Heritage Area lies in the heart of the Spring Farm area which has a consistent character of 'Planned Estates of Semi-Detached Houses'. The layout is arranged around the remnants of a circular historic copse. The mature landscaping reveals the historic character of the landscape which pre-dates development.

**11.143** The Bishops Walk Local Heritage Area represents a distinctive high quality historic landscape and townscape with a 'Scattered Houses on Large Plots' residential character. The southern section of Bishops Walk's mature landscaping reveals the historic design of Addington Park which pre-dated and allows for scenic views within and outside of the area. The distinctive design of the northern section creates a well-integrated topography, planting and built environment.

d) Incorporate or retain traditional shop front elements such as stall riser’s fascias pilasters and stall risers.

**DM47.2** In the area between 518 and 568 Wickham Road, to improve the character proposals should reference the ‘Suburban Shopping Area’ character type.

**DM47.3** In the area of the Wickham Road Shopping Parade, to retain the distinctive character of the 794-850 Wickham Road proposals should:

- a) Complement the existing predominant building heights up to a maximum of 2 storeys; and
- b) Retain the ‘Suburban Shopping Area’ character.

**DM47.4** Within Shirley allocate sites for development as set out in Table 11.16.

### How the policy works

**11.144** The areas in which Policies DM47.1 to DM47.3 apply are shown on the draft Policies Map.

#### Shirley Local Centre

**11.145** Shirley Local Centre consists of the combination of three different character types a ‘Urban Shopping Area’, ‘Scattered Houses on Large Plots’ and a ‘Suburban Shopping Area’. The northern side of the Local Centre is more tightly built-up, while the southern more is spacious with green verges, tree lined streets and parking within slip roads. In this area the potential for growth is limited.

#### Wickham Road

Each of Shirley’s shopping areas has a distinct character which should be enhanced and strengthened. This character is informed by the layout, scale, urban grain and, architectural features such as the brick work, fascias and stall rises. In order to ensure that the distinctive elements that contribute to Shirley’s sense of place are not lost these features have been included in the detailed policies.

#### Allocating land for development

**11.146** Table 11.16 below sets out the proposed use on specific sites in Shirley. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.16 Proposals for uses of land of specific sites in Shirley**

Ref no	Site name	Proposed use
128	Land at, Poppy Lane	Residential development
502	Coombe Farm, Oaks Road	Residential development so long as the development has no greater footprint, volume or impact on openness on the Metropolitan Green Belt than the existing buildings on the site

Ref no	Site name	Proposed use
504	Stroud Green Pumping Station, 140 Primrose Lane	Residential development (including the conversion of the Locally Listed pumping station) if the site is no longer required for its current use in the future. It should be noted that ordinary watercourses have not have been included in the fluvial modelling of the River Wandle and therefore a fluvial flood risk from this watercourse may be present.

## South Croydon

### General character

**11.147** South Croydon is organised in a south to north alignment along the Brighton Road. Its fragmented character can be attributed to the Brighton Road and railway infrastructure. The areas to the east are rich in green open spaces including areas of Green Belt such as Lloyd Park. The 'Industrial Estates' are primarily concentrated along the railway. Small pockets of 'Industrial Estates' are also scattered amongst residential blocks.

**11.148** The predominant residential character consists of 'Terraced Houses and Cottages', located within the central strip, with the mix of 'Medium Rise Blocks With Associated Grounds' and 'Compact Houses on Relatively Small Plots' to the west and north. The areas to the east contain 'Detached Houses on Relatively Large Plots' and 'Large Houses on Relatively Small Plots', a number of which have been Locally Listed.

**11.149** The Croham Manor Road Conservation Area represents the 'Detached Houses on Relatively Large Plots' character type. It is a notable collection of early 20<sup>th</sup> century Locally Listed houses with a wealth of well-preserved arts and crafts features.

**11.150** The South End Local Heritage Area has an 'Urban Shopping Area' character. It represents an early vernacular architectural style from late 19<sup>th</sup> with a wide range of well-preserved highly decorative architectural features. Its historic townscape composition consists of the street frontage and a triangular square with the prominent former Swan and Sugarloaf building terminating vistas along Brighton Road.

**11.151** The 'Urban Shopping Areas' of Ye Market Local Heritage Area is a distinctive early 20<sup>th</sup> century 'mock Tudor' style

shopping parade with a range of preserved original decorative features and detailing.

**11.152** St Peter's Road Local Heritage Area is focused around the Grade II Listed St Peter's Church with its high quality historic landscape that enables long vistas over South Croydon and reveals a panorama of the Croydon Opportunity Area and glimpses across the area. The character consists of the 'Institutions with Associated Grounds' surrounded by 'Large Houses on Relatively Small Plots' of well-preserved Victorian villas set in the high quality townscape.

**11.153** The Birdhurst Road Local Heritage Area predominantly contains the 'Large Houses on Relatively Small Plots' residential character type. It represents a collective value of high quality, well-designed and well-preserved Victorian Villas dating from before 1890. There is a distinctive relationship between the mature landscape of the street scene, the design of the buildings and the plan layout.

## Policy DM48: South Croydon

**DM48.1** Within the Brighton Road (Selsdon Road) Local Centre, to encourage a balance to be struck between strengthening and enhancing the character and facilitating growth, proposals should:

- a) Complement the existing predominant building heights up to a maximum of 3 storeys;
- b) Positively reinforce, strengthen and enhance characteristic features such as the articulation of corner buildings and continuous building line;
- c) Incorporate main entrances onto Brighton Road; and
- d) Positively reference, respect and enhance the articulation of shop fronts, including consistent rhythm and size of windows and doors.

**DM48.2** Within South Croydon allocate sites for development as set out in Table 11.17.

### How the policy works

**11.154** The area in which Policies DM48.1 applies is shown on the draft Policies Map.

#### Brighton Road (Selsdon Road) Local Centre

**11.155** The two Local Centres along the Brighton Road are dominated by the road infrastructure. The predominant character of 'Urban Shopping Areas' is characterised by the consistency of architecture and landmark buildings that serve as focal points and close the vistas at the apexes of Brighton Road and South End.

**11.156** The street frontages in the area are active and continuous. Ground floors are strongly articulated, have a consistent rhythm and size of ground floor doors and windows. The predominantly hard surfaced public realm has narrow footways that do not encourage walking.

**11.157** Place-specific development management policies are required to ensure a balance is struck between strengthening

and enhancing the character of the Local Centres and facilitating growth.

#### Allocating land for development

**11.158** Table 11.17 below sets out the proposed use on specific sites in South Croydon. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.17 Proposals for uses of land of specific sites in South Croydon**

Ref no	Site name	Proposed use
--------	-----------	--------------

Ref no	Site name	Proposed use
54	BMW House, 375-401 Brighton Road	Mixed use residential and supermarket. The site is located within Flood Zone 3a associated with the culverted River Wandle. At this location , the culverted River Wandle has been incorporated into the surface water sewer system as it flows north below the A235 Brighton Road. A Flood Warning and Evacuation Management Plan must be prepared for the site.
345	Normanton Park Hotel, 34-36 Normanton Road	Residential development with primary school expansion if required (otherwise the whole site may be used for residential development).
662	Coombe Road Playing Fields, Coombe Road	Secondary school with retention of playing pitches

## South Norwood and Woodside

### General character

**11.159** South Norwood has retained its Victorian urban centre, which has been recognised in its Conservation Area designation. It is predominantly a residential Place with a character of 'Terraced Houses and Cottages' with some patches of 'Medium Rise Blocks With Associated Grounds and 'Compact Houses on Relatively Small Plots'. Some larger buildings including residential 'Tower Buildings' and 'Large Buildings With Spacing' are scattered in the District Centre, in the vicinity of the railway line. Larger 'Industrial Estates' are located along the railways and scattered within smaller residential blocks. The Place's only 'Retail Estate and Business and Leisure Park' lies on the western edge next to Selhurst Park football stadium.

**11.160** Portland Road, one of the two historic high streets in South Norwood, links the District Centre with Woodside Green. It has a predominant 'Urban Shopping Area' character interlaced with residential developments, predominantly 'Medium Rise Blocks With Associated Grounds' and 'Large Buildings With Strong Frontages'.

**11.161** Woodside Green contains some of the few remaining parts of the historic medieval village. The surrounding street pattern radiates from this open area. Larger green spaces such as South Norwood Country Park and South Norwood Lake are located along the northern edge and form a boundary between this Place and neighbouring boroughs. The small green open spaces are scattered throughout South Norwood and Woodside.

**11.162** The South Norwood Conservation Area predominantly consists of an 'Urban Shopping Area' character mixed with 'Terraced Houses and Cottages'. Following the development of railway station, the district centre grew quickly

during Victorian times resulting in fine buildings on the High Street and grand residences at its perimeter. The Grade II Listed Stanley Halls is one of the area's most significant historic assets.

**11.163** The Portland Road Terraces, Portland Road Mission Hall and The Market Parade Local Heritage Areas have an 'Urban Shopping Area' character. These areas contain distinctive collections of mid-19<sup>th</sup> to early 20<sup>th</sup> century shopping parades, with bespoke Arts and Crafts and gothic inspired features that record the gradual historic development of the area.

**11.164** Ingatestone Road Local Heritage Area has a 'Terraced Houses and Cottages' character. It represents a fine example of high density Edwardian development with unique features such as balconies with ornate ironwork, exposed red brick cladding with elaborate white stucco decorations.

## Policy DM49: South Norwood and Woodside

**DM49.1** Along the section of Portland Road between the South Norwood Conservation Area and Watcombe Road, to facilitate growth and strengthen the edge of the South Norwood District Centre proposals should:

- a) Relate to the predominant character in adjacent residential areas;
- b) Complement the existing predominant height up to a maximum height of 3 storeys with accommodation in roof space;
- c) Incorporate main pedestrian entrances onto Portland Road; and
- d) Maintain the rhythm and size of ground floor windows and doors.

**DM49.2** Along the section of Portland Road between Watcombe Road and Woodside Avenue, to create a cohesive sense of place in this area, proposals should complement the existing predominant building heights of 2 storeys up to a maximum of 3 storeys.

**DM49.3** Within South Norwood and Woodside allocate sites for development as set out in Table 11.18.

### How the policy works

**11.165** The areas in which Policies DM49.1 and DM49.2 apply are shown on the draft Policies Map.

#### Section of Portland Road between the South Norwood Conservation Area and Watcombe Road

**11.166** Portland Road links South Norwood District Centre with Woodside Green. This street has a predominant 'Urban Shopping Area' character that has recently seen significant change which has resulted in the number of unsympathetic conversions from shops to residential use and a reduction of commercial uses.

**11.167** To facilitate growth, strengthen definition of the edge of the District Centre and manage conversions a Place-specific development management policy is required.

#### Section of Portland Road between Watcombe Road and Woodside Avenue

**11.168** The character of the area consists of small 'Urban Shopping Areas' and 'Institutions with Associated Grounds' interlaced with 'Medium Rise Blocks With Associated Grounds'. These character areas are surrounded by 'Terraced Houses and Cottages'.

**11.169** A Place-specific development management policy is required to create a cohesive sense of place.

#### Allocating land for development

**11.170** Table 11.18 below sets out the proposed use on specific sites in South Norwood and Woodside. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.18 Proposals for uses of land of specific sites in South Norwood and Woodside**

<b>Ref no</b>	<b>Site name</b>	<b>Proposed use</b>
97	24 Station Road	Residential development with a retail unit
137	Paxton House, 9 Cargreen Road	Residential development
486	Land and car park at rear of The Beehive Public House, 45A Woodside Green	Residential development

## Thornton Heath

### General character

**11.171** Thornton Heath is a densely built up settlement, with District and Local Centres that are spatially clearly defined.

**11.172** The Place has a predominantly residential character consisting of 'Terraced Houses and Cottages' with a number of Edwardian and Victorian parks interlaced within the urban fabric.

**11.173** The Thornton Heath High Street Local Heritage Area has an 'Urban Shopping Area' character. It contains distinctive classical Georgian, perpendicular and Queen Anne architectural styles dating from late 19<sup>th</sup> to 20<sup>th</sup> century with a wide range of well-preserved highly decorative historic features.

### Policy DM50: Thornton Heath

**DM50.1** Within the Thornton Heath District Centre and its environs, to ensure a balance is struck between strengthening and enhancing the character and enable growth, proposals should:

- a) Complement the existing predominant building heights of 3 storeys up to a maximum of 4 storeys;
- b) Retain the continuity of ground floor active frontages and allow flexibility at first floor and above for mixed use;
- c) Ensure tall or large buildings, located in the local vicinity of Thornton Heath Railway station do not exceed 9 storeys;
- d) Promote the expansion and enhancement of the shared public realm within the curtilage of the development;
- e) Ensure that the setting of Thornton Heath's local landmark, the Clock Tower, is respected; and
- f) Incorporate red multi-stock brick as the predominant facing material.

**DM50.2** Within the Thornton Heath Pond Local Centre and its environs, to ensure a balance is struck between strengthening and enhancing the character and facilitating growth, proposals should:

- a) Ensure building lines and frontages positively reference and respond to the form of the Thornton Heath Pond junction;
- b) Incorporate red multi-stock brick as the predominant facing material;
- c) Retain the extent and enhance the quality of the existing public realm;

- d) Complement the existing predominant building heights of 3 storeys up to a maximum of 6 storeys; and
- e) Ensure transitions between buildings of different sizes create sense of continuity at the street level.

**DM50.3** Within Thornton Heath allocate sites for development as set out in Table 11.19.

### How the policy works

**11.174** The areas in which these Policies DM50.1 and DM50.2 apply are shown on the draft Policies Map.

#### Thornton Heath District Centre and environs

**11.175** The character of Thornton High Street is defined by elements such as red multi-stock brick with white detailing around windows, a consistent scale of three storey buildings with active frontages and strong tree lines and the local landmark clock tower.

**11.176** The character around the railway station is less consistent changing from smaller scale buildings (up to three storeys) with narrow footways to tall and large buildings (up to nine storeys) with wider footways. The building lines within this area step back and forward resulting in inconsistent street frontages.

**11.177** There are opportunities for growth within this area. To facilitate growth, manage spatial quality and enhance and strengthen the character of the District Centre a Place-specific development management policy is required.

#### Thornton Pond Local Centre and environs

**11.178** The edge of the Thornton Pond Local Centre is beginning to lose its separate identity and sense of place. This could result in the Local Centre being absorbed into the homogenous urban form of the London Road.

**11.179** Densities in areas around of Thornton Pond Local Centre are beginning to increase. A cohesive approach needs to be taken to ensure that edge of the Local Centre remains well defined and that the Local Centre has a distinct sense of place.

#### Allocating land for development

**11.180** Table 11.19 below sets out the proposed use on specific sites in Thornton Heath. The location and boundary of each detailed proposal can be found on the draft Policies Map and further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.19 Proposals for uses of land of specific sites in Thornton Heath**

Ref no	Site name	Proposed use
115	Cheriton House, 20 Chipstead Avenue	Residential redevelopment
129	843 London Road	Primary school
136	Supermarket, car park, 54 Brigstock Road	Mixed use of residential, retail along Brigstock Road, and employment use
248	18-28 Thornton Road	Residential development
286	35-47 Osborne Road	Residential development
295	2 Zion Place	Residential development
326	Ambassador House, 3-17 Brigstock Road	Mixed use conversion comprising residential, retail and community facilities
400	Day Lewis House, 324-338 Bensham Lane	Residential redevelopment

Ref no	Site name	Proposed use
407	797 London Road	Conversion or redevelopment to residential use
468	Grass area adjacent to, 55 Pawsons Road	Residential development
499	Croydon University Hospital Site, London Road	Consolidation of the hospital uses on a smaller area of the site with enabling residential development on remaining part subject to there being no loss of services provided by the hospital in terms of both quantity and quality

## Waddon

### General character

**11.181** Waddon has a fragmented character which consists of Retail Estates and Business and Leisure Parks and Industrial Estates along Purley Way, Local Authority Housing with Public Realm' on the Waddon Estate, the large green open spaces of Duppas Hill, Wandle Park, Purley Way Playing Field, Roundshaw and the former international airport, WWI RFC and WWII RAF airfield. The local character is most consistent within the centre

### Policy DM51: Waddon

**DM51.1** To enable development opportunities including public realm improvements to be undertaken in a cohesive and coordinated manner, a masterplan with elements of design code will be considered for the area within Waddon's potential new Local Centre.

**DM51.2** Within Waddon allocate sites for development as set out in Table 11.20.

### How the policy works

#### Waddon's potential new Local Centre

**11.183** The area in which DM51.1 applies is shown on the draft Policies Map.

**11.184** The proposed new Local Centre and environs has a mix of conflicting uses. This has resulted in insensitive transitions between character areas. Additionally the area lacks a sense of place and does not function as a destination for residents, despite being well served by public transport, therefore a Place-specific development management policy is required.

**11.185** Waddon's potential to accommodate significant growth may lead to the designation of a new Local Centre. This opportunity provides additional impetus to ensure a balance is struck between retaining Waddon's sense of place while

and becomes more inconsistent towards the northern and eastern edges of Waddon.

**11.182** Located on east edge of Waddon, The Waldrons Conservation Area, one of Croydon's first Conservation Areas, has a residential character of 'Large Houses on Relatively Small Plots'. The central focus of the area are the fine Victorian houses around the Waldons and a number of large high quality buildings on Bramley Hill and Bramley Close.

strengthening and enhancing the positive elements of Waddon's character. Additionally there is a need to create opportunities to reduce the dominant effect of the Purley Way and Fiveways road infrastructure and use the full potential of Waddon station as a catalyst for growth.

**11.186** Due to the complexity of these issues and the number of development opportunities in Waddon's potential Local Centre a detailed masterplan would help coordinate development within this area is undertaken in a coordinated and cohesive way while retaining Waddon's sense of place.

#### Allocating land for development

**11.187** Table 11.20 below sets out the proposed use on specific sites in Waddon. The location and boundary of each detailed proposal can be found on the draft Policies Map and

further details including indicative phasing and indicative number of homes (if applicable) can be found in Appendix 5.

**Table 11.20 Proposals for uses of land of specific sites in Waddon**

Ref no	Site name	Proposed use
11	Croydon Garden Centre, 89 Waddon Way	Residential development
16	Heath Clark, Stafford Road	Secondary School and residential development subject to access from Stafford Road
25	Morrisons Supermarket, 500 Purley Way	Redevelopment of a mix of residential, retail, commercial and community uses to form the basis of a new residential community. It is recommended that basements are not considered at this site. Further ground investigations would be required at this site to confirm the the likelihood of groundwater occurrence.
48	294-330 Purley Way	Mixed use development comprising retail store, commercial space and residential units
301	Sea Cadet Training Centre, 34 The Waldrons	Residential use with community use

Ref no	Site name	Proposed use
316	PC World, 2 Trojan Way	Redevelopment of this area to a mixture of residential, retail and commercial use, healthcare facility (if required by the NHS) and community uses to form the basis of a new residential community
332	Superstores, Drury Crescent	Redevelopment of this area to a mixture of residential, retail, healthcare facility (if required by the NHS) and community uses to form the basis of a new residential community
349	Harveys Furnishing Group Ltd, 230-250 Purley Way	Redevelopment of this area to a mixture of residential, retail and commercial use, healthcare facility (if required by the NHS) and community uses to form the basis of a new residential community. As the site is partly within a Flood Zone 3 it will be subject to the Sequential Test as part of the Strategic Flood Risk Assessment.
350	Wing Yip, 544 Purley Way	Redevelopment of a mix of residential, retail, commercial and community uses to form the basis of a new residential community

Ref no	Site name	Proposed use
351	Furniture Village, 222 Purley Way	Redevelopment of this area to a mixture of residential, retail, healthcare facility (if required by NHS) and community uses to form the basis of a new residential community
355	Decathlon, 2 Trafalgar Way	Redevelopment of this area to a mixture of residential, retail, healthcare facility (if required by the NHS) and community uses to form the basis of a new residential community
430	Grafton Quarter, Grafton Road	Creative and Cultural Industries Enterprise Centre and residential development

# Appendices

Picture break

# Appendix 1 – About the proposal sites

The Proposed Submission draft of the Plan sets out Croydon Council's proposed sites for new homes, new primary and secondary schools, new healthcare facilities, new Gypsy and Traveller pitches and Creative and Cultural Industries Enterprise Centres and also land to be safeguarded for transport improvements in the borough.

This appendix explains the factors that were taken into consideration when assessing possible proposal sites in the borough. The possible proposal sites were identified from the following sources:

- The Call for Sites that took place in February 2012 and February 2014;
- The Strategic Housing Land Availability Assessment prepared by the Mayor of London in 2013;
- Planning permissions and records of pre-application advice; and
- Sites identified by Council officers as having potential for development.

Each site was considered for different uses. As each different land use has different needs the factors that were taken into consideration are looked at in turn starting below with housing.

## **New homes**

In assessing each site the basic criteria that were considered were as follows:

- a) Is the site big enough for 10 or more new homes;
- b) Are there any existing or proposed policy constraints that would prevent the development of the site altogether;
- c) Is the existing land use protected from development unless certain criteria are met (such as demonstrating lack of demand for an industrial premises or community use);
- d) Are there any factors that would prevent the site being developed (such as legal covenants or viability issues); and
- e) Could better use be made of the site for another use such as a new school based on the criteria in the following paragraphs?

On sites where c) or e) applies residential use may be a reasonable alternative option for the site and is being consulted upon as such.

## **New primary schools**

There were five principal criteria when assessing whether or not a site was suitable for a new primary school. These were:

- a) The site must be big enough (with 0.25ha being the smallest site a new primary school could be built on);
- b) The site must be in an area with an identified need for new primary school classes;

- c) The existing land use is not protected;
- d) There are no policy constraints that would prevent the development of the site altogether; and
- e) There are no known factors that prevent the site being developed.

Not every area of the borough has a need for new primary school classes beyond 2017. Only the North West, Centre and South West have been identified as needing more classrooms that will require the construction of a new primary school. The remaining areas of the borough (the North East, the East and the South East), either do not have any need for new classrooms or the need is small enough to be accommodated through the expansion of existing primary schools.

### **New secondary schools**

The assessment criteria for secondary schools were similar to primary schools, the main differences being the size of the site required and that secondary school places are required across the borough. The minimum site size for a new secondary school is 1.1ha.

### **New healthcare facilities**

The Council has worked with NHS England, the Croydon Commissioning Group, the South London and Maudsley NHS Trust, the Croydon University Hospital NHS Trust, the London Healthy Urban Development Unit and NHS Property Services to identify sites that would be suitable for new healthcare facilities and are in areas of demand.

### **Sites for Gypsy and Traveller pitches**

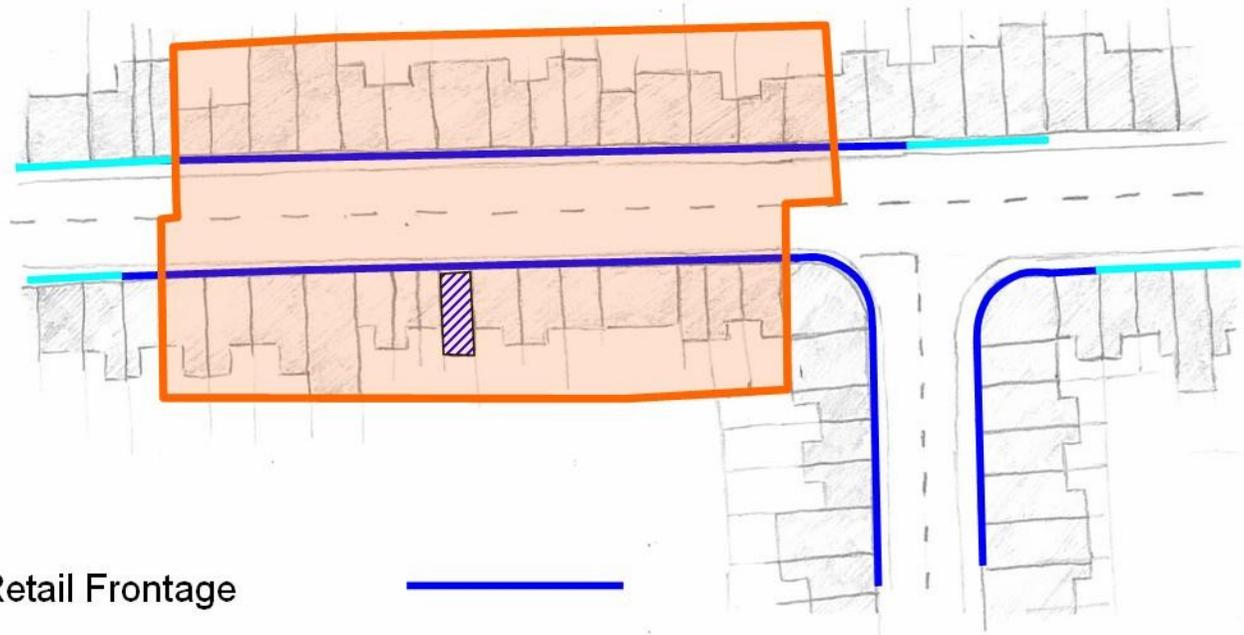

Gypsy and Traveller pitches are initially considered in the same way as a site for housing as in planning terms it is the same use of land. However, new Gypsy and Traveller pitches have their own specific requirements as well which were:

- a) The site must be big enough for three pitches (with 0.15ha being the minimum site size required for three new pitches); and
- b) The site should have no existing buildings (on the grounds that it would not be viable to demolish existing buildings and replace them with Gypsy and Traveller pitches), or the existing building could be used to provide an amenity block for new pitches.

### **Creative and Cultural Industries Enterprise Centres**

The Croydon Local Plan: Strategic Policies sets out in Policy SP3.3 that it will create a network of Creative and Cultural Industries Enterprise Centres with one each in Croydon Metropolitan Centre, Crystal Palace, Purley and South Norwood/Portland Road. Sites in these locations have been considered as potential locations for a Creative and Cultural Industries Centre where there is an existing policy designation protecting the existing use, but where the site could be realistically used to support creative and cultural industries in the borough.

## Appendix 2 – Calculating the percentage of units within a Main or Secondary Retail Frontage

Main Retail Frontage

Secondary Retail Frontage

Application Premises

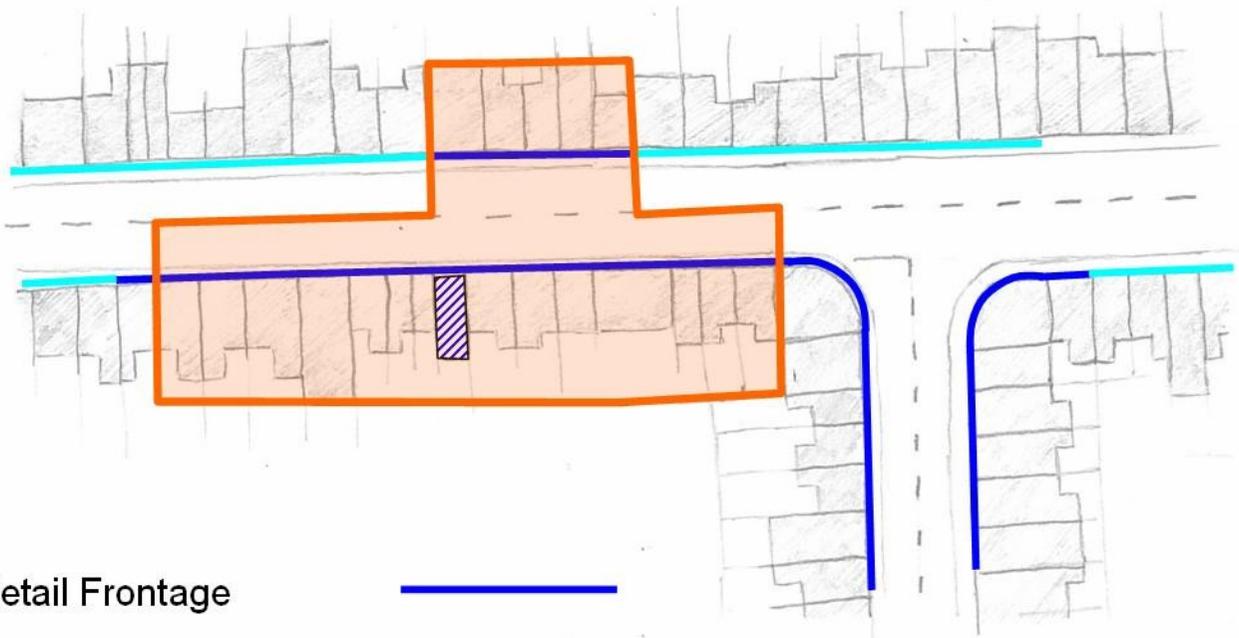

Extent of Main Retail Frontage for the purposes of calculating percentages

### Example 1

7 units either side of the application premises are included alongside 15 on the opposite side of the road.

Main Retail Frontage —

Secondary Retail Frontage —

Application Premises

Extent of Main Retail Frontage for the purposes of calculating percentages

**Example 2**  
 7 units either side of the application premises are included. However as the Main Retail Frontage on the opposite side of the road is smaller, only 5 units are included.

Main Retail Frontage

Secondary Retail Frontage

Application Premises

Extent of Main Retail Frontage for the purposes of calculating percentages

**Example 3**

7 units on one side of the application premises and 3 on the other are included alongside the 7 on the opposite side of the road.

## Appendix 3 – Designated Shopping Frontages

### Croydon Metropolitan Centre

<b>Croydon Metropolitan Centre: Main Retail Frontage</b>	
Whitgift Centre	Ground and first floor units, units 96 and 97, Chapel Walk
Centrale	Internal units
North End	1-151(odd); 2-142 (even)
High Street	1-37 (odd); (inc 1, St George's Walk) 4-56 (even); Arcade adjacent to no.34
Church Street	19-81 (odd); 26-88 (even)

<b>Croydon Metropolitan Centre: Secondary Retail Frontage</b>	
Station Road	2-12 (even)
Crown Hill	Crown House; 1-17 (odd); 2-18 (even)
Church Street	83-105 (odd); 90-100 (even)
Reeves Corner	1-5 (odd)
Surrey Street	Surrey House; 5-54 (cons)
High Street	39- 117 (odd); 58-114 (even)
St George's House	3-51 (odd); 2-44 (even); St George's Walk frontage of 22 Park Lane
Park Street	2-24 (even)
George Street	3-45 & 67-95 (odd); 2-68 (even)
Norfolk House	1-28 (cons)
Park Lane	2

### District Centres

<b>Addiscombe: Main Retail Frontage</b>	
Lower Addiscombe Road	237-295 (odd)

**Addiscombe: Secondary Retail Frontage**

Lower Addiscombe Road	185-205 & 207-227 & 229-231 (odd); 1-9 (cons) 297-331 (odd); 272-284 & 286- 308 (even);
-----------------------	--

**Coulsdon: Main Retail Frontage**

Brighton Road	110-148 (even)
Chipstead Valley Road	2-40 (even); 3-39 (odd)

**Coulsdon: Secondary Retail Frontage**

Brighton Road	96- 108 & 150-234 (even); 129-159 & 165-185 (odd)
Chipstead Valley Road	41-55 (odd); 42-48 (even)

**Crystal Palace: Main Retail Frontage**

Hollybush Terrace	1-4 (cons)
Westow Street	1-23 (odd); 2-64 (even)
Westow Hill	2-24 (even)

**Crystal Palace: Secondary Retail Frontage**

Central Hill	1-19 (odd)
Church Road	6-48 & 52-96 (even); 99-113 (odd)
Westow Hil	26-88 (even)
Westow Street	25-71 (odd); 74-78 (even)

**New Addington: Main Retail Frontage**

Central Parade	7-50 (cons)
----------------	-------------

**New Addington: Secondary Retail Frontage**

Central Parade	51-54 (cons)
----------------	--------------

**Norbury: Main Retail Frontage**

London Road	1384-1434 (even)
-------------	------------------

**Norbury: Secondary Retail Frontage**

London Road	1327-1423 & 1433- 1493 & 1495-1533 (odd); 1350-1374 & 1448-1468 (even)
-------------	--

**Purley: Main Retail Frontage**

Brighton Road (A235)	908-934 (even); 909-921 (odd)
High Street	44-48 (even); 15-31 (odd)
Purley Parade	1-11 (cons)

**Purley: Secondary Retail Frontage**

## Appendix 4 – How to assess whether proposals demonstrably relate to a Neighbourhood Centre

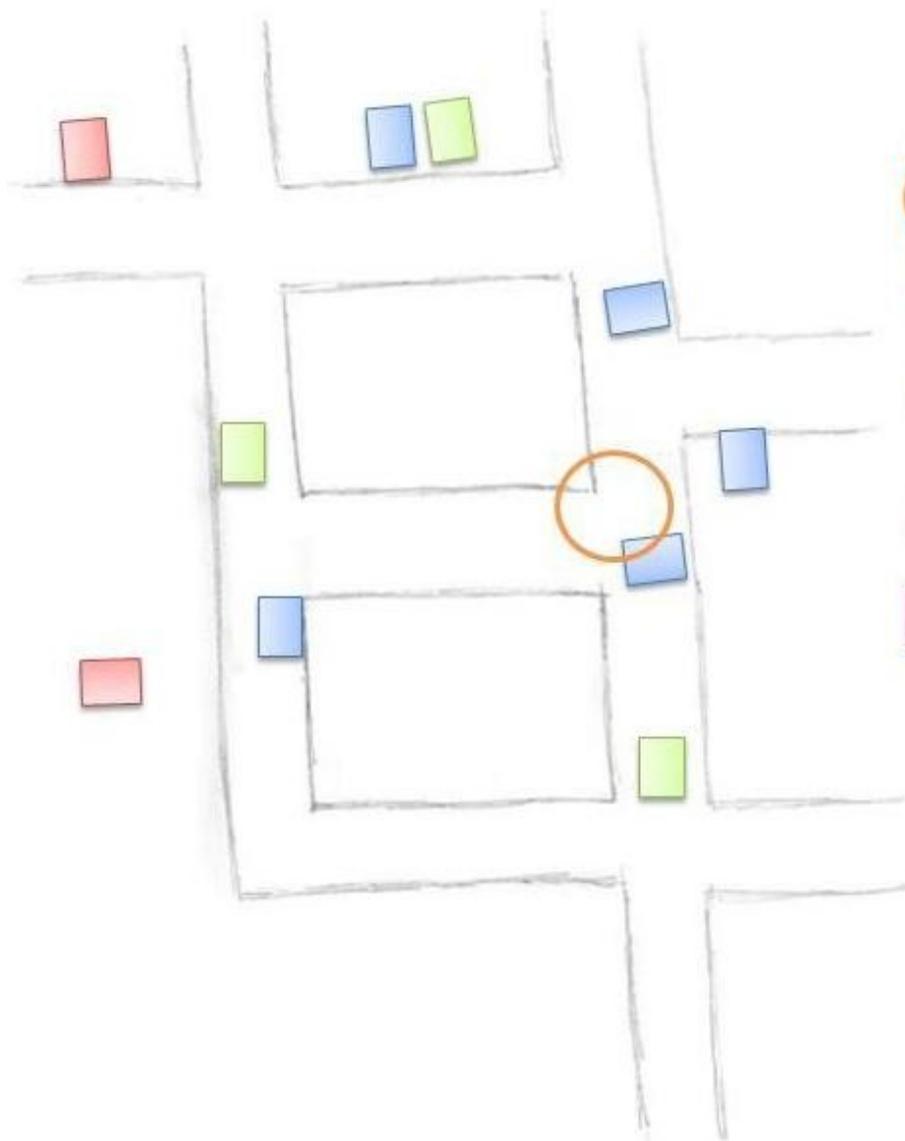

-  Neighbourhood Centre
-  Community Facilities (which together make-up the Neighbourhood Centre)
-  Appropriate locations for new community facilities
-  Inappropriate locations for new community facilities
-  Barriers that restrict movement

**EXAMPLE 2**

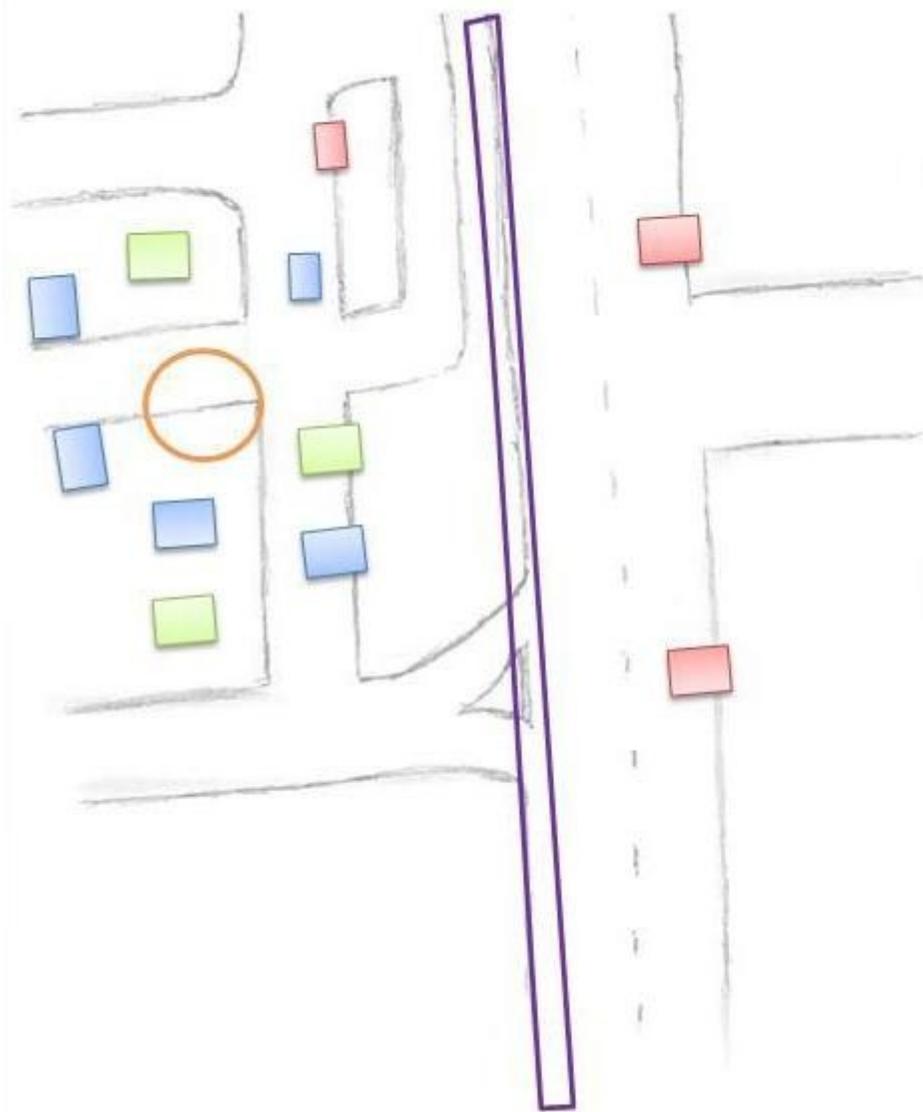

Community facilities will be permitted where they clearly relate to the neighbourhood centre. Proposals for community facilities that are not visually connected to the Neighbourhood Centre, beyond the line of sight, will not be permitted. A clear relationship cannot be demonstrated if there are barriers that restrict movement to the Neighbourhood Centre.

-  Neighbourhood Centre
-  Community Facilities (which together make-up the Neighbourhood Centre)
-  Appropriate locations for new community facilities
-  Inappropriate locations for new community facilities
-  Barriers that restrict movement

**EXAMPLE 3**

Community facilities will be permitted where they clearly relate to the neighbourhood centre. Proposals for community facilities that are not visually connected to the Neighbourhood Centre, beyond the line of sight, will not be permitted.

-  Neighbourhood Centre
-  Community Facilities (which together make-up the Neighbourhood Centre)
-  Appropriate locations for new community facilities
-  Inappropriate locations for new community facilities
-  Barriers that restrict movement

**EXAMPLE 4**

Community facilities will be permitted where they clearly relate to the neighbourhood centre. Proposals for community facilities that are not visually connected to the Neighbourhood Centre, beyond the line of sight, will not be permitted. A clear relationship cannot be demonstrated if there are barriers that restrict movement to the Neighbourhood Centre.

# Appendix 5 – Schedule of proposal sites

Sites numbered between 1 and 50

## 11: Croydon Garden Centre, 89 Waddon Way

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Waddon	CR0 4HY	0.994ha	Garden centre and car park	Urban	Low	Compact houses on relatively small plots; Local authority built housing with public realm; Retail Estates & Business & Leisure Parks
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Residential development	The site is suitable for residential development as the garden centre is not a protected use. Residential development will help to meet the need for new homes in the borough. The Sustainability Appraisal recommends public transport improvements are made as part of the development to mitigate the site's low public transport accessibility rating. The Locally Listed Building should be positively integrated into the development.			2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	35 to 94

**16: Heath Clark, Stafford Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Waddon	CR0 4NG	3.24ha	Field	Urban	High	Compact houses on relatively small plots; Industrial Estates; Large buildings in an urban setting; Mixed type flats
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Secondary School and residential development subject to access from Stafford Road		<p>The site is of a suitable size for a secondary school, is in an area that has a high demand for school places and can make a significant contribution to meeting this demand. The site is also large enough to accommodate new homes as well as a secondary school. Residential development will help to meet the need for new homes in the borough. Access to this site is currently an issue and development is dependent upon the reconfiguration of the Fiveways junction as currently it is not possible to provide access on to Stafford Road or Duppas Hill Road because of the volume of traffic on these roads. The Sustainability Appraisal recommends the loss of open space is mitigated by the development. School buildings and residential development should be located away from areas at risk from surface water ponding.</p>		2021 - 2026	Site forms part of Educational Estate Strategy	62 to 128

21: Former Royal Mail Sorting Office, 1-5 Addiscombe Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 6SE	0.44ha	Royal Mail Sorting Office & Post Office Car Park	Central	High	Large buildings in an urban setting; Tower Buildings; Transport Nodes
Description of option	Justification for option		Phasing of development	Evidence of deliverability	Number of homes	
Mixed use development incorporating residential, hotel and/or office. Also retail so long as the current planning permission is extant.	<p>Proximity to East Croydon Station means site is well suited to provide homes and offices. The redevelopment of this site could help to meet the need for new homes in the borough. The site lies within Croydon Metropolitan Centre close to East Croydon station but outside the Primary Shopping Area so all town centre uses except retail are acceptable in this location. The site has planning permission for a retail use having passed the sequential test. Should the planning permission expire retail use would cease to be an acceptable use on this site unless a new sequential test demonstrates that there are no sequentially preferable sites available that are suitable for the type of retail use proposed. A cycling hub is required to improve the sustainability of the site, the development of which has some negative environmental impacts, although partly mitigated by the provision of housing and employment.</p>		2016 - 2021	Site has planning permission and there is nothing preventing the site from being developed	74 to 201	

**25: Morrisons Supermarket, 500 Purley Way**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Waddon	CR0 4NZ	4.57ha	Retail warehouse site bordering Purley Way and Stafford Road	Urban	High	Detached houses on relatively large plots;Retail Estates & Business & Leisure Parks;Terraced houses and cottages
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
<p>Redevelopment of a mix of residential, retail, commercial and community uses to form the basis of a new residential community.It is recommended that basements are not considered at this site. Further ground investigations would be required at this site to confirm the the likelihood of groundwater occurrence.</p>		<p>Potential for a new Local Centre in the Five Ways area of Waddon is identified in the Croydon Local Plan: Strategic Policies. Over the lifetime of the Croydon Local Plan reconfiguration of out of town retail warehouses in the borough will provide an opportunity for redevelopment with a mix of residential and retail use alongside new community and leisure uses. Residential development will help to meet the need for new homes in the borough.</p>		<p>Post 2026</p>	<p>Site has no known developer interest and the Council will need to work with landowner to bring it forward</p>	<p>251 to 1028</p>

**28: Bowyers Yard, Bedwardine Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Crystal Palace & Upper Norwood	SE19 3AN	0.02ha	Studios and Workshop Space	Urban	High	Large houses on relatively small plots; Terraced houses and cottages; Urban Shopping Areas
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Cultural and Creative Industries Enterprise Centre	An existing recording studio that is seeking to expand their offer will provide greater support for the cultural creative sector. Accords with Croydon Local Plan Policy SP3.3 to deliver such a facility within Crystal Palace. The Sustainability Appraisal highlights the context of the Conservation Area which development proposals will need to consider.			2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	

**30: Purley Leisure Centre, car park and former Sainsbury's Supermarket, High Street**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 2AA	0.66ha	Swimming pool, multi-storey car park and former supermarket	Urban	High	Large buildings in an urban setting; Mixed type flats; Terraced houses and cottages; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Mixed use redevelopment incorporating public car park, new leisure facilities, including a swimming pool, and other community facilities, healthcare facility, creative and cultural industries enterprise centre, retail or residential accommodation.	The community use of the site is protected by Policy SP5 of the Croydon Local Plan: Strategic Policies. A commitment to deliver a creative and cultural industries enterprise centre in Purley District Centre is set out in Croydon Local Plan Strategic Policies. As it is in the Primary Shopping Area retail is an acceptable use. Residential development will help to meet the need for new homes in the borough. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities.	2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	30 to 171

**31: Croydon College car park, College Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1PF	0.25ha	Eastern end of Croydon College over existing car park and access area	Central	High	Large buildings in an urban setting; Linear Infrastructure

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Mixed use redevelopment comprising hotel & residential	The site is to be used to fund improvements to the remaining parts of Croydon College, who do not need the car park. Residential development will help to meet the need for new homes in the borough. The site lies within Croydon Metropolitan Centre close to East Croydon station but outside of the Primary Shopping Area so is suitable for all town centre uses except retail.	2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	159

### 32: 4-20 Edridge Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 9WX	0.23ha	Car park	Central	High	Linear Infrastructure; Tower Buildings; Urban Shopping Areas
Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes		
Residential development	Residential development will help to meet the need for new homes in the borough. It is a poor location for offices as it is too far from East Croydon station and outside of the Primary Shopping Area so retail use is not acceptable or suitable.	2021 - 2026	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	133		

**35: Purley Baptist Church, 2-12 Banstead Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 3EA	0.43ha	Purley Baptist Church, parking area and other various buildings	Urban	High	Large buildings in an urban setting;Planned estates of semi detached houses;Terraced houses and cottages;Urban Shopping Areas
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Mixed use redevelopment comprising new church, community facility and residential, with development located outside Flood Zone 2 and 3a.		The redevelopment of this site could help to meet the need for new homes in the borough. The church and community facility are protected by Croydon Local Plan Policy SP5. Part of the site previously had a planning permission which is now expired. The provision of flood prevention measures is required to improve the sustainability of the development.		2021 - 2026	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	20 to 111

**44: Central Parade West, Central Parade**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Addington	CR0 0JB	2.07ha	Land and community buildings to the west side of Central Parade	Urban	Medium	Institutions with associated grounds;Local authority built housing with public realm;Mixed type flats;Suburban Shopping Areas
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Mixed development including residential, community, healthcare facility, leisure, retail and open space		Residential development would help meet the need for new homes in the borough. The site is in New Addington District Centre, within the Primary Shopping Area which would make all town centre uses acceptable in this location. Community facilities are protected by Policy SP5 of the Croydon Local Plan: Strategic Policies. Landscaping that includes species to assist biodiversity is required to assist sustainability. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.		2016 - 2021	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	50 to 290

**48: 294-330 Purley Way**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Waddon	CR0 4XJ	2.55ha	Retail warehouse and vacant employment land	Urban	Medium	Retail Estates & Business & Leisure Parks; Terraced houses and cottages
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Mixed use development comprising retail store, commercial space and residential units	Over the lifetime of the Croydon Local Plan reconfiguration of out of town retail warehouses in the borough will provide an opportunity for redevelopment with a mix of residential and retail. Residential development will help to meet the need for new homes in the borough. As the site lies outside of a Primary Shopping Area it is not suited to intensification of the existing retail use. As the site is within Flood Zone 3 it will be subject to the Sequential Test as part of the Strategic Flood Risk Assessment. It is recommended that basements are not considered at this site			Post 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	17

**50: 44-60 Cherry Orchard Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 6BA	0.301ha	Meat processing factory	Urban	High	Industrial Estates; Mixed type flats; Tower Buildings

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development		2016 - 2021		50 to 80

Sites numbered between 51 and 100

**54: BMW House, 375-401 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
South Croydon	CR2 6ES	0.581ha	Site of former BMW showroom which has a multistorey car park to the rear of site	Urban	Medium	Large houses on relatively small plots; Retail Estates & Business & Leisure Parks; Terraced houses and cottages

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Mixed use residential and supermarket. The site is located within Flood Zone 3a associated with the culverted River Wandle. At this location, the culverted River Wandle has been incorporated into the surface water sewer system as it flows north below the A235 Brighton Road. A Flood Warning and Evacuation Management Plan must be prepared for the site.	There are no sequentially preferable sites within the Brighton Road (Sanderstead Road) Local Centre for a supermarket and a developer is interested in building one on this site. Residential development will help to meet the need for new homes in the borough. The development has some negative environmental impacts, although partly mitigated by the provision of housing and employment. As the site is within a Flood Zone 3 it will be subject to the Sequential Test as part of the Strategic Flood Risk Assessment.	2016 - 2021	Site is subject to developer interest and a planning application is likely soon with the landowner looking to develop the site themselves	42

**60: Cane Hill Hospital Site, Farthing Way**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Coulsdon	CR5 3YL	32.37ha	Former Hospital Site	Suburban	Low	Green Infrastructure;Planned estates of semi detached houses;Scattered houses on large plots
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development with new community, health and educational facilities		The development of this site will assist in meeting the need for housing in the borough. New community, health and educational facilities are required to improve the sustainability of the site. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities.		2016 - 2021	Site has planning permission and there is nothing preventing the site from being developed	650

**61: Car park, 54-58 Whytecliffe Road South**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 2AW	0.46ha	Car Park	Urban	High	Institutions with associated grounds;Mixed type flats;Planned estates of semi detached houses;Terraced houses and cottages;Transport Nodes

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential use with retention of car parking spaces	The site will help to meet the need for homes and potential for public parking in the borough after 2026. A Transport Assessment will be required of redevelopment proposals for the site to consider possible impacts on local streets in the vicinity of Purley Railway station arising from any reduction in parking.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	21 to 119

**66: 1-3 Pampisford Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 2NG	0.13ha	Office building at junction of Purley Way and Pampisford Road	Urban	High	Industrial Estates; Institutions with associated grounds; Large buildings in an urban setting; Mixed type flats; Urban Shopping Areas
Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes		
Residential development	The redevelopment of this site could help to meet the need for new homes in the borough. The site lies outside of Purley District Centre so is not a suitable location for town centre uses including retail and offices.	2016 - 2021	Site has planning permission and there is nothing preventing the site from being developed	14		

68: 130 Oval Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Addiscombe	CR0 6BL	0.22ha	Former warehouse/factory that has been vacant for more than five years. Hidden behind terraces of residential dwellings accessible through two alleyways.	Urban	High	Industrial Estates; Terraced houses and cottages
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development		As part of the Croydon Local Plan: Detailed Policies and Proposals any town centre or scattered employment site that has been vacant for more than 18 months is being proposed for redevelopment if it could accommodate 10 or more new homes. Policy SP3.2 of the Croydon Local Plan: Strategic Policies requires that evidence of lack of demand for the existing premises or site for an employment use be provided before other uses can be considered. However, the need for new homes in the borough is so great that, as a plan-making process, a plan-led release of vacant town centre and scattered employment sites is proposed to help meet the need for new homes.		2021 - 2026	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	10 to 57

**78: 114-118 Whitehorse Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR0 2JF	0.04ha	Retail unit on ground floor & vacant offices set back from retail frontage over 2 floors	Urban	High	Urban Shopping Areas
Description of option	Justification for option		Phasing of development	Evidence of deliverability	Number of homes	
Residential conversion and extension	Offices not in preferred location. Prior approval for office to residential for 8 units, there is potential for 10 units or more with potential to move the/extend the 1st storey and above to the building line of the ground floor. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development.		2016 - 2021	Site is subject to developer interest	7 to 8	

**80: Victory Place**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Crystal Palace & Upper Norwood	SE19 3BD	0.27ha	Warehouses and office buildings at rear of Victory Place and Carberry Road in the centre of the Crystal Palace Triangle	Urban	High	Compact houses on relatively small plots; Industrial Estates; Mixed type flats; Terraced houses and cottages; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Ground floor retail, restaurant and studio space with hotel, office/or and residential uses on other floors	Residential development will help to meet the need for new homes in the borough. The site lies within Crystal Palace District Centre and Primary Shopping Area so all town centre uses including retail are acceptable in this location. The Sustainability Appraisal recommends that the impact of the proposal on the conservation area is mitigated through the heritage and townscape assessment.	2016 - 2021	Site has planning permission and there is nothing preventing the site from being developed	33 to 70

**82: St John The Evangelist Vicarage, Sylvan Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Crystal Palace & Upper Norwood	SE19 2RX	0.33ha	Existing Church Hall, Vicarage and garden land in the grounds of St Johns Church (A large late Victorian redbrick building showing many of the best features of this type of building in that era)	Urban	Medium	Compact houses on relatively small plots; Institutions with associated grounds; Large houses on relatively small plots; Mixed type flats

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Redevelopment to provide new hall and residential dwellings	The redevelopment of this site could help to meet the need for new homes in the borough. The church hall is community facility protected by Croydon Local Plan Policy SP5. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	12 to 31

**97: 24 Station Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
South Norwood & Woodside	SE25 5AG	0.05ha	Vacant plot adjacent to supermarket	Urban	High	Terraced houses and cottages; Urban Shopping Areas
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Residential development with a retail unit	The redevelopment of this site could help to meet the need for new homes in the borough. The site lies within the Primary Shopping Area of South Norwood District Centre and so retail is an acceptable use. The Sustainability Appraisal recommends that the impact of the proposal on the conservation area is mitigated through the heritage and townscape assessment.			2016 - 2021	Site is subject to developer interest and a planning application is likely soon with the landowner looking to develop the site themselves	12

Sites numbered between 101 and 150

**104: Former Taberner House site, Fell Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR9 3JS	0.36ha	Former Council offices currently being demolished	Central	High	Green Infrastructure; Large buildings in an urban setting; Tower Buildings
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development		Residential development will help to meet the need for new homes in the borough. It is a poor location for offices as it is too far from East Croydon station and outside of the Primary Shopping Area so retail use is not acceptable or suitable. The retention of public open space in the development is required to assist its sustainability.		2021 - 2026	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	440

**115: Cheriton House, 20 Chipstead Avenue**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR7 7DG	0.17ha	Former care home and land	Urban	High	Institutions with associated grounds; Mixed type flats

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential redevelopment	No interest has been shown for a replacement community facility on this site so residential development is in principle acceptable and will help to meet the need for new homes in the borough. The design will need to address the environmental impacts of redevelopment. It is recommended that basements are not considered at this site	2021 - 2026	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	15 to 20

#### 116: Rees House & Morland Lodge, Morland Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Addiscombe	CR0 6NA	0.46ha	Vacant office building and former care home	Urban	Medium	Compact houses on relatively small plots; Institutions with associated grounds; Large houses on relatively small plots; Mixed type flats; Terraced houses and cottages
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Secondary School	Needed to meet demand for school places			2016 - 2021	Site forms part of Educational Estate Strategy	

**119: Amenity land at Croydon AFC stadium, Mayfield Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR7 6DN	2.78ha	Amenity land	Suburban	Low	Green Infrastructure; Industrial Estates; Terraced houses and cottages
Description of option	Justification for option		Phasing of development	Evidence of deliverability	Number of homes	
Primary school with access to playing field for community use outside of school hours	<p>The Council are looking to allow the playing field to be used as additional pitches under licence and also part of the site potentially for allotment use. These uses are not incompatible with use of part of the site as a primary school as the playing field would not be used during school hours. Although the site is Metropolitan Open Land there are no other sites available and suitable in the north west of the borough to meet the need beyond 2017 for primary school places. Sufficient sites have been identified to meet the need up to 2017. The Sustainability Appraisal recommends the loss of open space is mitigated by the development and that public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.</p>		2016 - 2021	In Council ownership		

**120: Timebridge Community Centre, Field Way**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Addington	CR0 9DX	2.089ha	Former school and grounds currently in use as a community centre	Urban	Medium	Compact houses on relatively small plots; Institutions with associated grounds
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development including replacement community facilities. Any loss of playing fields must be reprovided and provision of a family centre shall be continuous during the construction stage.		Residential development will help to meet the need for new homes in the borough, and the retention of community facilities with some replacement will assist the regeneration of Fieldway. The Sustainability Appraisal recommends that development proposals should seek to ensure that any loss of open land is mitigated through alternative provision.		2016 - 2021	In Council ownership	74 to 198

**123: Prospect West and car park to the rear of, 81-85 Station Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2RD	0.88ha	Car park at rear and office block	Central	High	large buildings with surrounding space; Transport Nodes

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
<p>Residential (with healthcare facility if required by NHS). It is recommended that basements are not considered at this site.</p> <p>Further ground investigations would be required at this site to confirm the likelihood of groundwater occurrence.</p> <p>There is one historic record of surface water flooding held by the Council in this location.</p>	<p>Existing office building is not protected from development. The site's location away from East Croydon station means it is less suited to hotel or office use and because it is outside of the Primary Shopping Area it is not suitable for retail use. Residential development will help to meet the need for new homes in the borough.</p> <p>The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place.</p> <p>Acoustic measures will need to be incorporated in the design to assist sustainability of the development.</p>	Post 2026	Site has planning permission and there is nothing preventing the site from being developed	40 to 288

#### 128: Land at, Poppy Lane

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Shirley	CR0 8YT	1.43ha	Cleared site	Suburban	Low	Green Infrastructure; Institutions with associated grounds; Mixed type flats

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development	This site does not meet the criteria for designation as Metropolitan Open Land as it does not contribute to the physical structure of London, it does not include open air facilities which serve whole or significant parts of London and it does not contain features or landscapes of national or metropolitan importance. For this reason it has been assessed by the same criteria as other non-Metropolitan Open Land sites and is considered acceptable for development. Residential development will help to meet the need for new homes in the borough.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	51 to 107

**129: 843 London Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR7 6AW	0.22ha	Site of former Oaks Hospital	Urban	Medium	Medium rise blocks with associated grounds; Retail Estates & Business & Leisure Parks; Terraced houses and cottages; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Primary school	<p>Site is a former community use and is protected for ongoing community activity by Policy SP5. There is a need for primary school places in this area of the borough and this site will help meet the need arising before 2017.</p> <p>The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.</p>	2016 - 2021	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	

**130: 1-9 Banstead Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 3EB	0.88ha	Semi detached houses including some used as offices	Urban	High	Planned estates of semi detached houses

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential	Residential development will help to meet the need for new homes in the borough	2021 - 2026	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	77 to 100

**136: Supermarket, car park, 54 Brigstock Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR7 8RX	0.44ha	Iceland Freezer Centre store and car park and rail yard.	Urban	High	Industrial Estates;Transport Nodes;Urban Shopping Areas
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Mixed use of residential, retail along Brigstock Road, and employment use		The site is in a very accessible location in Thornton Heath District Centre next to the railway station. Currently it has a low density supermarket with car park and scaffolding yard to the rear. The preferred option retains some employment use (as this is protected by Policy SP3.2 of the Croydon Local Plan: Strategic Policies) whilst making more efficient use of the site by providing homes that will help meet the borough's need for housing and a replacement retail unit (as the site is in the Primary Shopping Area of the District Centre where retail is encouraged).		Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	25 to 55

**137: Paxton House, 9 Cargreen Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
South Norwood & Woodside	SE25 5AE	0.13ha	A 4-storey derelict office building	Urban	High	Compact houses on relatively small plots;large buildings with surrounding space;Large houses on relatively small plots
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development		Office use is not protected in this location and redevelopment of the site to residential would help to meet the need for new homes in the borough.		2016 - 2021	Site has planning permission and landowner is likely to develop the site themselves	22

**138: Cherry Orchard Gardens and site between railway line and Cherry Orchard Road, Cherry Orchard Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 6BQ	0.8ha	Cleared site in two parts (1) between the railway line and Cherry Orchard Road and (2) on the corner of Cherry Orchard Road and Oval Road and the Sorter and Porter Public House	Central	High	Industrial Estates;Mixed type flats

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Mixed use development comprising residential, offices, restaurant/café, hotel and community facilities	Residential development will help to meet the need for new homes in the borough. The part of the site to west of Cherry Orchard Road lies within Croydon Metropolitan Centre close to East Croydon station but outside the Primary Shopping Area so all town centre uses except retail are acceptable on this part of the site. Acoustic measures will need to be incorporated in the design to assist sustainability of the development.	2021 - 2026	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	220 to 492

#### 142: 1 Lansdowne Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2BX	0.47ha	Lansdowne Hotel, YMCA Hostel and Marco Polo House	Central	High	large buildings with surrounding space; Large buildings with well defined building line and adjacent to other buildings; Linear Infrastructure

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Mixed use development comprising residential, offices, leisure and hotel	Residential development will help to meet the need for new homes in the borough. Site lies within Croydon Metropolitan Centre close to East Croydon station but outside the Primary Shopping Area so all town centre uses except retail are acceptable in this location. Accoustic measures will need to be incorporated in the design to assist sustainability of the development.	2021 - 2026	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	419 to 441

Sites numbered between 151 and 200

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
<p>Residential development. It should be noted that ordinary watercourses have not been included in the fluvial modelling of the River Wandle and therefore a fluvial flood risk from this watercourse may be present. As set out in Section 11.3.2 of the Level 1 SFRA, applicants considering development of this site may need to prepare a simple hydraulic model to enable a more accurate assessment of the probability of flooding associated with this ordinary watercourse to inform the site specific FRA. This should be carried out in line with industry standards and in agreement with the LLFA.</p>	<p>Residential development will help to meet the need for new homes in the borough</p>	<p>2021 - 2026</p>	<p>Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed</p>	<p>49 to 141</p>

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Mixed use development with offices or residential dwellings above retail units at ground level	Site lies within a proposed extension of the Primary Shopping Area close to East Croydon station which would make all town centre uses acceptable in this location and making it particularly suited to office use. The development of this site could help to meet the need for new homes in the borough.	2021 - 2026	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	30 to 85

**194: St George's Walk, Katharine House and Park House, Park Street**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1YE	1.94ha	Office & retail (including financial and food & drink) buildings between Katharine Street and Park Street	Central	High	Large buildings with well defined building line and adjacent to other buildings; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential and retail with new civic space.	Existing office building is not protected from development. The site lies within the Primary Shopping Area of Croydon Metropolitan Centre so it is suited to retail. It is situated at a distance from East Croydon station so it less suitable for office use. Residential development will help to meet the need for new homes in the borough. The Civic Space is a requirement of the Mid Croydon Masterplan. Many of the retail/catering units in St Georges Walk house independent businesses that provide low cost options and measures should be taken to enable these to continue in Croydon either within the development or elsewhere. As the site is in a Conservation Area, the Council's Conservation Area Guidance and Management Plans will need to be adhered to and proposals assessed against this. The Sustainability Appraisal recommends that the impact of the proposal on the conservation area is mitigated through the heritage and townscape assessment.	2021 - 2026	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	88 to 504

**195: Leon House, 233 High Street**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 9XT	0.56ha	High rise office building	Urban	High	large buildings with surrounding space; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
<p>Conversion to residential or mixed use residential/office with retention of retail on the ground floor. It should be noted that ordinary watercourses have not been included in the fluvial modelling of the River Wandle and therefore a fluvial flood risk from this watercourse may be present. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface' (BGS Susceptibility to Groundwater Flooding).</p>	<p>Existing office building is not protected from development. Site is too far from East Croydon station to be suited to continued use as an office building in its entirety so conversion to residential or residential and office is preferred option for this site. The area is not suited to more tall buildings or buildings taller than Leon House which means that redevelopment of the site is unlikely as a redevelopment would not be viable because of restrictions on height and the cost of demolishing Leon House. Site is outside of the Primary Shopping Area so is not suitable for retail use although the existing retail floor space can be retained or replaced. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development.</p>	<p>Post 2026</p>	<p>Site has planning permission but there are a number of issues that need to be overcome before the site can be developed</p>	<p>26 to 145</p>

**196: Stonewest House, 1 Lamberts Place**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area

Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Residential development	Residential development will help meet the need for housing in the borough. The existing office use is not protected.			2016 - 2021	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	9 to 31

**197: Emerald House, 7-15 Lansdowne Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2BX	0.39ha	Office building	Central	High	large buildings with surrounding space;Large buildings with well defined building line and adjacent to other buildings

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Office and residential and/or hotel (with healthcare facility if required by the NHS)	In accordance with Policy SP3 of Croydon Local Plan:Strategic Policies Partial Review, office refurbishment/redevelopment and mixed use should be explored fully. The site is suitable for all town centre uses except retail as it is within Croydon Metropolitan Centre close to East Croydon station but outside of the Primary Shopping Area. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place.	Post 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	55 to 157

**199: 20 Lansdowne Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2BX	0.775ha	Builders yard between Lansdowne Road and the railway line into East Croydon	Central	High	Industrial Estates;Large houses on relatively small plots

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development with light industrial workshops and studio spaces	Site is a town centre employment site. Policy SP3.2 of the Croydon Local Plan: Strategic Policies requires that evidence of lack of demand for the existing premises or site for an employment use be provided before other uses can be considered. However, the need for new homes in the borough is so great that, it is proposed that greater use is made of this site through a mixed use development of residential and light industrial or studio units.	Post 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	109 to 313

#### 200: Multi-storey car park, Lansdowne Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2BX	0.95ha	Multi storey car park	Central	High	large buildings with surrounding space; Large buildings with well defined building line and adjacent to other buildings
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Mixed use, public car park and residential.				Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	133 to 384

Sites numbered between 201 and 250

**201: Lidl, Easy Gym and car park, 99-101 London Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2RF	1.13ha	Supermarket, gym and car park	Urban	High	Retail Estates & Business & Leisure Parks; Urban Shopping Areas
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Primary school with residential development on upper floors		The site is of a suitable size for a primary school, is in an area that has a high demand for school places and can make a significant contribution to meeting this demand. The site is in a dense urban area and is suited to a mixed use development with the residential element helping to meet the need for new homes in the borough.		Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	51 to 293

**203: West Croydon station and shops, 176 North End**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1UF	1.75ha	West Croydon railway station, retail units on Station Road, London Road and North End, station car park and Network Rail yard	Central	High	Transport Nodes; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Remodelling of station and redevelopment to provide an improved transport interchange, cycle hub, retail & office units with residential development above. In the surrounding area, surface water flood risk is generally low. However, Station Road and the A212 have areas shown to be at high risk from surface water flooding. There are two historic records of surface water flooding held by Croydon Council in this location.	Existing station building is a low density development and use of the site (as identified in the West Croydon Masterplan) could be increased to include residential use. Improvements to the station as a transport interchange including a cycle hub is a policy aspiration of the Croydon Local Plan strategic policy SP8 and will assist in the sustainability of the development. Accoustic measures will need to be incorporated in the design to assist sustainability of the development and measures to alleviate surface water flooding taken, especially if current areas along train tracks are developed, reducing natural drainage capacity.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	79 to 455

#### 211: Poplar Walk car park and, 16-44 Station Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2RB	0.35ha	Car park & Buildings with ground floor retail units with residential accommodation on upper floors	Central	High	large buildings with surrounding space; Shopping centres, precincts; Transport Nodes; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
A more intensive use of the site with 232 residential units as part of an overall redevelopment of the site which includes re-provision of retail uses, car and cycle parking and a public square.	The site's location away from East Croydon station means it is less suited to hotel or office use and because it is outside of the Primary Shopping Area it is not suitable for retail use although the existing retail floor space can be re-provided as part of the redevelopment of this site. Residential development will help to meet the need for new homes in the borough.	2016 - 2021	Site is subject to developer interest and a planning application is likely soon with the landowner looking to develop the site themselves	50 to 141

**218: Lunar House, Wellesley Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 9YD	1.34ha	Office Block	Central	High	large buildings with surrounding space; Linear Infrastructure

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Office and residential and/or hotel (with healthcare facility if required by the NHS) if the site is no longer required by the Home Office.	In accordance with Policy SP3 of Croydon Local Plan:Strategic Policies Partial Review, office refurbishment/redevelopment and mixed use should be explored fully. The site lies within Croydon Metropolitan Centre close to East Croydon station but outside the Primary Shopping Area so all town centre uses except retail are acceptable in this location. Residential development will help to meet the need for new homes in the borough. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place. Conversion should be considered in the redevelopment to increase sustainability of the site.	Post 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	188 to 542

## 220: 9-11 Wellesley Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 0XD	0.15ha	Offices and bank	Central	High	large buildings with surrounding space;Large buildings with well defined building line and adjacent to other buildings

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential and/or hotel and/or retail and/or finance	Existing office building is not protected from development. Site lies within a proposed extension of the Primary Shopping Area which would make all town centre uses acceptable in this location. The redevelopment of this site could help to meet the need for new homes in the borough.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	21 to 60

**222: Multi-storey car park, 1 Whitgift Street**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1DH	0.54ha	Multi-storey car park and gymnasium	Central	High	Large buildings with well defined building line and adjacent to other buildings; Terraced houses and cottages; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential with community facilities commensurate in size and functionality to that currently on the site	The redevelopment of this site could help to meet the need for new homes in the borough. It is a poor location for offices as it is too far from East Croydon station and outside of the Primary Shopping Area so retail use is not acceptable or suitable. The Opportunity Area Planning Framework identifies surplus car parking spaces in this part of Croydon Metropolitan Centre. The retention of community facilities are required to improve the sustainability of the site, development of which has substantial environmental impacts.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	95 to 193

### 231: Segas House, Park Lane

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1NX	0.19ha	Listed office building	Central	High	Large buildings with well defined building line and adjacent to other buildings

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential conversion with cultural uses if required (with town centres uses considered if there is no interest in delivery of cultural uses).	The conversion of the existing Listed Building on this site could help to meet the need for new homes in the borough. Existing office building is not protected from development. Delivery of a cultural facility on the ground floor in this location would be appropriate to meet demand with residential or office uses on upper floors.	2016 - 2021	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	40

**234: Southern House, Wellesley Grove**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR9 1TR	0.58ha	24-storey office building with undercroft straddling Wellesley Grove and a two-storey period property converted to an office	Central	High	large buildings with surrounding space
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Offices and residential and/or hotel (with healthcare facility if required by the NHS)	In accordance with Policy SP3 of Croydon Local Plan:Strategic Policies Partial Review, office refurbishment/redevelopment and mixed use should be explored fully. The site is suitable for all town centre uses except retail as it is within Croydon Metropolitan Centre close to East Croydon station but outside of the Primary Shopping Area making it particularly suited to office use. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place.The public realm is required to encourage connectivity with surrounding areas to make the site more sustainable.			2021 - 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	82 to 234

**236: Apollo House, Wellesley Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 9YA	0.58ha	Office Building	Central	High	large buildings with surrounding space
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Offices and residential and/or hotel (with healthcare facility if required by the NHS) if the site is no longer required by the Home Office. There is one record of sewer flooding.	In accordance with Policy SP3 of Croydon Local Plan: Strategic Policies Partial Review, office refurbishment/redevelopment and mixed use should be explored fully. The site is suitable for all town centre uses except retail as it is within Croydon Metropolitan Centre close to East Croydon station but outside of the Primary Shopping Area. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place. To assist sustainability the development must incorporate acoustic measures to reduce noise impact on the development.			Post 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	82 to 234

**242: Davis House, Robert Street**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1QQ	0.13ha	Office building and shops	Central	High	Large buildings with well defined building line and adjacent to other buildings;Urban Shopping Areas
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development with limited retail to replace existing floor space		Existing office building is not protected from development. It is a poor location for offices as it is too far from East Croydon station and outside of the Primary Shopping Area although it does have a Secondary Retail Frontage. Residential development will help to meet the need for new homes in the borough.		Post 2026	In Council ownership	19 to 52

**245: Mondial House, 102 George Street**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1PJ	0.21ha	9-storey office building	Central	High	large buildings with surrounding space;Transport Nodes

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Office and/or residential development or offices or hotel and/or retail (on George Street frontage)	The site lies within a proposed extension of the Primary Shopping Area close to East Croydon station which would make all town centre uses acceptable in this location and making it particularly suited to office use. To assist sustainability the development must incorporate accoustic measures to reduce noise impact on the development.	2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	30 to 85

**247: Norwich Union House, 96 George Street**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1PJ	0.13ha	Office Building	Central	High	large buildings with surrounding space
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Offices with residential development or hotel and/or retail (on George Street frontage)	In accordance with Policy SP3 of Croydon Local Plan:Strategic Policies Partial Review, office refurbishment/redevelopment and mixed use should be explored fully. Site lies within a proposed extension of the Primary Shopping Area which would make all town centre uses acceptable in this location. The redevelopment of this site could help to meet the need for new homes in the borough.To assist sustainability the development must incorporate accoustic measures to reduce impact of noise on the development.			Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	19 to 52

Thornton Heath	CR7 6BA	0.20ha	Car sales site	Urban	Medium	Industrial Estates;Medium rise blocks with associated grounds;Urban Shopping Areas
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development		Residential development will help to meet the need for new homes in the borough.		Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	9 to 34

Sites numbered between 251 and 300

**284: Asharia House, 50 Northwood Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Norbury	CR7 8HQ	0.14ha	Offices, gymnasium and car park	Urban	Medium	Industrial Estates;Terraced houses and cottages

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development including replacement community facility	Residential development will help to meet the need for new homes in the borough. The community use of the site is protected by Policy SP5 of the Croydon Local Plan: Strategic Policies. The retention of a community facility will assist the sustainability of the site. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	7 to 23

**286: 35-47 Osborne Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR7 8PD	0.37ha	Disused warehouse and factory buildings	Urban	Medium	Industrial Estates; Terraced houses and cottages

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development	As part of the Croydon Local Plan: Detailed Policies and Proposals any town centre or scattered employment site that has been vacant for more than 18 months is being proposed for redevelopment if it could accommodate 10 or more new homes. Policy SP3.2 of the Croydon Local Plan: Strategic Policies requires that evidence of lack of demand for the existing premises or site for an employment use be provided before other uses can be considered. However, the need for new homes in the borough is so great that, as a plan-making process, a plan-led release of vacant town centre and scattered employment sites is proposed to help meet the need for new homes. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	17 to 62

**294: Croydon College Annexe, Barclay Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1PF	0.14ha	The former art block of Croydon College	Central	High	large buildings with surrounding space

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential redevelopment with community uses and Creative and Cultural Industries Enterprise Centre. There is one record of sewer flooding.	This site is well suited to provide a home to the creative and cultural industries enterprise centre for Croydon Metropolitan Centre. The existing building is a community facility which is protected by Policy SP5 of the Croydon Local Plan: Strategic Policies. Residential development will help to meet the need for new homes in the borough. The Fairfield Masterplan encourages a high standard of design which will help the sustainability of the site.	2021 - 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	20 to 56

#### 295: 2 Zion Place

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR7 8SD	0.15ha	Former Jacques & Co factory building	Urban	High	Industrial Estates; Terraced houses and cottages

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development	As part of the Croydon Local Plan: Detailed Policies and Proposals any town centre or scattered employment site that has been vacant for more than 18 months is being proposed for redevelopment if it could accommodate 10 or more new homes. Policy SP3.2 of the Croydon Local Plan: Strategic Policies requires that evidence of lack of demand for the existing premises or site for an employment use be provided before other uses can be considered. However, the need for new homes in the borough is so great that, as a plan-making process, a plan-led release of vacant town centre and scattered employment sites is proposed to help meet the need for new homes. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	7 to 39

Sites numbered between 301 and 350

**301: Sea Cadet Training Centre, 34 The Waldrons**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Waddon	CR0 4AZ	0.14ha	Derelict building	Urban	Medium	large buildings with surrounding space; Large houses on relatively small plots

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential use with community use	The existing structure on the site is fire damaged and cannot be reused. Residential development will help to meet the need for new homes in the borough. The community use of the site is protected by Policy SP5 of the Croydon Local Plan: Strategic Policies. The Sustainability Appraisal recommends that the impact of the proposal on the conservation area is mitigated through the heritage and townscape assessment.	2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	7 to 23

**306: The Good Companions Public House site, 251 Tithe Pit Shaw Lane**

Norbury	SE19 3HD	0.36ha	Former Car showroom	Urban	Medium	Industrial Estates;Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Retail supermarket on ground floor with residential above	There are no sequentially preferable sites within the Beulah Hill Local Centre in neighbouring Lambeth for a supermarket and a developer is interested in building one on this site. Residential development will help to meet the need for new homes in the borough. The Sustainability Appraisal recommends that the impact of the proposal on the conservation area is mitigated through the heritage and townscape assessment.	2016 - 2021	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	5 to 15

**324: Purley Oaks Depot, 505-600 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 2BG	1.03ha	Council depot	Suburban	Medium	Industrial Estates;large buildings with surrounding space
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Gypsy and Traveller pitches	The site is in Council ownership and the existing employment use can be relocated to underused land in Factory Lane which is also owned by the Council. It is the only deliverable site for Gypsy and Traveller pitches that has been identified and will contribute to meeting the need for Gypsy and Traveller pitches in Croydon.			2016 - 2021	In Council ownership	

**325: Telephone Exchange, 88-90 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 4DA	0.34ha	Four storey telephone exchange	Urban	High	Urban Shopping Areas
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Conversion of existing building to residential use if no longer required as a telephone exchange in the future	The conversion of this building could help to meet the need for new homes in the borough. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development.			Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	19 to 77

**326: Ambassador House, 3-17 Brigstock Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR7 7JG	0.56ha	Various retail units at ground level and offices above (with some community use)	Urban	High	Large buildings with well defined building line and adjacent to other buildings; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Mixed use conversion comprising residential, retail and community facilities	Office use is not protected in this location which is within the Primary Shopping Area (so retail is a preferred use at ground floor level). The community use in Ambassador House is protected by Policy SP5. Residential development would help to meet the need for homes in the borough. The building is built above the London to Brighton railway line and so conversion is likely to be preferable to new build because of cost of building above Network Rail infrastructure. To assist sustainability the development must incorporate acoustic measures to reduce noise impact of the development. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development. The site is located in Flood Zone 1, low probability of flooding from rivers.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	26 to 145

### 332: Superstores, Drury Crescent

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Waddon	CR0 4XT	1.45ha	Retail Warehouses and car park	Urban	Medium	Large buildings with well defined building line and adjacent to other buildings; Retail Estates & Business & Leisure Parks

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Redevelopment of this area to a mixture of residential, retail, healthcare facility (if required by the NHS) and community uses to form the basis of a new residential community	Over the lifetime of the Croydon Local Plan reconfiguration of out of town retail warehouses in the borough will provide an opportunity for redevelopment with a mix of residential, community uses and retail. Residential development will help to meet the need for new homes in the borough and the shift from out of town retail will assist the use of more sustainable modes of transport. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place. As the site is within Flood Zone 2 it will be subject to the Sequential Test as part of the Strategic Flood Risk Assessment. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface'	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	66 to 246

### 334: Valley Leisure Park, Hesterman Way

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR0 4YA	0.95ha	Vue Cinema and Valley Park Leisure Complex	Urban	Low	Retail Estates & Business & Leisure Parks

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
<p>Redevelopment of this area to a mixture of residential, retail, healthcare facility (if required by the NHS), community and leisure to form the basis of a new residential community and local centre.</p>	<p>Potential for a new Local Centre in the Valley Park area is identified in the Croydon Local Plan: Strategic Policies. Over the lifetime of the Croydon Local Plan reconfiguration of out of town retail warehouses in the borough will provide an opportunity for redevelopment with a mix of residential and retail use alongside new community and leisure uses. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place. Flood mitigation measures must be incorporated in the development to assist sustainability. As the site is within Flood Zone 2 it will be subject to the Sequential Test as part of the Strategic Flood Risk Assessment. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface'</p>	<p>Post 2026</p>	<p>Site has no known developer interest and the Council will need to work with landowner to bring it forward</p>	<p>34 to 90</p>

**337: Zodiac Court, 161-183 London Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR0 2RJ	0.71ha	Residential building with ground floor commercial units	Urban	High	Large buildings with well defined building line and adjacent to other buildings;Urban Shopping Areas
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential redevelopment		Redevelopment provides an opportunity to intensify the use of the site. However, it is noted that there are significant issues with viability of redevelopment that will need to be overcome before this site could be developed. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface'		Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	32 to 184

**345: Normanton Park Hotel, 34-36 Normanton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
South Croydon	CR2 7AR	0.40ha	Normanton Park Hotel & grounds	Urban	Medium	Compact houses on relatively small plots; Large houses on relatively small plots

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development with primary school expansion if required (otherwise the whole site may be used for residential development).	Residential development will help to meet the need for new homes in the borough. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	2021 - 2026	Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed	14 to 38

### 347: Tesco, 2 Purley Road

Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	59 to 221

### 357: Norwood Heights Shopping Centre, Westow Street

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Crystal Palace & Upper Norwood	SE19 3AH	1.46ha	Sainsbury's supermarket and smaller retail units	Urban	High	Retail Estates & Business & Leisure Parks; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Retail, replacement community use and residential	Site is a relatively low density site within the Primary Shopping Area of Crystal Palace District Centre which has potential for redevelopment. Residential development will help to meet the need for new homes in the borough. The Sustainability Appraisal recommends that the impact of the proposal on the conservation area is mitigated through the heritage and townscape assessment.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	39 to 223

### 372: Car park, Lion Green Road

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Coulsdon	CR5 2NL	1.08ha	Car Park (within Coulsdon District Centre)	Suburban	Medium	Industrial Estates
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Mixed use development comprising leisure, community facilities and retention of car parking spaces. Also retail so long as the current planning permission is extant.	Site lies within Coulsdon District Centre but outside the Primary Shopping Area so all town centre uses except retail are acceptable in this location. The site has planning permission for a retail use having passed the sequential test. Should the planning permission expire retail use would cease to be an acceptable use on this site unless a new sequential test demonstrates that there are no sequentially preferable sites available that are suitable for the type of retail use proposed.			2021 - 2026	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	

**374: Reeves Corner former buildings, 104-112 Church Street**

<b>Place</b>	<b>Postcode</b>	<b>Size of site</b>	<b>Site description</b>	<b>Suburban, Urban or Central location?</b>	<b>Public Transport Accessibility of area</b>	<b>Local character of area</b>
Croydon Opportunity Area	CR0 1RD	0.16ha	Vacant Land with designated Secondary Retail Frontage	Urban	High	Urban Shopping Areas
<b>Description of option</b>	<b>Justification for option</b>			<b>Phasing of development</b>	<b>Evidence of deliverability</b>	<b>Number of homes</b>
<p>Mixed use with residential to upper storeys and retail on ground floor. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface' (BGS Susceptibility to Groundwater Flooding). A high risk of surface water flooding surrounds the site, particularly across the road network such as Cairo New Road and Church Street. There is one historic record of surface water flooding held by Croydon Council in this location.</p>	<p>It will help meet the need for housing in the borough. Retail or a community use will assist in providing an active frontage to the ground floor. Previous use of the site was retail so new retail use is acceptable. As the site is in a Conservation Area, the Council's Conservation Area Guidance and Management Plans will need to be adhered to and proposals assessed against this. The Sustainability Appraisal recommends that the impact of the proposal on the conservation area is mitigated through the heritage and townscape assessment.</p>			<p>2021 - 2026</p>	<p>Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed</p>	<p>23 to 64</p>

**375: Northern part of, 5 Cairo New Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1XP	0.91ha	Church in former Factory building	Urban	High	Institutions with associated grounds; Linear Infrastructure
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential redevelopment above community use. The surrounding areas of Cairo New Road and Roman Way are shown to be at a high risk of surface water flooding.		Residential development will help to meet the need for new homes in the borough. The community use of the site is protected by Policy SP5 of the Croydon Local Plan: Strategic Policies.		2021 - 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	128 to 368

**392: Carolyn House, 22-26 Dingwall Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 9XF	0.13ha	Office building	Central	High	large buildings with surrounding space

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Offices and residential and/or hotel (with healthcare facility if required by the NHS)	In accordance with Policy SP3 of Croydon Local Plan:Strategic Policies Partial Review, office refurbishment/redevelopment and mixed use should be explored fully. The site is suitable for all town centre uses except retail as it is within Croydon Metropolitan Centre close to East Croydon Station but outside of the Primary Shopping Area. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	23 to 64

### 393: Whitgift Centre, North End

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1UB	8.8ha	Shopping Centre, four office towers and two multi-storey car parks	Central	High	Shopping centres, precincts

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Expansion of shopping centre, improved public realm and residential development and car parking provision. The majority of the site is shown to be at a very low risk. The surrounding areas are generally at a low risk of surface water flooding with the areas of the road network (i.e. Wellesley Road) being shown to be at high risk. There are three historic records of surface water flooding and one historic record of sewer flooding.	Planning permission has been granted for this site which represents a comprehensive major regeneration scheme for Croydon Metropolitan Centre which will secure an improved quality and expanded shopping centre along with new homes that will help to meet the need for new homes in the borough. The Sustainability Appraisal recommends that the impact of the proposal on the conservation area is mitigated through the heritage and townscape assessment.	2016 - 2021	Site has planning permission and landowner is likely to develop the site themselves	400 to 1,000

**396: Praise House, 145-149 London Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR0 2RG	0.25ha	Former office building of 4 floors currently with a community use with extension at rear last used as garage. Frontage used as tyre fitters.	Urban	High	Industrial Estates; Retail Estates & Business & Leisure Parks; Terraced houses and cottages

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Redevelopment for mixed use residential and community use	Site has an existing community use that is protected. The redevelopment of this site would help to meet the need for new homes in the borough. Currently it is not likely to be viable so its development is not likely to be completed before 2026.	Post 2026	Site has no known developer interest and the Council will need to work with the landowner to bring it forward	9 to 52

**398: Coombe Cross, 2-4 South End**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1DL	0.26ha	4 storey office building	Urban	High	Large buildings with well defined building line and adjacent to other buildings; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
<p>Residential development. It should be noted that ordinary watercourses have not been included in the fluvial modelling of the River Wandle and therefore a fluvial flood risk from this watercourse may be present. There are further areas of medium risk of surface water flooding to the west of the site. The surrounding area is generally an area of low to medium surface water flood risk. However, there are areas of high risk in regards to surface water flooding in areas such as Parker Road and South End. There are two historic records of surface water flooding.</p>	<p>The redevelopment of this site could help to meet the need for new homes in the borough</p>	<p>Post 2026</p>	<p>Site has no known developer interest and the Council will need to work with landowner to bring it forward</p>	<p>37 to 105</p>

**400: Day Lewis House, 324-338 Bensham Lane**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR7 7EQ	0.25ha	Large office/factory building	Urban	Medium	Industrial Estates; Terraced houses and cottages
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential redevelopment						12 to 42

Sites numbered between 401 and 450

**404: Vistec House & 14 Cavendish Road, 185 London Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR0 2RJ	0.69ha	6 storey office building fronting London Road and 2 storey warehouse on Cavendish Road	Urban	High	Large buildings with well defined building line and adjacent to other buildings; Urban Shopping Areas
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development		The redevelopment of this site could help to meet the need for new homes in the borough and as it is outside the Local Centre and Primary Shopping Area retail and other town centre uses are not preferred uses on this site.		2016 - 2021	Site is subject to developer interest and a planning application is likely soon with the landowner looking to develop the site themselves	32 to 179

**405: Capella Court & Royal Oak Centre, 725 Brighton Road**

<b>Place</b>	<b>Postcode</b>	<b>Size of site</b>	<b>Site description</b>	<b>Suburban, Urban or Central location?</b>	<b>Public Transport Accessibility of area</b>	<b>Local character of area</b>
Purley	CR8 2PG	1.30ha	A 5 storey office in the middle of a roundabout and a single storey block on the south side of the roundabout connected by a footbridge to the main building and group of vacant single storey shops at rear of Capella Court	Urban	Medium	Industrial Estates;large buildings with surrounding space

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development and health facility, with no net loss of flood storage capacity	The redevelopment of this site could help to meet the need for new homes in the borough. The site lies outside of Purley District Centre so is not a suitable location for town centre uses including retail and offices. The Shopping Parade on the southern part of the site is proposed for dedesignation as it does not have any shops in it. The current community use within the site should be included to assist sustainability in the local context. As the site is within a Flood Zone 3 it will be subject to the Exception Test as part of a Site Specific Flood Risk Assessment. Any development which involves an increase in building footprint should ensure there is no impact on the ability of the floodplain to store water. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	59 to 221

**407: 797 London Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR7 6AW	0.15ha	Six storey office building and car park at least part vacant	Urban	Medium	large buildings with surrounding space; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Conversion or redevelopment to residential use	Office use is not protected in this location and residential use would help meet the borough's need for new homes. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	7 to 25

**409: Beech House, 840 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 2BH	0.14ha	4 storey office building	Urban	High	Large buildings in an urban setting; large buildings with surrounding space; Large buildings with well defined building line and adjacent to other buildings

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Conversion of the office building to residential uses.	Located outside the proposed District Centre boundary so residential would be the preferred use, however the existing office use could be retained on the site. Residential development will help to meet the need for new homes in the borough. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development. As 22% of the site is in Flood Zone 2 any proposal for redevelopment should locate buildings within Flood Zone 1.	2016 - 2021	Site has planning permission and there is nothing preventing the site from being developed	36 to 45

**410: 100 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 4DA	0.22ha	Co-op funeral service premises	Urban	Medium	Urban Shopping Areas
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Mixed use residential and retail development	Site has an existing retail use and has potential for intensification with the addition of residential units which will help to meet the need for new homes in the borough.			Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	10 to 37

**411: Palmerston House, 814 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 2BR	0.07ha	Office Building	Urban	High	large buildings with surrounding space; Medium rise blocks with associated grounds

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential redevelopment	Site is an office in an edge of centre location where residential use is preferable. Residential development will help to meet the need for new homes in the borough. Conversion could be considered to reduce the environmental impacts of the development with flood mitigation measures. As part of the site is in Flood Zone 2 and 3 an Exception Test is required as part of a Site Specific Flood Risk Assessment. Any redevelopment of the site should seek to locate buildings in Flood Zone 1.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	4 to 18

**416: Challenge House, 618 Mitcham Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR0 3AA	0.80ha	3-storey office building	Urban	Medium	Industrial Estates; Institutions with associated grounds; Terraced houses and cottages

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential redevelopment or conversion. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development.	Office use is not protected. The Council's preferred location for offices is in the New Town and East Croydon station areas of Croydon Metropolitan Centre and in District Centres. The redevelopment of this site will help to meet the need for new homes in the borough. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	36 to 136

420: 87-91 Biggin Hill

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Crystal Palace & Upper Norwood	SE19 3HT	0.32ha	Derelict former industrial warehouse units	Urban	Medium	Industrial Estates
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Residential development	<p>As part of the Croydon Local Plan: Detailed Policies and Proposals any town centre or scattered employment site that has been vacant for more than 18 months is being proposed for redevelopment if it could accommodate 10 or more new homes. Policy SP3.2 of the Croydon Local Plan: Strategic Policies requires that evidence of lack of demand for the existing premises or site for an employment use be provided before other uses can be considered. However, the need for new homes in the borough is so great that, as a plan-making process, a once only release of vacant town centre and scattered employment sites is proposed to help meet the need for new homes. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.</p>			2016 - 2021	<p>Site is subject to developer interest with a planning application likely soon and subject to granting of planning permission there is nothing preventing the site from being developed</p>	14

**430: Grafton Quarter, Grafton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Waddon	CR0 3RP	0.62ha	Various industrial buildings and office block that are vacant	Urban	Medium	Industrial Estates;Institutions with associated grounds;Terraced houses and cottages
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Creative and Cultural Industries Enterprise Centre and residential development		It is an objective of the Croydon Local Plan: Strategic Policies to encourage creative and cultural industries in the borough. Permitting residential development on part of this site enables the development of a Creative and Cultural Industries Enterprise Centre on the remaining part of the site as it makes the overall development viable and assits with the sustainability of the site along with mitigation of the loss of employment with the retention if some skills and training on the site.		2016 - 2021	Site is subject to developer interest and a planning application is likely soon with the landowner looking to develop the site themselves	28 to 131

**450: Lennard Lodge, 3 Lennard Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2UL	0.18ha	Disused hospital buildings	Urban	High	Industrial Estates;Large houses on relatively small plots

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development	The previous community use relocated to an office building elsewhere in Croydon so residential development of this site would not lead to a loss of community facilities in the borough and would help to meet the need for new homes in Croydon.	2016 - 2021	Site is subject to developer interest and a planning application is likely soon with the landowner looking to develop the site themselves	9 to 46

Sites numbered between 451 and 500

**468: Grass area adjacent to, 55 Pawsons Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Thornton Heath	CR0 2QA	0.27ha	Fenced of grass area to the rear of shops on Whitehorse Road and adjacent to estate of 1 - 55 Pawsons Road and former depot at rear of 57 Pawsons Road	Urban	Medium	Medium rise blocks with associated grounds; Terraced houses and cottages; Urban Shopping Areas
Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes		
Residential development	Residential development will help to meet the need for new homes in the borough. The Sustainability Appraisal recommends that development proposals should seek to ensure that any loss of open land is mitigated through alternative provision.	2016 - 2021	In Council ownership	13 to 45		

**471: Masonic Hall car park, 1- 1B Stanton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR0 2UN	0.15ha	Private Car Park between 1 and 1 B Stanton Road, called Masonic Hall car park.	Urban	High	Large houses on relatively small plots; Terraced houses and cottages
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development		Residential development will help to meet the need for new homes in the borough. Delivery will be an issue with the land in private ownership and as a car park for a hall the Community Policy SP5 must be complied with. A Contaminated Land Assessment will be required.		Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	7 to 39

**474: Rear of The Cricketers, 47 Shirley Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Addiscombe	CR0 7ER	0.18ha	Amenity land to the rear of the pub's car park	Suburban	Medium	Terraced houses and cottages; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development	Residential development will help to meet the need for new homes in the borough. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	7 to 17

**486: Land and car park at rear of The Beehive Public House, 45A Woodside Green**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
South Norwood & Woodside	SE25 5HQ	0.15ha	Amenity land & car park	Urban	Medium	Compact houses on relatively small plots; Terraced houses and cottages; Urban Shopping Areas
Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes		
Residential development	Residential development will help to meet the need for new homes in the borough	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	7 to 25		

**488: Canius House, 1 Scarbrook Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 1SQ	0.07ha	5 storey vacant office block bordering Surrey Street	Central	High	Large buildings with well defined building line and adjacent to other buildings; Medium rise blocks with associated grounds
Description of option	Justification for option			Phasing of development	Evidence of deliverability	Number of homes
Residential conversion	A prior notification under the General Permitted Development Order has been made for this site. Residential development will help to meet the need for new homes in the borough. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development. The Sustainability Appraisal highlights the context of the Conservation Area which development proposals will need to consider and which this site is adjacent to .			2016 - 2021	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	30

**489: Corinthian House, 17 Lansdowne Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2BX	0.21ha	Locally listed office building	Central	High	large buildings with surrounding space

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Retention of offices with residential conversion, and/or hotel (with healthcare facility if required by the NHS)	As a locally listed building redevelopment is not an acceptable option. In accordance with Policy SP3 of Croydon Local Plan: Strategic Policies Partial Review, office refurbishment/redevelopment and mixed use should be explored fully. The site lies within Croydon Metropolitan Centre close to East Croydon station but outside the Primary Shopping Area so all town centre uses except retail are acceptable in this location. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	30 to 85

**490: 95-111 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 4HD	0.40ha	Gym car park and derelict houses	Urban	Medium	Planned estates of semi detached houses; Transport Nodes; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Primary school	The site is of a suitable size for a primary school, is in an area that has a high demand for school places and can make a significant contribution to meeting this demand.	2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	

**492: 5 Bedford Park**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area	CR0 2AQ	0.18ha	Vacant office building	Central	High	large buildings with surrounding space

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential conversion	A prior notification under the General Permitted Development Order has been made for this site. Residential development will help to meet the need for new homes in the borough. Conversion would need to adhere to Local Plan and London Plan Standards to improve the sustainability of the development.	2016 - 2021	Site has planning permission but there are a number of issues that need to be overcome before the site can be developed	82 to 91

**493: Pinnacle House, 8 Bedford Park**

<b>Place</b>	<b>Postcode</b>	<b>Size of site</b>	<b>Site description</b>	<b>Suburban, Urban or Central location?</b>	<b>Public Transport Accessibility of area</b>	<b>Local character of area</b>
Croydon Opportunity Area	CR0 2AP	0.31ha	Office building	Central	High	Institutions with associated grounds; large buildings with surrounding space
<b>Description of option</b>	<b>Justification for option</b>			<b>Phasing of development</b>	<b>Evidence of deliverability</b>	<b>Number of homes</b>
Mixed use of residential with offices (or a healthcare facility if required by the NHS) on the ground floor	In accordance with Policy SP3 of Croydon Local Plan: Strategic Policies Partial Review, office refurbishment/redevelopment and mixed use should be explored fully. The site lies within Croydon Metropolitan Centre close to East Croydon station but outside the Primary Shopping Area so all town centre uses except retail are acceptable in this location. The site has been identified by the NHS as being in an area with a need for additional healthcare facilities. The inclusion of healthcare facilities should be explored with the NHS before development takes place.			Post 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	44 to 125

**495: Dairy Crest dairy, 823-825 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley	CR8 2BJ	0.45ha	Dairy depot with buildings fronting on to Brighton Road being a locally listed building	Urban	Medium	Compact houses on relatively small plots; Industrial Estates; Large houses on relatively small plots; Medium rise blocks with associated grounds; Terraced houses and cottages
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Conversion of buildings fronting Brighton Road to studio space (with potential for a Creative and Cultural Industries Enterprise Centre serving Purley) with new light industrial units to the rear		The buildings fronting Brighton Road are locally listed so conversion is the only acceptable option. Policy SP3 of the Croydon Local Plan: Strategic Policies sets out the need for a Cultural and Creative Industries Enterprise Centre in Purley and the conversion of the buildings on Brighton Road could lend themselves to studio spaces. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating. As the site is within a Flood Zone 3 it will be subject to the Sequential Test as part of the Strategic Flood Risk Assessment.		2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	

**499: Croydon University Hospital Site, London Road**

<b>Place</b>	<b>Postcode</b>	<b>Size of site</b>	<b>Site description</b>	<b>Suburban, Urban or Central location?</b>	<b>Public Transport Accessibility of area</b>	<b>Local character of area</b>
Thornton Heath	CR7 7YE	8.17ha	Various hospital and medical associated buildings along with a staff car park on Bensham Lane	Urban	Medium	Industrial Estates; Large buildings with well defined building line and adjacent to other buildings; Medium rise blocks with associated grounds; Retail Estates & Business & Leisure Parks
<b>Description of option</b>	<b>Justification for option</b>			<b>Phasing of development</b>	<b>Evidence of deliverability</b>	<b>Number of homes</b>
Consolidation of the hospital uses on a smaller area of the site with enabling residential development on remaining part subject to there being no loss of services provided by the hospital in terms of both quantity and quality	In order to fund improvements to the existing hospital buildings residential development on part of the site may be required. This option is dependent on there being no loss of services provided by the hospital both in terms of quantity and quality.			2021 - 2026	Site is part of a partners' Estate Strategy	77 to 290

Sites numbered between 501 and 1000

**502: Coombe Farm, Oaks Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Shirley	CR0 5HL	3.99ha	Former school and hostel buildings	Suburban	Low	Green Infrastructure; Institutions with associated grounds
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Residential development so long as the development has no greater footprint, volume or impact on openness on the Metropolitan Green Belt than the existing buildings on the site		Although the site is in the Green Belt, it already has built form. Residential development will help to meet the need for new homes in the borough.		2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	

**504: Stroud Green Pumping Station, 140 Primrose Lane**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Shirley	CR0 8YY	0.72ha	Thames Water pumping station (which is a Locally Listed Building) and surrounding land	Suburban	Medium	Green Infrastructure; Industrial Estates; Planned estates of semi detached houses

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development (including the conversion of the Locally Listed pumping station) if the site is no longer required for its current use in the future. It should be noted that ordinary watercourses have not been included in the fluvial modelling of the River Wandle and therefore a fluvial flood risk from this watercourse may be present.	This site does not meet the criteria for designation as Metropolitan Open Land as it does not contribute to the physical structure of London, it does not include open air facilities which serve the whole or significant parts of London and it does not contain features or landscapes of national or metropolitan importance. For this reason it has been assessed by the same criteria as other non-Metropolitan Open Land sites and is considered acceptable for development. Residential development will help to meet the need for new homes in the borough.	Post 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	26 to 68

**517: Milton House, 2-36 Milton Avenue**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Broad Green & Selhurst	CR0 2BP	1.32ha	Mostly vacant & semi derelict factory units in integrated industrial location surrounding Milton Avenue	Urban	Medium	Compact houses on relatively small plots; Industrial Estates; Large buildings in an urban setting; Terraced houses and cottages

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential and employment uses	The redevelopment of this site could help to meet the need for new homes in the borough, whilst also providing some employment and mitigating against possible loss of employment in the area. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating and that mitigation of loss of employment might take the form of requirements around training and skills development.	2016 - 2021	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	74

**522: Surface car park, Wandle Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Croydon Opportunity Area		0.6ha	Council Surface Car park	Central	High	Large buildings with well defined building line and adjacent to other buildings; Linear Infrastructure; Medium rise blocks with associated grounds

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
<p>Bus stand underneath the flyover and a district energy centre and residential development on the remainder of the car park. The majority of the site is within Flood Zone 3a to the south-west and the rest of the site are within Flood Zone 1. This More Vulnerable development should be preferably located in Flood Zone 1. If it is essential to build on Flood Zone 3a, then all residential uses should be located in the first floor level or above.</p> <p>Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface' (BGS Susceptibility to Groundwater Flooding).</p>	<p>TfL Buses require a bus standing space in Croydon Metropolitan Centre so that bus stands can be removed from the Mid Croydon Masterplan area. A district energy centre is a policy aspiration of the Croydon Local Plan: Strategic Policies and the Wandle Road surface car park has been identified as the most cost effective and realisable site for its location. The remaining capacity can be used for new housing which will help to meet the need for new homes in the borough. As the site is within a Flood Zone 3 it will be subject to the Sequential Test as part of the Strategic Flood Risk Assessment.</p>	<p>2021 - 2026</p>	<p>Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed</p>	<p>Up to 40</p>

**636: Land west of Timebridge Community Centre, Lodge Lane**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Addington	CR0 0QA	7.44ha	Amenity land	Suburban	Medium	Compact houses on relatively small plots; Green Infrastructure; Institutions with associated grounds
Description of option		Justification for option		Phasing of development	Evidence of deliverability	Number of homes
Secondary school		The site is of a suitable size for a secondary school, is well connected to an area that has a high demand for school places and can make a significant contribution to meeting this demand. The site has met the criteria for de-designation as Green Belt and part of the site will be de-designated to accommodate a school.		2021 - 2026	In Council ownership	

**662: Coombe Road Playing Fields, Coombe Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
South Croydon	CR0 5RB	10.80ha	Playing fields	Suburban	Medium	Detached houses on relatively large plots; Green Infrastructure; Institutions with associated grounds

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Secondary school with retention of playing pitches	The site is of a suitable size for a secondary school, is well connected to an area that has a high demand for school places and can make a significant contribution to meeting this demand. The site has met the criteria for de-designation as Green Belt and part of the site will be de-designated to accommodate a school. The site is currently used as playing pitches which are protected so any redevelopment for a school should look to retain some of this use. Development could potentially require mitigation to address the effects of impact on the adjacent SNCI	2016 - 2021	In Council ownership	

**683: Purley Back Lanes, 16-28 Pampisford Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Purley		0.54ha	Single Storey Garage Engineering works at Russell Hill Place, car park and domestic garages at rear of Tudor Court, Russell Hill Parade. Two four storey detached houses in use as D1 facilities on Pampisford Road	Urban	High	Large houses on relatively small plots; Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development and public car park including new industrial units to replace those currently on the site	Part of the site is currently an operational town centre employment site where there is a presumption against residential development. However, development of the site could enable the replacement of the industrial units with more modern and more accessible premises whilst providing new homes that are needed to meet the borough's need for housing.	2021 - 2026	Site is subject to developer interest but there are a number of issues that need to be overcome before the site can be developed	Up to 91

**764: Land to the east of Portnalls Road, Portnalls Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Coulsdon	CR5 3DE	6.81ha		Suburban	Low	Green Infrastructure;Planned estates of semi detached houses

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Secondary school	The site is of a suitable size for a secondary school, is in an area that has a high demand for school places and can make a significant contribution to meeting this demand. The site is of a suitable size for a secondary school, is well connected to an area that has a high demand for school places and can make a significant contribution to meeting this demand. The site has met the criteria for de-designation as Green Belt and part of the site will be de-designated to accommodate a school. Development could potentially require mitigation to address the effects of impact on the adjacent woodland.	Post 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	

**937: Kempfield House, 1 Reedham Park Avenue**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Kenley and Old Coulsdon	CR8 4BQ	0.48ha	Former Croydon Council children's home	Suburban	Low	Institutions with associated grounds; Mixed type flats; Planned estates of semi detached houses

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential development with community use	Residential development to help meet the need of the borough. The community use of the site is protected by Policy SP5 of the Croydon Local Plan: Strategic Policies. The Sustainability Appraisal recommends public transport improvements are made as part of the proposal to mitigate the site's low public transport accessibility rating.	2016 - 2021	Site is subject to developer interest and a planning application is likely soon with the landowner looking to develop the site themselves	12

**945: Waitrose, 110-112 Brighton Road**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Coulsdon	CR5 2NB	0.265ha	Waitrose supermarket	Urban	Medium	Urban Shopping Areas

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Residential and healthcare facilities	The site has been identified by the NHS as being in an area with a need for additional healthcare facilities.	2021 - 2026	Site has no known developer interest and the Council will need to work with landowner to bring it forward	55 to 90

**946: Stubbs Mead Depot, Factory Lane**

Place	Postcode	Size of site	Site description	Suburban, Urban or Central location?	Public Transport Accessibility of area	Local character of area
Waddon	CR0 3RL	2.71ha	Council Depot with parking area, and six buildings and one bay of fuel pumps.	Urban	High	Industrial Estates

Description of option	Justification for option	Phasing of development	Evidence of deliverability	Number of homes
Mixed residential and employment (industry and warehousing)	The employment use is a protected use and therefore need to be retained on the site. The redevelopment of this site could help to meet the need for new homes in the borough. The provision of flood prevention measures is required to improve the sustainability of the development. Self-contained residential basements and bedrooms at basement level are not permitted in areas that have 'potential for groundwater to occur at the surface'	2021 - 2026	In Council ownership	157 to 440

**947: 359-367 Limpsfield Road**

*Comments and Council's response by Consultation Document*

---

**CLP2 - Detailed Policies and Proposals (Preferred and Alternative Options)**

<i>Ref No</i>	<i>Representor Company or Organisation</i>	<i>Participation at EIP</i>	<i>Object or Support</i>	<i>Soundness</i>	<i>Policy, Site or Paragraph</i>	<i>Summary of Representation</i>	<i>Summary of Proposed Changes</i>	<i>Council's Response</i>	<i>Council's Proposed Action</i>
0057/02/004/Non-specific/O	Jill Kilsby		Object			Incidentally, it was only by chance that I learnt of the existence of this document. If I had had time I might have had more points to raise. In what ways do you inform people in the borough about documents such as these?		No change	The Council wrote to or e-mailed everybody on our consultation list to inform them of the publication of the draft Local Plan documents as well as putting up site notices and putting out a press release. Our consultation list is made up of people and organisations who have requested to be informed about the Local Plan and those who have made any comments on either previous drafts of the Local Plan or the Community Infrastructure Levy Charging Schedule.

0084/02/006/Non-specific/O	Mr Dale Greetham  <i>Sport England</i>	Object	<p>The National Planning Policy Framework (NPPF) requires each local planning authority to produce a Local Plan for its area. Local Plans should address the spatial implications of economic, social and environmental change. Local Plans should be based on an adequate, up-to-date and relevant evidence base. In addition, paragraph 73 of the NPPF requires that:</p> <p>"Planning policies should be based on robust and up-to-date assessments of the needs for open space, sports and recreation facilities and opportunities for new provision. The assessment should identify specific needs and quantitative deficits or surpluses of open space, sports and recreational facilities in the local area."</p> <p>Paragraph 175 of the NPPF states: "Where practical, Community Infrastructure Levy charges should be worked up and tested alongside the Local Plan."</p> <p>Sport England advocates that new developments should contribute to the sporting and recreational needs of the locality made necessary by their development.</p> <p>Sport England is not aware of a robust evidence base for playing pitches and indoor sports facilities for Croydon. It is not clear how this lack of evidence base has been/will be taken into account to develop this document and the IDP.</p> <p>Sport England would be happy to provide further advice on how local authorities can strategically plan for sports facilities. There are a number of tools and guidance documents available, which can be found on Sport England's website.</p>	The Council should produce a robust evidence base for playing pitches and indoor sports facilities for Croydon.	Change	The Council is producing a Indoor Sports Facilities Assessment and Strategy. It is also producing an Outdoor Sports Facilities Assessment and Playing
----------------------------	--	--------	---	---	--------	---

---

0092/02/023/Non-specific/O	<i>Riddlesdown Residents Associatio</i>	Object	<p>The RRA are also concerned about the proposed Local Plan which has been included in three large documents and has mostly had to be viewed on line. We understand hard copies of the documents have not been readily available until the last week of the consultation period. This quite frankly is disgraceful and it must surely call into question the validity of the consultation. We wonder if this is something the Secretary of State for Communities and Local Government ought to be made aware of, prior to the Council adopting the Plan? In view of this, why don't the Council extend the consultation for another 6 weeks i.e. until 29 January 2016?</p>	No change	The Local Plan documents were available in hard copies at the borough's libraries, Access Croydon and at the consultation events.
----------------------------	---	--------	---	-----------	---

---

0115/02/019//C	Mr Bob Sleeman	Comment	<p>The document, like the previous UDP, is very impenetrable to many residents. The timescale to respond has not allowed for significant consultation or public meetings. It is difficult to identify policy details in this set of documents</p> <p>It is difficult to understand the implication of one set of policies against another, particularly where planning relates to districts outside the central area but there is a buffer zone adjacent to the central area where different policies will be implemented.</p> <p>The exercise has given us little confidence that residents will be able to make representation through their elected councillors and therefore we have been effectively disenfranchised from the process.</p>	Change	<p>Changes will be made to the introduction to the document to make it more user friendly including a guide to which policies might apply if you were applying for different types of planning permission.</p>
0115/03/001//C	Mr Bob Sleeman		<p>Call for a review including increased weighting for needs for transport, education and health facilities for all sites suitable for 15 + gypsy and traveller pitches with site area greater than 4.0:</p> <p>15: Kent Gateway Lane ,Featherbed Lane,Selsdon,CR0</p> <p>536: Land of former Croydon Airport runway- south of Imperial Way,Purley Way,Waddon,CR0 4RR</p> <p>553: By Pavilion, Playing Fields,Purley Way, Waddon,</p> <p>632: Land south of Threehalfpenny Woods, Kent Gate Way, Bridle Way, Addington, CR0 5AH</p> <p>635: Land adjoining Kent Gateway East of Addington Village Roundabout ,Kent Gateway, Lodge Lane,Addington,CR0 5AR</p> <p>636: Land west of Timebridge Community Centre, Lodge Lane,Elmside, Addington CR00QA</p> <p>651:Land south of Heathfield,Riesco Drive, Selsdon, CR0 5RS</p> <p>661: Coombe Lodge Nursery (Central Nursery), Conduit Lane ,Coombe Road, South Croydon, CR0 5RQ</p>	No change	<p>The evidence will not be amended with regards to weighting of particular categories. The weighting was subject to stakeholder consultation whilst preparing the Local Plan and was determined to be the most appropriate for meeting the needs of Gypsy and Travellers living in Croydon.</p>
0203/03/042/Non-specific/C	<p>Mr Charles King</p> <p><i>East Coulsdon Residents' Associat</i></p>	Comment	<p>Public Transport Rail : Coulsdon generally has good train links, with three stations Coulsdon South, Coulsdon Town and Woodmansterne. Linking Coulsdon to Croydon, London, Redhill and Gatwick. Unfortunately from December 2015 GTRailway has reduced the off-peak service from 7 trains per hour to 6 trains per hour and diverted one service from London Bridge to Blackfriars adding 15minutes to the journey time to Central London.</p>	No change	<p>Public transport management is not a planning consideration and is not a subject of this consultation.</p>

0203/03/002/Non-specific/C	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Comment	Education Not only is it important that Croydon has good primary and secondary schools it is important that Croydon College and Coulsdon Sixth Form College are fully funded together with the Calat centres.	Not Duly Made	funding issues are not a subject of this consultation
0203/03/065/Non-specific/C	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Comment	CIL and 106 Monies from developments in the town centre and on the Cane Hill site should be used to improve local infrastructure in Coulsdon town centre and on improvements that benefit the local community.	No change	The Community Infrastructure Levy is assigned at a borough level but up to 15% may be spent on projects in specific Places that are not infrastructure related. This money will be dividing equally amongst the 16 Places. S.106 funding will usually have to be spent in the area local to the development depending on the precise wording of each individual s.106 agreement.
1324/03/002/Non-specific/S	Katharine Harrison <i>Surrey County Council</i>	Support	We are pleased to note that the supporting evidence indicates that the potential additional education need likely to be generated by the planned new housing development will be met within the borough. We would like to continue to be consulted as the Croydon Local Plan progresses to seek to ensure that new development does not impact on education provision for Surrey. We therefore would anticipate future engagement with you to ensure that any potential cross-boundary pressure on Surrey schools is appropriately mitigated and that strategic education infrastructure needs are met in accordance with the statutory Duty to Cooperate.	Welcome support	

1610/02/015/Non-specific/C

Mr Sean Creighton

*Norbury Residents Association Joi*

Comment

Soundness - Justified

34.As AECOM suggests that 'it is worthwhile considering the implications of development within areas of existing multiple deprivation (as defined by the Index of Multiple Deprivation)' what steps are being taken to do this?

35. As AECOM points out that although 'Development in an area of relative deprivation is assumed to be a positive step given that it can lead to developer funding being made available for targeted local schemes/initiatives', 'it is difficult to draw strong conclusions.' What proposals are there for ensuring that future developer schemes will possibly address social exclusion and increase equality?

36.As AECOM states that 'No data exists to inform the appraisal of housing site options in terms of contribution to housing objectives', how do the officers propose to assess each application for housing development?

38.In order to rectify AECOM's view that the lack of data showing the location of existing schools 'is a notable evidence gap', can this be made public and submitted with the Cabinet in the report of the outcome on the Local Plan consultation?

39.Given that AECOM considers that 'whilst the Index of Multiple Deprivation does identify areas of education and skills deprivation, this data is not considered suitably reliable', are there any other data sources that will help improve the understanding of such deprivation, which can be submitted to the Cabinet in the report on the outcome of the Local Plan consultation?

40. Given that AECOM states that '(l)imited data is available to inform the appraisal of site options' and that '(i)deally, data would be available to show the location of sports and recreational facilities', can such data be published and included in the report to the Cabinet reporting the results on the Local Plan consultation?

No change

The need for homes across the borough is high so no further work has been undertaken on this matter. What is key is that the supporting infrastructure is provided and for this the Council has introduced its Community Infrastructure Levy and identified sites for health and education in the Local Plan.

1610/02/012/Non-specific/C

Mr Sean Creighton

*Norbury Residents Association Joi*

Comment

Soundness - Effective

AECOM 1 (p. 8-10) notes that a strong development management and monitoring role is needed in respect of:

- ensuring that opportunities to develop Neighbourhood Centres as 'community hubs' are fully realised
- ensuring the introduction of low carbon energy infrastructure
- the protection of urban green space (including garden land) and support the Green Grid
- achieving 'positive effects on the biodiversity baseline'
- avoiding and mitigating noise
- ensuring that design measures avoid/mitigate negative effects and result in new development that reinforces existing historic built character where possible
- 'to ensure that archaeological assets are given due consideration'

22. Given the increasing staff cuts the Council will have to make how will it be able to ensure that development management monitoring will ensure positive effects can be achieved?

23. How many planning staff are currently involved in this type of monitoring and how many staff vacancies for it are frozen?

No change

The comment is noted and the recommendations of the Sustainability Appraisal have and will continue to be taken into account in the emerging Local Plan.

1610/02/007/Non-specific/C	Mr Sean Creighton  <i>Norbury Residents Association Joi</i>	Comment	Soundness - Effective	<p>Planning Application Processes</p> <p>13. Why is there no policy proposal on the planning application process with a view to only validating applications if the documentation provided includes details of discussions with immediate neighbours, the provision of site location maps, design and access statements, and full drawings with clear measurements to ensure that neighbours and others can better understand what is being proposed?</p> <p>Planning Enforcement</p> <p>14. Why is there no discussion on planning enforcement making it clear that the Council will take enforcement action where unauthorised building works are or have been carried out so that the work is undone before an application to regularise what the applicant plans can be validated?</p> <p>15. How many planning enforcement officers are currently in post and how many frozen vacancies are there?</p> <p>16. How many enforcement notices are outstanding? How old is the longest of these? How many enforcement notices were issued in each financial or calendar year between 2008 and 2014? How many enforcement notices have been issued so far in 2015? Are similar statistics available for the actual number enforcement notices acted upon and complied with?</p>	No change	<p>Validation requirements are set separately and are not included in the Local Plan. The Local Plan sets out what an applicant needs to demonstrate in order to have a development that is in accord with the Local Plan. It does not stipulate how a developer should necessarily demonstrate this.</p> <p>Planning enforcement is not a matter for the Local Plan.</p>
1610/01/001/Non-specific/C	Mr Sean Creighton  <i>Norbury Residents Association Joi</i>	Comment		<p>What people like about Norbury:</p> <ul style="list-style-type: none"> <li>- It is not overdeveloped. There is a good mix of shops and houses</li> <li>- It is quite in the side streets away from the High St with nice gardens and trees</li> <li>- There is a diverse mix of people</li> <li>- It is convenient and accessible</li> <li>- There are trees and open spaces</li> <li>- Pollards Hill is a place of peace and near rural civility</li> </ul>	No change	<p>The comment is noted. Many of these aspects of Norbury are picked up by the Borough Character</p>

1610/01/002/Non-specific/C	Mr Sean Creighton  <i>Norbury Residents Association Joi</i>	Comment	<p>What people dislike about Norbury:</p> <p>It is unkempt and feels uncared for  There is too much litter and drink cans everywhere which has been aggravated by the hours of sale of alcohol  Fly tipping  The streets are covered in phlegm and chewing gum  Not enough shops selling fresh produce: meat, fish, baker, etc  The food shops spilling out onto the pavement  Restaurants polluting the street air with smoke  Restaurants that do not serve alcohol with meals  Too many cheap eateries  Traffic congestion and fumes  Not enough buses  Street drinking  Lack of flowers and trees</p>	No change	<p>Many of the points raised in this comment cannot be addressed by the planning system. Those that can (food shops and their appearance on the street scene and number of restaurants) are addressed already through the draft policies of the Croydon Local Plan: Detailed Policies and Proposals, in particular policies on shop fronts, design and character, and land use in District Centres.</p>	
1700/01/003/Non-specific/O	A P Goodall	Object	<p>I feel strongly how Croydon Council deals with this issue in that it seeks to do so without proper consultation with the council tax payers who, in effect, pay for all these ideas. Publicity of this issue does not appear in any of the emails about Croydon I receive from the Council. Why should this be, to ensure greater secrecy.</p>	Greater publicity should be given to the consultation on the Local Plan.	Change	<p>Consideration will be given as to how the Local Plan can be publicised through the Council's existing communication methods.</p>

I am writing to you because I am really worried that our MP Gavin Barwell is trying to rally support against new development in the borough.

I have had correspondence with Gavin Barwell regarding housing before & his lack of action to accelerate home building in the borough is disappointing, for him to go further still and resist it is deeply regrettable.

I'd love to assume we're all agreed London & the south-East badly needs far more housing than is currently planned, not less. However, people have different views so I should briefly express mine here.

People want to live in London & the South-East due to the availability of work which is in turn driven by the productivity of central London - many people trading their skills in close geographical proximity to one another & those services being sold to a global market.

Housing supply needs to respond to this and I welcome the extra council tax revenues that new residences can provide. The development in central Croydon is very welcome, but even there my curiosity asks why other buildings couldn't match the height of Saffron House.

So why do we I believe we need more housing? because when house prices and rents are high it leads to wealthy land & property owners reaping the benefits of the productivity & hard-work done by normal families. It also leads to higher housing benefit bills & administration costs that in turn increase the tax burden on, yes, hard working families.

One symptom of this is all the talk surrounding 'affordable housing.' In my opinion the majority of housing should be affordable.

So why am I writing to you? Because Gavin Barwell's email is bound to lead to people from the 'I'm alright Jack' generation largely comprising of baby-boomers writing to you to resist the plans. Also we know that Conservatives garner much support from older people that may have more time to write to you & oppose plans, than let's say younger people that may be too busy working hard to find the time.

Please can you outline what measures are in place to safeguard against the 'picture of public opinion' being distorted by this, with regards to decisions on what development should be allowe

1812/01/002/Non-specific/O	Grahame Lamb	Object	<p>I wish to notify you of my objections to some of the Council's proposals in the Croydon Local Plan, which has recently been brought to my attention. As I understand from Gavin Barwell MP (Croydon Central) there are plans to build three gypsy/traveller camps in the Green Belt (eg Coombe Farm), and to allow large housing developments on some of our precious green spaces. Once gone these are gone forever. The character of parts of the Borough could be dramatically changed for the worse and this might discourage people from living, working, shopping and investing in the area. Whilst I acknowledge that there is a need for more accommodation in Croydon it is preferable to utilise effectively those brownfield sites which I am given to understand do exist in the area. More brownfield sites might become available in the future and I should like to think that the Council is establishing and/or maintaining and updating a list of suitable locations.</p>	<p>Whilst I acknowledge that there is a need for more accommodation in Croydon it is preferable to utilise effectively those brownfield sites which I am given to understand do exist in the area. More brownfield sites might become available in the future and I should like to think that the Council is establishing and/or maintaining and updating a list of suitable locations</p>	No change	<p>The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.</p>
1842/01/002/Non-specific/O	Katy Littler	Object	<p>After reading the proposal I strongly object to the building of houses on green belt land. Not only will it change the way that my family and I enjoy open spaces, but as a teacher knowing how stretched the current education system is, I imagine that your plans will put totally unnecessary pressure on local schools. I could not see any plans for any infrastructure development along side your proposal. Surely, you need to consider the opinions of local people? I live in Tanglewood Close and have not been informed of these plans. Luckily we have a strong sense of community, and have been informed by local M.P's.</p>	No change	<p>The objection does not refer to any specific site and so cannot be considered further. Public consultation has been undertaken in order to obtain the view's of residents and members of the public.</p>	
1898/01/001/Non-specific/O	Mr Douglas Houghton	Object	<p>I would like to register my disapproval at any plans to build on, or develop on any green spaces in the Croydon area. I feel that there are enough undeveloped brownfield sites available.</p>	No change	<p>The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.</p>	

1926/01/057/Non-specific/C	Councillor Luke Clancy	Comment	Legal Compliance	The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'. Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.	Change	The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.
1926/01/002/Non-specific/O	Councillor Luke Clancy	Object	Legal Compliance	Let me first say a number of residents have contacted me to say it is disgraceful that Croydon Council appear to have allowed so little time for consultations, particularly given the time of year, and publicised the process in such a desultory fashion.	No change	The Council will consider whether the advance communication regarding future consultations can be improved upon.
1926/01/054/Non-specific/C	Councillor Luke Clancy	Comment	Legal Compliance	It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	Change	It is desirable that Members of the Council from across the borough be involved in its preparation prior to publication of each draft of the Local Plan.

2062/01/057/Non-specific/C	Councillor Jason Perry  <i>London Borough of Croydon</i>	Comment	Legal Compliance	<p>The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. Change	It is desirable that Members of the Council from across the borough be involved in its preparation prior to publication of each draft of the Local Plan.
2168/01/002/Non-specific/S	Mr Duncan Clarke  <i>London Borough of Sutton</i>	Support		The London Borough of Sutton is generally supportive of the aims and preferred policies within both documents.	Welcome support	
2199/01/001/Non-specific/O	August & Wendy Kolster	Object		1.Loss of greenbelt, green spaces, parks, gardens, etc. (Policy DM2 – page 18, Policy DM28 – pages 115-116, Policy DM40.1 – page 166)  We believe that having ample green spaces is essential for a good quality of life. As such we feel that it is inappropriate to use the already limited existing green spaces for housing, retail, etc. If anything, in some instances new green spaces should probably be created whenever old buildings are pulled down!	No change	The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.

2221/01/003/Non-specific/C

Mr Derek Maynard

Comment

*Hartley and District Residents Ass*

HADRA's more general representations also relate to a more macro view of the overall Draft Plan. Following some analysis of the contents of the Draft CLP, we conclude that there is a major mis-match between the overall body of the documentation and the deliverability of the headline targets for 31,756 new homes to 2036, which criticism I justify with further comments below. At, say, 3 people per home average, this equates to a population expansion of 96,000 in the Borough by 2036, of which 21,000 homes and 65,000 people are to be absorbed into the suburban parts of the Borough, chiefly in the South. Given that Croydon, as already the most populous Borough in Greater London, comprising 370,000 inhabitants [with relatively little fallow (white) land left to exploit], we contend that absorbing a further 96,000 people over 20 years (+ 25%) is not realistically deliverable based on the approach outlined in the Draft CLP

From the aggregated Site Opportunities set out in the Draft Plan, assuming they can all be fully exploited for housing development they are substantially inadequate to achieve the provision of more than a modest fraction of the land needed to build 21,000 new homes. Even optimistically assuming, as well, that bounteous and abundant number of sizeable and well located "Windfall Sites" can be identified and quickly secured by private developer partners, year after year, we do not believe that the Council will be able to deliver anything like 1,000 plus homes year on year, outside the COA. The Council need to re-visit this aspect of the draft CLP.

So, in terms of creating the necessary scale of land availability within the Borough boundaries, for such a large additional population and number of new homes, realistically, this target level will not be achievable by the approach the Council envisages, even over a period of 20 years. Only by applying for extensive statutory compulsory purchase powers, Government/GLA primary funding and corresponding private sector partnerships can such targets be attained. Furthermore, we contend that achievement of the full ambitions of Croydon's programmes will have to be based upon fully identified and approved land clearance programmes of existing housing stock for just the housing accommodation element alone.

No change

The average household size is approximately 2.1 people per household so the overall expected growth in population would be substantially less than suggested by this representation. In addition the Local Plan envisages that growth be distributed across the borough and not (with the exception of the Croydon Opportunity Area in particular as well as along the Purley Way and in Purley District Centre) in just one part of the borough.

The representor is correct in suggesting that the Local Plan on its own will not and cannot deliver 31,750 new homes. However it is one part of the complex jigsaw that is housing delivery in London. By promoting sustainable growth in Croydon it may attract developers (small, medium and large) to Croydon to work with the Council to help address some of the housing need that exists in the borough and to sustain the current high building rates that are currently to be seen in Croydon.

2221/01/004/Non-specific/C	Mr Derek Maynard <i>Hartley and District Residents Ass</i>	Comment	<p>As a sense of scale scenario and for the sake of simplicity [disregarding the level of public opposition that would ensue and the many inevitable legal processes], if the target of 21,000 homes outside the COA is viewed as a high density housing roll-out solution (Hong Kong and East European style), then take a typical standard 16 storey tower block with 10 homes per floor, providing 160 homes. Dividing 21,000 homes by 160 homes/block equates to 130 blocks across the Borough. Concentrating these mainly around "public transport hubs" like your key targets of Purley, Coulsdon, Waddon and Broad Green, conceivably just in physical terms 10 blocks could be realistically developed. Possibly, some low density and open land around Shirley could take 10 more. Thus, 15% can be allocated; providing 20 blocks x 160 units = 3,200 new homes. Thus, locating and assembling a further 110 sites for more blocks could not be achieved by just encouraging private sector development companies with "friendly" planning consents, even with 15 to 20 years to accomplish the task.</p> <p>Take in the complications of adding 25% plus capacity to schools, healthcare, social care, leisure, car parking etc on top of the tower blocks, the task requires some miraculous solutions to be found. A letter to Father Christmas might be worth a try.</p>	No change	<p>Croydon currently achieves in excess of 1,500 new homes a year, mostly in the form of small blocks of flats outside of the Croydon Opportunity Area and some taller blocks within the Opportunity Area. The Local Plan seeks to promote this sustainable form of development but at the same time encourage more and higher quality private amenity space within flatted developments coupled with more larger units to make them attractive for families. There is significant potential for growth within the existing character of residential areas of Croydon without the need to promote very tall buildings outside of a few specific locations identified in the Local Plan.</p>
2221/01/005/Non-specific/S	Mr Derek Maynard <i>Hartley and District Residents Ass</i>	Support	<p>The desires to retain and enhance the character, heritage and beautiful valley surroundings are well and comfortingly expressed in the body of the Draft Plan and are worthy of full support.</p>	Welcome support	
2221/01/006/Non-specific/C	Mr Derek Maynard <i>Hartley and District Residents Ass</i>	Comment	<p>The desires to retain and enhance the character, heritage and beautiful valley surroundings are well and comfortingly expressed in the body of the Draft Plan and are worthy of full support. If the high rise roll out approach is to be a small element within the programme for new homes, then a mixture of medium and lower density developments will require hundreds of decent sized sites to be assembled and mainly by the private sector, attracted only by the chance to create high value homes to achieve reasonable profits. In our opinion, this is not a realistically deliverable scenario.</p>	No change	<p>This describes the pattern of development that exists in Croydon and which the Local Plan wishes to promote and further enable (coupled with higher quality private amenity space and more larger units to make these developments more attractive to families).</p>

2221/01/007/Non-specific/C	Mr Derek Maynard <i>Hartley and District Residents Ass</i>	Comment	Finally, HADRA believes the Draft Plan is also unrealistically deficient in recognising the high impact of extra motor vehicles (say 1 vehicle per home on average) on road capacity and both residential and Town/Local Centre convenience off and on-street parking. The Council has a primary duty to have proposals and solutions to both recognise and pro-actively cater for this level of impact, whether the population grows only by 5% (naturally) or 25% (by design), but these key elements are seriously lacking within the current Draft on Transport & Communication.		No change	The Local Plan has the support of Transport for London who say that the scale of growth envisaged by the Plan is unlikely to create significant issues and a borough level on the road network. At a local level this matter is addressed by proposed policies DM27 and DM28. An amendment is being made to Policy DM28 to cover matters arising if a reduced amount of car parking is proposed such that an increased amount of car club parking must be provided in compensation.
2325/01/001/Non-specific/O	Miss Kirsty Pearce <i>New Addington Path Finders</i>	Object	<p>Response to question 2 on rep sheet - How is a member of public supposed to answer this if we cannot take the documents home to peruse at leisure.</p> <p>Question 2.3 - I would like to provide my honest feedback on yourselves when your strategic plans reflect fairly and clearly what we are all consulting on.</p> <p>Question 3 - I appreciate that this is a "strategic overview" for plans for the whole borough, but I am more interesting in the area which I own my property. The information on the plans omits many of the details already brought to the table by the Council's Regeneration Team. How can we be asked to consult on your plans when they are clearly incorrect. You could perhaps revisit us again at the end of your roadshow so residents can provide their views on fairer, more complete and detailed plans.</p>		Change	The Council will ensure that there are better linkages between its Regeneration service and its Spatial Planning service prior to the publication of the Proposed Submission version of the Local Plan to ensure that similar issues around differences in what has been consulted upon do not arise.
2329/01/001/Non-specific/C	Mr & Mrs Gunn	Comment	Traffic Congestion	None	No change	This comment is not detailed enough for any changes to be made.

2448/01/057/Non-specific/C	Andy Stranack  Croydon Council	Comment	Legal Compliance	The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'. Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.	Change	The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.	
2448/01/054/Non-specific/C	Andy Stranack  Croydon Council	Comment	Legal Compliance	It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	Change	It is desirable that Members of the Council from across the borough be involved in its preparation prior to publication of each draft of the Local Plan.	
2453/01/005/Non-specific/C	Mr. A.W. Greenfield	Comment		I recommend that consultation documents of such importance are given much wider publicity.	Greater publicity should be given to the consultation on the Croydon Local Plan.	No change	The Council advertised the Local Plan via social media, a press release and writing or e-mailing every person and organisation on our Local Plan consultee list. Site notices were also put up around each preferred proposal site to help raise awareness of the Local Plan. There is a limited budget for the Local Plan and publicity for it but the Council will continue to use cost effective methods of communication to publicise the emerging Local Plan.

Sally Kibble

Object

I write to express my dismay that you are contemplating a site adjacent to my home for a permanent site for Travellers.

No change

The representation does not specify any particular site or policy and therefore no further consideration can be given to it.

My first two objections are as follows. In researching for this email, I came across the cost of £3000 per week in 2012 for clearing up after Travellers. This cost will, no doubt, exceed this figure, as we enter 2016. I visit my Health Club on Hannibal Way, off Stafford Road, Sutton where there are often approximately 6 Travellers vans parked and the area quickly becomes disgusting. Quite apart from the aesthetics of the area, it is a health hazard.

Secondly, please could you clarify why the proposed site has been chosen? Far from the description of 'wasteland' as I have heard it called, the area is frequented by many Croydon citizens, especially in good weather and is an area of outstanding beauty of which Croydon should be proud and, at all costs, wish to retain.

I hope these points will be considered seriously and thank you, in advance

---

Crystal Palace Football Club

Object

Soundness - Effective

The purpose of this representation is to request a policy promoting Crystal Palace Football Club and the continued presence and future redevelopment of its stadium and associated facilities at Selhurst Park. The inclusion of such a policy in support of the Club is appropriate in order to safeguard the continued presence of the Club in the borough, enable and support future development plans in relation to the stadium, and acknowledge the positive impact that the Club has, and will continue to have, on local people.

Crystal Palace Football Club has a major role in promoting Croydon on a national and international scale. It is a significant employer (directly employing 1,080 people). Over 25k fans attend 19 games every season, on average spending £10 per head in the area outside the stadium (a total of £4.75m) over a season. 50k away fans visit the stadium every year making it Croydon's biggest tourist attractions.

The Club runs a number of community schemes in the area through the Crystal Palace Football Club Foundation.

The Club supports the existing Policy RO16 in the Replacement Unitary Development Plan.

The Club is now fully committed to building a new stadium and associated facilities at Selhurst Park. Given the Club's strong commitment to its continuing presence and improvement at Selhurst Park the existing Policy RO16 is now out-of-date and a new policy ought to acknowledge, protect and support the Club's redevelopment plans in the Borough.

We request that the following policy is included in the Local Plan:

"The Council supports the role of Crystal Palace Football Club as a renowned football club and business that makes a significant contribution to the Borough. The presence of the Club in the Borough has a positive impact on the Borough, bringing many direct and indirect social, employment, educational, health, economic and cultural benefits. The Council is supportive of the presence of the presence of the Club's stadium at Selhurst Park and recognises the great benefits that the stadium brings to the Borough. Future expansion or development plans put forward by the Club to enable the improvement of existing facilities and/or construction of a new stadium at Selhurst Park and associated facilities and infrastructure that would support any such expansion or redevelopment will be supported by the Council, subject to national and local policy and guidance. The Council will also seek to resist any neighbouring development that would prejudice the existing facilities or potential redevelopment of Selhurst Park."

We request that the following reasoned justification accompanies this policy:

"The presence of Crystal Palace Football Club within the Borough is an historic and important one. The Club brings many direct and indirect benefits to the Borough. The Council recognises that in order to maintain the Club's continued and improved success it is necessary to ensure that the facilities at Selhurst Park and supporting infrastructure are of an appropriately modern standard required of a Premiership/Championship Football Club and are of a level which would also support the prospect of Crystal Palace Football Club regularly competing in European Club level competitions. The Council considers that its support for the improvement of the facilities at Selhurst Park Stadium to support the continued success of Crystal Palace Football Club are consistent with the Council's wider regeneration aspirations for the Borough as a whole and South Norwood in particular."

Change

An additional policy will be included in the Community Facilities section of the Plan which will say:

"The Council will continue to support Selhurst Park as the home stadium of Crystal Palace Football Club and ensure that any redevelopment would enhance the club's position with a football stadium which makes a significant contribution to the Borough."

2635/01/028/Non-specific/C	Paul Sandford  <i>Bourne Society</i>	I support the idea of an Enterprise Centre (Ref p102, detailed policies) : However, The map shown at the drop-in presentation in Purley shows this notional development at the location of the new fire station currently being completed, with no adjacent free sites except the possibility that Fitness First might be the site that planners have in mind. Officials at the 8th Dec 2015 presentation stated that no specific site was in mind, only the concept. Therefore it should not have been put on the map, nor referred to as being sited between Brighton Road and Downlands Road.	No change	An enterprise centre for Purley is included in the Local Plan either on site 30 or site 495.
----------------------------	--	--	-----------	--

2635/01/048/Non-specific/O	Paul Sandford  <i>Bourne Society</i>	Object	Legal Compliance	<p>It is regrettable that this version of the Local Plan apparently was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.</p> <p>The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'.</p> <p>Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.</p>	Change	The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.
----------------------------	--	--------	------------------	---	--------	--

2635/01/025/Non-specific/C	Paul Sandford  <i>Bourne Society</i>			A further policy should be added to enhance and mark the entrance into the borough along the main A23 and A22 corridors	No change	The A23 and A22 are part of the Transport for London Road Network, therefore the entry points to the borough on these roads are not under Croydon's control. However, other entry points on borough roads will be enhanced in line with other area wide public realm improvements throughout the borough as appropriate. This will not form part of the Local Plan.
2669/01/002/Non-specific/C	Mrs Jean Brooks	Comment	Legal Compliance	As we do not have a computer I do think it would have been a courtesy to inform residents concerned in writing.	No change	We wrote to all residents registered on our consultation database to inform them of the consultation. The Spatial Planning team does not have sufficient budget to write to all residents of the borough.
2694/01/002/Non-specific/O	Mr Bernard Mickelburgh	Object		Objects to the contents of the plan.	No change	Objections are not substantiated in planning terms.
2725/02/004/Non-specific/O	Carol Munns	Object		Lastly and possibly most important is the fact that I had to find out this information from my local MP and not the council who should have advised via letter/flyer every resident of Forestdale of the Council's proposed actions. Yet another example of a Public Body not being open and honest. Hoping to sneak these changes through the back door were we? Mind you some members of the Council probably don't have a clue what's happening as they're too occupied watching football or playing games on their ipads.	No change	We wrote to all residents registered on our consultation database to inform them of the consultation. The Spatial Planning team does not have sufficient budget to write to all residents of the borough.
2734/01/002/Non-specific/C	Mr Christopher Jordan	Comment		I have downloaded your consultation proposals and find them wordy, obfuscating and unclear - I feel the taxpayers of Croydon, whom you purport to serve, would be more alarmed had they the time and energy to wade through this unwieldy document. If you had provided a map showing current green belt areas to be de-designated and other proposed changes in a clear manner, I would have more confidence in the consultation process. As it stands, it feels like an attempt to sweep proposals under the carpet and introduce measures through the 'back door'.	Change	The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.

2735/01/007/Non-specific/O	Mr Eric Green	Object		<p>So obvious it should not need to be enumerated. What does the Council propose to do to improve the existing infrastructure. Also, our GP surgeries are bursting, schools, elderly care, transport links, numerous ancillary services are not able to cope with demand as the situation stands at present.</p> <p>Croydon has degenerated into what has become an undesirable mess, better avoided than embraced.. Why can greater effort not be put into making Croydon a place to take pride in once again and give us the opportunity to shale off the "oh no, not Croydon" syndrome! Let us build to restore Croyson and be proud of its heritage, rather than destroying what precious little is left in all too few remaining 'nice spots'?</p>	No change	The objection has not been substantiated in planning terms and therefore cannot be considered as part of the Local Plan.
2775/01/002/Non-specific/O	<p>Cllr Tim Pollard <i>London Borough of Croydon</i></p>	Object	Legal Compliance	<p>Until the last few days of the consultation most members and the public have been required to work from PDF copies of the documents. The three paper documents referred to above break down into over 40 individual PDFs with confusing names and which must be individually downloaded. It is almost impossible to work with these documents.</p>	Change	<p>The limitations of the Council's website and the cost of producing a draft Policies Map meant that the only way that the documents could be displayed was as individual downloads. A full draft Policies Map will be produced for the Proposed Submission publication draft of the Local Plan which will be easier to use than multiple downloads.</p>
2775/01/004/Non-specific/O	<p>Cllr Tim Pollard <i>London Borough of Croydon</i></p>	Object	Legal Compliance	<p>In at least one of the libraries (Shirley) there was no paper copy available for the public to inspect until the last few days of the consultation. Given that it is proposed in this plan that the character of Shirley is to be most changed, this is deeply unacceptable and calls into question the validity of the whole consultation and the soundness of the process.</p>	Change	<p>An officer of the Spatial Planning service went to Shirley Library with a copy of the Local Plan documents when this issue was raised and it transpired that the Library did have copies but were not aware of what they were or their significance. In future, to avoid this situation arising again, they will be delivered to the libraries in person rather than by courier so that an officer can explain what they on delivery.</p>

2775/01/057/Non-specific/C	Cllr Tim Pollard  <i>London Borough of Croydon</i>	Comment	Legal Compliance	The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'. Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.	Change	The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.
2775/01/054/Non-specific/C	Cllr Tim Pollard  <i>London Borough of Croydon</i>	Comment	Legal Compliance	It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	Change	It is desirable that Members of the Council from across the borough be involved in its preparation prior to publication of each draft of the Local Plan.
2776/01/006/Non-specific/O	Cllr Helen Pollard  <i>London Borough of Croydon</i>	Object	Soundness - Effective	The plan should make reference to how the borough will meet the demands, in terms of schools, infrastructure etc, to meet the needs of the big increase in population in Croydon.	No change	The Croydon Local Plan: Strategic Policies-Partial Review, in paragraph 5.31 refers to the Infrastructure Delivery Plan which provides the evidence of needs for additional infrastructure including schools.

2776/01/057/Non-specific/C	Cllr Helen Pollard  <i>London Borough of Croydon</i>	Comment	Legal Compliance	The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. Raaxeet H Shah

Comment

*Oshwal Association of the UK*

The Oshwal community have been a part of the Croydon community for almost 50 years, acquiring our current centre on Campbell Road in 1982. We have approximately 1,400 community members residing in South London, largely in and around the Croydon area. We have a centre at 1 Campbell Road, Croydon, CR0 2SQ, known as Oshwal Mahajanwadi which was purchased in 1982 and it quickly became a focal point for our community activities. The building provides assembly halls and also houses a temple and this helps members practice the Jain religion which is the foundation of our community. As we are predominantly London based, most of our members reside in and around London. Our main centre is in Potters Bar and we have 3 community centres in Croydon, Kingsbury and Hounslow. We are largely followers of the Jain faith and the teachings of Lord Mahavir. The continuing changes in the landscape around Campbell Road has resulted in extreme scarcity of car parking facilities and this has resulted in a gradual decline in use of our current centre in Campbell Road. Many regular functions have been curtailed or scaled back as the numbers attending is also declining. We need to seek an alternative site within Croydon to create a modern purpose built facility to serve the needs of our Community. The new centre needs to have good access and good transport links, as well as adequate parking facilities. Our ideal requirement would be for a site of up to 1 acre in size. This would address our immediate needs and would provide us with the opportunity to increase our activities for our community and other communities. Our new centre would recognise the changes to the structures of our communities and would be aimed at both young and old and also become a social forum for the elderly. If Croydon Council can assist our community with sourcing a suitable site such as former council or community buildings that are no longer in use or even a green field site, we would be interested in exploring such opportunities. As a strong and united community we are confident that we could raise the necessary resources without resource to council funding. In the circumstances Oshwal Association of the UK urges Croydon Council to include in the The Croydon Local Plan a need to accommodate a community centre with appropriate planning use for the needs for our special community and its population

A suitable site for a new community centre should be allocated in the Local Plan. The new centre needs to have good access and good transport links, as well as adequate parking facilities. Our ideal requirement would be for a site of up to 1 acre in size.

No change

The Local Plan is not the best vehicle for allocating sites for specific community groups. There is an existing community facilities policy that applicants need to approach community organisations about possible community uses for sites, and proposed Policy DM18 will require marketing specifically for community uses before other development on a site with an existing community use can take place.

in Croydon.

It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.
2830/01/004/Non-specific/C	Ms Valerie Humfress	Comment		<p>Consultation process</p> <p>I consider that there was insufficient publicity of the proposals and we were not notified of the consultation meetings. I only learned about it this week when my MP distributed his alarmist letter through our doors. As a Director of one of the Forestdale estates, I am surprised we were not informed. I understand that there was a notice in the Croydon Guardian but this never delivered here and I only get to see it if I happen to go shopping on a Wednesday and pick one up as they've all gone by Thursday. I would have attended a consultation meeting if I had known about it and so would some of my friends and neighbours.</p>	No change	The Council publicised the Local Plan consultation through social media, via a press notice, via site notices near all proposed development sites, and by writing to every person or organisation on our Local Plan consultee list. There is insufficient budget to write to all residents individually.

2830/01/005/Non-specific/S	Ms Valerie Humfress	Support		Overall, the Croydon Plan plan is very thorough and well thought out and will hopefully be taken forward to provide us with a good future. The emphasis on increasing the number of homes is excellent with detailed identification of possible sites for housing. This is the crisis of our times. It is also good that Metropolitan Open Land and Local Open Land will be given same protection as the Metropolitan Green Belt.	Welcome support	
2842/01/057/Non-specific/C	Cllr Richard Chatterjee <i>London Borough of Croydon</i>	Comment	Legal Compliance	The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'. Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.	Change	The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.
2842/01/054/Non-specific/C	Cllr Richard Chatterjee <i>London Borough of Croydon</i>	Comment	Legal Compliance	It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	Change	It is desirable that Members of the Council from across the borough be involved in its preparation prior to publication of each draft of the Local Plan.

2850/01/001/Non-specific/O	Elizabeth Killick	Object		<p>I am writing to object to the plans for a permanent home for 'travellers' on Hawkhurst rd Kenley. My objections are as follows;</p> <p>&gt;the development is totally out of character for this quiet residential area with an aging population &gt;this development would have a major impact and destroy the open green spaces required for health and general well being &gt;loss of natural habitat for foxes, badgers, deer and birds &gt;too much heavy traffic on a road that is only meant to be used by residents with cars and not caravans and heavy duty vehicles</p>	Not Duly Made	The site on Hawkhurst Road Kenley has not been proposed in the draft Croydon Local Plan: Detailed Policies and Proposals as a development site, including site dedicated for Gypsies and Travellers.
2884/01/001/Non-specific/O	Mr David Brown	Object	Soundness - Justified	I had always thought that it had always been government policy and practice not to build new housing on Green Belt land unless all suitable Brownfield alternatives have been exhausted.	No change	The Croydon Local Plan seeks to meet as much of the housing need as is possible. There is insufficient previously developed land in Croydon to meet the entire need for new homes so the Council will have to ask other local authorities in London and the South East to help meet its unmet housing need.
2909/01/001/Non-specific/O	Mrs A Stagg	Object	Soundness - Justified	<p>I was most upset to hear about all the new planning in Shirley, East Croydon and Addiscombe. Are these areas going to end up looking like a concrete jungle and Fairfield Halls? Can you not leave anything alone that looks nice and are you intent to turn anything green and pleasant into an eyesore?</p> <p>Burglaries, traffic, antisocial behaviour will all go up when larger communities move in. Please do this sort of thing where you live, not others. We do not want change. You so so have it all on your doorstep.</p>	No change	The Croydon Local Plan: Detailed Policies and Proposals is planning for sustainable growth in the context of the 16 Places and it is not the intention to create concrete jungles. All Places will change to some degree, some more than others, reflecting the need to provide more homes and jobs for a growing population. There are existing Green Grid policies in the Croydon Local Plan: Strategic Policies that protect Croydon's open spaces including the Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces.
2998/01/001/Non-specific/O	Mr John Deacon	Object		I strongly object to Croydon Council's proposal to build on our green areas it will wreck the area	No change	There is insufficient detail in this objection to consider it further. The Local Plan protects green spaces across the borough.

3019/01/002/Non-specific/O	Joanna Hinkley	Object		<p>I wish to object to the proposed plans for Shirley on behalf of my household 31 Spring Park Road.</p> <p>These changes proposed I feel will impact Shirley greatly and destroy all of its character among many other things. We are constantly hearing of all of these different changes which seem endless, many of which will affect our household</p>	No change	The representation does not specify any particular document or policy and therefore this comment is considered as not duly made.
3043/01/004/Non-specific/O	Sarah Stenning	Object	Soundness - Effective	<p>The council are also "legally" converting family homes into 6 flat abodes for single men!!!! to provide social housing.</p>	No change	This does not refer to a specific policy, paragraph or other item in the Local Plan and planning applications are considered on their merits and dealt with through the planning application process.
3130/01/001/Non-specific/C	Mr Laurie King	Comment		<p>I understand the needs to provide additional housing and there are numerous unused sites around the borough, where either industrial decline has rendered the buildings and land unused for many years or where there are unused garage blocks, commercial buildings or other areas where brand new mini communities can be considered. I do not however, expect a Council to be considering radical reductions of green belt designated land just to fulfil quotas or election promises.</p> <p>I hope that you can acknowledge my objections to these proposals and take in to account the feelings of locals who live and work in these vicinities and the need to both preserve the fabric and character of the existing building areas as well as the need to conserve the green belt land that is so precious for a healthy environment for all generations, present and future.</p>	No change	There are many areas where new homes can be accommodated and in the case of smaller sites these are included within a broader allowance for 'windfall sites' (as they are too small to allocate). It is an approach embedded in the overall sustainable growth of the suburbs embodied in the draft Local Plan. However, together they will not meet the borough's housing need.

3153/01/001/Non-specific/O	Mr Gordon Winrow	Object		<p>Concerned to read on Gavin Barwell's website that the Council's Croydon Local Plan envisages building on our precious green spaces. Once gone- gone forever. I acknowledge chronic housing crisis in the Borough and more houses needed both private and social. Brownfield sites, I understand that many are available. More might become available. Need to encourage people to live/work/shop/invest in Croydon. Long-delayed re-generation now underway (eg East Croydon station, Whitgift Centre) but if Croydon not socially attractive people might go elsewhere to live and/or do their shopping etc."</p> <p>I am happy for the Council to replace under-used garages with much-needed homes, but I will be objecting to building on precious open space.</p>	No change	<p>The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.</p>
3162/01/026/Non-specific/O	Mr Joe Toner	Object		<p>You as local council just seem to bulldoze your ideas without due consideration for the local community as whole. One example have you ever tried to park your car in Purley Probably not!!!</p>	No change	<p>This comment does not directly refer to a part of the Local Plan. However in response the Council would refute this and the representations received during the consultation on the Croydon Local Plan have been taken into account and some subsequent changes made to the Local Plan.</p>
3169/01/001/Non-specific/C	Mr Brian Barnes	Comment	Soundness - Effective	<p>I hope that you will not put at risk any more playing fields in Croydon when we are trying to encourage more healthy people.</p> <p>This also applies to open spaces kept attractive at least where the locals try to keep rubbish to a minimum. Wild life is also essential to our health. So with so few new developments having large or any gardens let us not get rid of those we have.</p>	No change	<p>The Local Plan protects playing fields and important open spaces across the borough at the same time as meeting as much of need for new homes and associated social infrastructure as is possible. No public open spaces would be lost as a result of the Local Plan proposals.</p>

3170/01/002/Non-specific/O	Mr Darren Bryne	Object	Legal Compliance	<p>I would additionally wish to raise the following points:</p> <p>a) It is disappointing that the Council feel that it is sufficient to notify residents of such significant proposals by placing a notice on a lamp post in Verdayne Avenue. This may be deemed to be sufficient where an extension is being built on a property but it is completely inappropriate where such large scale developments are being planned. One could form an opinion that the Council does not wish to engage in meaningful debate with the residents of Croydon. It is only through the diligence and hard work of Gavin Barwell that this matter has been brought to my attention.</p> <p>b) I am a Governor at two Croydon Schools, both of which have been approached by Croydon to investigate the possibility of expanding the schools to cater for the desperate need to provide school places for children in the Borough. The lack of school places is deemed to be critical and will require significant investment in both primary and secondary schools over many years. Yet despite the severe shortage of school places the Council seems intent on building more houses and putting our infrastructure and local services under more pressure. Schools in the area are already oversubscribed and yet Croydon feels it is appropriate to designate land to provide space for over 700 houses.</p>	No change	<p>The Council wrote to or e-mailed everybody on our consultation list to inform them of the publication of the draft Local Plan documents as well as putting up site notices and putting out a press release. Our consultation list is made up of people and organisations who have requested to be informed about the Local Plan and those who have made any comments on either previous drafts of the Local Plan or the Community Infrastructure Levy Charging Schedule.</p> <p>The Council has also considered the need for school places arising from the proposals in the Local Plan and as a result has proposed sites for primary and secondary schools across the borough.</p>
3192/01/004/Non-specific/O	Mr Steve Simms	Object		<p>I strongly object to any of these new proposals to squeeze new housing on any already over crowded areas in New Addington / Croydon</p>	No change	<p>The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.</p>
3231/01/002/Non-specific/O	Patricia Knight	Object		<p>I wish to formally record my objection to all sections of the new Croydon Plan.</p>	No change	<p>The representation does not specify any particular document or policy and therefore this comment is considered as not duly made.</p>

3263/01/001/Non-specific/O	Shirley Tovey	Object	I agree with all your objections.	No change	We cannot respond to this comment as there is no substance as to what the representor is objecting/supporting.
3285/01/002/Non-specific/C	Valerie Kelsall	Comment	I very strongly support the objections made by Chris Philips MP regarding the ruination of our local towns and spaces, ie the proposals for Coulsdon and Purley in particular. Coulsdon town is in chaos as it is, enough is enough, you are turning it into a concrete jungle! What are you trying to do to us residents? It used to be a pleasure to live here.	No change	The representation does not specify any particular document or policy and therefore this comment is considered as not duly made.
3338/01/001/Non-specific/C	Ms Maura Keane	Comment	The consultation window was too small. I should have liked longer. Having just come out of hospital, this has only given me a day. It must have taken a while for the plans to be developed and I have a great interest. More time should have been allowed to all to give the plans justice.	No change	The Council will consider whether the advance communication regarding future consultations can be improved upon and engagement within the parameter of the Council's resources and will consider the time period of consultations.

3346/01/002/Non-specific/C

Mr Richard Sanders

Change

The general comments on the Plan are noted

Gavin Barwell, my MP has sent me a brief summary of this document which contains details of how it is planned to develop Croydon and the surrounding area in the next 40 or so years. Thus, the document is very important to us residents as it has the possibility to alter, change and develop for better, perhaps, or more likely, for worse, the environment in which we live and work.

I guess that a great percentage of the population of Croydon are unaware of these plans. I have not seen them publicised anywhere. Given their importance, I would have thought that the Council itself and / or our elected Councillors would have seen fit to bring them to the attention of us residents. You all should remember that the Council and Councillors are our servants, my servants, not we or In yours.

Add to that, most of us residents do not have a degree or equivalent in Local Government Administration to understand the fine nuances of a 700+ page document, so we need time to read, mark, learn and inwardly digest such words of wisdom. And, then you set a deadline of just before Christmas for responses, when we residents have other pressing personal matters on our minds. And you are not going to do anything with the information gathered until the beginning of January, so a deadline in that month would have been more realistic and satisfying.

3389/01/005/Non-specific/O

Mr A Young

Object

I would also like to ask the question why the local residents haven't been consulted, even before you published a draft "Local Plan"

The publication of the Croydon Local Plan: Strategic Policies- Partial Review (Preferred and Alternative Options) was the opportunity for residents to comment on the Local Plan. There is no requirement to consult with residents before this document was published.

No change

The publication of the Croydon Local Plan: Detailed Policies and Proposals (Preferred and Alternative Options) was the opportunity for residents to comment on the Local Plan. There is no requirement to consult with residents before this document was published.

3395/01/002/Non-specific/O	Mr A Coxe	Object	We strongly object to the crazy plans Croydon Council is proposing, garden grabbing, green belt changes and woodland destruction are totally unacceptable, the council is trying to turn Croydon into a concrete jungle, we need green places for the health and sanity of our grandchildren and future generations, there are plenty of derelict sites and brown fields which can be built on, we must keep our woods to filter the awful pollution which is now being generated.	No change	The Local Plan is not planning to meet all the housing need that exists in Croydon because there is insufficient land to do so. The only proposed sites in Green Belt that are currently undeveloped are three sites for secondary schools, which are proposed because there are insufficient previously developed sites in Croydon of a size that could accommodate a secondary school.
3396/01/014/Non-specific/O	Ms A Pavon-Lopez	Object	Can you outline to me the public consultation process that you will be carrying out on these proposals which will materially affect the lives of thousands of existing residents? Please also outline when this will take place and how you will be receiving and considering objections?	No change	The Council will be publishing the Proposed Submission draft of the Croydon Local Plan after Cabinet has approved the documents for publication. The documents are planned to be presented to Cabinet for approval in July 2017 and, subject to that approval the Proposed Submission draft will be published in September for a six weeks period in which all can make representations on the soundness and legal compliance of the proposals. More advance publicity of the publication period will be made in view of comments received on the previous consultation. The representations received will be submitted to the Planning Inspectorate to consider as part of the independent examination of the Croydon Local Plan, on behalf of the Secretary of State. There will be the opportunity to appear at the Examination.

3401/01/004/Non-specific/O

Ms B Ani

Object

1) Parking  
There are currently restricted parking areas in the New Addington area. Your proposals will increase these restrictions and cause utter gridlock in the area in the morning and evening peaks. Why are you proposing to introduce this into the area? I lived in central London for over 10 years in areas where the council had introduced what you are proposing to do and had to walk for half an hour to get the nearest mode of transportation as the roads were grid locked each morning and even the buses could not move for traffic.

2) Amenities  
The number of people you are intending to introduce into the area will place an enormous strain on the amenities in the area. Why are you intending to totally stifle the amenities in the area that have not been built to cater for and to the astronomical increments that you are intending to introduce here?

3) Congestion  
You may or may not know but there has been a reorganisation of the bus services around new addington. Buses T31 and T32 have been with drawn. This means there are currently fewer buses in the area. Are you intending by your proposal to take the area back to the days when it took 2 hours to get to East Croydon from New Addington due to fewer bus services and the added issue of people being able to board the buses as the buses were filled to creaking point? You as the councillors ought and should know that you cannot simply over burden amenities that were not originally designed for unannounced and unplanned increments. At the moment the tram service can just about cope in the peaks.

No change

Transport for London has assured the Council that the existing transport network and existing planned improvements are sufficient to cope with the level of development proposed for New Addington. The Local Plan also includes provision for school places and healthcare facilities to support growth as well as designating areas of Local Green Space to ensure that new and existing residents can continue to enjoy access to public open spaces across the borough. In addition new standards on private amenity space should ensure that new developments provide quality amenity space within them no matter the scale of development.

3414/01/002/Non-specific/O

Mr Chris McInerney

Object

I have received an e-mail from my local MP, Gavin Barwell, outlining your proposals. I would like to add my voice in opposition to the proposals particularly in relation to Shirley, where I live. Overall, I agree entirely with Gavin's comments.

No change

No changes can be made as a result of this comment as it is not detailed enough as to what is being objected to.

3416/01/008/Non-specific/O	C Mortreuil	Object	<p>It has also come to my attention that empty commercial buildings are being transformed into flats in Croydon: great but is 16 m2 adequate for living? No it's not. Out of all European countries, the UK has the sad record for the smallest and very often shoddiest accommodation; the council should be looking after its people and ensuring that they live in decent conditions. Private landlords should be held accountable rather, We can't just pat ourselves on the back for passing the buck of accommodation to the private sector.</p>	No change	<p>This comment is not duly made as it is not specific to the Detailed Policies and Proposals or Strategic Policies: Partial Review that was subject to this consultation and is therefore not considered in that regard. However, this type of development is typically undertaken by availing of permitted development rights. In this instance, the Council has very limited powers by which to control the quality of the development.</p>
----------------------------	-------------	--------	--	-----------	--

3430/01/057/Non-specific/C	Mr Donald Speakman	Comment	Legal Compliance	<p>The information contained within the proposed Local Plan has been included in three large documents. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'.</p> <p>It is also extraordinary that hard copies of these important documents were not supplied to members until just one week before the deadline for comments. Why on earth not? .What about Openness and transparency?</p> <p>Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the task of responding to this consultation. Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.</p>	Change	<p>The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.</p>
----------------------------	--------------------	---------	------------------	--	--------	---

3430/01/054/Non-specific/C	Mr Donald Speakman	Comment	Legal Compliance	It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	Change	It is desirable that Members of the Council from across the borough be involved in its preparation prior to publication of each draft of the Local Plan.
3455/01/002/Non-specific/O	Ms E Warwick-Cateaux	Object		I agree with you and join you in objecting	No change	No change can be made as a result of this comment as it is not clear as to what is being objected to.
3470/01/002/Non-specific/O	Mr & Mrs Palmer	Object		Objection to 50 storeys on the outskirts of central Croydon and over development of housing and high rises elsewhere. Please lodge my objects.	No change	No changes can be made as a result of this comment as it is not detailed or specific enough as to what is being objected to.
3471/01/002/Non-specific/O	Mr G Pinnell	Object		May I also highlight the irony that if a resident sought planning permission for a development then this notice needs to be affixed for public viewing at the location to allow others to object. Where as we have had no such notices relating to these proposals, no mail shot, no publicly affixed copy on a tree, Forestdale doesn't receive any local Croydon newspapers, so please could you inform me of how I would be expected to be made aware of such future development applications?	No change	The public consultation was advertised in a number of ways: - Documents available in all of the libraries and Access Croydon - Posters in all of the libraries - Memos to librarians and Members - Letters and emails to all those on the LDF consultation database - Press notice in the Croydon Guardian - Council press release - Article in Your Croydon - The Council's Get Involved Platform - Social Media including Facebook, Twitter and Streetlife - The Council's website and Local Plan webpages - Site notices for each site allocation - 6 consultation events
3474/01/003/Non-specific/O	Mr Dennis King  <i>Sanderstead Residents' Associatio</i>	Object	Legal Compliance	We also object to the to the complicated layout of the plan and the too short period of time to respond. You don't appreciate that we intern need to consult with our members, councillors and committee.	No change	The layout will be improved in the next draft to make it easier to use including a better guide to the document at the start. The consultation process was fully in line with regulations governing consultation on Local Plans and 6 weeks is not an uncommon length of time for a local plan consultation.

3494/01/001/Non-specific/C	Hannah Daniels	Comment	Soundness - Effective	I mostly agree with your sentiments - also, when a construction co/developer has been given planning permission they should be precluded from seeking planning permission for new sites until they start to develop/build otherwise our whole housing supply is in the hands of commercial companies with profit margins to maintain.	No change	The proposed change would not work as if included as a policy developers would simply set up individual limited companies for each development site. It is also not in the interest of Croydon and meeting its housing need to constrain developers so who may wish to develop one site before another for any number of reasons.
3511/01/013/Non-specific/C	Jenny Hayden	Comment		I would like to register my strong objections over the possible future plans for our area, Shirley , and surrounding areas in the borough. It has been difficult to plough through all the documentation and to retrieve the salient points. It would also appear that the residents have been kept in the dark until fairly recently, about the Councils intentions.	Change	<p>The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.</p> <p>The Council wrote to or e-mailed everybody on our consultation list to inform them of the publication of the draft Local Plan documents as well as putting up site notices and putting out a press release. Our consultation list is made up of people and organisations who have requested to be informed about the Local Plan and those who have made any comments on either previous drafts of the Local Plan or the Community Infrastructure Levy Charging Schedule.</p>
3511/01/014/Non-specific/C	Jenny Hayden	Comment		Terminating the current green waste collection would be a retrograde step, in my opinion. It would mean more fly tipping as some people will not bother with going to the local tips. Making a small annual charge may be the only way it can continue and I would support that. However, some people's budgets are already trimmed to the bone and to pay a charge would not be an option for them. Also, as a regular user of Croypost, would this mean the facility not being available in the future if the green waste stops ??	Not Duly Made	Matters related to green waste collection were not subject of this consultation and therefore your comment is considered as not duly made.

3525/01/002/Non-specific/O	Mr Leonard Hewitt	Object		NO NO NO x1000000000 To each & every plan for the borough!!!	No change	The representation does not specify any particular document or policy and therefore this comment is considered as not duly made.
3533/02/001/Non-specific/O	Mr Martin Owen	Object	Soundness - Effective	Can the Schools and Hospitals cope with all the Proposed extra people coming into the Area	No change	The Council has worked closely with the NHS to ensure that the proposals in the draft Local Plan can be supported by health care facilities in the borough, and where needed, allocated extra sites for new health care facilities. The Council's Education service has also been closely involved with the draft Local Plan and in order to meet the need for school places the draft Local Plan proposed 5 sites for new secondary schools and 7 sites for new primary schools across the borough where it was identified that population growth would generate a need for new schools.
3567/01/001/Non-specific/S	Mr Mike Roberts	Support		I visited your consultation session in South Norwood last Wednesday and looked at some of the general exhibits as well as a closer look at the proposals for Crystal Palace and Upper Norwood, the latter as I am a resident of Anerley.  I thought these proposals were fine.  PS I hope this is OK, as I couldn't cope with your official comment form.	Welcome support	Your support is welcomed.
3568/01/009/Non-specific/O	Mr Mike Jones	Object		Importantly no thought has been made about schools. Houses contain families often with two incomes and two cars and at least two children of school age and older children who cannot afford to leave parental homes. The children need schools within walking distance or on short single journey bus routes. I dread to think of all the extra teenagers wandering around Croydon to get clear of compressed living in tiny houses and flats.	No change	The Croydon Local Plan proposes sites for primary and secondary schools across the borough to meet the expected need for school places arising from the Local Plan's proposed level of growth.
3699/01/054/Non-specific/C	Cllr J Cummings	Comment	Legal Compliance	It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	No change	Consideration will be given to arranging cross party meetings prior to future consultation on the Local Plan.

3699/01/057/Non-specific/C	Cllr J Cummings	Comment	Legal Compliance	The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'. Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.	Change	The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.
3718/01/002/Non-specific/O	Ms Jill Johnson	Object		Re your draft to allow Building be it houses or as I understand sites for travelers to live how could you even think of this.I have lived in Croydon for 47 years and do not agree with this surely residents should have a say into what Croydon should look like.  I DO NOT WANT TO LOOSE OUR GREEN SPACES so please look at the long term affect this would have.	No change	The representation does not specify any particular document or policy and therefore this comment is considered as not duly made.
3720/01/001/Non-specific/O	Mr J Wilkinson  <i>Jamar</i>	Object		The scale and complexity of these proposals make them very difficult to address overall the question needs to be asked - how necessary and valid are they ? e.g. - " Increasing the supply of homes through sustainable growth, including affordable homes, is a key element of Ambitious for Croydon, which is enshrined throughout the Croydon Local Plan: Strategic Policies – Partial Review (Preferred and Alternative Options). In part, the sustainable growth of the suburbs will deliver this growth as encouraged by this Plan. This will be achieved whilst protecting the borough's open space and the distinctive heritage and character, alongside the necessary infrastructure to mitigate the impact of growth " - if this is so, much of the detail requires revision.	No change	The objection has not been substantiated in planning terms and therefore cannot be considered as part of the Local Plan. The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.

3723/01/013/Non-specific/C	Mrs j Middleton	Comment	Can someone explain why some of the massive amount of land owned by the Bethlem Royal cannot be considered. To say that it is a secure unit means nothing when you think of the amount of housing already around the site – approach the NHS they need the cash. The only reason Croydon Council want to put flats in the place of people's homes is so they can gather more Council tax. Residents have put in money, time and effort to be in homes that give me them a better quality of life and an environment that improves the lives of their children. You are taking that away.	No change	This site has not been considered as it is situated beyond the borough boundary.
3768/01/004/Non-specific/C	Ms K Kendall	Comment	I have not used the Representation Form available on the website as that form is not designed for the layperson Croydon resident to use, and if anything, would be a barrier to communicating my objections. I do not see why objections raised in a simple email should not carry as much weight and I would be extremely disappointed if they did not.	No change	The comment is noted. The representation form is designed to assist members of the community. In future consultations the form template will be reconsidered to be more effective and user-friendly.
3769/01/015/Non-specific/O	Mr K George	Object	I assume there must be plans for increased demand for schools, Doctors and other local services but I find it hard to believe that the roads will be other than significantly more congested leading to greater pollution and green house gas emission both during and after any redevelopment.	No change	The Croydon Local Plan: Strategic Policies-Partial Review, in paragraph 5.31 refers to the Infrastructure Delivery Plan which provides the evidence of needs for additional infrastructure including school, and SP8..4 requires that major development proposals will be required to be supported by transport assessments, travel plans, construction logistics plans and delivery/servicing plans.
3778/01/008/Non-specific/O	Mr & Mrs Wakelam	Object	Generally, Croydon does not enjoy a good image. Croydon Council needs to recognise, particularly if it wishes to attract senior company executives and their families, and others, into the Borough, especially in connection with the re-development of the Whitgift Centre etc, that open spaces and attractive residential areas are assets to the Borough and not something to be eroded and concreted over. Before it's too late, lets take a leaf out of, for example, Bromley's book and not lose out.	No change	The Council is seeking to meet as much of the housing need as possible in Croydon without eroding the character of the borough or building on important open spaces and will be encouraging other boroughs to do their part in meeting the housing need of London as a whole and Croydon's unmet housing need in particular.
3785/01/020/Non-specific/O	Jenny Greenland	Object	Please don't turn Croydon into another Inner London Slum where people are living together like Sardines. Help to improve our reputation to what it was as I was growing up, not reinforce the thoughts of many after the riots.	No change	The comment is noted but does not make a specific reference to the Local Plan.

3804/01/017/Non-specific/C	Cllr L Hale  <i>London Borough of Croydon</i>	Comment	I do feel that it is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working, with which I had the opportunity to contribute, and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	No change	It is desirable that Members of the Council from across the borough be involved in its preparation prior to publication of each draft of the Local Plan.
3804/01/055/Non-specific/C	Cllr L Hale  <i>London Borough of Croydon</i>	Comment	<p>The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed.</p> <p>When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'.</p> <p>Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation</p>	Change	The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.
3892/01/008/Non-specific/O	Ms M Bailey	Object	As local residents of the area, why were we not informed of the public meetings in advance of them being held, not afterwards? I believe that new public meetings should be held on these gypsy/traveller sites as no notification about these meetings were given to after the event. Residents within a 3 mile radius of these sites should be notified by either post or a letter through their doors and not just in the local press or on the Council's website.	No change	Residents were given notice of all the consultation events at the start of the consultation period. Site notices were also placed at each of the proposed site allocations.

3892/01/014/Non-specific/O	Ms M Bailey	Object	I strongly object to the whole of the Croydon Local Plan, it is ill thought out and will ruin many parts of Croydon and will not be that green and pleasant town to live in as it once was. If any housing needs to be built it should only be done on brownfield sites.	No change	The draft Local Plan focuses almost all new housing development on to previously developed land. There is insufficient previously developed land in Croydon to meet all of Croydon's housing need hence the draft Local Plan only plans to meet just under 80 % of the borough's housing need. The rest will need to be met by other local authorities in London and the south east of England.
3896/01/002/Non-specific/O	Mr M Veldeman	Object	I am at a complete loss to understand why Croydon Council are trying to push through so many damaging proposals, harmful to both the environment and residents and why they are treating the people they are meant to be looking after with such contempt. I attended, or tried to, the consultation in Purley over the proposals. True to form, the Council displayed their customary disregard for everyone by arriving late, saying they were delayed in traffic. They work in the Borough and for the Borough, they should know what the traffic is like and how long to allow. If the Council can't even get that right, how can we believe they will get the bigger things right or that they understand the effects of these proposals on the areas we live in. The proposals themselves are another example of the Council's disregard for the public. The plans, whilst generally outlining the ideas for development, are so vague and unclear it is hard to know exactly what to comment on. Is this deliberate or does the Council really not yet have clear plans.	No change	The proposals in the draft Local Plan are quite specific but, as they are not a planning application, they include some flexibility over use (on certain sites) and number of homes (for sites with a residential use proposed) so as to provide certainty to a developer over the types of development that would be acceptable in that location. As a whole the proposals try to meet the need for homes in Croydon as far as is possible without building on important open spaces and eroding the character of the borough.
3896/01/005/Non-specific/O	Mr M Veldeman	Object	The feeling amongst the people who were looking at these is that the Council plans to push through as many housing developments as possible, has already made up its mind and that these consultations are meaningless, a mere formality to be gone through in order to claim people have been consulted, and any objections will make no difference whatsoever.	No change	A full consultation log will be published alongside the Proposed Submission draft of the Local Plan which will show where changes have been made to the draft Local Plan in response to the consultation.

3896/01/006/Non-specific/O	Mr M Veldeman	Object	<p>There is so much wrong with each of the proposals it is hard to understand what the Council is thinking of? The impression is that they are determined to squeeze as much housing as possible into the area, absolutely regardless of the consequences to the environment and the resulting lack of quality of life for everyone involved, the people who actually live there. Squeezing in more and more housing will result in overcrowding and services struggling to cope as they try to keep up with the increased numbers using them. Traffic will increase and it is unrealistic to assume measures to force people to use public transport will be effective. People use cars and it will not change that easily, instead there will merely be more aggression and anti-social behaviour.</p>	No change	<p>Transport for London have considered the draft Local Plan and believe that the level of growth that is planned can be serviced by existing and planned for transport infrastructure. The Local Plan allocates sites for schools and healthcare facilities to meet the planned growth in the borough.</p>
----------------------------	---------------	--------	--	-----------	---

3897/01/044/Non-specific/O	Cllr M Neal	Object	<p>It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents. The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'. Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.</p>	No change	<p>The comments are noted and consideration will be given to improve the clarity and readability of future Local Plan consultation documents and to clearly identify the proposed changes for the 16 Places.</p>
----------------------------	-------------	--------	--	-----------	--

3898/01/002/Non-specific/O

Mr M & D McQuiggan

Object

With regard to the policies and proposals put forward by the Croydon Council in respect of Shirley, which has only recently been brought to my attention, I am extremely disappointed in the way the Council has not informed any residents in Shirley of these proposals! Yet whilst the Council have sought to fully inform everyone of the garden waste service, by letters to each residential home, which in fact is minor in comparison to the changes the council would like to make to Shirley, they have not provided anything to any of the homes, re any of these, many major changes, to the Shirley area! It would appear that the current council have very little regard for any of the residents in Shirley and other areas for that matter and have been very devious and underhanded in the way they have concealed these proposals in the middle of reams of paper hoping to get them through without anyone noticing. Therefore, until these policies & proposals are fully explained and are fully discussed with the residents of Shirley, myself and my son totally object to any of the proposals put forward in your Local Plans, in respect of Shirley. I would also like to add that myself and both my son and daughter who work in the public sector are disgusted in the way the Croydon Labour Council are trying to bulldoze these through without any consultation and total disregard to Shirley residents.

No change

The Council wrote to or e-mailed everybody on our consultation list to inform them of the publication of the draft Local Plan documents as well as putting up site notices and putting out a press release. Our consultation list is made up of people and organisations who have requested to be informed about the Local Plan and those who have made any comments on either previous drafts of the Local Plan or the Community Infrastructure Levy Charging Schedule.

3910/01/002/Non-specific/O

Mr & Mrs Holloway

Object

With reference to your (very small) application notices selectively placed around the surrounding area, our first thoughts are why there has been no communication from the management company, or have they been kept in the dark as well. We are very much against the planning guidance proposals, as although we understand there has to be social housing we would not like to see this area turned into another New Addington or shrublands. So will strongly oppose any plans forwarded any time.

No change

The representation does not specify any particular document or policy and therefore this comment is considered as not duly made.

3913/01/002/Non-specific/O	Mr & Mrs Paulose	Object	I have to raise my concerns re the councils proposals to building all these places and ruining the green spaces. Just as you need your greens for a healthier body green spaces are required for not only fresh air but also healthy bodies. Viewing flats after flats is stressful but imagine walking through green spaces and parks. Nothing is more soothing and calming as that. All these flats only increase crowds. Please think again and do not destroy the open green areas. A healthier happy community is much much better than sick , unhealthy crowds.	No change	No changes can be made as a result of this comment because it is not clear which policy or proposal is being objected to.
3922/01/001/Non-specific/C	Mr E Wotherspoon		The communication of the development plans were poorly performed by the Council. Although the Council held a number of meetings and updated their web site and other social media, it did not in my opinion, successfully inform Local Residents. I and the majority of people only discovered the plans by chance, "word of mouth". I should have received a letter from the Council due to my proximity to the site. Many people, especially the elderly, do not use computers or social media and would rely on postal communication. The consultation period and deadline for objections are tight and very close to the Xmas period making it difficult for people to place their objection in time or to monitor developments to the degree clearly required.	No change	The Council wrote to or e-mailed everybody on our consultation list to inform them of the publication of the draft Local Plan documents as well as putting up site notices and putting out a press release. Our consultation list is made up of people and organisations who have requested to be informed about the Local Plan and those who have made any comments on either previous drafts of the Local Plan or the Community Infrastructure Levy Charging Schedule.
3928/01/002/Non-specific/O	Ms C Hart	Object	Having read your email, I agree with all your objections The council's proposals are a disgrace and should be stopped.	No change	No change can be made as a result of this policy because it is not clear which policy or proposal is being objected to.
3959/01/002/Non-specific/O	Mrs Pezier	Object	I wish to say that I strongly oppose the development plans for Croydon	No change	No change can be made as a result of this comment because it is not clear as to which policy or proposal is being objected to.

4014/01/007/Non-specific/C	Mr R Swatton	Comment	General Note. I have read through this document and there does no appear to be any reference to how much this audacious plan would cost and no reference on how it is proposed to fund the implementation of all these proposals! Please advise?	No change	The sites will not be funded by the council as they are privately developed by developers.

4025/01/002/Non-specific/O	Ms S Carelse	Object	I am very angry that I found out about the proposals via a friend with minimal time to object at a time when everyone is preoccupied with preparing for Christmas, it is disgusting! I no longer receive local free newspaper, by the time I buy the Croydon advertiser it is almost a week late. Why has this not been mentioned in the paper. It seems to me that the council is hoping to push this through without anyone noticing. I live on edge of Addiscombe and have family and friends living in Shirley. We lived in Shirley for 18 years, we were drawn to the area because of the appearance and number of green spaces (which my sister keeps clean whilst 'litter picking' in her own time free, saving the council money). Please please do not do this, myself and my family object strongly to the council's proposals. There should be an extension until after Christmas and notification should be put through the doors of people living in the areas affected. The council should be more open and honest otherwise they will certainly be losing our vote.	No change	The Council wrote to or e-mailed everybody on our consultation list to inform them of the publication of the draft Local Plan documents as well as putting up site notices and putting out a press release. Our consultation list is made up of people and organisations who have requested to be informed about the Local Plan and those who have made any comments on either previous drafts of the Local Plan or the Community Infrastructure Levy Charging Schedule.
4096/01/016/Non-specific/O	Mr Vince Hemment	Object	I am grateful to the Council for consulting on the detailed policies and proposals that will make up the Croydon Local Plan. There is much in the document that I agree with, but some of the proposals would, in my opinion, change the character of parts of Croydon very much for the worse.	No change	The objection has not been substantiated in planning terms and therefore cannot be considered as part of the Local Plan.
4117/01/048/Non-specific/O	Cllr S Brew	Object	It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and therefore drew on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	No change	The Council will consider whether the advance communication regarding future consultations can be improved upon and engagement within the parameter of the Council's resources.

4117/01/050/Non-specific/O	Cllr S Brew	Object	<p>The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. In addition, many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it very difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering what key information has been 'hidden' in the 'small print', and why.</p> <p>It is also extraordinary that hard copies of these important documents were not supplied to members until just one week before the deadline for comments. Why on earth not? .What about "Openness and transparency"? Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the task of responding to this consultation.</p>	Change	<p>The Proposed Submission draft will be accompanied by a draft Policies Map which should be clearer. In addition the draft will include in the introduction an improved guide on how to use the plan and which policies would apply for different types of development to make it easier to use. It is noted that the Preferred and Alternative Options draft did include a table which showed what type of changes to designations were being made in each Place.</p>
----------------------------	-------------	--------	---	--------	---

4125/01/057/Non-specific/C	Councillor M Fisher	Comment	Legal Compliance	<p>The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. ----------------------------	---------------------	---------	------------------	---	--------	---

4125/01/054/Non-specific/C	Councillor M Fisher	Comment	Legal Compliance	It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.	Change	It is desirable that Members of the Council from across the borough be involved in its preparation prior to publication of each draft of the Local Plan.
4146/01/012/Non-specific/O	Mr & Mrs Carpenter	Object		The aim should be to build on Brownfield sites first and leave Greenfield sites alone until there is no alternative.	No change	The Croydon Local Plan has been prepared using this principle. Brownfield sites have been considered first and together they will not meet the need for new homes in the borough. Beyond this a review of Green Belt and Metropolitan Open Land in the borough (that will be published in full alongside the Proposed Submission draft of the Local Plan) has identified that almost all Green Belt and Metropolitan Open Land bar is correctly designated and thus unsuited to development.
4210/01/007/Non-specific/O	Mr K Arnold	Object		If these ideas go ahead I will not be voting Labour again.	Not Duly Made	This comment is not duly made as it is not associated with any planning policy or site in the Local Plan.
4221/01/002/Non-specific/C	Mr R Fanthome	Comment		Giving 6 weeks notice via lamppost announcement is just wrong.	No change	The Council wrote to or e-mailed everybody on our consultation list to inform them of the publication of the draft Local Plan documents as well as putting up site notices and putting out a press release. Our consultation list is made up of people and organisations who have requested to be informed about the Local Plan and those who have made any comments on either previous drafts of the Local Plan or the Community Infrastructure Levy Charging Schedule.

4278/01/003/Non-specific/O

Mr Melvin Howard

Object

I know that new housing is desperately needed but the council should be building on brownfield sites not on our precious and remaining green spaces.

No change

The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.

---

You need to protect those family, residential areas and green spaces, or you may end up with noone to shop in your shiny new Westfield and go to a redeveloped Fairfield Halls. On that note the plans for that too are wonderfully vague, how can you shut and redevelop a venue with no re opening plan already in place- doesn't it take around two years to put a programme in place and that is your proposed timescale? The Local Plan and the concepts for the Croydon College area are all well and good but the devil is in the detail and there isn't enough of it in all these wonderful proposals due up for planning. Croydon needs an arts venue and college that serves Croydon, a wonderful, developing, vibrant, diverse community in one of the largest London Boroughs- full of businesses and families and hopefully full of aspiring young couples who will live in the urban centre and then move out to those family communities. We don't need a Southbank Centre that serves the greater London Area, has huge Arts Council funding and is a tourist destination that resides next to many famous London landmarks- nor do we need the bill or risks that go with that proposal. I am all for aspiration but if their CEO says they can do a big chunk of that work with an existing £12 million let him do it, I do not want my council to take the risk with my council tax for such a development that may falter. I also wouldn't mind somewhere to still go whilst the rest of Croydon is a building site and Westfield starts. Please build the expected residential houses on the old Taberner site, sort Georges Walk and Nestle House and let the College start building on the arts block site first; what earth has happened to those 'Places' too? Iust doing that would be a great next phase.

The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.

The replacement of Fairfield Hall involves no change of use and is therefore not included in the Local Plan.

4610/01/003/Non-specific/O

Mr Stewart Jamieson

Object

With regard to the plans themselves I was of the understanding that the areas are largely protected by green belt policy, indeed any such developments would not be in keeping with the local area, seriously jeopardising the mainly low level singular dwellings, open spaces and road network in particular. local infrastructure in particular would not support such expansion.

No change

The Local Plan protects important green spaces across the borough including designating many Local Green Spaces which will have the same level of protection as Metropolitan Green Belt. The Local Plan also focussed development on to previously developed land across Croydon. However, there is insufficient land in the borough to meet all of the housing need and so the Local Plan is planning for a shortfall which will need to be met by other local authorities in London and the south east.

4610/01/002/Non-specific/O

Mr Stewart Jamieson

Object

I do not understand how any current local planning requires that the applicant posts a notices to all surrounding neighbours to alert them of intended planning in order to make them aware should they wish to object and yet this fundamental change has not been formally notified such that residents are given the opportunity to object. In my case I found out by chance and with little notice to take action. Surely there are more rigorous processes in place.

No change

We wrote to all residents registered on our consultation database to inform them of the consultation. The Spatial Planning team does not have sufficient budget to write to all residents of the borough.

*1 Introduction*

<i>Ref No</i>	<i>Representor Company or Organisation</i>	<i>Participation at EIP</i>	<i>Object or Support</i>	<i>Soundness</i>	<i>Policy, Site or Paragraph</i>	<i>Summary of Representation</i>	<i>Summary of Proposed Changes</i>	<i>Council's Response</i>	<i>Council's Proposed Action</i>
0004/04/002/Non-specific/C	Amanda Purdye  Gatwick Airport		Comment			The areas are outside of our 'physical' 15km safeguarding zone, we would therefore, have no comments to make from an aerodrome safeguarding perspective. Our only concern at this distance would be any proposals that include wind turbines.		No change	Comment is noted. There are no proposals for wind turbines.
0120/02/003/Non-specific/C			Comment			We would appreciate if you would extend the period of the consultation in view of the importance of this document. It was not possible to engage and comment in the short time given to the extent we would wish to. The online documentation is not accessible to all.	The consultation period should have been extended.	No change	The Council will consider whether the advance communication regarding future consultations can be improved upon and will consider the time period of consultations.
0120/02/005/Non-specific/C			Comment			Addiscombe Residents' Associations' Planning Group have worked closely together since the first consultation on Croydon Policies (Preferred and Alternative Options) 2013. We have had excellent communications with the Spatial Planners over the period of that consultation- beneficial for both sides as we were able to share local knowledge with the expertise of the planners. We have contacted the Spatial Planners regularly since requesting a follow on, in particular regarding the consultations on the preferred sites and were not able to engage with them. The reason for this change we do not understand completely. This is regrettable and we feel it is a lost opportunity for a true consultation across Croydon - considering that the new Croydon Local Plan has to last for 20 odd years and will be a key document that will shape Croydon as a "Place of Opportunity, A Place to Belong and A Place for Sustainable Living."	The Council should work with the Addiscombe Residents' Associations' Planning Group	No change	Croydon Council has limited resources and it was considered that the best use of these resources was to hold a series of meetings open to all groups across the borough. It would be unfair to have individual meetings with some organisations rather than

1592/01/001/Non-specific/C

Croydon Partnership Ltd

Comment

The Croydon Limited Partnership (CLP) represents a joint venture between two of the UK's most successful shopping centre developers - Westfield Europe Limited and Hammerson UK Properties Plc. On 5 February 2014 the London Borough of Croydon granted CLP outline planning permission and conservation area consent (application refs. 12/02542/P and 12/02543/CA respectively) for the comprehensive redevelopment of the Whitgift Centre and surrounding land in central Croydon. The scheme represents an opportunity for an investment in excess of £1 billion into the Croydon Opportunity Area (COA), delivering 5,000 jobs and up to 600 homes and transforming the Retail Core. The CLP scheme is widely recognised as the single most important opportunity to kick-start the regeneration of Croydon town centre which has been in decline for over a decade. The CLP scheme will act as a catalyst for the regeneration of the wider town centre and will assist in unlocking the potential of a number of other town centre and COA sites which have failed to come forward in recent years. On 15 September 2015 the Secretary of State for Communities and Local Government confirmed the compulsory purchase order (CPO) which brings together the land required for the CLP scheme. The Inspector confirmed the compelling case in the public interest for the confirmation of the CPO and acknowledged that the CLP scheme represents the only present possibility of meeting the requirements of planning policy for the Retail Core and achieving the necessary transformative change in Croydon's status and economy. The CPO decision reinforces the importance of the CLP scheme to Croydon's regeneration. The London Plan (2015) identifies Croydon as London's largest Metropolitan town centre. The Plan states that Croydon's strategy will need to re-brand the offer of the town to meet modern commercial needs, realizing its competitive advantages and good public transport accessibility. To achieve this, the Plan suggests an integrated approach to a number of sites will be needed, with specific reference to the consented Whitgift Centre redevelopment. Current local planning policy contains a similar emphasis. The Croydon Local Plan (Strategic Policies) (2013), as adopted, and the Croydon Opportunity Area Planning Framework (OAPF) (2013) set out

No change

Comment is noted

the need to secure growth and regeneration within the Croydon Metropolitan Centre. This is not a new aspiration for the Metropolitan Centre and in fact it has been a core but largely unfulfilled part of the local planning policy framework over the last two decades. In particular, the Croydon OAPF strongly supports the potential for a renewed and improved town centre and Retail Core and sets out proposals for comprehensive redevelopment and renewal so that Croydon can again serve as a significant retail destination for both south London and the south east of England. Delivery of new homes in the Retail Core is considered to be an integral part of this vision. In summary, the London Plan and local policy framework clearly requires the comprehensive regeneration of Croydon's Retail Core and the recent CPO decision acknowledges the importance of the CLP scheme to achieving this objective. CLP is currently exploring options for delivery and is very aware that emerging planning policy should not prejudice the ability for either LBC or the Mayor from achieving these clear policy objectives.

2128/03/025/Non-specific/O

Cllr Steve O'Connell AM

Object

It is regrettable that this version of the Local Plan was not subject to cross party consultation prior to producing the consultation drafts. Previous iterations of the Local Plan were subject to such cross party working and as such were able to draw on the knowledge and understanding of members from across the borough. It is a shame that such insight has not gone into these documents.

The Local Plan should be subject to cross party consultation. No change

Consideration will be given to arranging cross party meetings prior to future consultation on the Local Plan.

2128/03/027/Non-specific/O	Cllr Steve O'Connell AM	Object	The information contained within the proposed Local Plan has been included in three large documents. Within those documents the 16 places of Croydon are discussed in four different sections, with each section covering a different aspect of the place. This has made it an almost impossible task for members of the Council and the public to fully understand the impacts of the proposed Local Plan on each place, within the short consultation window allowed. When you add to this that many of the proposed changes are only detailed on specific site maps, and not on the policy tables, it makes it increasingly difficult to understand exactly what is happening in each place. This has caused a disconnect for many members of the public who have found it very difficult to navigate these large documents. Many members of the public have been left wondering why key information has been 'hidden' in the 'small print'. Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.	Fully accurate policy tables along with an executive summary of all the key changes in each place would have greatly eased the openness and transparency of this consultation.	Change	The comments are noted and consideration will be given to improve the clarity and readability of future Local Plan consultation documents and to clearly identify the proposed changes for the 16 Places.
2151/01/002/Non-specific/O	Mr Rod Davies <i>East Croydon Community Organisations</i>	Object	ECCO has grave misgivings about the lack of meaningful consultation and the failure of the Planning Dept to provide a timely response to the request to attend a meeting with ECCO to specifically discuss the Croydon Local Plan and associated Council policies and strategies.	The Council should engage more meaningfully during consultation with ECCO.	No change	Croydon Council has limited resources and it was considered that the best use of these resources was to hold a series of meetings open to all groups across the borough. It would be unfair to have individual meetings with some organisations rather than
2605/01/003/Non-specific/C	Ian Broyd	Comment	We would appreciate if you would extend the period of the consultation in view of the importance of this document. It was not possible to engage and comment in the short time given to the extent we would wish to. The online documentation is not accessible to all.	The consultation period should have been extended.	No change	The Council will consider whether the advance communication regarding future consultations can be improved upon and will consider the time period of consultations.

2605/01/005/Non-specific/C	Ian Broyd	Comment	<p>Addiscombe Residents' Associations' Planning Group have worked closely together since the first consultation on Croydon Policies (Preferred and Alternative Options) 2013. We have had excellent communications with the Spatial Planners over the period of that consultation- beneficial for both sides as we were able to share local knowledge with the expertise of the planners. We have contacted the Spatial Planners regularly since requesting a follow on, in particular regarding the consultations on the preferred sites and were not able to engage with them. The reason for this change we do not understand completely. This is regrettable and we feel it is a lost opportunity for a true consultation across Croydon - considering that the new Croydon Local Plan has to last for 20 odd years and will be a key document that will shape Croydon as a "Place of Opportunity, A Place to Belong and A Place for Sustainable Living."</p>	The Council should work with the Addiscombe Residents' Associations' Planning Group	No change	The Council will consider whether the advance communication regarding future consultations can be improved upon and engagement within the parameter of the Council's resources, however, the Council is no longer able to work with individual groups during the consultation period.
3709/01/002/Non-specific/C	Mr J Patel	Comment	<p>The areas are outside of our 'physical' 15km safeguarding zone, we would therefore, have no comments to make from an aerodrome safeguarding perspective. Our only concern at this distance would be any proposals that include wind turbines.</p>		No change	Comment is noted. There are no proposals for wind turbines.

## 10 Transport and Communication

<i>Ref No</i>	<i>Representor Company or Organisation</i>	<i>Participation at EIP</i>	<i>Object or Support</i>	<i>Soundness</i>	<i>Policy, Site or Paragraph</i>	<i>Summary of Representation</i>	<i>Summary of Proposed Changes</i>	<i>Council's Response</i>	<i>Council's Proposed Action</i>
0203/03/009/Non-specific/C	Mr Charles King  <i>East Coulsdon Residents' Associat</i>		Comment			We have serious concerns that the Mayor's off-peak fare rise in contradiction to the rapid drop in diesel and petrol prices has led to a move away from public transport to the car especially in the outer boroughs. This together with increased car ownership is leading to more pollution and road congestion.		No change	The comment is noted but it is outside of the scope of the Local Plan to do this. The Local Plan does try to encourage use of other forms of transport through the design of new developments, provision of car clubs as an alternative to private cars and ensuring new developments promote the use of public transport, walking and cycling.
0203/03/005/Non-specific/C	Mr Charles King  <i>East Coulsdon Residents' Associat</i>		Comment			Good public transport with adequate and fairly priced car parking provision are needed to keep both Croydon town centre which is competing for trade and business with large towns such as Sutton, Bromley and Lewisham. While outer district centres are competing with other district centres in other London boroughs and across the GLA boundary in Tandridge and Banstead.		No change	The comment is noted although the prive of car parking is not something that the Local Plan can control, only the amount, which is considered on individual sites and through proposed Policy DM28.
0203/03/007/Non-specific/C	Mr Charles King  <i>East Coulsdon Residents' Associat</i>		Comment			Croydon has good public transport links with Central London, Gatwick Airport and the South Coast by rail. The takeover of local London rail services by TfL Overground has improved local rail services at West Croydon and Norwood Junction, but since the introduction of December 2015 timetable by GTRailways a number of stations in the borough now have a worse off-peak service. The Borough should be encouraging TfL and Mayor to take over responsibility for local services inside zones 1-6 including all the stations and services in Croydon. Where this is not possible then TfL should specify the train service level and the minimum standards at Croydon stations in line with other TfL controlled stations.		No change	The comment is noted but it is outside of the scope of the Local Plan to do this.
0203/03/008/Non-specific/C	Mr Charles King  <i>East Coulsdon Residents' Associat</i>		Comment			Croydon Town centre is well connected to all parts of the borough and the surrounding boroughs by bus and tram systems. However, there are many gaps in local services where neighbouring district centres or access to the Croydon University require travelling via central Croydon. More local bus routes linking local district centres should be promoted along with more direct bus routes to Croydon University Hospital.	More local bus routes linking local district centres should be promoted along with more direct bus routes to Croydon University Hospital.	No change	The comment is noted but it is outside of the scope of the Local Plan to do this.

0203/03/044/Non-specific/C	Mr Charles King  <i>East Coulsdon Residents' Associat</i>	Comment		Fares : While the area benefits from the Oystercard, being on the edge of the borough a lot of rail and bus journeys are across the boundary where Oyster is not valid. In addition off-peak fares have risen by 38% making public transport the less attractive option now that fuel has reduced in price by 40%. This is has increased car usage and congestion on local through roads.  The Council should lobby TfL to take over the train services in the area as part of the Overground, or if this is not possible in the immediate future, TfL should specify the service levels to be the same as that of TfL Overground. The Council should also lobby the Mayor and TfL to reduce the off-peak fares and reintroduce an outer zones 2-6 Travelcard.	No change	Transport management issues are not a subject of this consultation
0320/01/023//O	Mr Tarsem Flora  <i>Flora Associates</i>	Object		Public car parks provision- It is imperative that the council's strategy should retain the existing public car parks (multi storey + surface parking) where they exist. Any change should NOT reduce the numbers.	No change	This is not a matter for the Croydon Local Plan: Detailed Polcies and Proposals.
0538/01/001/Non-specific/O	Mr Adrian Britton	Object	Soundness - Effective	There should be a policy that provision be made and maintained in Coulsdon town centre for adequate short stay public parking (free for the first hour) and a substantial provision for commuter parking. This is necessary to achieve sustainability of this as a shopping and services centre.	No change	The Local Plan cannot require free parking. It also cannot stipulate parking provision beyond allocating sites for car parking. All applications for redevelopment of car parks should provide an assessment as part of the application of the impact of the proposal on transport networks including the justification for the loss of car parking.
1610/01/004/Non-specific/C	Mr Sean Creighton  <i>Norbury Residents Association Joi</i>	Comment		There is a need for more buses along London Rd. and improved frequency on the railway.  Car parks are needed that are accessed directly from London Rd for local businesses. Parking bay timings should be improved to enable people to stop off to use shops. e.g. free parking for 40 minutes. Taxi companies use a lot of car parking spaces at the Station.	No change	These matters are beyond the scope of the Local Plan.

1610/01/021/Non-specific/O	Mr Sean Creighton  <i>Norbury Residents Association Joi</i>	Object	Soundness - Effective	<p>There needs to be improvements to the accessibility of some stations e.g. Norbury (with its steep ramps), and improvements to the surrounding environment. The Council can work with Network Rail to obtain such improvements plus the need for more frequent trains and the end of 4-6 carriage trains and replacement by 10-12 to ease passenger congestion.</p> <p>The Council should be working with TfL to increase the frequency of buses along London Rd given their heavy use , which often means that people cannot get on them. It can also work to obtain additional buses routes to better inter-connect parts of the Borough e.g. Norbury and South Norwood.</p>	No change	These matters are beyond the scope of the Local Plan.
1610/02/004//C	Mr Sean Creighton  <i>Norbury Residents Association Joi</i>	Comment	Soundness - Effective	<p>8. Why is there no discussion of the need for frequency improvements to bus services in the light of the need for more capacity to serve the predicted growing population along London Rd given the car parking policy restrictions?</p> <p>9. Why are there no proposals for additional services to enable direct bus journeys to be taken from one part of the Borough to another e.g between Norbury and South Norwood, thereby encouraging more visiting of other centres especially where there are cultural facilities like Stanley Halls?</p> <p>10. While there is mention of a tram line along London Rd and across into Lambeth there is no discussion of the practical problems of:  (a) either laying a one or two track system  (b) if a one track system where would pass-by sections would be located  (c) where stops would be located  (d) competition with vehicle traffic adding to congestion and air pollution?</p>	No change	It is beyond the scope of the Local Plan to address points 8 and 9 of this comment. Whilst the Local Plan could safeguard land along London Road for Tramlink works at this stage it is an aspiration set out in the adopted Strategic Policies for a tram extension and it does not form part of Transport for London's business plan. Should at a later date the Council be successful in persuading the Mayor and Transport for London of the benefit of a tram extension then further detailed work would be undertaken and safeguarding, if required, included in a future version of the Local Plan.

1949/01/004/Non-specific/C

Beth Havelock

Comment

*Transport for London*

TfL is currently working on a 2030 vision for the Tram network, to accommodate the growth in demand as a result of new jobs and homes, and deliver an improved and reliable service that would also support the regeneration of Croydon Town Centre, for example the Dingwall Loop and tram upgrade plans. The project includes ongoing work such as expansions to the network and the Dingwall Loop proposals, as well as longer term plan for trams across south London including links to the underground network. The site specific policies should where appropriate seek to secure the necessary areas of land and identify development sites that may be required to assist in the delivery of Tram improvements.

The site specific policies should where appropriate seek to secure the necessary areas of land and identify development sites that may be required to assist in the delivery of Tram improvements.

No change

The comment is noted and dealt with under the specific requests regarding particular sites.

2780/01/002/Non-specific/O	Graham Dyke	Object	Soundness - Effective	<p>I live in Coulsdon and wish to strongly object about the constant developments taking place without adequate parking being provided. Coulsdon where I have lived for 60 yrs is a shambles parking wise and is rapidly becoming a total dump.. The closure of the Lion green park without any new parking is absurd. As a result many people including myself are unable to use coulsdon as much as we want to as there simply is nowhere to park as all the street parking is always occupied and aldi is only for 90 mins which is far too little and that park is already always full anyway with queues into the road a lot of the time blocking any through traffic.</p> <p>Coulsdon is basically full even before we have the absurd cane Hill development which noone wants. After that opens parking will be even worse as people will still want to use their cars to go to the bigger shops in coulsdon. The development of the lion green road car park area is ok in theory but without as least as many places to park as there is now it will make things even worse. I can never eat out in coulsdon now as even in the evenings there is nowhere to park now so I go elsewhere. Do you really want the legacy of this labour council to be that you effectively destroyed the small businesses in coulsdon and drove the shoppers to other areas because that's what it will be unless we have more parking and now.</p> <p>The cost of parking in Coulsdon and Croydon is a joke. Are u aware that its possible to park in Lewes in sussex for 1.50 for 8 hrs and surprise surprise the shops are thriving and very few empty ones unlike coulsdon.</p> <p>What is it about providing car parks that is so difficult to solve? Without them coulsdon will die as a shopping center but maybe that's what you want so all the shops can be turned into dwellings.</p>	Change	Specific reference to car parking will be made in the allocation of the Lion Green Road car park within the Local Plan to ensure that car parking provision is maintained and improved in Coulsdon District Centre in the future.
----------------------------	-------------	--------	-----------------------	---	--------	---

2804/01/010/Non-specific/O	Jim Gibbons	Object	<p>There are many references to this subject within the plan but no mention of Park &amp; Ride. Croydon wisely promoted the Tramlink concept which is approaching its 20th year of operation. There has, however been no attempt to capitalise on the P&amp;R concept to reduce road congestion as has been introduced in many other large conurbations and I would request that the plan includes this issue.</p>	No change	Park and Ride was considered during the preparation of the Croydon Local Plan: Strategic Policies and was not considered deliverable in Croydon.
----------------------------	-------------	--------	--	-----------	--

3396/01/010//O	Ms A Pavon-Lopez	Object		<p>I would like answers to the following questions:</p> <p>What additional access roads are you proposing that would serve this large increase in housing? Where would these go and how would it affect existing roads and neighbourhoods?</p> <p>What additional public transport are you proposing that would serve this large increase in local population, especially if you are not going to be providing additional parking?</p> <p>How will you managing the increase in car and public transport demand, considering that the area is gridlocked already every morning and evening, and very busy during the</p>	No change	The Infrastructure Delivery Plan supports the Croydon Local Plan identifying the infrastructure to support growth. Policy SP8 requires a transport assessment to be carried out for all major developments which would consider the impact of proposed development on local transport.
1350/06/014/10.003/C	Helen Buckland <i>Environment Forum</i>	Comment	10.003	<p>Strategic Policy para 10.3. Carbon dioxide emissions</p> <p>The Forum agrees with the Council's view that congestion and use of private transport lead to increased carbon emissions, and supports actions that will reduce those emissions. In view of the recent revelations about car manufacturers doctoring their emissions test results.</p> <p>•Recommendation- that the Council should seek guidance on whether the 1,600kt of CO2 a year mentioned in para 10.3 is actually higher in reality if the real emissions of these cars are factored in.</p>	No change	The support is welcomed and the comment noted.

0082/02/003/10.006/O	Ms Anne Bridge <i>Canning and Clyde Road Resident</i>	Object	Soundness - Effective 10.006	Section 10.6 is far too weak. It currently states, 'All major development proposals should demonstrate by means of a Transport Assessment, Travel Plan, Construction Logistics Plan and Delivery & Servicing Plan, or equivalents, how they will promote measures to increase the use of public transport, cycling and walking and that they will not result in a severe impact on the local transport networks.' It should include the requirement for the developer specifically to come up with a good quality (not poor quality as in the case of the Gateway Arena) road traffic plan. For as far as the development may affect local roads, the developer should be required to produce detailed and comprehensive plans for how traffic will be managed. This may include reworking traffic junctions. For example, the Westfield Hammerson development will have an impact on roads for many miles around, including from West Croydon, along St James Road, Lower Addiscombe Road, all the way to Elmers End.	No change	This is covered by the Transport Assessment which encompasses all types of transport and considers the impact of development on transport networks related to the site	
0120/02/008/10.006/O	<i>Addiscombe Residents Associatio</i>	Object	10.006	Section 10.6 is far too weak. It should include the requirement for the developer specifically to come up with a good quality road traffic plan. This was too weak with the Gateway development. The developer should be required to produce detailed and comprehensive plans for how traffic will be managed. This may include reworking traffic junctions. There is concern as to how the Westfield Hammerson development will impact traffic on roads for many miles around, from West Croydon, along St James Road, Lower Addiscombe Road, all the way to Elmers End.	The paragraph should require developers to come up with a good quality road traffic plan.	No change	This is covered by the Transport Assessment which encompasses all types of transport and considers the impact of development on transport networks related to the site

0391/02/009/10.006/C	Mrs Mira Armour <i>HOME Residents Associaton</i>	Comment	10.006	<p>DM27 Promoting sustainable travel and reducing congestion DM27 needs to take into account that there will always be people who want to use cars. We do support any safe and comprehensive changes to the layouts of roads and junctions to accommodate cycling.</p> <p>Section 10.6 currently states, 'All major development proposals should demonstrate by means of a Transport Assessment, Travel Plan, Construction Logistics Plan and Delivery &amp; Servicing Plan, or equivalents, how they will promote measures to increase the use of public transport, cycling and walking and that they will not result in a severe impact on the local transport networks.</p> <p>It should include the requirement for the developer specifically to come up with a good quality road traffic plan. The developer should be required to produce detailed and comprehensive plans for how traffic will be managed. An impact into traffic effect of the Westfield Hammerson development on roads surrounding the area is urgently needed.</p>	Paragraph 10.6 should include the requirement for the developer specifically to come up with a good quality road traffic plan. The developer should be required to produce detailed and comprehensive plans for how traffic will be managed. An impact into traffic effect of the Westfield Hammerson development on roads surrounding the area is urgently needed.	No change	A Transport Assessment as listed in paragraph 10.6 would encompass a road traffic plan as well as an assessment on the impact on all forms of transport.
0391/01/009/10.006/C	Mrs Mira Armour <i>HOME Residents Associaton</i>	Comment	10.006	<p>DM27 Promoting sustainable travel and reducing congestion DM27 needs to take into account that there will always be people who want to use cars. We do support any safe and comprehensive changes to the layouts of roads and junctions to accommodate cycling.</p> <p>Section 10.6 currently states, 'All major development proposals should demonstrate by means of a Transport Assessment, Travel Plan, Construction Logistics Plan and Delivery &amp; Servicing Plan, or equivalents, how they will promote measures to increase the use of public transport, cycling and walking and that they will not result in a severe impact on the local transport networks.</p> <p>It should include the requirement for the developer specifically to come up with a good quality road traffic plan. No change	This is covered by the requirement for a Transport Assessment which includes the impact on all forms of transport related to the site.
0535/01/005/10.011/O	Mr Peter Morgan	Object	10.011	<p>While Croydon-specific policies are needed, the London plan is inadequate and has been partly superseded by national guidance in March 2015 allowing and encouraging a more open and relaxed approach to parking. "The imposition of maximum parking standards under the last administration lead to blocked and congested streets and pavement parking. Arbitrarily restricting new off-street parking spaces does not reduce car use, it just leads to parking misery. It is for this reason that the government abolished national maximum parking standards in 2011. The market is best placed to decide if additional parking spaces should be provided</p> <p>However, many councils have embedded the last administration's revoked policies. Following a consultation, we are now amending national planning policy to further support the provision of car parking spaces. Parking standards are covered in paragraph 39 of the National Planning Policy Framework. The following text now needs to be read alongside that paragraph: "Local planning authorities should only impose local parking standards for residential and non-residential development where there is clear and compelling justification that it is necessary to manage their local road network."</p>		No change	The car parking standards in the London Plan post date the March 2015 ministerial statement as the Minor Alterations to the London Plan amended the parking requirements and was adopted post March 2015.
0535/01/008/10.014/O	Mr Peter Morgan	Object	10.014	The council may consider them (developments with a reduced amount of car parking), but there should be a presumption against this.		Change	Changes proposed to Policy DM28 mean that if a reduced amount of car parking is provided more car club spaces should be provided instead. The paragraph will be amended to reflect this.

0535/01/009/10.015/O	Mr Peter Morgan	Object		10.015	The Draft Minor Alterations to the London Plan do allow boroughs to consider higher levels of parking in areas with a low Public Transport Accessibility Level (Level 2 or below) should they wish to so this is presented as an alternative option for consultation. Croydon should clearly do so.		No change	The Local Plan already includes proposed transitional arrangements to help developers adjust to a more sustainable form of development whereby in the first years of the Plan the Council may be more relaxed about car parking in low PTAL areas.
0535/01/010/10.016/O	Mr Peter Morgan	Object		10.016	This paragraph is unduly prescriptive and restrictive. Developers should be free to provide more parking as they see fit. The public repeatedly objects on grounds of inadequate parking, and the council should ensure these concerns are met.		No change	The paragraph provides greater flexibility to developers if it is justified to enable them to adapt to more sustainable forms of development that will be required if London is to meeting its housing need without building on Green Belt.
0535/01/011/10.017/O	Mr Peter Morgan	Object		10.017	Inadequate car packing leads to parking stress and unsatisfactory development. Time and time again the council has mis-managed this issue, with too little parking blighting the lives of so many,		No change	The Local Plan seeks to balance the need for car parking against providing quality private amenity space of the sort that makes higher density developments suitable and attractive to families. Croydon and London will need to adjust to these forms of development if London is to meet its housing need without building on its Green Bet.
0082/02/004/DM27/O	Ms Anne Bridge <i>Canning and Clyde Road Resident</i>	Object	Soundness - Effective	DM27	Whilst it is desirable to promote public transport and cycling, DM27 needs to take into account that there will always be people who want to use cars. To pretend otherwise is burying the head in the sand.		No change	The policy recognises that people use cars in the clause that says that there should be no detrimental impact on the transport networks (which includes the road network) local to the site and also there being no impact on highway safety. No new development should be actively promoting car use hence the private car is not refereced in the first clause of the policy.
0120/02/007/DM27/O	<i>Addiscombe Residents Associatio</i>	Object		DM27	Whilst it is desirable to promote public transport and cycling, DM27 needs to take into account that there will always be people who want to use cars.	The policy needs to take account that people will still use their cars.	No change	The policy recognises that people use cars in the clause that says that there should be no detrimental impact on the transport networks (which includes the road network) local to the site and also there being no impact on highway safety. No new development should be actively promoting car use hence the private car is not refereced in the first clause of the policy.

0203/01/036/DM27/O	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Object	DM27	We support the promotion of walking and cycling. However, the geography and topography of Coulsdon does not lend itself easily to this. Where possible separated cycle lanes should be provided and where possible not be combined with footpaths. Coulsdon is also on the National Cycle Route 20 from London to Brighton and on Route Verte from London to Paris, which needs to be recognised in signage with safe routes where they travel or transect major roads in the area. A new cycle route along with a bridle way for Horses should be created through Cane Hill. Walking and usage of footpaths across open spaces and woodland should be encouraged and this is best done by keeping them clean, tidy and well-marked.	Cycle lanes should be improved in Coulsdon and the use of footpaths should be encouraged by keeping them clean, tidy and well-marked.	No change	The comment is noted and where this can be achieved through new development it will be through Policy DM27 which requires development to promote the use of public transport, cycling and walking.
0203/03/047/DM27/C	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Comment	DM27	Walking and Cycling: We support the promotion of walking and cycling. However, the geography and topography of Coulsdon does not lend itself easily to this. Where possible separated cycle lanes should be provided and where possible not be combined with footpaths. Coulsdon is also on the National Cycle Route 20 from London to Brighton and on Route Verte from London to Paris, which needs to be recognised in signage with safe routes where they travel or transect major roads in the area. A new cycle route along with a bridle way for Horses should be created through Cane Hill.		No change	Where possible and directly related to the development this can be achieved through the application of Policy DM27 as worded.
0203/03/006/DM27/C	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Comment	DM27	Transport We welcome the promotion of walking, cycling and public transport. However, this cannot be at total expense of the car. The car still provides a major form of transport for both the town centre and for the outer district centres where the geography and topography do not lend themselves easily to walking and cycling.		No change	The continued use of the car is recognised both in Policies DM27 and DM28, in terms of congestion and provision of car parking respectively.

0203/03/045/DM27/C	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Comment	DM27	<p>Road Transport : We agree with the policy. To promote sustainable growth in Croydon and reduce the impact of traffic congestion. Although this should not be interpreted as anti-car as the car has a vital role to play in the economy of a town like Coulsdon</p> <p>Although the bypass has provided a great relief to the town centre by removing through traffic, the general increase in traffic, the closure of Lion Green car park and other local developments have increased traffic in the town centre and in surrounding roads such as Chipstead Valley Road, Lion Green Road, Portnalls Road, Marlpit Lane and the Brighton Road which are at capacity during the morning and evening peaks and even on Sundays.</p>	Welcome support	The comment is welcomed and the comments about the impact of the closure of Lion Green Road car park, local developments and the capacity of the local road network are noted.
1350/06/015/DM27/S	Helen Buckland <i>Environment Forum</i>	Support	DM27	The Forum supports Detailed Policy DM27 and particularly (c) in respect of buses on which so many of North Croydon's population depend, and as inequalities in the North further increase will depend on even more in the future.	Welcome support	
1574/02/005/DM27/O	Mr Gordon Thompson <i>Mid Croydon Conservation Area A</i>	Object	DM27	<p>DM27 Promoting sustainable travel and reducing congestion</p> <p>The two main roads adjoining this area and leading into Croydon are very busy and are often already severely congested (with a couple of "bottlenecks"/over-complex junctions), leading to "rat-running" in the network of side-roads feeding and linking them. That will be exacerbated by Westfield/Hammerson and other developments creating/attracting traffic. The effect of the Local Plan is, broadly speaking, to create an intensification of occupation/population --- which has an obvious knock-on effect on people-movement/transport. The Council needs to realise that not everyone wants to (or indeed can) cycle or use public transport (desirable, in theory, as that might otherwise be), nor can anyone be compelled to do so. It seems to us that developers should be required to produce detailed and comprehensive traffic-management plans, from the outset, for proposed schemes --- that sort of thing surely</p>	No change	The comments are noted, however Policy SP8.4 of the adopted Croydon Local Plan:Strategic Policies requires all major development proposals to be supported by transport assessments, travel plans construction logistics plans and delivery/servicing plans.

1592/01/010/DM27/O	Croydon Partnership Ltd	Object	DM27	Draft Policy DM27 relates to highway safety and the need to reduce congestion within the Borough. Option 1 (i.e. the 'Preferred Option') requires developments to promote measures to increase the use of public transport, cycling and walking; have a positive impact and not a detrimental impact on highway safety for pedestrians, cyclists, public transport users and private vehicles; and not result in a severe impact on the local road network. Whilst we agree with the principle of what the Council is trying to achieve through the preparation of this policy, it is considered that, as drafted, the policy will not always be practically achievable if Croydon's growth potential is to be realised. Instead, it is suggested that the introduction to this policy (i.e. before the criteria is listed) is revised to read: "To promote sustainable growth in Croydon, development proposals should seek to minimise the impact of traffic congestions by". It is important that the emerging policy acknowledges that a balanced approach should be taken when assessing development proposals and, importantly, schemes can be acceptable in planning terms where the benefits of the scheme outweigh the highways impacts.	The policy should state "To promote sustainable growth in Croydon, development proposals should seek to minimise the impact of traffic congestions by..	No change	Car use is inevitable from many developments but its impact can be reduced, although it is recognised that this is more challenging than simply minimising the impact. However, if the wording was changed to 'minimise' there would be far less benefit from this policy to Croydon and it may result in future development being jeopardised because of insufficient capacity of transport networks so it is not effective to change its wording.
2041/04/001/DM27/O	McKay Securities	Object	DM27	It is unreasonable to require schemes to have a positive impact only upon highway safety for road users. Schemes that preserve current levels of highway safety and have no adverse impact will also be acceptable. The policy should be amended to make it clear that schemes which have either a neutral or positive impact on road safety will be granted planning permission.		No change	The policy is worded such that all schemes must at least have a neutral impact and should have a positive impact so no change is necessary.
2605/01/007/DM27/O	Ian Broyd	Object	DM27	Whilst it is desirable to promote public transport and cycling, DM27 needs to take into account that there will always be people who want to use cars.	The policy needs to take account that people will still use their cars.	No change	The policy recognises that people use cars, in particular by requiring that there be no severe impact on the highways network arising from new development. However, the policy also seeks to promote alternative forms of transport to the car so requires developers to design their developments in such a way that other forms of transport are more accessible and attractive to residents and users.

2655/01/005/DM27/C	Luci Mould <i>Reigate and Banstead Borough Co</i>	Comment		DM27	<p>Policy DM27: Promoting Sustainable travel and reducing congestion – This policy requires development to “Not result in a severe impact on the transport networks local to the site”. We do not feel that “severe” is appropriate wording and request that alternative wording is considered to require that no detrimental impact on the transport network is created. We also consider use of the word “local” is too narrow and suggest that the wording is amended to require consideration of both the local and wider transport network.</p> <p>At a more detailed level, in terms of the areas around the Croydon and Reigate &amp; Banstead borders, and particularly in Coulsdon, we request that proper testing of transport implications of proposed development sites is carried out and appropriate transport mitigation measures are required. We request you engage with Surrey County Council as part of this process.</p>	No change	<p>Requiring no detrimental impact on transport networks would severely constrain development and accentuate the housing crisis that already exists in London and the South East as it would be difficult or impossible to achieve.</p> <p>The definition of local road networks will, as stated, vary depending on the size of the development so for larger schemes will extend to the wider network. However for minor residential development it will be much smaller and so the policy is written so as to not be a burden on them whilst still ensuring that more significant schemes do not have a detrimental impact.</p> <p>It would be expected that transport mitigation measures would be encompassed by the wording of the policy through promotion of public transport, cycling and walking and not having a significant detrimental impact on transport networks local to the site.</p>	
2716/01/001/DM27/S	Peter Jarvis <i>Chipstead Residents' Association</i>	Support	Soundness - Effective	DM27	<p>I note Option 1b of Policy DM27 and agree that developments should not have a detrimental impact on highway safety for pedestrians, cyclists, public transport users and private vehicles.</p> <p>I note also Option 1c of Policy DM27 and agree that developments should not have a severe impact on the transport networks local to the site.</p>	Welcome support		
2787/01/013/DM27/O	Cllr John Stephenson <i>Reigate and Banstead Borough Co</i>	Object		DM27	<p>Option 1c on P 113 states ‘not result in severe impact on the transport network local to the site’. The proposed developments in Coulsdon will almost certainly have a severe impact on the transport network, contrary to this policy. The words ‘local to the site’ are restrictive and not definitive. I would suggest that they are replaced by ‘impacted by the site’.</p>	The words 'local to the site' should be replaced by 'impacted by the site'.	No change	The supporting text makes clear that local to the site is not restrictive and can cover a wide area, which may be more than 'impacted by the site'.
3729/01/002/DM27/O	Mr J Luthra	Object	Soundness - Effective	DM27	<p>I own several properties in Croydon and belong to a large family who all strongly object to the local plan on the basis it encourages: -More congestion on already saturated roads</p>	No change	This policy would restrict developments with would have a severe impact on local road networks in Croydon.	

Transport issues and parking needs – The Strategic Plan, section 10 states “Croydon has a strategic objective to improve accessibility, connectivity, sustainability and ease of movement to, from, and within the borough”...“policy...is to ensure that individual developments consider these matters”. Consideration of transport and parking is currently a very weak area of planning outcomes. Travelling through the borough by public or private transport is a bad experience. The increase in the number of vehicles on key roads in the borough has been exceptionally rapid. Extensive traffic congestion is evident during many hours of the day. In the south of the borough, the two main roads A22 and A23 are choked with vehicles moving from bottleneck to bottleneck. More traffic is using side roads in order to circumvent the main roads. Side roads are now becoming choked with traffic. There is no evidence of any attempt to speed traffic flows – on the contrary constricting wide roads to single carriageways by the use of road markings, plus, instead of indenting bus stops so that the bus can pull out of the traffic flow, many bus stops have been built out from the sidewalks.

The entire transport network needs to be re-evaluated, with a different mindset and approach. Statements about vehicle pollution are inappropriate. If improvements are required in air quality in the vicinity of roads it is the vehicle manufacturers who must be held to account. Where national and local elected representatives are concerned about air quality they must exert pressure on vehicle manufacturers to improve their output. Elected representative should acknowledge that all their constituents (rich or poor) aspire to have a personal ability to access their own transport to improve their life experiences. Accordingly, to try to satisfy the aspirations of constituents, there should be a motivation to improve road availability (wider roads, removal of bottlenecks, availability of parking - especially at train stations and within retail areas - as well as the provision of public transport). The whole mindset at the moment seems to be to make life as difficult as possible for the aspiring owner of private transport. Council and Transport for London planners need a complete re-think.

The comment is noted. The policy does seek to approach use of transport differently by ensuring the developments take account of their impact on local transport networks and are designed in such a way as to encourage people to walk, cycle or use public transport.

Policy DM28 (page 115-116- CLP2) requires developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The RRA are watching with alarm in our area, the increased on street parking that is occurring principally because of the Council's poor planning policies on parking. More on street parking is creating huge implications for road safety for both pedestrians, motorists and cyclists. The Council assumes that this will lead to fewer people owning their own car. In fact, it is leading to more and more pressure on on-street parking. The Council should be allowing higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems. Policy We believe the Council also need to follow policies that other Local Authorities are adopting in respect of increased on-site parking. We also believe that all new houses, if they have garages, they should be a minimum size of 7m x 3m (internal measurements) and with a minimum 7 foot door opening, to accommodate larger modern day vehicles. Existing garages attached to properties should not be allowed to be demolished and/or converted into residential accommodation, unless the same amount of parking provision is made available within the curtilage of the property to meet the minimum requirements below. Construction of roads should be a minimum of 7m wide, with at least one, 1m wide pavement.

The policy should be amended to increase the amount of parking in areas of low public transport accessibility and ensure new garages are built to accommodate modern cars.

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking.

The planning for car parking is part of the overall London dilemma.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

As far as it impacts "Addiscombe" the lack of car parking space, when large older property is converted into multiple flats, blocks roads and junctions and makes it difficult for service vehicles (e.g. street cleaning, gulley cleaning) to gain access. The infrastructure therefore deteriorates and there is a general build-up of rubbish. Of course we will meet the objectives of this policy at a cost to the community. I request a policy on provision of adequate parking for homes converted into multiple occupancy and in intensified development areas block of flats must have adequate parking spaces and include traffic management planning to avoid disruption of existing roads and junctions.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

Trams have improved transport and reduced the need for cars but little though was given to the resultant commuter parking near Sandilands and Addiscombe tram stops. The policy makes no mention of the need for car parking facilities near to the transport hubs.

The comments about car parking in shopping parades (and the cost of it) is outside the remit of the Local Plan which can only consider loss of parking and provision of spaces in proposed developments.

Lack of parking and the introduction of parking restrictions "killed" the excellent Cherry Orchard Road Shopping Parade. People drove from outside the immediate area to access individual high quality shops (Baker, Farm Butcher, Greengrocer, Shoe Repair shop that also worked for Harrods). I suggest a more positive encouragement of local shopping parades e.g. Cherry Orchard Road specifically application for TFL funding as used for our local Addiscombe Shopping Area

DM28 (Option 1)

6.Policy DM28, which should allow higher levels of parking in developments of low public transport accessibility. Restricting parking spaces in such areas doesn't lead to fewer people owning their own car; it just leads to greater competition for existing spaces.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

0203/01/020/DM28 (Option 1)/O	Mr Charles King  <i>East Coulsdon Residents' Associat</i>	Object	DM28 (Option 1)	The existing parking provision in new developments has proved inadequate especially where these take place in Controlled parking zones. As a result parking is spread across surrounding areas and this has been the cause of many parking rage incidents requiring attendance by the police. Car Ownership in Coulsdon in both social and owned property is nearer that of neighbouring Surrey than London and this should be reflected in the provision in new developments which should have parking spaces to reflect this.	Higher levels of car parking provision should be made in areas such as Coulsdon.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.  Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

Enid Allen

Object Soundness - DM28 (Option 1)  
Justified

The idea that very few parking spaces are needed for developments because they happen to be in a town which has some transport facilities is not appropriate in outer London towns like Purley. I understand that this is presently part of the Mayor for London's current plan and no doubt is appropriate in central London. In Purley it quite simply cannot be and will exacerbate the problems we already have with on-street parking in residential roads.

I have in mind particularly the proposed development of the Purley Baptist Church: some 200 flats (1-, 2- and 3- beds) with only 38 parking spaces proposed. It would be likely that most of these flats will have one car and quite a few, at least two cars. They will need to park somewhere and that will be in nearby roads, already congested in the day time with commuter parking as the Council has not developed a reasonable policy to deal with commuter parking (many will not pay the fees for parking anywhere near the station). It is really time that some serious thought is given to quality of life and sustainability of the environment, particularly for those who have been here for many years and whose enjoyment of our properties will be adversely affected.

I understand that a new school is proposed for the site opposite the gym on Brighton Road so that will alleviate pressures on primary school places somewhat, but the Council really need to reject the central London idea of almost zero parking facilities. I do hope you will revise your plans.

Revise Policy DM28 to reconsider the strategy of the quantum of parking for developments relating to the existing transport facilities (Public Transport Accessibility Levels), for outer London towns like Purley and reject the idea of central London of zero parking facilities and include a reasonable policy to deal with commuter parking.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

----------------------------------	----------------	--------	-----------------	--	--------	--

1856/01/006/DM28 (Option 1)/C	Chris Sleight		DM28 (Option 1)	<p>Policy DM28 (p115-116): The requirement for developers to provide fewer parking spaces is insanity in a borough where parking is a ubiquitous issue. The idea that people will abandon their cars because the council thinks it is a good idea is pure fantasy on your part. The requirement should be for increased parking, particularly in areas of denser population, and/or where public transport is lacking. Reducing the requirement to provide parking with developments simply increases on-road parking, increasing congestion and making our roads more dangerous. This policy is moronic</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--	-----------------	--	--------	--

1883/02/009/DM28 (Option 1)/O	David Hurst	Object	DM28 (Option 1)	Policy DM28, which should allow higher levels of parking in developments of low public transport accessibility. Restricting parking spaces in such areas doesn't lead to fewer people owning their own car; it just leads to greater competition for existing spaces.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. ----------------------------------	-------------	--------	-----------------	--	--------	--

2199/01/002/DM28 (Option 1)/O	August & Wendy Kolster	Object	DM28 (Option 1)	<p>1.Loss of greenbelt, green spaces, parks, gardens, etc. (Policy DM2 – page 18, Policy DM28 – pages 115-116, Policy DM40.1 – page 166)</p> <p>We believe that having ample green spaces is essential for a good quality of life. As such we feel that it is inappropriate to use the already limited existing green spaces for housing, retail, etc. If anything, in some instances new green spaces should probably be created whenever old buildings are pulled down!</p>	No change	Objection noted. Comment not relevant to policy DM28.
2199/01/004/DM28 (Option 1)/O	August & Wendy Kolster	Object	DM28 (Option 1)	<p>2.Parking (Policy DM28 – pages 115-116, Policy DM40.1 – page 166)</p> <p>The parking issue appears totally out of control. In our immediate neighbourhood we see new buildings being constructed that are substantial in size (4 / 5 bedrooms) but that are relatively "crammed in", with sometimes just a single garage and very limited or no additional off-street parking capability. Especially on main roads, the sometimes thoughtless manner of street parking (e.g. right at street corners) creates hazardous traffic situations. To maintain streets that are safe and clear to drive through, the aim should be to have as much off-street parking as possible, in particular with new developments where this can be readily achieved. With the typical number of cars in a household these days being at least 2 or 3, a similar number of off-street parking spaces should be required (or more, depending on the size of the property).</p> <p>When it comes to in-town parking, disposing of existing car parking facilities in towns like Purley or Coulsdon is equally concerning as there is already a shortage of parking facilities. The recent loss of the main Coulsdon car park means we now no longer go to Coulsdon for shopping or to visit restaurants.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. ----------------------------------	---------------------------	--------	-----------------	---	--------	--

2364/01/002/DM28 (Option 1)/O	Alison Crane	Object	Soundness - Effective DM28 (Option 1)	In an ideal world we would have less cars, walk less and cycle more and therefore need less parking spaces. This is a dream world. In reality people need parking spaces and if there is not sufficient provision for parking in new developments this will just cause further problems in the future. People will still own cars in Croydon for the foreseeable future and they will park them in neighbouring roads .	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.  Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
2365/01/003/DM28 (Option 1)/O	Mrs Ash Lewis	Object	DM28 (Option 1)	Policy DM28 which seems to say developers can provide fewer car parking spaces in new developments to encourage use of public transport. Well, this only works when public transport is on your doorstep. If it isn't you will merely encourage on street parking and really we have far too much of that already. You've only got to have some building work on that type of road for total gridlock. For example, the residential part of Russell Hill Road in Purley at 5pm is a total mess at present. I was stuck in gridlocked traffic there for 10 minutes as a combination of far too many new build flats and on street parking plus even more new developments and builder's traffic means you cannot not move. Dreadful. If this policy is not restricted in some way you will have this happening throughout the borough. A disaster awaits	No change	Objection noted but not substantiated in planning terms.

2371/01/009/DM28 (Option 1)/O	Christopher Palmer	Object	DM28 (Option 1)	<p>Policy DM28 which should allow higher levels of parking in developments of low public transport accessibility.</p> <p>The roads in the area are already congested causing visitors to the houses difficulty in finding somewhere to park, particularly as commuters park their cars to catch the buses into Croydon. To build this amount of homes and insufficient parking spaces would cause cars to be parked across drives (sometimes happens now!) and frustration on the part of the local residents.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------------	--------	-----------------	--	--------	--

2429/02/006/DM28 (Option 1)/O	Mr & Mrs E Abdul-Nabi	Object	Soundness - Effective	DM28 (Option 1)	<p>DM28 should allow higher levels of car parking in developments with low public transport accessibility.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. ----------------------------------	-----------------	--------	-----------------	---	--------	--

2598/01/005/DM28 (Option 1)/O	H A Chakera	Object	Soundness - Effective	DM28 (Option 1)	<p>I strongly object to your policies .</p> <p>DM 2 DM 40 DM 40.4 DM 41.3 DM 44.2, DM 28 DM 3 DM 31.4</p> <p>Local shopping parades are empty due to draconian parking charges Whitgift and Centrale are empty Office Blocks empty</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	--------------------------	-----------------	--	--------	--

2604/01/005/DM28 (Option 1)/C	I and W Smith			DM28 (Option 1)	<p>Policy DM28 which should allow higher levels of parking in developments of low transport accessibility not less as the daytime parking in residential roads is already beyond a joke.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--	--	-----------------	--	--------	--

2605/01/015/DM28 (Option 1)/O	Ian Broyd	Object	DM28 (Option 1)	In areas of low public transport and low accessibility there should be higher levels of parking requirements from developments. Restricting parking spaces has never lead to fewer people owning their own car; it just leads to greater competition for existing spaces and tensions in the existing communities.	There should be higher levels of parking in areas of low public transport.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------	--------	-----------------	--	--	--------	--

2606/01/005/DM28 (Option 1)/O	A&J Mitchell	Object	DM28 (Option 1)	We object to this policy		Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------	--------	-----------------	--------------------------	--	--------	--

2635/01/047/DM28 (Option 1)/O	Paul Sandford  <i>Bourne Society</i>	Object	DM28 (Option 1)	Finally, on the general matter of parking provision in district centres, a more realistic approach should adopted, with well designed and affordable LA provided car parks (if necessary multistory) and less reliance on the goodwill towards non-customers of retailers (such as Wairose and Aldi in Coulsdon) in order to support local businesses and services. Such car parks should have long term permit space for local residents in flats developments with inadequate parking provision. In addition, railway stations should have adequate Park & Ride facilities for long-term parking to avoid the daytime dumping by commuters of cars in residential streets outside restricted zones.	Change	Policy DM28 has been amended to require that applicants demonstrate that any car parking that is lost in new development is not needed.
2635/01/015/DM28 (Option 1)/O	Paul Sandford  <i>Bourne Society</i>	Object	DM28 (Option 1)	I object to policy DM28: Car and Cycle Parking in New Development, as this will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Plan assumes that this will lead to fewer people owning cars when in fact it will lead to more and more pressure on on-street parking. The policy should be amended to allow higher levels of parking in all locations that the London Plan contemplates, because so many of our District centres already have very severe parking problems.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>

2666/01/008/DM28 (Option 1)/C	C Morley-Smith	Comment	Soundness - Effective	DM28 (Option 1)	The respondent questions the provision of affordable housing and if this will really be "affordable". Is there provision for lower earning families and not just for young high earning professionals. Appropriate housing needs to be provided for immigrants and asylum seekers. Furthermore, insufficient long term thought has been given to all the infrastructure needed to support all these developments, in particular car parking and traffic control.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	---------	--------------------------	-----------------	--	--------	--

2673/01/004/DM28 (Option 1)/O	Dewi Jones	Object	DM28 (Option 1)	<p>In addition to changes in the housing stock, these proposals would significantly alter the population density. Most individuals continue to aspire to own a car and for many this is a necessity in order to travel to and from work.</p> <p>Public transport will never cover the needs of all people particularly those that need their vehicles as an integral part of their work. The proposed dramatic increase in dwellings and population density will add to the demand for on-street parking which is already an acute problem in some parts of Forestdale. (Polley DM28 of Croydon local Plan - fewer parking places)</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------	--------	-----------------	--	--------	--

2675/01/005/DM28 (Option 1)/O	Lynn Colthart	Object	Soundness - Effective DM28 (Option 1)	Should allow for higher levels of parking in developments of low public transport accessibility.	Should allow for higher levels of parking in developments of low public transport accessibility. Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	--	--	---	--

2695/01/005/DM28 (Option 1)/C	Cllr Chris Wright  <i>London Borough of Croydon</i>	Comment	DM28 (Option 1)	<p>We wonder why when parking is severely restricted in new developments, is there no clear policy for discussions with The Mayor on increasing transport facilities within the borough, creating better accessibility to rail and tram stations and providing closer access to bus routes for new developments. There is continuing concern about the lack of planning for the increase and not decrease in car ownership especially in areas such as a Coulsdon East where public transport is limited and not likely to improve and request is made for a better understanding of the different needs of different parts of the borough in this respect. Concern was also expressed at policy DM28 as this did not address the need for more parking provision in developments that were away from easy access to public transport and not enough thought was given to gradients from new developments to bus and train services. This is particularly relevant in Coulsdon east which has some of the steepest hills in the borough and some of the farthest distances from public transport.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---	---------	-----------------	---	--------	--

2700/01/006/DM28 (Option 1)/O	Mr & Mrs Thomas	Object	Soundness - Effective	DM28 (Option 1)	When we moved into the house there were never any cars parked in the road but now the road is full every night of parked vehicles. Making fewer parking spaces would only increase the number of parked vehicles. Unfortunately most people cannot be weaned away from their reliance on their cars.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------------	--------	--------------------------	-----------------	--	--------	--

---

2723/01/005/DM28 (Option 1)/O	Mr Christopher Knight	Object		DM28 (Option 1)	Policy DM28, Which should allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------------------	--------	--	-----------------	---	--------	--

---

2725/02/002/DM28 (Option 1)/O	Carol Munns	Object	DM28 (Option 1)	Surely this is ridiculous as everyone has the right to own a car.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	-----------------	---	--------	--

2725/01/002/DM28 (Option 1)/O	Carol Munns	Object	DM28 (Option 1)	<p>There is more pressure on parking spaces with the main Pixton Way now ridiculously over-used for parking. This causes difficulties for the buses which at weekends. Can barely move through the parked cars. Yet the Council DM 28 want to reduce parking spaces whilst increasing the amount of people living here. Sorry but you are under an illusion that less people will need a car - they will consider it their right to own one. And why not!! Public transport is already used to its full capacity.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	-----------------	---	--------	--

2740/01/009/DM28 (Option 1)/O	Mr Ian K White	Object	DM28 (Option 1)	Policy DM28 which should allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	-----------------	--	--------	--

2741/01/006/DM28 (Option 1)/O	Mr Colin Dunk	Object	Soundness - Effective	DM28 (Option 1)	<p>It is apparent that the Council wish to relax the London wide rules for new developments providing at least a minimum level of parking. We already have a parking space crisis in many parts of the borough. This council do not care about local residents parking problems. That is evident time and again when reading through the proposals, and when one looks at how the recent Coulsdon parking fiasco was allowed to take place.</p>	<p>Looking at my local area, both Coulsdon and Purley suffer from a chronic shortage of affordable public parking spaces and the council should be looking to increase, not decrease, the requirement for new developments to provide additional parking spaces.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	--------------------------	-----------------	---	--	--------	--

2759/01/002/DM28 (Option 1)/O	Mr David Reed	Object	DM28 (Option 1)	<p>Policy DM28, which should allow higher levels of parking in developments of low public transport accessibility:</p> <p>With regard to Policy DM28 the Council should be adopting policies to increase off-road parking provision and its use in residential areas where this is possible, not reducing it. Many streets in local residential areas have become virtual carparks, including important through roads with schools such as Sandpiper Road and Pixton Way. Lax parking control and planning policies which encourage conversion of private garages into living accommodation are to blame. The result is slower journeys and increased danger for motor vehicles and pedestrians alike.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	--	--------	--

2770/01/011/DM28 (Option 1)/O	Mr Peter May	Object	DM28 (Option 1)	<p>DM28 it is noted that this proposes less parking spaces in areas of good public transport accessibility. Whilst it is laudable that we should seek to promote greater use of public transport and reduce the impact of traffic on the roads, we already have too little off road parking generally throughout the borough which means that our roads are already clogged with parked vehicles. Thus to propose such developments having less parking spaces makes no sense when living in the real world.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------	--------	-----------------	--	--------	--

2774/01/010/DM28 (Option 1)/O	Cllr Susan Winborn  <i>London Borough of Croydon</i>	Object	DM28 (Option 1)	I object to policy DM28. Car and Cycle Parking in New Development, as this will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
2784/01/004/DM28 (Option 1)/O	Iain Waterson	Object	DM28 (Option 1)	<p>these policies completely neglect the basis truth that there is already a substantial scarcity of parking in and around the centre of Purley. The policies appear to have been written by someone with the fundamental misunderstanding that the provision of fewer parking spaces will lead to fewer people owning cars when it will lead to greater pressure on on-street parking. Having tried to park in Purley on many occasions I have first-hand experience of how difficult to find an on-street place. As such it is important that the number of parking spaces required as part of any new development is not allowed to be reduced whilst the prohibition of temporary car parks is too restrictive and gives no flexibility.</p> <p>It is also important that there is no reduction in the total number of parking spaces available. If the car park at 54-58 Whytecliffe Road South is indeed re-designated as residential any new scheme should have at least as many public parking spaces as the current car park. Similarly, whilst redevelopment of the Purley Pool and multi-story car park site would be more than welcome the total number of public parking spaces should not go down given the problems with parking in Purley town centre</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>

2785/01/007/DM28 (Option 1)/O	Ian Cutts	Object	Soundness - Effective	DM28 (Option 1)	Anyone who assumes development without adequate parking will result in less car ownership has not studied the facts or human nature. This policy merely increases on street parking within a greatly increased area.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------	--------	--------------------------	-----------------	--	--------	--

2804/01/009/DM28 (Option 1)/O	Jim Gibbons	Object		DM28 (Option 1)	The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. 2817/01/003/DM28  
(Option 1)/C

Tina Steele

DM28 (Option 1)

I object to the lack of consideration being given to local areas who are already suffering severe lack of parking - especially as Croydon install even more yellow lines. Especially around areas already overloaded by restrictions and red routes.

Decision makers do not live in these areas and do not understand or care about the implications to local council tax payers

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

Comment

Soundness -  
Effective

DM28 (Option 1)

Change

Inadequate car parking in new developments would only increase demand for street parking and slow traffic flow as would reduction of existing public car parking.

In my opinion a car is no longer a luxury but more an essential for our way of life. I agree with you public transport should be used wherever possible. With it virtually a necessity for the husband and wife to work and at the same time bring up a family. Time is limited dropping off and collecting children at child minder, grand parents or school in some cases with babies before going off to work. Fitting in after school activities and shopping. In such circumstances time is tight and public transport is not an option.

As regards to cycling I am not convinced how practical this is and when travelling around Croydon see very little use of cycling lanes. I agree it is desirable but I think it is being pushed by a small but vocal minority and not a suitable means of transport for the majority

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

Soundness - Effective  
DM28 (Option 1)

I am most concerned that Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces than the London Plan allows for. This will inevitably lead to even further pressure on existing parking spaces. Parking in my own road, Ashburton Road, is already very difficult for residents, with many being regularly unable to find any spaces near their own homes. This will in turn lead to more people giving over their front gardens to parking spaces, which will have severe environmental consequences where rain water is unable to be adequately

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

DM28 (Option 1)

Parking in new developments. We do not accept the premise that if parking space is not provided that the occupants will not own cars and will use public transport. Experience shows us that this is a ridiculous assumption.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

2841/01/015/DM28 (Option 1)/O	Cllr Vidhi Mohan  London Borough of Croydon	Object	DM28 (Option 1)	I object to policy DM28: Car and Cycle Parking in New Development, as this will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Plan assumes that this will lead to fewer people owning cars when in fact it will lead to more and more pressure on on-street parking. The policy should be amended to allow higher levels of parking in all locations that the London Plan contemplates, because so many of our District centres already have very severe parking problems.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.  Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
2846/01/012/DM28 (Option 1)/S	Alison and Kemal Hairettin	Support	DM28 (Option 1)	DM28 Parking: we support the proposal to allow lower parking standards for affordable housing sites to make this type of housing is more deliverable.	Welcome support	
2850/02/005/DM28 (Option 1)/O	Elizabeth Killick	Object	DM28 (Option 1)	IT IS A NONSENSE PROVIDING FEWER PARKING SPACES IN THESE AREA. MOST OF THE TENANTS IN THE SOCIAL HOUSING WHERE I LIVE HAVE 2 CARS WHETHER THEY ARE EMPLOYED OR NOT.HONEST AND HARDWORKING TRADESMEN WILL NOT BE ABLE TO SECURE THEIR TOOLS AT NIGHT. DESPITE THE 'NO PETS' RULE IN A LOT OF THESE DEVELOPMENTS MOST TENANTS HAVE DOGS THAT THEY ALLOW TO FOUL ON OTHER PEOPLE'S GARDENS AND DRIVES.PLEASE DO NOT OVER POPULATE AREAS AND DEVELOPEMENTS.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.  Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

2857/01/001/DM28 (Option 1)/O	Philip Talmage	Object	Soundness - Justified	DM28 (Option 1)	Policy DM28 No new housing development should be allowed with fewer parking spaces than one per unit, and never should there be fewer than allowed by The London Plan. As can already be witnessed elsewhere in the area, too meagre an allowance for car parking is a recipe for instant slums rather than a significant deterrent to the ownership of cars and vans.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	--------------------------	-----------------	--	--------	--

2866/01/001/DM28 (Option 1)/C	Malcolm Maskrey	Comment	Soundness - Effective	DM28 (Option 1)	<p>Re-Developed Car Parking Sites or Multi Storey Car Parks:</p> <ul style="list-style-type: none"> <li>- Any new re-development should/must have a requirement of at least the same number of parking spaces as those that are currently available either within the re-development or adjacent.</li> <li>- Car parking is an ever growing problem with more and more cars on the road.</li> <li>- On street parking over the years has increased considerably.</li> <li>- It is particularly noticeable that cars are being parked on footpaths. This in itself is dangerous as in many instances pedestrians, and in particular mothers with prams have to walk in the road in order to get past them. Higher Drive in Purley is a good example but it is happening all over the borough.</li> </ul>	Change	<p>An additional clause will be added to the Policy to cover the redevelopment of existing car parking such that developers will need to demonstrate that, in redeveloping any car park in the borough, there is need for any car parking spaces to be lost.</p>
----------------------------------	-----------------	---------	--------------------------	-----------------	---	--------	--

2868/01/009/DM28 (Option 1)/O	Graham Lyon	Object	DM28 (Option 1)	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. Developers have a responsibility to improve the area with their build and not downgrade it for existing residents.</p> <p>I understand that you need extra housing but this should not be at the expense of the smooth flow of the roads.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	-----------------	--	--------	--

2970/01/009/DM28 (Option 1)/O	Janet Dean	Object	DM28 (Option 1)	<p>I understand that the following Policies will threaten our green spaces. I was born in Croydon and have lived in this area all my life (I am now 63). My parents came here from Scotland in the early 1950s. They chose this area specifically for its green spaces and it is quite unique in that facility. I spent more than 35 years in Real Estate in this area and know very well that the reason people continue to move here, is exactly for these facilities and yet remaining within easy reach of other amenities, London, the coast and airports. Of course, more housing is required but I believe the alternative suggestions to these proposals to be very valid and much more in keeping with the neighbourhood thus maintaining its attractiveness and good standard.</p> <p>These proposals are ill conceived and will change this particular neighbourhood beyond all recognition and take away that for which it is well known and valued. Please hear the voices of people like me and do NOT continue with the proposed policies set out below and which can be found in your Local Plan:</p> <p>8. Policy DM28 (p115-116) This is too restrictive as temporary car parks</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------	--------	-----------------	---	--------	--

2974/01/001/DM28 (Option 1)/O	Jane Bowden	Object	Soundness - Justified	DM28 (Option 1)	<p>1) I understand that Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. This will not discourage people from owning a car, especially if public transport is limited in that area, it will simply increase on-street parking in the area. For example, I need a car to enable me to get to and from my mother's home as I am her principal carer, and I need the car to enable me to take her to doctors appointments and other activities. Making it more difficult for me to park my car won't discourage me from owning one.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	--------------------------	-----------------	---	--------	--

2978/01/009/DM28 (Option 1)/O	Mr James Marland	Object	DM28 (Option 1)	All new developments should have adequate parking, less parking does not equal less cars, it just creates more pressure on existing parking places. I myself constantly have people parking over my driveway as there are not enough parking places.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	--	--------	--

2982/01/037/DM28 (Option 1)/O	Mrs Jeanne Driscoll	Object	DM28 (Option 1)	I wish to add my objections made on this document by our local M.P. Chris Philp.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------------	--------	-----------------	--	--------	--

2984/01/004/DM28 (Option 1)/O	Jennifer Flanagan	Object	DM28 (Option 1)	The requirement for developers to provide fewer parking spaces will only lead to more pressure on on street parking. It should not be assumed that building more homes with fewer parking spaces will encourage people to buy fewer cars. People enjoy the convenience of the car and history shows that the car has increased in popularity over the decades.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------------	--------	-----------------	--	--------	--

2987/01/003/DM28 (Option 1)/O	Mrs Jenny Andrews	Object	Soundness - Justified	DM28 (Option 1)	<p>As part of your consultations, please note my objections to the following in your Local Plan:</p> <p>DM2, DM40,DM28, DM35, DM41.3, DM35, DM44.2, DM44.2 (11.17) Policy 40 (11.3), Policy 40.4 (11.3 site 61)</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------------	--------	--------------------------	-----------------	---	--------	--

2992/01/005/DM28 (Option 1)/O	Mr & Mrs Swift	Object	DM28 (Option 1)	<p>4 Policy DM28 re parking spaces. It is intended that developers will be allowed to provide fewer parking spaces in areas of low public transport accessibility – not only is this against the London Plan but it makes a nonsensical assumption re car ownership. Fewer parking spaces do not lead to lower car ownership. People just resort to on-street parking. Even in areas with good public transport facilities, there is high car ownership. Vans for work, two-cars plus for families - all have to be parked somewhere. On-street parking is heavy and often inconsiderate or even dangerous. This policy will just exacerbate the problem.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	-----------------	---	--------	--

2999/01/013/DM28 (Option 1)/O	Mr John Harris	Object	DM28 (Option 1)	<p>I am writing to object to Lack of Parking in new developments</p> <p>Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	-----------------	--	--------	--

3001/01/013/DM28 (Option 1)/O	Mr John Helen	Object	DM28 (Option 1)	<p>Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for.</p> <p>The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. I will be calling for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	--	--------	--

3003/01/008/DM28 (Option 1)/O	Mr John James	Object	DM28 (Option 1)	<p>I would like to register my objection to DM 28 ( lack of parking areas)</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	--	--------	--

3004/01/001/DM28 (Option 1)/O	Mr John Pewtress	Object	DM28 (Option 1)	In particular the lack of sufficient local parking is a serious matter in Coulsdon town centre and in Riddlesdown, near the Station in Lower Barn Road, Coombe Wood Hill, Brancaster Lane and other side roads. Any policy which fails to preserve the number of current parking spaces must not be allowed. In town centres the lack of parking will inevitably lead to loss of business and deterioration of the area.	Change	An additional clause will be added to the Policy to cover the redevelopment of existing car parking such that developers will need to demonstrate that, in redeveloping any car park in the borough, there is need for any car parking spaces to be lost.
3017/01/013/DM28 (Option 1)/O	Mr Chris Connor	Object	DM28 (Option 1)	<p>7. Policy DM28</p> <p>The draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for.</p> <p>The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. Which already happens in the north of the borough. In fact what the Council should be doing in these areas is increasing the number of parking spaces.</p> <p>Please consider representing Croydon residents and promoting their interests rather than setting your face against them.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>

3029/01/012/DM28 (Option 1)/O	Mr Paul Newton  Addington Village Residents Assoc	Object	Soundness - Effective	DM28 (Option 1)	Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility	Will be calling for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---	--------	--------------------------	-----------------	--	--	--------	--

3039/01/005/DM28 (Option 1)/O	Samantha Freeman	Object	Soundness - Effective	DM28 (Option 1)	<p>In particular I object to:-</p> <p>5. (DM28) Lower parking levels in new developments. Own transport is vital for many people for work. Any people need to work to be able to afford new properties! We also want to support local towns and need to park in order to do this. Lowering parking levels will not lead to people giving up their car - it will lead to congestion. Take a look at local roads to see the problem now - Rutherford Rise in Coulsdon is a good example.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	--------------------------	-----------------	--	--------	--

3043/01/003/DM28 (Option 1)/O	Sarah Stenning	Object	Soundness - Effective DM28 (Option 1)	POLICY DM28, which should allow higher levels of parking in developments of low public transport accessibility. Parking currently is unsafe and unsustainable on Forestdale. It is madness to consider this practicable. Most families have children who have grown up and cannot afford to live in their own home. Therefore most homes have 2 or 3 cars or more.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	--	--	--------	--

---

3045/01/012/DM28 (Option 1)/O	Mr Stuart Marsh	Object	DM28 (Option 1)	I object to policy DM28 which should allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------------	--------	-----------------	--	--------	--

---

3046/01/009/DM28 (Option 1)/O	Stephanie Lawson	Object	DM28 (Option 1)	I believe this policy should allow for higher levels of parking in the locations listed, than the amount currently listed as otherwise there will be more pressure on on-street parking. A lot of the local areas already have drastic parking problems and this policy currently would make the situation worse. I believe temporary car parks should also be allowed as these are sometimes necessary to alleviate congestion (currently prohibited in Policy DM29).	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	--	--------	--

3071/01/006/DM28 (Option 1)/O	Mrs Christine Hardy	Object	DM28 (Option 1)	I am writing to object to: Policy DM28, which should allow higher levels of parking in developments of low public transport accessibility. I should mention there is already a problem with on street parking in the area leading to some people parking on pavements and in front of garages. I can't see people giving up their cars especially when tfl have recently reduced the bus services in Courtwood Lane (which has actually prompting my neighbour to start learning to drive) .	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------------	--------	-----------------	--	--------	--

3075/01/005/DM28 (Option 1)/O	Mr Christopher Andrews	Object	DM28 (Option 1)	It is proposed to allow developers to provide fewer parking spaces than currently required. Local towns such as Coulsdon already have considerable parking problems which will be exasperated increased by the hundreds of new homes in the town. Parking commensurate with trade and domestic usage is a fundamental necessity, and should not be constructively reduced.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------------	--------	-----------------	--	--------	--

3077/01/014/DM28 (Option 1)/O	Mrs Clare Gardner	Object	Soundness - Effective	DM28 (Option 1)	7. Policy DM28: wrongly assumes that fewer people will own cars. This policy should require developers to provide more parking spaces in places with low levels of public transport.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------------	--------	--------------------------	-----------------	--	--------	--

3078/01/005/DM28 (Option 1)/O	Clare Greaves	Object	DM28 (Option 1)	I am writing to object to Policy DM28 which should allow higher levels of Parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	--	--------	--

3080/01/015/DM28 (Option 1)/O	Mr John Mills	Object	DM28 (Option 1)	I object to this policy which should allow higher levels of parking in developments of low public transport accessibility. Restricting parking spaces in such areas doesn't lead to fewer people owning their own car; it just leads to greater competition for existing spaces	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	---	--------	--

3091/01/008/DM28 (Option 1)/O	Mr Paul Gomm	Object	DM28 (Option 1)	please note my objection to the following policy reference numbers within your current draft plan for planning & development;	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------	--------	-----------------	---	--------	--

3098/01/012/DM28 (Option 1)/O	Mr Derrick Thurley	Object	DM28 (Option 1)	Allowing developers to provide fewer parking places in areas of low public transport accessibility. The assumption this will lead to fewer people owning cars is wishful thinking. Most aspire to their own transport therefore cars will just be parked at the kerbside even if some distance away.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------------	--------	-----------------	--	--------	--

3124/01/006/DM28 (Option 1)/O	Mr Gerald Lambert	Object	DM28 (Option 1)	Provision of inadequate parking in new developments does not reduce car ownership, it only increases on-street parking. A good example of this is Higher Drive from Kenley to Purley. Failure to provide adequate on-site parking has turned this road into an obstacle course!	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------------	--------	-----------------	---	--------	--

3132/01/007/DM28 (Option 1)/O	Carole Shorey	Object	DM28 (Option 1)	Parking was also mentioned in Croydon. There are not going to be more people with less cars. Parking is a nightmare and way too expensive already. The more people we let into the country and Croydon areas, the more cars there will be so reducing parking is just not an option.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	--	--------	--

3145/01/012/DM28 (Option 1)/O	Mr David Harwood	Object	DM28 (Option 1)	I also object to DM26 allowing fewer parking spaces for developers, we should be looking to increase not decrease	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	---	--------	--

3151/01/003/DM28 (Option 1)/O	Gillian Edwards	Object	DM28 (Option 1)	Developments where there is low public transport availability need to have a parking place for each flat/house, otherwise surrounding streets are congested	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. (Option 1)/O

Mr Joe Toner

Object

DM28 (Option 1)

I would like to voice my objection to the following plan DM28.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

3185/01/008/DM28  
(Option 1)/O

Mr Stephen Woodward

Object

DM28 (Option 1)

We have lived in Sanderstead for over 40 years, and have thoroughly enjoyed the areas to the south of Croydon being unspoilt. In our view these ill conceived proposals will change this area beyond recognition and take away that for which it is well known and valued. Please rethink, and do not continue with the proposed policies set out below and which can be found in your Local Plan:  
Policy DM28 (p115-116) This is too restrictive as temporary car parks may sometimes be needed.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

3197/01/004/DM28 (Option 1)/O	Sue Hills	Object	DM28 (Option 1)	Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. I call for Policy DM28 to allow higher levels of parking in developments in areas of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------	--------	-----------------	--	--------	--

3201/01/005/DM28 (Option 1)/O	Sharon Smith	Object	DM28 (Option 1)	I am writing to support my local MP Chris Phelp in his objections	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. DM28 (Option 1)

Policy DM28 in reference to parking for new developments. I honestly believe that all new development should actually be required to provide ample parking for potential residents. Where a new development is granted for commercial or residential it is important to provide parking spaces underground (preferably) in order to keep cars parked off of the roads. Cars parked on roads cause more congestion than cars being driven. There is a case for for an increased use of public transport but this should work in tandem with the ability to use private transport when required. Cars kept in ample private off road spaces would help traffic flow for all road users no end. For example I have a private car, for health reasons I find it very difficult to use public transport. When possible I walk to local shops, when I am not driving my car it is parked off road and bothers no one. Only being used when necessary to help me carry the heavy equipment I need for work. A great example of when a lack of provision for parking can cause traffic chaos is on the B272 Plough Lane Purley. As gardens have been built on and old semi detached houses have been replaced by flats without ample parking the road has become a parking lot. Where there was once no need for road marking or parking restrictions and traffic flowed well. There are now yellow lines and traffic chaos with cars left all day on the side of the road. All new development should be required to provide ample parking on site. If that means underground at the expense for the developer then so be it. Why should it be council and local residents who suffer from congestion for the sake of the developers profits? If residents of new-builds are able to be car free then with a bit of thought their parking space could double up as storage. I have always been amazed how this seems to work in Europe and yet we are unable to make it work here.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

3345/01/006/DM28 (Option 1)/O	Rital Patel	Object		DM28 (Option 1)	I would like to object.	No change	No change can be made as a result of this comment as it is not detailed enough as to what is being objected to.	

3347/01/010/DM28 (Option 1)/O	Mr Richard Veldeman	Object	DM28 (Option 1)	Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car which is undoubtedly ill-judged – there is little sign nationwide of a fall in car ownership, in fact probably just the opposite. In my view it will lead to more and more pressure on on-street parking which is quite bad enough already. Policy DM28 should allow higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems. Policy DM29 (p120) prohibits temporary car parks which is completely unrealistic and unhelpful.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------------	--------	-----------------	--	--------	--

3350/01/003/DM28 (Option 1)/O	Mr Robert Watson	Object	DM28 (Option 1)	I live in crofters mead forestdale and cannot see any benefits to the areas mentioned in the above proposals. I am sure it would be better to refurbish existing properties in the area concerned and create more green areas for residents and their children to enjoy. create more sensible car parking areas people will buy cars regardless of not having a parking space and simply park in an existing space thus creating a problem for somebody else. transport for London have already created a problem by their introduction of double yellow lines which in some areas are not required. why anybody would want to create a traveller camp at pear tree farm is beyond me surely a nice new housing complex would be more suitable. forestdale and surrounding area is a very nice place to live and I cannot see any improvement to the area in your proposals. i understand that these proposals are inappropriate and unacceptable these are my views on the matter.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. ----------------------------------	------------------	--------	-----------------	---	--------	--

3352/01/005/DM28 (Option 1)/O	Mr & Mrs Leggatt	Object	DM28 (Option 1)	Policy DM28 of the draft Plan appears to allow developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. This will lead to more and more pressure on on-street parking which is already an issue in the area.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	--	--------	--

3353/01/003/DM28 (Option 1)/O	Rosamund Edwards	Object	DM28 (Option 1)	The theory "no parking spaces = fewer cars owned" was used in Brighton to encourage use of the excellent public transport. It didn't work. People use cars because (a) bus fares for families are costly (b) they can't walk far and can't carry much shopping home by bus (c) they are short of time.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	---	--------	--

3354/01/015/DM28 (Option 1)/O	Dr Bob Wenn	Object	DM28 (Option 1)	I object to Policy DM28, which should allow higher levels of parking in developments with low public transport accessibility. Local road networks and road widths most especially in Shirley where the Wickham Road is often 'nose-to-tail' with cars, will not cope with the proposed higher residential density and the concomitant increase in car numbers.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. ----------------------------------	-------------------	--------	-----------------	---	--------	--

3385/01/002/DM28 (Option 1)/O	Ms Avni Dave	Object	DM28 (Option 1)	We have lived here for 34 years only because of the pleasant environment, therefore we strongly oppose the Croydon local plan that has been proposed. We are against policy DM28. We strongly agree that this plan would fundamentally change the environment in forestdale to its detriment.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------	--------	-----------------	---	--------	--

3408/01/003/DM28 (Option 1)/O	Ms Christine Waring	Object	DM28 (Option 1)	It is foolhardy to assume that fewer people will own a car in such areas. Instead, there will be even more pressure on on-street parking or on any space which can possible be used to park a car. Since more and more young adults are forced to remain living at home because of the very high price of property and those young adults expect to own a car the on-street parking problems will be exacerbated.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------------	--------	-----------------	---	--------	--

3409/01/004/DM28 (Option 1)/O	Mrs Candida de Poitiers	Object	DM28 (Option 1)	The policy is outrageous. How can you think that enabling developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for will lead to fewer people owning a car? This will just not happen and in fact will lead to even more on street parking and congestion.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------------------	--------	-----------------	--	--------	--

3414/01/012/DM28 (Option 1)/O	Mr Chris McInerney	Object	Soundness - Effective	DM28 (Option 1)	Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility	Will be calling for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------------	--------	--------------------------	-----------------	--	--	--------	--

3415/01/010/DM28 (Option 1)/O	Ms C Soroczynski	Object	DM28 (Option 1)	Please note my objections to planning objections to DM28	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	---	--------	--

3423/01/005/DM28 (Option 1)/O	Mr David Haworth	Object	DM28 (Option 1)	I am writing to object to: Policy DM28, which should allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. ----------------------------------	------------	--------	-----------------	---	--------	--

3474/01/015/DM28 (Option 1)/O	Mr Dennis King  <i>Sanderstead Residents' Associatio</i>	Object	Soundness - DM28 (Option 1) Effective	<p>The London Plan which includes inner and outer London Boroughs seeks to reduce car parking facilities. Sanderstead, Selsdon, Purley and Coulsdon are on the outer edges of this great metropolitan area, thus there is no comparison to more central London.</p> <p>The Croydon Council should be more appreciative that residents have greater need of their own transport. This applies even where they are close to public transport because their work may require them to use their car or other activities for transporting family members to a variety of venues. Every citizen is entitled to own or use a car.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--	--------	--	--	--------	--

3496/01/003/DM28 (Option 1)/O	Mr Ian Leggatt	Object	DM28 (Option 1)	<p>I believe the proposals are entirely incorrect in proposing less parking provision than is currently required. I object to the proposal.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	-----------------	---	--------	--

3515/01/005/DM28 (Option 1)/O	Rosemary Wiseman	Object	DM28 (Option 1)	Adequate parking must be provided for any new developments. Reducing parking provision will not lead to less people owning a car, and is a ridiculous assumption. We suffer from computer/other parking in my road, which sometimes makes it impossible for us to park close to our own house.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	--	--------	--

3516/01/004/DM28 (Option 1)/O	Mr G Tubb	Object	DM28 (Option 1)	I have misgivings over several other details which should be reviewed ; 2. The urgent necessity for extending car parking space must be taken into account. Multi story car parking in Purley and Coulsdon- can and should be developed considerably and fees lifted if necessary to give sufficient return to the council.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------	--------	-----------------	--	--------	--

3523/01/009/DM28 (Option 1)/O	Mr Mike Rice	Object	DM28 (Option 1)	<p>Dear Sirs,</p> <p>With reference to the recently published 'Croydon Local Plan', as a resident of the past 25 years I give my views as follows:-</p> <p>Policy DM28 (p115-116), Objection, the council is there to serve us &amp; should provide adequate parking, temporary &amp; permanent.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------	--------	-----------------	--	--------	--

3533/01/001/DM28 (Option 1)/O	Mr Martin Owen	Object	Soundness - Effective	DM28 (Option 1)	<p>Please think very carefully about ruining an entire area, We who pay Council Tax will be replaced by non payers, We will move out to East Sussex, or Abroad, We cannot sustain the whole World</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	--------------------------	-----------------	---	--------	--

3539/01/006/DM28 (Option 1)/O	Mary Norman	Object	DM28 (Option 1)	And I object to Policy DM28 draft plan to allow developers to provide fewer parking spaces in areas of low public transport. I will be calling for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	-----------------	--	--------	--

3545/01/011/DM28 (Option 1)/O	Linda Bevin	Object	Soundness - Justified	DM28 (Option 1)	Any new development - business, leisure or residential should have adequate parking provision. Not providing a parking space will not stop people having and using their cars - it will just push the problem onto the street - clogging up already busy roads and causing friction between neighbours and with parking enforcers.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	--------------------------	-----------------	--	--------	--

3547/01/013/DM28 (Option 1)/O	Mr I Fuell	Object	Soundness - Justified	DM28 (Option 1)	7.Policy DM 28	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------	--------	--------------------------	-----------------	----------------	--------	--

3555/01/005/DM28 (Option 1)/O	Mr I Willaims	Object		DM28 (Option 1)	<p>I object to this policy which should allow higher levels of parking in developments of low public transport accessibility. Many people living in areas of restricted parking also don't live near to public transport, where would the land come from. Is it not the case that new developments require at least 2 spaces per household, if this is a problem why not put parking under the development and not on the street. You can't have a policy for public transport for some and special treatment for those that that transport can't or wont service.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	--	-----------------	--	--------	--

3561/01/005/DM28 (Option 1)/O	Linda Hione	Object	DM28 (Option 1)	Lack of Parking in new developments Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. I will be calling for Policy DM28 to allow higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems. Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	-----------------	---	--------	--

3565/01/005/DM28 (Option 1)/O	Mr I Williams	Object	DM28 (Option 1)	I object to this policy which should allow higher levels of parking in developments of low public transport accessibility. Many people living in areas of restricted parking also don't live near to public transport, where would the land come from. Is it not the case that new developments require at least 2 spaces per household, if this is a problem why not put parking under the development and not on the street. 3579/01/004/DM28 (Option 1)/O	Noemi Molloy	Object	DM28 (Option 1)	<p>As I have previously touched upon, Purley has already suffered as a consequence of the number of new multi-occupancy developments which have been permitted. This policy will allow developers to provide fewer parking spaces and the impact of this should not be under-estimated.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
3584/01/008/DM28 (Option 1)/O	Mrs Margaret Lawless	Object	DM28 (Option 1)	<p>I list below the relevant policy References to which I object. DM28 (115-116)</p>	No change	<p>No changes can be made as the result of this comment as it not detailed enough to determine what is being objected to.</p>

3705/01/005/DM28 (Option 1)/O	Mr J Lemanski	Object	DM28 (Option 1)	I would like you to note my strong objection to the granting of any Planning Application relating to the following Policy Ref. DM28.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	--	--------	--

3706/01/003/DM28 (Option 1)/O	Mr J Logan	Object	DM28 (Option 1)	I am also concerned at the suggestion that there may be attempts to reduce the opportunities for car parking in the surrounding area through redevelopment. This would exacerbate the already acute parking difficulties which exist for people in places such as Purley.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------	--------	-----------------	---	--------	--

3708/01/009/DM28 (Option 1)/O	Mrs J McDonald	Object	DM28 (Option 1)	Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. I will be calling for Policy DM28 to allow higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems. Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	-----------------	---	--------	--

3710/01/006/DM28 (Option 1)/O	Mr J Nolan	Object	DM28 (Option 1)	I am also concerned at the suggestion that there may be attempts to reduce the opportunities for car parking in the surrounding area through redevelopment. This would exacerbate the already acute parking difficulties which exist for people in places such as Purley.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------	--------	-----------------	---	--------	--

3710/01/007/DM28 (Option 1)/O	Mr J Nolan	Object	DM28 (Option 1)	I am also concerned at the suggestion that there may be attempts to reduce the opportunities for car parking in the surrounding area through redevelopment. This would exacerbate the already acute parking difficulties which exist for people in places such as Purley.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. ----------------------------------	---------------	--------	--------------------------	-----------------	--	--	--------	--

3746/01/005/DM28 (Option 1)/O	Jay Luthra	Object	DM28 (Option 1)	Objects to the plan due to the lack of parking in new developments.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------	--------	-----------------	---	--------	--

3750/01/009/DM28 (Option 1)/O	Mrs Anne Turner	Object	DM28 (Option 1)	<p>I would like to put in writing my objections to the following local plans: I am listing the relevant Policy Numbers: 8. DM28 Lack of Parking</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------------	--------	-----------------	---	--------	--

3768/01/003/DM28 (Option 1)/O	Ms K Kendall	Object	DM28 (Option 1)	Policy DM8, this policy will not lead to fewer people owning a car as I believe the Council is anticipating, instead, it will lead to more pressure on parking. Even if local public transport is good, the cost of long distance travel on trains for families is prohibitive. I understand that these are areas where public transport is actually poor, so even local travel would be difficult.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------	--------	-----------------	---	--------	--

3779/01/007/DM28 (Option 1)/O	Mr Andrew Frazer	Object	DM28 (Option 1)	Policy DM28 There is a lack of parking in new developments, which means local residential roads are now becoming very congested with traffic.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	--	--------	--

3785/01/019/DM28 (Option 1)/O	Jenny Greenland	Object		DM28 (Option 1)	I call for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility.		Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
----------------------------------	-----------------	--------	--	-----------------	---	--	--------	--

3789/01/012/DM28 (Option 1)/O	Mr Paul Slaughter	Object	Soundness - Effective	DM28 (Option 1)	Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility	Will be calling for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
----------------------------------	-------------------	--------	-----------------------	-----------------	--	--	--------	--

3793/01/014/DM28 (Option 1)/O	Mr Stephen Barnes	Object	DM28 (Option 1)	<p>And finally, Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. Policy DM28 should allow higher levels of parking in developments of low public transport accessibility.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------------	--------	-----------------	--	--------	--

3794/01/008/DM28 (Option 1)/O	Mr Thomas Lawson	Object	DM28 (Option 1)	<p>I believe this policy should allow for higher levels of parking in the locations listed, than the amount currently listed as otherwise there will be more pressure on on-street parking. A lot of the local areas already have drastic parking problems and this policy currently would make the situation worse. I believe temporary car parks should also be allowed as these are sometimes necessary to alleviate congestion (currently prohibited in Policy DM29).</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	---	--------	--

3795/01/011/DM28 (Option 1)/O	Mr Tony Connor	Object	DM28 (Option 1)	With reference to the Local Plan which has been proposed, please note my objection to the following policies: Lack of Parking in new developments Policy DM28	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
----------------------------------	----------------	--------	-----------------	---	--------	---

3796/01/007/DM28 (Option 1)/O	Mr Tony Sales	Object	DM28 (Option 1)	I am emailing to record my objection to the following policies within the 'Local Plan'.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
----------------------------------	---------------	--------	-----------------	---	--------	---

3803/01/009/DM28 (Option 1)/O	Mr Denis Perrott	Object	DM28 (Option 1)	<p>Policy DM28 which should allow higher levels of parking in developments of low public transport accessibility.</p> <p>The roads in the area are already congested causing visitors to the houses difficulty in finding somewhere to park, particularly as commuters park their cars to catch the buses into Croydon. To build this amount of homes and insufficient parking spaces would cause cars to be parked across drives (sometimes happens now!) and frustration on the part of the local residents.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	--	--------	--

3804/01/024/DM28 (Option 1)/O	Cllr L Hale	Object	DM28 (Option 1)	<p>I object to policy DM28: Car and Cycle Parking in New Development, as this will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Plan assumes that this will lead to fewer people owning cars when in fact it will lead to more and more pressure on on-street parking. The policy should be amended to allow higher levels of parking in all locations that the London Plan contemplates, because so many of our District centres already have very severe parking problems.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	-----------------	--	--------	--

3807/01/005/DM28 (Option 1)/O	Mr Geoff Bell	Object	DM28 (Option 1)	Britain is a car owning society. Even if there are good public transport facilities nearby, people will still own a car. So provision for this must be made for all new developments	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	--	--------	--

3809/01/014/DM28 (Option 1)/O	Mr Ian Leonard	Object	DM28 (Option 1)	Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. that is a farcical assumption and takes no account of human nature or peoples normal aspirations and will lead to more and more pressure on on-street parking, not less. Therefore, I ask for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	----------------	--------	-----------------	--	--------	--

3810/01/008/DM28 (Option 1)/O	Joan Sabatini	Object	DM28 (Option 1)	This section appears to allow developers to provide less parking spaces (in the proposed areas) than the London Plan allows. This is going to increase on-street parking in these areas. Higher not lower levels of parking will be required. This situation is further exacerbated by Policy DM29 (p120) which prohibits temporary parking areas. This also requires addressing.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
3812/01/011/DM28 (Option 1)/O	Mr Peter Spragg	Object	DM28 (Option 1)	Lack of Parking in new developments- Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. This policy, if adopted, will lead to more on street parking rather than less as the Council is understood to expect. From my experience of a recent low rise, flats development at Mitcham, Commonside East, the car parking has become so intense that cars are parked on the pavement, on one side of the road, and as a continuous line on the other side of the road, on the road. This leaves a single car width corridor for cars to negotiate even though car parking areas have been included within the development area. Clearly insufficient car parking spaces were created. The Policy DM28 should allow for higher levels of off road parking, in all locations that the London Plan contemplates, because so many of Croydon's District centres (such as Purley and Coulsdon) already have very severe parking problems.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

3813/01/011/DM28 (Option 1)/O	Mr Brandon Hannan	Object	DM28 (Option 1)	Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. I will be calling for Policy DM28 to allow higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems. Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
----------------------------------	-------------------	--------	-----------------	---	--------	--

3814/01/011/DM28 (Option 1)/O	Mr Jon Adams	Object	DM28 (Option 1)	Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. I propose that Policy DM28 should allow higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.
----------------------------------	--------------	--------	-----------------	--	--------	--

3819/01/005/DM28 (Option 1)/O	Mr Michael Drury	Object	DM28 (Option 1)	<p>I notice that in your Local Plan for development of the area there are several proposals which deserve reconsideration before they are promulgated.</p> <p>4 Parking policy DM28 Like it or not the motor car is here to stay. More parking not less must be provided as Coulsdon and Purley suffer greatly from a lack of parking spaces, especially Coulsdon where some 700 extra houses with their attendant cars are going to add to the competition for parking places. Policy DM29 is too restrictive as sometimes temporary car parks are needed, as in Coulsdon during the closure of Lion Green Road car park, (which incidentally was given to the people of Coulsdon not Croydon Council).</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
3825/01/010/DM28 (Option 1)/S	Yasmeen Hanifa	Support	Soundness - Justified DM28 (Option 1)	<p>I write to you having received this email from Gavin Barwell MP, the tone of which I find inflammatory and discriminatory towards the Gypsy and Traveller communities, and smacks of "not in my backyard".</p> <p>I write as a resident of Addiscombe who recognises the huge problem of lack of affordable housing to buy and to rent in London promulgated by this Conservative government and the previous coalition government.</p> <p>I fully support Croydon Council's proposals.</p>	Welcome support	
3836/01/003/DM28 (Option 1)/O	Mrs L Kavanagh	Object	DM28 (Option 1)	<p>Also any alterations that affect parking should be considered as this is already a nightmare. Why on earth the planners saw fit to reduce street parking recently to Purley High St, is just not logical.</p>	Change	<p>An additional clause will be added to the Policy to cover the redevelopment of existing car parking such that developers will need to demonstrate that, in redeveloping any car park in the borough, there is need for any car parking spaces to be lost.</p>

3837/01/002/DM28 (Option 1)/O	Mr & Mrs Hooper	Object	DM28 (Option 1)	Policy DM28. I oppose the proposal for developers in future to provide fewer parking spaces than they do at present in any development. There is far too little off street parking now and that would just add to street congestion.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------------	--------	-----------------	--	--------	--

3849/01/009/DM28 (Option 1)/O	Maureen Messett	Object	DM28 (Option 1)	I sincerely hope that my objections will be noted. I have lived in this borough for many many years and I hate seeing it gradually destroyed.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. 3949/01/009/DM28  
(Option 1)/O

Mr K Rudduck

Object

DM28 (Option 1)

Policy DM28 which should allow higher levels of parking in developments of low public transport accessibility.

The roads in the area are already congested causing visitors to the houses difficulty in finding somewhere to park, particularly as commuters park their cars to catch the buses into Croydon. To build this amount of homes and insufficient parking spaces would cause cars to be parked across drives (sometimes happens now!) and frustration on the part of the local residents.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

DM28 (Option 1)

Reference Policy Numbers:-  
DM31.4 DM28 DM2

Change

Reference:- 128 504 541 542 548

I am a resident of Shirley and strongly object to the current proposals to build on green belt land on the Shirley Oaks and surrounding areas.

There are plenty of brown sites that are unoccupied and could fulfill the purpose of providing new homes. Shirley is already tight for school places. St John's, in Spring Park Road, is increasing to 2 form entry already with the number of children living locally requiring education. The 367 bus serving the Shirley Oaks Village is infrequent and much more transport will be required. Parking is already a nightmare and with the lack of parking contemplated with the new build supply the problem will only get worse. There will be an incredible build up of traffic on the already congested Wickham Road and other local roads.

I believe this proposed building of traveller's sites and homes will change the whole ethos of Shirley and cause resentment and the lowering of living standards. This is a particular area of standard housing and should not be changed by the building of blocks of houses. Garden land should not be built on and this is an inappropriate development and should not be allowed to go ahead. Metropolitan Open Land has the same protection as the Green Belt and the rules should be followed accordingly..

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

----------------------------------	-----------------	--------	--------------------------	-----------------	---	--------	--

---

3992/01/011/DM28 (Option 1)/O	Patricia Wood	Object	Soundness - Effective	DM28 (Option 1)	There is insufficient parking planned for the new development as Shirley has poor transport links, Policy DM28.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	--------------------------	-----------------	---	--------	--

4010/01/012/DM28 (Option 1)/O	Mr R Morley-Smith	Object	Soundness - Effective	DM28 (Option 1)	Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility	Will be calling for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------------	--------	--------------------------	-----------------	--	--	--------	--

4032/01/009/DM28 (Option 1)/O	Ms S Lawson	Object		DM28 (Option 1)	I believe this policy should allow for higher levels of parking in the locations listed, than the amount currently listed as otherwise there will be more pressure on on-street parking. A lot of the local areas already have drastic parking problems and this policy currently would make the situation worse. I believe temporary car parks should also be allowed as these are sometimes necessary to alleviate congestion (currently prohibited in Policy DM29).		Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	--	-----------------	--	--	--------	--

4034/01/007/DM28 (Option 1)/O	Ms S Quay	Object	DM28 (Option 1)	We have serious parking problems in our town centres so please don't permit the proposed change to the local plan to lower the number of parking spaces that developers need to provide.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-----------	--------	-----------------	--	--------	--

4036/01/012/DM28 (Option 1)/O	Ms S Wheeler-Kiley	Object	Soundness - Effective	DM28 (Option 1)	Policy DM28 of the draft Plan will allow developers to provide fewer parking spaces in areas of low public transport accessibility	Will be calling for Policy DM28 to allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. ----------------------------------	--------------------	--------	--------------------------	-----------------	--	--	--------	--

I am grateful to the Council for consulting on the detailed policies and proposals that will make up the Croydon Local Plan. There is much in the document that I agree with, but some of the proposals would, in my opinion, change the character of parts of Croydon very much for the worse. I hope you will forgive me if I focus on these areas of contention. I am therefore writing to formally object to:

1. de-designation of the Metropolitan Open Land around Shirley Oaks Village;

2. the use of the following five sites for housing:

- land at Poppy Lane reference number 128;

- Stroud Green Pumping Station, 140 Primrose Lane reference number 504;

- land to the east of Shirley Oaks Road and to the rear of Beech House and Ash House reference number 541;

- land to the west of Shirley Oaks Road reference number 542; and

- land to the rear of 5-13 Honeysuckle Gardens reference number 548.

If the Council will not keep them as Metropolitan Open Land, these five sites should at least be designated as Local Green Spaces. Building housing on them would mean the loss of a vital green corridor between Shirley Oaks and the surrounding areas, changing the character of this part of Shirley. As far as I can see, these are the only bits of Metropolitan Open Land in the whole borough which the Council is proposing to de-designate and allow housing to be built on. Why has Shirley Oaks been singled out in this way?

3. the use of the following locations as gypsy/traveller sites:

- Coombe Farm off Oaks Road reference number 502;

- Coombe Lodge Nurseries off Conduit Lane reference number 661; and

- Pear Tree Farm and Pear Tree Farm Cottage on Featherbed Lane reference number 755;

As the Council acknowledges, all three of these sites are in the Green Belt and one of them borders a Site

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

of Nature Conservation Interest.  
Policy E of Planning Policy for  
Traveller Sites, published by the  
Government in August, says very  
clearly:

“Traveller sites (temporary or  
permanent) in the Green Belt are  
inappropriate development”.

The Council's approach is clearly in  
breach of that policy. All three sites  
are also some distance from public  
services and they are all in the same  
part of the borough (two are in  
Heathfield ward, one just over the  
border in Croham). Why has  
Heathfield been singled out in this  
way? If the Council really needs, as  
it claims, to quadruple the number of  
gypsy/traveller sites in the borough -  
which I would question - they should  
look elsewhere (for example, off the  
Purley Way where the existing site is);

4.focussed intensification associated  
with gradual change of an area's  
local character under Policy DM31.4  
of the Shirley Road Shopping  
Parade, Shirley local centre and  
Forestdale. Shirley Road Shopping  
Parade is surely worthy of protecting  
rather than replacing with medium-  
rise blocks? Shirley local centre is  
defined not just as a stretch of the  
Wickham Road (where some  
intensification may be appropriate)  
but Ridgemount Avenue, Wickham  
Avenue, Peregrine Gardens, West  
Way Gardens, the northern section of  
Hartland Way and the western parts  
of Bennetts Way and Devonshire  
Way. Replacing the largely semi-  
detached buildings in these  
residential roads with medium-rise  
blocks would completely change the  
character of Shirley. Replacing the  
largely terraced housing and small  
blocks of flats in Forestdale with  
medium-sized blocks would  
completely change that area too;

5.Policy DM2 on development on  
garden land, which is too subjective  
and therefore too weak. There  
should be a much stronger  
presumption against development on  
garden land; and

6.Policy DM28, which should allow  
higher levels of parking in  
developments of low public transport  
accessibility. Restricting parking  
spaces in such areas doesn't lead to  
fewer people owning their own car; it  
just leads to greater competition for  
existing spaces.

4050/01/005/DM28 (Option 1)/O	Jenny White	Object	DM28 (Option 1)	Lack of Parking in new Developments Pexcessive roadolicy DM.28	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.
				Realistic Parking must be provided for new development. It should be mandatory to avoid excessive road parking		
						Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

---

4051/01/014/DM28 (Option 1)/O	Mr Matt Knight	Object	DM28 (Option 1)	This policy should allow higher levels of parking in developments of low public transport accessibility.	Change	The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. ----------------------------------	------------------	--------	-----------------	----------------	--------	--

4117/01/014/DM28 (Option 1)/O	Cllr S Brew	Object	DM28 (Option 1)	<p>I object to policy DM28: Car and Cycle Parking in New Development, as this will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Plan assumes that this will lead to fewer people owning cars when in fact it will lead to more and more pressure on on-street parking. The policy should be amended to allow higher levels of parking in all locations that the London Plan contemplates, because so many of our District centres already have very severe parking problems.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	-------------	--------	-----------------	--	--------	--

4122/01/005/DM28 (Option 1)/O	Mr David Hazzard	Object	DM28 (Option 1)	Policy DM28, Which should allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	---	--------	--

4137/01/009/DM28 (Option 1)/O	Mrs S Rudduck	Object	DM28 (Option 1)	<p>Policy DM28 which should allow higher levels of parking in developments of low public transport accessibility.</p> <p>The roads in the area are already congested causing visitors to the houses difficulty in finding somewhere to park, particularly as commuters park their cars to catch the buses into Croydon. To build this amount of homes and insufficient parking spaces would cause cars to be parked across drives (sometimes happens now!) and frustration on the part of the local residents.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	---------------	--------	-----------------	--	--------	--

4143/01/003/DM28 (Option 1)/O	Miss R Thorogood	Object	DM28 (Option 1)	Policy DM28 of the draft Plan which will allow developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In reality, it will lead to more and more pressure on on-street parking. You only need to walk around Forestdale now to see that the roads are already lined with cars and vans. Policy DM28 needs to allow higher levels of parking in developments of low public transport accessibility. I do hope that you take seriously all the objections sent to you by those of us who live in the areas you are proposing to radically alter. Thank you.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	-----------------	--	--------	--

4145/01/014/DM28 (Option 1)/O	Mr & Mrs Andrews	Object	Soundness - Effective	DM28 (Option 1)	<p>I am grateful to the Council for consulting on the detailed policies and proposals that will make up the Croydon Local Plan. There is much in the document that I agree with, but some of the proposals would, in my opinion, change the character of parts of Croydon very much for the worse. I hope you will forgive me if I focus on these areas of contention. I am therefore writing to formally object to:</p> <p>6. Policy DM28, which should allow higher levels of parking in developments of low public transport accessibility. Restricting parking spaces in such areas doesn't lead to fewer people owning their own car; it just leads to greater competition for existing spaces.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	------------------	--------	--------------------------	-----------------	--	--------	--

4146/01/011/DM28 (Option 1)/O	Mr & Mrs Carpenter	Object	DM28 (Option 1)	The motor car is a fact of life and something which most people aspire to own. Tning to reduce ownership of cars by restricting the provision of parking spaces will not work and will only lead to ever more pressure on on-street parking.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.</p> <p>Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.</p>
----------------------------------	--------------------	--------	-----------------	--	--------	--

4160/01/005/DM28 (Option 1)/O	Mr T.C Martin	Object	DM28 (Option 1)	Policy DM28, Which should allow higher levels of parking in developments of low public transport accessibility.	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. 4187/01/006/DM28  
(Option 1)/C

Mr Mark Tatum

DM28 (Option 1)

OBJECT to DM28 which should  
allow higher levels of parking

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

4218/01/011/DM28  
(Option 1)/O

Mr & Ms Morgan & Mason

Object

DM28 (Option 1)

This would allow higher levels of  
parking in developments of low public  
transport accessibility.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

4219/01/004/DM28  
(Option 1)/C

Mr R.C Syred

DM28 (Option 1)

OBJECT to DM28 which should  
allow higher levels of parking

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters. Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

4222/01/005/DM28  
(Option 1)/O

Mrs Brenda Taylor

Object

DM28 (Option 1)

Policy DM28, Which should allow  
higher levels of parking in  
developments of low public transport  
accessibility.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

----------------------------------	---------------	--------	-----------------	---	--------	--

4282/01/004/DM28 (Option 1)/O	Mr P Tyler	Object	DM28 (Option 1)	<p>Policy DM28 should allow for higher levels of parking in developments of low public transport. The draft plan does not allow for sufficient spaces as allowed for on The London plan. This is not acceptable and will lead to more pressure on street parking. It is wonderful to have plans for Croydon and its re-generation but you cannot and should change every part of Croydon and especially those green spaces and the parts that are not in need of regeneration. In reading the London Plan the intent is not to change those areas that already exist within its parameters but to find new ones, such as brownfield sites to develop. You cannot hide far reaching changes to these existing communities that exist well in Croydon to sort out the problems of housing that need to be resolved in a 200 page document, which is effectively what you have done. These proposals will have local repercussions in the near and distant future for many residents. Find brownfield sites and build these developments there.</p>	Change	<p>The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. 4716/01/009/DM28  
(Option 1)/O

Rachel Marland

Object

DM28 (Option 1)

Policy DM28 - all new developments should have adequate parking, less parking does not equal less cars, it just creates more pressure on existing parking places. I myself constantly have people parking over my driveway as there are not enough parking places and the council never ever comes out when I ring to complain about this.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

I understand that a new school is proposed for the site opposite the gym on Brighton Road so that will alleviate pressures on primary school places somewhat, but the Council really need to reject the central London idea of almost zero parking facilities. I do hope you will revise your plans.

Revise Policy DM28 to reconsider the strategy of the quantum of parking for developments relating to the existing transport facilities (Public Transport Accessibility Levels), for outer London towns like Purley and reject the idea of central London of zero parking facilities and include a reasonable policy to deal with commuter parking. Include parking facilities in the proposed development of a new school.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. DM28 (Table 10.1)

Presumably n/a means none or nil appropriate. So what happens to the car(s) if the future owner(s) purchase one? Under note 31- Presumably this means 5% of the number of dwellings; so car spaces for the 10 units which means half a car space (a Smart Car!) for 10 units but with a minimum space for 1 car? If the development is for 100 units at high housing density/ha, the 5% car space allowance is just 5 car parking spaces. After regular confrontation between residents over the available spaces, where do the other 95 park? (In the street round the corner)? The policy of reduction of car parking allocations is unrealistic now and up to 2036- unless legislation is introduced to prevent car ownership. Restricting development allocations of parking spaces for high residential and housing density developments would inevitably create localised zones of high density on-street parking as can be seen in some areas now. It is not feasible to magically stop car ownership unless public transport is significantly improved; user costs reduced and reach more areas with interchanges between modes more co-ordinated. The policy of reduction of car parking allocations is unrealistic in the 21st Century- unless legislation is introduced to prevent car ownership. The authorities may wish that car ownership should be reduced and thus car parking provision could be reduced but as the current law stands, the authorities cannot prevent car ownership. If provision of car parking spaces is not provided as part of a development proposal, the new occupant may still want and could purchase a car and there is nothing that the authorities can do (currently) to stop them doing so- even if they do not have car parking provision at their dwelling. Future car ownership is unlikely to fall as development in technology will make car ownership more affordable and therefore more likely, (people like the freedom to up and go where and when they want rather than be restricted by public transport routes, availability or timing, complex interchange en-route etc.) Vehicles may be smaller per unit (rather than the current large 4 x 4's). Therefore we contend that developments, at least in areas of low PTAL, should be provided with a minimum of one off-street parking space per unit. Not to provide such an allocation would inevitably lead to an increase in onstreet parking which causes road congestion. (Unless street parking is prohibited everywhere! Again - unrealistic). Therefore, especially in

The requirements for car parking spaces in areas of low PTAL should be increased. Developments, at least in areas of low PTAL, should be provided with a minimum of one off-street parking space per unit.

Change

The policy will be amended to require increased provision of car club/pool car spaces where reduced levels of car parking are proposed compared to the maximum level set out in the London Plan. This will ensure that residents of developments with reduced amounts of parking can live in them without needing their own car and adding to pressure of on-street parking. The requirement for cycle parking will also be amended to encompass motorcycles and mobility scooters.

Coupled with the approach to sustainable growth of the suburbs (which will make them more sustainable places in which to live) set out in the Plan there is no need to permit higher parking standards in areas of lower PTAL beyond that already referenced in the supporting text.

areas of LOW PTAL provision of car space should be provided. If NOT provided, the end result will be both parking congestion and road congestion as manoeuvring around parked vehicles slows traffic progression. These policies are to cover the period 2017 to 2036. Can the Planners consider the situation by 2036 when probably cars will be 'driverless' and will be more futuristic in design and more environmentally friendly? Get in the car, set your destination on the display panel (GPS) and off you go. No need for a driving licence as anyone could use them (the car would need a license, not the driver); no speed cameras (or income stream revenue from speed cameras) as cars will be driven within the legal limit by GPS SAT navigation. Safety designed into the systems will make the 20mph zones redundant. The only problem will be that the planners have not had the foresight to allow sufficient parking spaces in all the high density dwellings built between 2017 to 2036 and therefore they will still require high density on-street parking with no provision to re-charge the vehicle batteries (if they are electric and not hydrogen powered or other power sourced)! What is the predicted car ownership per household by 2036? We contend that the proposed policies won't work and in the end could ultimately cause chaos. Just a little bit of space allocation in each development and the problem is solved! It gets the stationary cars OFF the streets, now and especially in the future.

0092/02/024/DM29/O	<i>Riddlesdown Residents Associatio</i>	Object	Soundness - Effective	DM29	DM29 (page 120- CLP2) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. 2770/01/003/DM29/O	Mr Peter May	Object	DM29	DM29 refers to not allowing empty spaces to become temporary car parks. In a borough that generally has too little car parking amenities this makes no sense especially where such land does not have an already more immediate and more appropriate use.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
2770/01/004/DM29/O	Mr Peter May	Object	DM29	DM29 refers to not allowing empty spaces to become temporary car parks. In a borough that generally has too little car parking amenities this makes no sense especially where such land does not have an already more immediate and more appropriate use.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
2784/01/005/DM29/O	Iain Waterson	Object	DM29	<p>these policies completely neglect the basis truth that there is already a substantial scarcity of parking in and around the centre of Purley. The policies appear to have been written by someone with the fundamental misunderstanding that the provision of fewer parking spaces will lead to fewer people owning cars when it will lead to greater pressure on on-street parking. Having tried to park in Purley on many occasions I have first-hand experience of how difficult to find an on-street place. As such it is important that the number of parking spaces required as part of any new development is not allowed to be reduced whilst the prohibition of temporary car parks is too restrictive and gives no flexibility.</p> <p>It is also important that there is no reduction in the total number of parking spaces available. If the car park at 54-58 Whytecliffe Road South is indeed re-designated as residential any new scheme should have at least as many public parking spaces as the current car park. Similarly, whilst redevelopment of the Purley Pool and multi-story car park site would be more than welcome the total number of public parking spaces should not go down given the problems with parking in Purley town centre</p>	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.

2828/01/002/DM29/O	Mr Eugene Regan	Object	DM29	Allow higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems. Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
2999/01/014/DM29/O	Mr John Harris	Object	DM29	Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3046/01/017/DM29/O	Stephanie Lawson	Object	DM29	I believe temporary car parks should also be allowed as these are sometimes necessary to alleviate congestion (currently prohibited in Policy DM29).	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3185/01/013/DM29/O	Mr Stephen Woodward	Object	DM29	We have lived in Sanderstead for over 40 years, and have thoroughly enjoyed the areas to the south of Croydon being unspoilt. In our view these ill conceived proposals will change this area beyond recognition and take away that for which it is well known and valued. Please rethink, and do not continue with the proposed policies set out below and which can be found in your Local Plan: Policy DM28 (p115-116) This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.

3312/01/015/DM29/O	Mr Richard Brandwood	Object	DM29	Policy DM29 (p120) should PERMIT temporary car parks on occasions. Policy DM35, Table 11.8, Site 945 (p146) - Redevelopment of this site MUST allow similar provision for public car parking as at present. Provision in Coulsdon is inadequate at present!	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3347/01/016/DM29/O	Mr Richard Veldeman	Object	DM29	olicy DM29 (p120) prohibits temporary car parks which is completely unrealistic and unhelpful.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3412/01/003/DM29/O	Mrs C McNaughton	Object	DM29	I would like to register my anxieties as regards some of the proposals in the draft "local plan". They are DM29.	No change	No change can be made as a result of this comment because it is not clear as to what is being objected to.
3561/01/015/DM29/O	Linda Hione	Object	DM29	Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.

3561/01/010/DM29/O	Linda Hione	Object	DM29	Lack of Parking in new developments Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. I will be calling for Policy DM28 to allow higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems. Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3571/01/010/DM29/O	Mr & Mrs Hewitt	Object	DM29	Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3708/01/019/DM29/O	Mrs J McDonald	Object	DM29	Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.

3794/01/011/DM29/O	Mr Thomas Lawson	Object	DM29	I believe temporary car parks should also be allowed as these are sometimes necessary to alleviate congestion (currently prohibited in Policy DM29).	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3804/01/025/DM29/O	Cllr L Hale <i>London Borough of Croydon</i>	Object	DM29	Object to Policy DM29: Temporary Car Parks, as the policy is too restrictive and temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3812/01/012/DM29/O	Mr Peter Spragg	Object	DM29	Policy DM29 (p120) also prohibits temporary car parks. This seems too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.

3813/01/012/DM29/O	Mr Brandon Hannan	Object	DM29	Policy DM28 (p115-116) of the draft Plan will require developers to provide fewer parking spaces in areas of low public transport accessibility than the London Plan allows for. The Council assumes that this will lead to fewer people owning their own car. In fact, it will lead to more and more pressure on on-street parking. I will be calling for Policy DM28 to allow higher levels of parking in all locations than the London Plan contemplates, because so many of our District centres (such as Purley and Coulsdon) already have very severe parking problems. Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3813/01/015/DM29/O	Mr Brandon Hannan	Object	DM29	Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3814/01/012/DM29/O	Mr Jon Adams	Object	DM29	I also note that Policy DM29 (p120) prohibits temporary car parks, which would introduce an unnecessary obstacle as temporary car parks are clearly a part of a flexible and sensible plan.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.

3849/01/010/DM29/O	Maureen Messett	Object	DM29	I sincerely hope that my objections will be noted. I have lived in this borough for many many years and I hate seeing it gradually destroyed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3897/01/019/DM29/O	Cllr M Neal	Object	DM29	I object to Policy DM29: Temporary Car Parks, as the policy is too restrictive and temporary car parks may sometimes be needed.	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
3940/01/011/DM29/O	Shirley Shephard	Object	DM29	Policy DM29 (p120) prohibits temporary car parks. This is too restrictive as temporary car parks may sometimes be needed	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
4032/01/017/DM29/O	Ms S Lawson	Object	DM29	I believe temporary car parks should also be allowed as these are sometimes necessary to alleviate congestion (currently prohibited in Policy DM29).	Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.

4078/01/011/DM29/O	Mr & Mrs Belsey	Object		DM29	Lastly, temporary car parks must be allowed, especially in Coulsdon and Purley, where there are already severe problems that are threatening the future of the shops and restaurants.		Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
4117/01/015/DM29/O	Cllr S Brew	Object		DM29	I object to Policy DM29: I disagree that temporary car parks should be discouraged. If sites are vacant and there's a local need, perhaps because other parking sites are temporarily unavailable, then temporary car parks are to be encouraged. The current parking crisis in Coulsdon is a perfect example, and there may be similar issues in the future while other major sites are redeveloped.		Change	Temporary car parks are used by landowners as an easy way to make use of land that is not being developed. The only instance that a temporary car park may be justified is when it is a time limited replacement of a permanent car park that is being redeveloped. The supporting text of Policy DM29 will be amended to reflect this and provide justification for a departure from the formal policy.
0790/01/136/DM30.1/O	Mr Mathew Frith <i>London Wildlife Trust</i>	Object	Soundness - Effective	DM30.1	Whilst in principle we support this, we believe that Sites of Importance for Nature Conservation should be included under DM30.1b.	Whilst in principle we support this, we believe that Sites of Importance for Nature Conservation should be included under DM30.1b.	No change	No change is required as Policy DM25 in the preferred and alternative options draft already covers any development (including the siting of telecommunications equipment) on Sites of Nature Conservation Importance. The clause in Policy 30.1 regarding Metropolitan Green Belt and Metropolitan Open Land was specifically included as it is not a matter covered by the draft policy on development in Green Belt or on Metropolitan Open Land.

## 11 The Places of Croydon

<i>Ref No</i>	<i>Representor Company or Organisation</i>	<i>Participation at EIP</i>	<i>Object or Support</i>	<i>Soundness</i>	<i>Policy, Site or Paragraph</i>	<i>Summary of Representation</i>	<i>Summary of Proposed Changes</i>	<i>Council's Response</i>	<i>Council's Proposed Action</i>
0092/02/012/Non-specific/O	Riddlesdown Residents Associatio		Object			There is no mention in "movement" section in both Purley & Sanderstead "Places" of the poor transport links for both staff and pupils attending Riddlesdown Collegiate which is effectively located in a cul-de-sac. The large size of this Collegiate means traffic and pupil/staff movement is high, especially in the morning and mid/late afternoon.	The Purley and Sanderstead Places should reference movement around Riddlesdown college.	Not Duly Made	Only marked up changes to the adopted Croydon Local Plan: Strategic Policies are subject to consultation and therefore this comment is not duly made.
0092/02/001/Non-specific/O	Riddlesdown Residents Associatio		Object			The RRA are again extremely disappointed to note that very little mention is made of Riddlesdown within the proposed Plan and it would appear from various plans published in the proposed documents, that we are located in the three "Places" of Purley, Sanderstead and Kenley/Old Coulsdon! A small area in the centre of Riddlesdown is also in a blank area on the "Places" plan. Riddlesdown might not be large enough to be a "Place" but it has the largest secondary school in the Borough (Riddlesdown Collegiate with 2,000 children plus 250 staff), a railway station, eleven retail frontages on two sites (6 & 5), including a vital sub post office, a chemist, two convenience stores, a church, a large Common and associated adjoining Green Belt land, arable land and woodland. It is surprising then, that the Council have again made very little reference to Riddlesdown's existence! The topography of Riddlesdown, with local infrastructure, clearly makes it an important area within the Borough. We would ask that more reference is made to Riddlesdown within the Plan!	Riddlesdown should be referenced in the Plan and on the Places Maps.	Change	The following changes were made to the text in order to reflect on the specific comment about Riddlesdown: (1) in Kenley and Old Coulsdon section to read: "11.95 Kenley and Old Coulsdon is a suburban area with green wooded hillsides (Dollypers Hill, Roydons Wood) and green open spaces (Kenley Common, Riddlesdown, Kenley Aerodrome) located within and around it. There is a strong link between the green infrastructure and the built environment. This creates a feeling of spaciousness or openness can be seen in the layout of the built environment." and "11.97 Kenley and Old Coulsdon's shopping and community facilities are concentrated in the area between the Godstone Road and Kenley station. The area is framed by green space of Riddlesdown to the north and railway to the south." (2) in Sanderstead section to read: "11.127 Sanderstead is a suburban Place located on a hilltop, with residential areas of Purley Downs, Riddlesdown, Hamsey Green and Sanderstead surrounded by large scale green open spaces such as Mitchley Wood, Riddlesdown and Kings Wood."

0115/04/013//O	Mr Bob Sleeman	Object	I appeal to you to re-visit the analysis of sites for travellers and to confirm the mechanism and weightings of scores conforms to a national policy, not something invented by Croydon Council without any accreditation	Change	The Scoring set out in the table in the Gypsy and Traveller sites selection evidence document was incorrectly applied to sites in Metropolitan Green Belt and Metropolitan Open Land as +5 when it should have been -5. The scoring for individual sites affected will be corrected and republished with the Croydon Local Plan Proposed Submission drafts of the Detailed Policies and Proposals and the Strategic Policies- Partial Review.	
0203/03/054/Non-specific/C	Mr Charles King <i>East Coulsdon Residents' Association</i>	Comment	Leisure, Recreation and Sports: It is important there are good leisure and recreational facilities for all age ranges especially young people. Coulsdon is blessed with great open spaces such as Farthing Downs, Happy Valley, the Cane Hill site and two sections of the London Loop starting at Coulsdon South Station. There are adequate parks and open spaces with recreation facilities such as football pitches, pitch and putt, bowls, open air gym and children's playgrounds with swings and other equipment within walking distance. It also has a long established Harriers Running Club, Children's Gymnastic Club and many other clubs operating in the area.	No change	Thank you for your comment	
0203/03/051//C	Mr Charles King <i>East Coulsdon Residents' Association</i>	Comment	On the Cane Hill site : We would like to see the Green Belt opened up to the public with new bridle paths, footpaths, a circular bridle path for walkers, cyclists and horse riders. The diversion of the London Loop from Lion Green Road through Cane Hill via the Ancient Monument Surrey Iron Railway embankment site so that people can be made aware of its importance to Coulsdon's local transport history.	The London Loop section 6 from Coulsdon South to Banstead should be diverted at Brighton Road onto the Cane site to run past the Ancient Monument of the Surrey Iron Railway embankment.	No change	Alignment of the London Loop is not a matter that the Local Plan can consider.
1302/01/016/Non-specific/C	Mr Graham Saunders <i>Historic England</i>	Comment	In addition to help provide clarity of the potential impact of developments on the existing local and historic character, we would suggest that the Plan include annotated site plans of the proposals sites listed in each character area. It is appreciated that this would increase the size of the document, but this additional information would help provide further clarity on the potential impacts development of these sites may generate and the issues that need to be considered.	Borough Character - assurances in delivering intensification	No change	Resonated justification and guidance in relation to intensification in the areas with different character type is provided under paragraphs 11.11 - 11.18.

1324/01/001/Non-specific/S	Katharine Harrison <i>Surrey County Council</i>	Support	Soundness - Justified	We are pleased to note that the supporting evidence indicates that the potential additional education need likely to be generated by the planned new housing development will be met within the borough.	We would like to continue to be consulted as the Croydon Local Plan progresses to seek to ensure that new development does not impact on education provision for Surrey. We therefore would anticipate future engagement with you to ensure that any potential cross-boundary pressure on Surrey schools is appropriately mitigated and that strategic education infrastructure needs are met in accordance with the statutory Duty to Cooperate.	Welcome support	
1574/01/001/Non-specific/O	Mr Gordon Thompson <i>Mid Croydon Conservation Area A</i>	Object	Soundness - Justified	The division of the Borough into "Places" is, to start with, utterly arbitrary and, upon inspection, palpably absurd. Take, for instance, the so-called "Addiscombe Place" (this is seen, it seems, as homogenous but it is, in reality, an immensely varied urban/suburban landscape, and one still blessed with nice open spaces, gardens, trees and greenery). There is already a massive, out-of-scale, overbearing "edge of town centre"-development of flats (the awful Menta, or whatever it is now called) in progress at one location --- is the Council now going to say that the rest of the "Place" is OK for this, as well?		No change	Cherry Orchard Road and East Croydon station areas are a part of the Opportunity Area, which has rigidly established boundaries and more detailed planning policies in the form of Opportunity Area Planning Framework. Local character of Addiscombe as a Place is described on page 135 of the consultation draft of the Croydon Local Plan: Detailed Policies and Proposals and clearly reflects on it as a suburban residential settlement. The concept of 16 Places was widely consulted prior to its adoption as a part of the Croydon Local Plan: Strategic Policies.
1610/02/003/C	Mr Sean Creighton <i>Norbury Residents Association Joi</i>	Comment	Soundness - Effective	Other than for East and West Croydon Stations why are there no detailed proposals for improving accessibility to and within railway stations and the improvement of the immediate areas around them?		No change	Detailed design guidance for the East and West Croydon areas, including accessibility, are included in masterplans adopted in 2011. Direct reference to those document is included in policy DM36.1.

1834/01/002/Non-specific/O	John Underwood	Object	<p>In addition I object, particularly relating 5 above, to the apparent lack of consideration given to associated issues relating to proposed significant increases in housing. Examples are pressure on schools and doctors, and traffic flows on the already overburdened Wickham Road, which at times is gridlocked.</p> <p>The London area is already overcrowded. It would surely be better to encourage the Government to concentrate on other areas of the country for new housing, business and related services or at least concentrate on less densely populated parts of Croydon for new housing.</p>	No change	<p>The Croydon Local Plan: Detailed Policies and Proposals is planning for sustainable growth in the context of the 16 Places. Croydon has to align with the London Plan which has identified the need for growth in all the London Boroughs. Croydon is in discussions with neighbouring local authorities regarding the Duty to Cooperate and has approached them regarding the need to provide more housing. All Places will change to some degree, some more than others, reflecting the need to provide more homes and jobs for a growing population. There are existing Green Grid policies in the Croydon Local Plan that protect Croydon's open spaces including the Metropolitan Green Belt, Metropolitan Open Land and Local Green Spaces. The Croydon Local Plan: Strategic Policies-Partial Review, in paragraph 5.31 refers to the Infrastructure Delivery Plan which provides the evidence of needs for additional infrastructure including school, and SP8.4 requires that major development proposals will be required to be supported by transport assessments, travel plans, construction logistics plans and delivery/servicing plans.</p>
1926/01/037/Non-specific/C	Councillor Luke Clancy	Comment Soundness - Effective	<p>A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.</p>	No change	<p>The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.</p>

2062/01/037/Non-specific/C	Councillor Jason Perry  <i>London Borough of Croydon</i>	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.		No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
2071/01/037/Non-specific/C	Councillor Mario Creatura  <i>London Borough of Croydon</i>	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.		No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
2077/03/003/Non-specific/O	Mr David Page  <i>Mid Croydon Conservation Area A</i>	Object		The Panel is concerned at the concentration of residential development in the centre of Croydon with particular concern at the lack of facilities and the local of recreational space particularly green recreational space. The Panel is also concerned at the quality of development and conversion being permitted and how this will impact on the quality of the street scene.		No change	Croydon Local Plan secures protection to the existing Local Green Spaces serving Croydon Opportunity Area such as: Wandle Park, Duppas Hill, Park Hill and The Queens Gardens. New sites for schools, cultural and healthcare facilities are proposed, see Table 11.9.
2128/01/006/Non-specific/C	Cllr Steve O'Connell AM	Comment		There is a need for greater protection of District Centre employment buildings and sites to ensure that new jobs can be based across the Borough. More sites need to be added with the tag 'retain use' and not alternatives listed.	More sites need to be added with the tag 'retain use' and not alternatives listed.	No change	Employment sites within the District Centre will be protected by SP3.2 and do not require an allocation.

2128/01/002/Non-specific/C	Cllr Steve O'Connell AM	Comment	There is a need for the officers to consult other Residents Associations, groups in the Local History Forum and the members of the Area Conservation Committees as to whether amendments need to be made, to ensure more accurate descriptions.	The character descriptions should be more accurate, working with local stakeholders.	No change	The Borough Character Appraisal was originally prepared in 2011 and was a part of consultation packages and subsequent adoption of the Croydon Local Plan: Strategic Policies (2013). The current document was updated only in areas relating to local character typology which was extended to cover all uses, not only residential. The document was widely consulted and constitutes an evidence base to the local plan.
2151/01/006/Non-specific/S	Mr Rod Davies <i>East Croydon Community Organisations</i>	Support	ECCO supports in principle the creation of sites for travellers as means to address reported anti-social activity and to promote engagement between the traveller and settled communities. The caveat that ECCO applies to this support is that it expects the Council to provide active management to ensure that the sites are well maintained and do not become venues of anti-social behaviour. ECCO notes the lack of factual communication regarding this issue by the Council, particularly with the affected communities.	The allocations are supported but the Council should provide active management to ensure the sites are well maintained.	Welcome support	
2166/01/003/Non-specific/O	Mr Clark Dunstan	Object	South Norwood Country has many vistas and views to the City, Canary Wharf, Shirley Hills and Croydon Town Centre. The recent building of Arena School has had a negative impact upon the locality and when completed the building will be obtrusive and detract from the character of the Victorian/Edwardian terraced homes. Any further development that will have an effect upon this valuable green resource and ecological habitat needs greater protection. The trails in south Norwood Country Park could be improved to encourage Croydon's Heart Borough policy and embed the Olympic Legacy that they promised to do when developing the school yet have failed to deliver.		No change	Green spaces are protected under policy SP7 of the Croydon Local Plan: Strategic Policies and DM24 of the Croydon Local Plan: Detailed Policies and Proposals.

2448/01/037/Non-specific/C	Andy Stranack  Croydon Council	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
2571/01/004/C	Jennifer Radford	Comment		I would also like to be provided with further details of the following matters that have been used as reasons to discount many of the proposed sites that scored significantly higher than the Site and site no. Site 324: Employment and proposed residential use in the Proposal:  **Unsure of where this site is since there is no Site No 324 in the proposals doc**	No change	Details of the assessment of site 324 can be found in the "Gypsy and Travellers assessment and selection sites for Gypsy and Travellers sites " can be found on the intranet on the Local Plan Evidence base
2619/01/006/Non-specific/S	Ross Holdgate  Natural England	Support		The Places of Croydon This section contains the proposed site allocations. We note that none of the allocations under consideration would appear to result in direct impacts to SSSIs within the Borough.	Welcome support	
2683/01/004/Non-specific/O	Mr & Mrs Iles	Object		There are many, many empty sites in Croydon that are not mentioned. For example a large site near the Three Penny Bit by East Croydon station has been empty for as long as we can remember. There are a cottage was pulled down, the occupants evicted just so that we could look at another undeveloped area for years to come. What is wrong with Croydon Council and the people who think up such crazy plans. I would lay an even bet that they don't live in or near any of the areas designated in the Plan. It is unfair, unjust and must be rethought.	No change	The area around East Croydon Station is covered by the East Croydon Masterplan and all sites have valid planning permissions. Construction works commenced on the majority of sites.

2713/02/002/Non-specific/O	Mr Alan Magrath	Object		I am most concerned at the changes proposed in the Local Plan. Croydon spends much of its time being kicked in the teeth. The last thing it needs is for the Council to join in. The Council should not spend its time ruining the lives of people who live in the borough. Do not build on green-belt land when there are plenty of brown-field sites. Do not build tower blocks in places where it is inappropriate. For goodness sake! Have a bit of sensitivity. Do the people proposing these changes actually live in the borough?	No change	There is no reference to a specific paragraph, policy or site within the representation and so it cannot be considered in shaping the Local Plan in that regard.
2775/01/037/Non-specific/C	Cllr Tim Pollard <i>London Borough of Croydon</i>	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
2776/01/037/Non-specific/C	Cllr Helen Pollard <i>London Borough of Croydon</i>	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.

2805/01/001/Non-specific/S	Mr Ken Baker	Support		I was genuinely elated to see the Local Plan proposals for Croydon generally - and particularly for our own area here in South Norwood - elation not being easy to summon up after 10 years membership of 'People for Portland Road' (half of that as Chair of our Planning Watch group) and often feeling part of a losing battle when Planning decisions would still allow monstrous decisions on Portland Road and when our thoroughly researched and consulted Regeneration Strategy was 'shelved' over 7 years ago. These current proposals, however, do appear very positive and encouraging and I, for one, am grateful for your work.	Welcome support	
2812/01/037/Non-specific/C	Cllr Jan Buttinger <i>London Borough of Croydon</i>	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
2829/01/037/Non-specific/C	Cllr Margaret Mead <i>Croydon Council</i>	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.

2842/01/037/Non-specific/C	Cllr Richard Chatterjee  London Borough of Croydon	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
2885/01/001/Non-specific/O	Mrs Anita Pepper	Object		I object to the proposal for building more houses on our land which belongs to the present residents. "changes to the Policy Map 43". The notices you have displayed on the lampposts are unfair as they do not give the whole story of your plans.	No change	It is unclear which policy or what proposal site the comment relates to. References to Policy Map 43 does not relate to a particular site, therefore this comment is considered as not duly made.
2982/01/038//O	Mrs Jeanne Driscoll	Object		I wish to add my objections made on this document by our local M.P. Chris Philp. 'DM35.8'	Not Duly Made	Not duly made as policy DM35.8 does not exist
3166/01/003//O	Maria Linford	Object		I totally object to the proposal of the gypsy development I thought that the site was allocated to build a new Archbishop Tennison school and playing field.	No change	It is unclear what site is being referred to in the objection.
3396/01/012//O	Ms A Pavon-Lopez	Object		What consideration are you required to give to local character, and how did you decide that this was not important in this case?	No change	The evidence is available on the Council's website.
3396/01/013/Non-specific/O	Ms A Pavon-Lopez	Object		Can you send me a copy of the impact assessment on surrounding properties in the areas around the proposed development?	No change	The evidence is available on the Council's website.

3430/01/037/Non-specific/C	Mr Donald Speakman	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
3430/01/058/Non-specific/O	Mr Donald Speakman	Object		Purley Library site: (not currently discussed in local plan): The existing listed building should be retained but converted to offices. (AFTER new library has opened on site 30 above)	No change	This is not discussed in the Local Plan, but your comment is noted.
3699/01/037/Non-specific/C	Cllr J Cummings	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
3711/01/003/Non-specific/O	Ms J Powell	Object		Brookscroft is a privately managed estate so residents do not drain the local economy of funds for the upkeep of the area. Linton Glade does belong to Croydon and its upkeep is poor. I have had to report poor road surfaces and only the bus route at the entrance to Pixton Way never gets gritted in snowy conditions. It is almost as if we are forgotten part of Croydon.	No change	Matters relating to estate management and maintenance, road maintenance and bus routes are not matters that can be considered through the Local Plan process.
3746/01/002/Non-specific/O	Jay Luthra	Object		Objects to the destruction of local green spaces but does not specify where or what policies.	No change	There is no reference to a specific paragraph, policy or site within the representation and so it cannot be considered in shaping the Local Plan in that regard.

3862/01/009/Non-specific/O	Mr M Blount	Object	Soundness - Justified	<p>I have considered details of the proposed Croydon Local Plan and have the following objections on the basis that they will:</p> <ul style="list-style-type: none"> <li>detract from the local areas,</li> <li>dramatically change the local areas,</li> <li>dramatically change the character of local areas,</li> <li>have a significant adverse effect on an already overloaded infrastructure, including roads, public transport, public open space, environment and emergency, health and support services.</li> </ul> <p>3. I object to the proposed replacement of low rise, terraced, semi detached, and detached properties with medium and high rise properties in the Addington, New Addington area, Addiscombe and East Croydon area.</p> <p>4. I object to the proposed increased building capacity and density in the Addington, New Addington area, Addiscombe and East Croydon area.</p>	No change	There are no proposals as described in the representation in the Local Plan.
3896/01/003/Non-specific/O	Mr M Veldeman	Object	<p>The plans made references to developments of between 20 to 119 houses, and that sort wide margin was used on almost all the sites mentioned! How on earth can the Council think it is acceptable to make such vague proposals with such a huge difference in the numbers involved. Was it thought that we would not notice? Most significantly, the use of the words "and/or" mean that the Council have actually offered us no information whatsoever. Whatever is put forward now, however vaguely, can be completely overruled because of the use of the words "and/or", making all the proposals meaningless.</p>	No change	The proposals in the draft Local Plan are quite specific but, as they are not a planning application, they include some flexibility over use (on certain sites) and number of homes (for sites with a residential use proposed) so as to provide certainty to a developer over the types of development that would be acceptable in that location.	
4095/01/002//O	Vaughan Pomeroy	Object	<p>I have a concern about the security of open spaces, where the change in designation appears to reduce the level of protection. However, there does seem to be an intention to increase the land under protection by taking into the total land bank areas that presently are not designated as open spaces. Particularly in the south of the Borough the open space is highly valued and a resource to be treasured. I am encouraged by some of the recent work carried out in local open spaces in improving the facilities but I can see no clear intention to upgrade and transform some of the less attractive open spaces for greater facility.</p>	No change	The comment is noted regarding upgrading areas	

4125/01/037/Non-specific/C	Councillor M Fisher	Comment	Soundness - Effective	A further policy should be added to enhance and mark the entrance into the borough along London Road in Norbury.	No change	The District Centre designation in combination with the physical gate of the railway line and historic character of the Local Heritage Area sufficiently marks entrance to the borough from the residential areas of the London Borough of Lambeth. Policy SP1 read in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework provide sufficient policy support for enhancement and distinctiveness of Places of Croydon, including Norbury.
1302/01/014/Table 11.3/S	Mr Graham Saunders <i>Historic England</i>	Support	Table 11.3	In general we support the approach taken by the Council and thoroughness illustrated in details provided in order to deliver intensification.	Welcome support	
2764/12/001/11.011/O	Mr Derek Ritson <i>Monks Orchard Residents Associa</i>	Object	11.011	This negates and undermines the NPPF and London Plan Policy on the presumption of not allowing Back Garden Development. What is the definition of "significant" change of an area's character? This policy at 11.11 d negates any presumption of NOT allowing Back Garden Development as it gives credence to change of character of an area as an evolutionary excuse and allows "Beds-in-sheds". The policy undermines all the statements to resist back garden developments and removes them from greenfield to brownfield sites against the NPPF and London Plan presumptions against garden land development. It allows developers to quote 'evolution' as a reason for allowing developments in back gardens as a part of an evolutionary change to an area. This could fundamentally change the character of any Croydon residential area. This policy could place Housing Blight on properties in the designated areas for years ahead up to 2036. The general proposition of this Croydon Council administration's policies to relax planning policies and to give a green light for developers to concrete over most of Croydon will be a negative epitaph for this Council's Administration. "They concreted over Croydon!". It seems that the Spatial Planning Team will not be satisfied until Croydon is completely concreted over with developments. Every little in-fill or back garden - nook and cranny is up for grabs!	No change	Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. Gradual renewal of housing stock is led by individual developers. Policy 31.1 in conjunction with Policy 7.4 of the London Plan and Paragraph 58 of the National Planning Policy Framework will guide design solutions.

1993/01/014/11.012/O	Graham & Kate Marsden	Object	11.012	Object most strongly where these proposals will fundamentally damage the nature of the designated area in Shirley. It is difficult to see how para 11.16 and 11.12 are compatible.	No change	Paragraphs 11.12 and 11.16 are not meant to be compatible as they are referring to different parts of the borough.
1993/01/015/11.016/O	Graham & Kate Marsden	Object	11.016	Object most strongly where these proposals will fundamentally damage the nature of the designated area in Shirley. It is difficult to see how para 11.16 and 11.12 are compatible.	No change	Paragraphs 11.12 and 11.16 are not meant to be compatible as they are referring to different parts of the borough.
2846/01/001/11.026/C	Alison and Kemal Hairettin	Comment	11.026	11.26 to 11.31 fails to address the area around East Croydon Station/off Cherry Orchard Road which lies in the intersection between Croydon Development Area and Addiscombe Area and is a stark transition zone from Office developments into Victorian and Edwardian low-rise terrace houses.	Change	Paragraph 11.26 was amended to read: "Addiscombe is a suburban residential settlement, framed by green areas on the eastern side and the high density Croydon Opportunity Area to the west. This Place is influenced by and evolved as an extension of the Croydon Metropolitan
2846/01/004/11.038/S	Alison and Kemal Hairettin	Support	11.038	11.32 to 11.39 Addiscombe District Centre: we support these proposals including proposals for maximum height of 5 stories on specific corner plots	Welcome support	
2846/01/005/11.041/S	Alison and Kemal Hairettin	Support	11.041	11.40, 11.41 Agree that current character has become fragmented and needs sensitive development	Welcome support	
2846/01/006/11.042/C	Alison and Kemal Hairettin	Comment	11.042	11.33 to 11.42: fails to address needs of Cherry Orchard Road/Lower Addiscombe road shopping parade, plus the transition zone of Cherry Orchard Road between the Croydon Opportunity Area and the streets of Oval Road, Cedar Road, Cross Road, Colson Road, Cedar Road and Addiscombe Road west from number 35	No change	The transition area is addressed in the Opportunity Area Planning Framework and is referred to as 'Edge Area'.
0203/03/049/11.060/C	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Comment	11.060	Leisure, Recreation and Sports: It is important there are good leisure and recreational facilities for all age ranges especially young people. Coulsdon is blessed with great open spaces such as Farthing Downs, Happy Valley, the Cane Hill site and two sections of the London Loop starting at Coulsdon South Station. There are adequate parks and open spaces with recreation facilities such as football pitches, pitch and putt, bowls, open air gym and children's playgrounds with swings and other equipment within walking distance. It also has a long established Harriers Running Club, Children's Gymnastic a Club and many other clubs operating in the area.	No change	The particular qualities of Coulsdon are documented in the Borough Character Appraisal which is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

0203/03/013/11.060/S	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Support	11.060	Public Realm 6.50 A well-designed, cared for and high quality public realm <sup>13</sup> plays an important role in reinforcing the perception of Croydon as a welcoming, safe and accessible place. Croydon's aspirations for its public realm are outlined in the Croydon Local Plan Strategic Policies SP4.6 to SP4.10.  We support and believe this applies equally to the outer district town centres.		Welcome support	
0203/03/001/11.070/C	Mr Charles King <i>East Coulsdon Residents' Associat</i>	Comment	11.070	Croydon town Centre should remain a strategic centre of employment, education, culture retail and local government for the whole of the borough and for those outside the borough who come to Croydon for work, education and entertainment.		No change	Place specific policies are designed to manage local character, the appearance of the area. Croydon's status as the Metropolitan Centre is recognised by the Policies SP3 of the Croydon Local Plan: Strategic Policies and Policy DM4 of the Croydon Local Plan: detailed Policies and Proposals.
2846/01/007/11.070/C	Alison and Kemal Hairettin	Comment	11.070	11.70 & 11.71: Also Fails to address issues around East Croydon Station and the transition zone into Addiscombe Area : Oval Road, Cherry Orchard Road, Cedar Road Cross Road, Colson Road and Addiscombe Road west from number 35		No change	The transition area is addressed in the Opportunity Area Planning Framework and is referred to as 'Edge Area'.
2846/01/008/11.078/C	Alison and Kemal Hairettin	Comment	11.078	2.DM36.1, DM36.2 DM36. Fails to develop a policy on Residential Skyscrapers. Current Tall Building policy of appropriate for edge of Croydon Opportunity Sites. Maximum height should be set for Cherry Orchard Road and Addiscombe Road. Current Maximum height should be based on Number One Croydon (NLA Tower). Also in order to reflect that it borders a low rise residential areas of Cross Road/Colson Road/Oval Road/Cedar Road/Cherry Orchard Road./Addiscombe Road.	We Propose that only the central area of Croydon Opportunity Area is allowed tall Office Buildings and no tall buildings over 25 floors on Cherry Orchard Road due to proximity to low rise residential building and no building on South Side of Addiscombe Road at 30-38 higher than 5 floors due to proximity and relative position ( to the south) to low rise residential housing.	No change	The transition area is addressed in the Opportunity Area Planning Framework and is referred to as 'Edge Area'.
2846/01/009/11.079/O	Alison and Kemal Hairettin	Object	11.079	11.78 to 11.85: fails to specifically address the East Croydon area as a distinct area in its own right. We disagree in particular that the area lying to the west side of East Croydon Station Cherry Orchard Road, Addiscombe Grove, Addiscombe Road and Colson Road can be "successfully managed by General policies" (11.79) unlike London Road and Sydenham Road and Lansdowne Road areas. This area is also unique given the proximity to low rise traditional housing.		No change	The transition area is addressed in the Opportunity Area Planning Framework and is referred to as 'Edge Area'.

2846/01/010/11.085/C	Alison and Kemal Hairettin	Comment		11.085	11.78 to 11.85: fails to address Network Rail proposals for a new East Croydon Station north of current site. Need to protect new entrances into Lansdowne Road and Cherry Orchard Road/Cross Road. Also fails to designate land owned by Menta Ltd as the new access route into the new pedestrian bridge from Cherry Orchard Road		No change	The planning guidance for the area around East Croydon Station can be found in the East Croydon Masterplan, an adopted Interim Planning Guidance, included in policy DM36.1.
1610/01/009/11.104/O	Mr Sean Creighton <i>Norbury Residents Association Joi</i>	Object	Soundness - Justified	11.104	<p>There is a need for the officers to consult other Residents Associations, groups in the Local History Forum and the members of the Area Conservation Committees as to whether amendments need to be made to ensure more accurate descriptions.</p> <p>The summary of the general character of Norbury in paras 11.104-11.110 is only a partial description. It does not:</p> <ul style="list-style-type: none"> <li>- highlight the existence of the Norbury Park and the Norbury Hall Park as important open spaces;</li> <li>- understand the special character and heritage of the whole of the Pollards Hill area;</li> <li>- mention the importance of Norbury Brook which flows through the area;</li> <li>- discuss the incidence of employment buildings among the largely residential nature of the area around London Rd.</li> </ul> <p>Further it does not accurately reflect aspects of the history of the area, which are now better understood as a result of the work of David Clark, the local historian and long-term resident on Norbury, who successful negotiated with Network Rail for aspects of Norbury history to be on display at the Railway Station, who maintains the planted areas in front of the Station by the London Rd pedestrian lights, and re-stocks the Cancer Research bookcases at the railway station which have raised several thousand pounds from passengers. The proposed amendments below reflect David's research.</p> <p>The JPC is concerned at the failure of the Local Plan to recognise the special character and heritage of the whole of the Pollards Hill area. The current planning application for 18 Pollards Hill West is a classic example of how new residential development can adversely change the character, as well as potentially aggravating existing problems of flooding affecting other properties.</p>	Add at end of para 11.104:  'It has been going through a process of change involving an increase in the number of new homes through conversions of large houses, new build, conversion of offices to residential, and backland development increasing the population density and the demand on local services. It has only a few important community facilities left including the Harlow Hall and Norbury Library, but has recently Semley Dance Hall and the Police Station. It has also been losing employment with the departure of office tenants from Astral and Windsor Houses and their conversion into flats. There is growing use by Norbury Station by commuters creating stresses for residents with respect to car parking and increased number of passengers using the Railway Station and buses.'	No change	Paragraph 11.104 specifically refers to the character of the Place. The proposed text will be added in the Norbury chapter of the Borough Character

1610/01/010/11.105/O Mr Sean Creighton  
Norbury Residents Association Joi

Object Soundness - 11.105  
Justified

There is a need for the officers to consult other Residents Associations, groups in the Local History Forum and the members of the Area Conservation Committees as to whether amendments need to be made to ensure more accurate descriptions.

The summary of the general character of Norbury in paras 11.104-11.110 is only a partial description. It does not:

- highlight the existence of the Norbury Park and the Norbury Hall Park as important open spaces;
- understand the special character and heritage of the whole of the Pollards Hill area;
- mention the importance of Norbury Brook which flows through the area;
- discuss the incidence of employment buildings among the largely residential nature of the area around London Rd.

Further it does not accurately reflect aspects of the history of the area, which are now better understood as a result of the work of David Clark, the local historian and long-term resident on Norbury, who successfully negotiated with Network Rail for aspects of Norbury history to be on display at the Railway Station, who maintains the planted areas in front of the Station by the London Rd pedestrian lights, and re-stocks the Cancer Research bookcases at the railway station which have raised several thousand pounds from passengers. The proposed amendments below reflect David's research.

The JPC is concerned at the failure of the Local Plan to recognise the special character and heritage of the whole of the Pollards Hill area. The current planning application for 18 Pollards Hill West is a classic example of how new residential development can adversely change the character, as well as potentially aggravating existing problems of flooding affecting other properties.

Add: '11.105A Norbury has important open spaces: Norbury Park through which Norbury Brook flows, Norbury Hall Park and Pollards Hill Park and the former allotments area next to it, Norbury Manor Primary School field. Just over the border in Merton is the former National Westminster Bank playing fields.'

Change

Paragraph 11.105 is changed to read: 'Norbury has a residential character that predominantly consists of 'Terraced Houses and Cottages', 'Large Houses on Relatively Small Plots' and 'Local Authority Housing with Public Realm', enriched by green spaces of Norbury Park through which Norbury Brook flows, Norbury Hall Park and Pollards Hill Park.'

1610/01/011/11.106/O Mr Sean Creighton  
Norbury Residents Association Joi

Object Soundness - 11.106  
Justified

There is a need for the officers to consult other Residents Associations, groups in the Local History Forum and the members of the Area Conservation Committees as to whether amendments need to be made to ensure more accurate descriptions.

The summary of the general character of Norbury in paras 11.104-11.110 is only a partial description. It does not:

- highlight the existence of the Norbury Park and the Norbury Hall Park as important open spaces;
- understand the special character and heritage of the whole of the Pollards Hill area;
- mention the importance of Norbury Brook which flows through the area;
- discuss the incidence of employment buildings among the largely residential nature of the area around London Rd.

Further it does not accurately reflect aspects of the history of the area, which are now better understood as a result of the work of David Clark, the local historian and long-term resident on Norbury, who successful negotiated with Network Rail for aspects of Norbury history to be on display at the Railway Station, who maintains the planted areas in front of the Station by the London Rd pedestrian lights, and re-stocks the Cancer Research bookcases at the railway station which have raised several thousand pounds from passengers. The proposed amendments below reflect David's research.

The JPC is concerned at the failure of the Local Plan to recognise the special character and heritage of the whole of the Pollards Hill area. The current planning application for 18 Pollards Hill West is a classic example of how new residential development can adversely change the character, as well as potentially aggravating existing problems of flooding affecting other properties.

The summary of the general character of Norbury in paras 11.104-11.110 is only a partial description. It does not:

- highlight the existence of the Norbury Park and the Norbury Hall Park as important open spaces;
- understand the special character and heritage of the whole of the Pollards Hill area;
- mention the importance of Norbury Brook which flows through the area;
- discuss the incidence of employment buildings among the largely residential nature of the area around London Rd.

Change

Paragraph 11.105 is changed to read: 'Norbury has a residential character that predominantly consists of 'Terraced Houses and Cottages', 'Large Houses on Relatively Small Plots' and 'Local Authority Housing with Public Realm', enriched by green spaces of Norbury Park through which Norbury Brook flows, Norbury Hall Park and Pollards Hill Park.' Other points will be considered during the review of Borough Character Appraisal.

1610/01/012/11.107/O	Mr Sean Creighton Norbury Residents Association Joi	Object	Soundness - 11.107 Justified	<p>There is a need for the officers to consult other Residents Associations, groups in the Local History Forum and the members of the Area Conservation Committees as to whether amendments need to be made to ensure more accurate descriptions.</p> <p>The summary of the general character of Norbury in paras 11.104-11.110 is only a partial description. It does not:</p> <ul style="list-style-type: none"> <li>- highlight the existence of the Norbury Park and the Norbury Hall Park as important open spaces;</li> <li>- understand the special character and heritage of the whole of the Pollards Hill area;</li> <li>- mention the importance of Norbury Brook which flows through the area;</li> <li>- discuss the incidence of employment buildings among the largely residential nature of the area around London Rd.</li> </ul> <p>Further it does not accurately reflect aspects of the history of the area, which are now better understood as a result of the work of David Clark, the local historian and long-term resident on Norbury, who successful negotiated with Network Rail for aspects of Norbury history to be on display at the Railway Station, who maintains the planted areas in front of the Station by the London Rd pedestrian lights, and re-stocks the Cancer Research bookcases at the railway station which have raised several thousand pounds from passengers. 1610/01/015/11.110/O Mr Sean Creighton  
Norbury Residents Association Joi

Object Soundness - 11.110  
Justified

There is a need for the officers to consult other Residents Associations, groups in the Local History Forum and the members of the Area Conservation Committees as to whether amendments need to be made to ensure more accurate descriptions.

The summary of the general character of Norbury in paras 11.104-11.110 is only a partial description. It does not:

- highlight the existence of the Norbury Park and the Norbury Hall Park as important open spaces;
- understand the special character and heritage of the whole of the Pollards Hill area;
- mention the importance of Norbury Brook which flows through the area;
- discuss the incidence of employment buildings among the largely residential nature of the area around London Rd.

Further it does not accurately reflect aspects of the history of the area, which are now better understood as a result of the work of David Clark, the local historian and long-term resident on Norbury, who successfully negotiated with Network Rail for aspects of Norbury history to be on display at the Railway Station, who maintains the planted areas in front of the Station by the London Rd pedestrian lights, and re-stocks the Cancer Research bookcases at the railway station which have raised several thousand pounds from passengers. The proposed amendments below reflect David's research.

The JPC is concerned at the failure of the Local Plan to recognise the special character and heritage of the whole of the Pollards Hill area. The current planning application for 18 Pollards Hill West is a classic example of how new residential development can adversely change the character, as well as potentially aggravating existing problems of flooding affecting other properties.

In the UDP the Norbury Hall parkland was classified as a 'Site of Nature Conservation Importance.' The 'Review of Sites of Importance for Nature Conservation' for the Council by Thomson Ecology (September 2013) clearly indicates that Norbury Park and Norbury Brook, Norbury Hall and Pollards Hill are Local Sites of Nature Conservation Importance. This is designation is hidden within Detailed Policies and Proposals Appendix 7.

Para 11.110 to read

'11.110 The Pollards Hill South Local Heritage Area consists of terraced, semi detached and detached character Houses has a character of 'Planned Estates of Semi-Detached Houses' built between 1900 and 1922. It provides a green oasis in the uniformly laid out Northern Suburb, one that is enjoyed by residents and many visitors in pursuit of leisure. This distinctive grouping represents a unique example of individual Arts and Crafts terraces laid out to appear as large U-shaped buildings with a number of distinctive architectural features. The well preserved and distinctive 1930's townscape is an example of an innovative approach to defining street frontages through sequence of courtyards.'

Add 'Para 11.110A The wider area of Pollards Hill has its own special character which is being comprised by new housing developments.'

Add Para 11.110B. Norbury has several important Local Green Spaces: Biggin Wood, Green Lane Sports Group, Norbury Hall, Norbury Park, Northwood Rd Recreation Group and Pollards Hill. Among their other functions Biggin Wood, Norbury Hall and Norbury Park are described as sites of nature conservation importance, while Norbury Hall and Pollards Hill are described as 'historic park and garden'.

Add Para 11.110C. Norbury Hall is re-named as Norbury Hall Park

Change

The paragraph was amended to read: 'The Pollards Hill South Local Heritage Area consists of terraced houses which complement the predominant character of the area has a character of 'Planned Estates of Semi-Detached Houses' in a particularly creative way. This distinctive grouping represents a unique example of individual Arts and Crafts terraces laid out to appear as large U-shaped buildings with a number of distinctive architectural features. The well preserved and distinctive 1930's townscape is an example of an innovative approach to defining street frontages through sequence of courtyards.'

Proposed Green Spaces. It should be explicit in the more public Detailed Policies and Proposals section describing the character of Norbury.

There is confusion about the relationship between what residents call Norbury Hall Park and the Norbury Hall Care Home land. Recent signs omit the word park and just state Norbury Hall. This is confusing to visitors to Norbury Hall Care Home who now mistakenly turn into the entrance to the park, and confusing to visitors to the Park who can turn into the entrance of the Care Home.

DM31 (Table 11.2)

Area between Kenley station and Godstone Road (subject to development being safe from flooding for the lifetime of the Plan)

In Policy DM31.4 (p126) some parts of Kenley, Sanderstead and South Croydon are earmarked for intensification which is a euphemism for more building. This will change the character of those areas and should be opposed.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include schools, the pumping station and homes on smaller plots of land. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

DM31 (Table 11.2)

Area between Kenley station and Godstone Road (subject to development being safe from flooding for the lifetime of the Plan)

The text describes how DM 31.4 is applied to the area within Kenley as: "Area between Kenley Station and Godstone Road"  
A graphical representation is also provided that is intended to define the outer limits of the DM31.4 zone for "focused intensification" as shown below.  
KENDRA fails understand how the graphical and textual definition of how DM31.4 are consistent?  
By reference to the available maps we can ascertain that the graphical representation (above) includes the following within zone for "focused intensification":-  
 Approx. half of Church Road  
 Parts of Foxley Road  
 Houses up Hayes Lane as far as #2 Abbots Lane.  
 A large part of Hermitage Road  
 A large part of Kenley Lane  
 All of Oaks Way  
 All of Oaklands  
 Nearly all of Park Road  
 All of Raveneswold  
 All of Roke Road  
 A Large parts of Valley Road,  
 A large part of Welcomes Road  
It is observed that NONE of the roads identified above can reasonably be described as being within the "Area between Kenley Station and Godstone Road"

Given the poor definition of the area for the DM31.4 "focused intensification" within Kenley we asked that Kenley is removed from this policy.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include schools, the pumping station and homes on smaller plots of land. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

DM31 (Table 11.2)

Area between Kenley station and Godstone Road (subject to development being safe from flooding for the lifetime of the Plan)

Policy DM31.4: Positive Character of the Places of Croydon, should be amended so that it does not include the hinterland of many of the areas selected. This policy sets out locations where the Council will support intensification associated with gradual change of the area's local character. This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 - 167 include large areas of hinterland that would not be appropriate for such intensification.

The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries: Kenley and Old Coulsdon, page 163, Godstone Road, Hayes Lane upto Kenley Lane and Station Road

DM31 (Table 11.2)

Area between Kenley station and Godstone Road (subject to development being safe from flooding for the lifetime of the Plan)

We have lived in Sanderstead for over 40 years, and have thoroughly enjoyed the areas to the south of Croydon being unspoilt. In our view these ill conceived proposals will change this area beyond recognition and take away that for which it is well known and valued. Please rethink, and do not continue with the proposed policies set out below and which can be found in your Local Plan:  
The loss of Local Area of Special Character protection for many roads such as West Hill, Campden and Spencer Roads, the Woodcote Estate and Hartley Farm will open these roads up to inappropriate development. Roads such as Oakwood Avenue in Purley should also be included as new Local Heritage Areas. In Policy DM31.4 (p126) some parts of Kenley, Sanderstead and South Croydon are earmarked for "intensification" – which is a euphemism for more building. This will change the character of those areas beyond all recognition and I am strongly opposed to any of it.

This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 - 167 include large areas of hinterland that would not be appropriate for such intensification. The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries:  
Kenley and Old Coulsdon, page 163, Godstone Road, Hayes Lane upto Kenley Lane and Station Road;

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include schools, the pumping station and homes on smaller plots of land. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Area between Kenley station and Godstone Road (subject to development being safe from flooding for the lifetime of the Plan)

We are life long residents of Croydon. With reference to the local plan we would like to object to the following proposals:  
•DM40.1 - A skyscraper in Purley is total out of character for the town. Purley needs development but this is not the way to go about it.  
•DM40.4 - Purley Pool - whilst not objecting to this area being redeveloped it should include a swimming pool. Our children learnt to swim here and it is an important facility to the community. For instance our Farther uses it regularly. It has been vital to maintaining his health and he would not be able to travel to more distant pools.  
•DM44.2 - It is not appropriate to have a travellers site on green belt land. We believe it is important to protect all Green Belt land from development  
•DM31.4 - We are opposed to the intensification of these areas.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include schools, the pumping station and homes on smaller plots of land. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

The intensification is on the border of Addiscombe and Shirley Place and it seems to have been chosen with no underlying evidence as to why. There are no detailed plans in the presented consultation documents. The traffic along Shirley Rd and Wickham Rd is at the standstill in rush hour. Access to Cental Croydon is by car or by bus. This area has a distinct character, is predominantly residential with semi detached and detached homes. The policy would lead to piece meal development-which has always lead to the area becoming run down as residents loose motivation to keep up with maintenance of their homes in the uncertainty of what will happen next door when the property comes up for sale.

The area should not be identified as being suitable for intensification. Change

Area of the Shirley Road Shopping Parade					

Area of the Shirley  
Road Shopping  
Parade

We are happy for the Council to replace under-used garages with much-needed homes, but we are objecting to building on precious open space. Finally, the draft Local Plan identifies two other areas of Shirley as locations where the Council wants to see "focussed intensification associated with gradual change of area's local character" under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals). It goes on to describe what this means:

"New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. The promoted character types are: 'Medium-rise blocks with associated grounds', 'Large buildings with spacing' and 'Large buildings with strong frontages'. Their gradual introduction will alter over time the predominant character of intensified areas" (page 132, Croydon Local Plan Detailed Policies & Proposals).

The two areas are the Shirley Road Shopping Parade and the Shirley local centre (the area around Shirley Library) (page 166, Croydon Local Plan Detailed Policies & Proposals). The idea that the largely semi-detached buildings in these residential roads should be replaced by medium-rise blocks is unacceptable - it would completely change the character of Shirley and we are objecting to it.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The local draft Plan identifies two other areas of Shirley as locations where the Council wants to see "focussed intensification associated with gradual change of area's local character".

The two areas around Shirley Road Shopping Parade and the Shirley Library which have been targeted are roads of semi-detached houses where families have lived for years. It is completely unacceptable that family houses should be replaced by medium-rise blocks of flats. The character of the area would change completely and would mean neighbours in conflict with each other.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. Area of the Shirley  
Road Shopping  
Parade

1 Proposed Policy DM31 Policy DM31.4: Positive Character of the Places of Croydon  
Policy DM31.4 sets out locations where the Council will support intensification associated with gradual change of the area's local character. As this is a new designation it will need to be shown on the Policies Map. Details of each designation are:  
- Area of the Shirley Road Shopping Parade - Shirley  
- Setting of the Shirley Local Centre - Shirley

I object to the relaxation of the planning regulations to allow the building of significantly larger structures in close proximity to the existing housing stock, comprising mainly bungalows and two storey semi-detached houses in residential roads in the area described as Shirley Local Centre, i.e. around the Shirley Library and the area around the Shirley Road/Shirley Shopping Parade including the Green Triangle and the Trinity School educational open space. The promoted character types of Medium rise blocks with associated grounds; large buildings with spacing; and Large buildings with strong frontages; in this location would look out of character and is unacceptable. These types of developments in the wrong locations would adversely affect the character of Shirley both now and for future generations.

1. In the case of the Shirley Road/Shirley park parade shops, the area behind the shopping parade is a site of Nature Conservation Importance (locally called the Green Triangle) which should be preserved for future generations and the area of Educational Open Space for future Trinity School children.
2. If High density residential accommodation were provided there would be insufficient area for communal open space allocation.
3. The local side road network and width could not cope with high residential density proposals and the likely car ownership and on street parking.
4. If these proposals were to become the Croydon Plan adopted policy, it would place Planning blight on all properties as defined in DM31.4 until the year 2036.

I object to the development plans for the Shirley (Wickham Road) Shopping Parade and the intensification of Wickham Avenue

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. DM31 (Table 11.2)  
  
Area of the Shirley  
Road Shopping  
Parade

The idea that the largely semi-detached buildings in these residential roads should be replaced by medium-rise blocks is unacceptable - it would completely change the character of Shirley and I will be objecting to it very strongly.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The areas in Shirley should not be zones for intensification as this type of development would be totally out of keeping with the character of the area.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Object to focussed intensification associated with gradual change of area's local character under policy DM31.4 of the Shirley Road Shopping Parade and especially Shirley local Centre. Shirley local centre area in particular houses a large proportion of elderly residents, including two sheltered housing complexes, and those living there are doing so for the convenience of transport, shops, doctors, library etc. If you take their property where do they all go? Not everyone will find another property with such convenience on their doorstep.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The intensification is on the border of Addiscombe and Shirley Place and it seems to have been chosen with no underlying evidence as to why. There are no detailed plans in the presented consultation documents. The traffic along Shirley Rd and Wickham Rd is at the standstill in rush hour. Access to Cental Croydon is by car or by bus. This area has a distinct character, is predominantly residential with semi detached and detached homes. The policy would lead to piece meal development-which has always lead to the area becoming run down as residents loose motivation to keep up with maintenance of their homes in the uncertainty of what will happen next door when the property comes up for sale.

The area should not be identified as being suitable for intensification. Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Objections to the proposed Intensification of Shirley Local Centre and Shirley Shopping Parade as outlined in table 11.2 on page 129 of Croydon Local Plan Detailed Proposals and Policies and extensive development in other areas of Shirley that are affected by road congestion and poor PTAL scores.

Lack of Communication re Consultation

Many residents in the Shirley area only learnt about Croydon Council's proposed local plan first through an email sent out by Gavin Barwell, MP and secondly through documents he delivered to each property..

There were no notices put up on lamp posts, in the library or on public noticeboards in Shirley's main shopping parade or any prominent place in the Shirley Local Centre.

The consultation period commenced on 5 November but the three large books containing the Croydon Plan and associated consultation documents were only delivered to Shirley Library on 11 December – after the consultation meeting had taken place and one week before the closing date of 18 December.

The Consultation meeting that covered the Shirley area was not held in Shirley (even though there are many suitable venues there – particularly Shirley Library or the Parish Hall) but miles away in Selsdon so that fewer people could attend.

For this reason Croydon Council, with regard to the transparency it claims for itself, should extend the closing date so that all residents can have a say and that this time the plans and proposals be widely advertised.

Shirley Road Area

I am writing to object to the proposals to intensify development in many roads around this centre for the following reasons:

- Poor transport accessibility
- The Shirley character assessment notes that Shirley has some of the poorest public transport links in the borough. There is no railway or tram station in the built up area. The nearest railway station is 1½ miles away.

The bulk of the proposed intensification area has a PTAL score of only 2, some parts as low as 1a.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The A232 Wickham Road leads into the A215 at the Methodist Church, this has been identified as one of the most congested roads in Europe (Source: Daily Telegraph )

The council already knows there are existing traffic problems in Shirley even before any houses are built - see page 253 of transport strategy document which notes high car dependency due to poor public transport and peak time congestion. <https://www.croydon.gov.uk/sites/default/files/articles/downloads/localcentres.pdf>

There is no evidence (beyond a mere pious hope in section 7.76 that people will use public transport more) that the council has considered the effect of the intensification of development on local transport networks. This is contrary to London Plan policy 6.3 which states assessments must be undertaken, and in particular the cumulative effects of development considered. Paragraph D of the policy contains the presumption that development should be directed to areas with good transport links. See London Plan paragraph 6.15 "In practical terms, this means ensuring that new developments that will give rise to significant numbers of new trips should be located either where there is already good public transport accessibility with capacity adequate to support the additional demand or where there is a realistic prospect of additional accessibility or capacity being provided in time to meet the new demand."

- Increased car usage

The effect of the poorer transport links can be seen in increased car ownership in Shirley ward.

Table – Car ownership in Shirley and Croydon Borough (Source 2011 census)

Shirley Croydon	
All Households	5586.145010

4 or More Cars or Vans in Household	1632.92%18971.31%
All Cars or Vans in Area	6981.140049

This is further reflected in modes of travel to work. Only about 10% of

people who don't work at home work in Central Croydon, the rest have to work further afield.

54% of all journeys to work from Shirley are by motor. Even in the narrow corridor along the A232 there are as many car journeys as bus/tram. Outside of there it is no contest. Even in the remainder of Croydon itself, three times as many journeys are made by car as by tram/bus/train. 70% of journeys to work to the second placed borough of Bromley are by car.

This table shows the 20 most popular locations in 2011 for Shirley residents to work and the mode of travel to work.

All journeys to work	864	21%	54%	21%	6%

Note: these are journeys to work from the 3 Middle Layer Super Output areas which make up most of Shirley (Croydon 18, 25, 26). Central Croydon is defined as MSOA Croydon 20, 24, 27. Source: Nomis based on 2011 census.

- Sustainability

National Planning Policy Framework (page 6) has a presumption against development in locations that are non-sustainable, which includes where environmental damage such as increasing greenhouse gases would result ("actively manage patterns of growth to make the fullest possible

use of public transport, walking and cycling, and focus significant development in locations which are or can be made sustainable"). The poor transport links in Shirley is reflected in a significantly higher level of car ownership than the borough as a whole.

Individual applicants have to carry out transport assessments, why has the council not done the same for the areas they propose to designate as suitable for development?

- Council has underestimated the amount of empty houses coming forward

We note that the council assume only 190 empty houses will be reoccupied during the period 2016-36. However this appears to be at variance London Strategic Housing Land Availability Assessment (2009). In that Croydon stated that in the period 2011-2021 they would return 91 long term vacant properties per year to housing, plus a further 20 per annum for non-self contained units. This means that you have already stated that the borough will gain 555 homes this way in the period 2016-21, why then is a figure of 190 given for empty homes only for the whole period 2016-36? Omitting non-self contained units conflicts with the GLA SHLAA 2009.

The 2011 census Croydon had 3,814 empty properties, and as well as that there were over 1,500 commercial sites in 2010 that were vacant, many would have flats over shops, or would be capable of conversion to residential.

- Effect on local character  
Sections 11.140 and 11.141 of the Detailed Policies document emphasises the pleasing uniformity of Shirley with its predominately 1930s housing in planned estates. New buildings have tended to be designed to fit into the existing streetscape.

You have stated in your report to Cabinet that development should only complement and enhance character.

This conflicts with your reasons given in paragraph 3.46 of the Report to Cabinet of 21 September 2015 (select 7.2 Main Report then find pages 15-16). Then this is used to argue Shirley has no dominant character and can therefore be the host for more intensive development. This is clearly not the case with one exception the shopping centre is consonant with the surrounding architecture, that of 1930s suburbia, creating a homogeneous whole.

In no sense can intensified development with dense house building up to 4 stories high in suburban side roads be in keeping with the inter-war single and two storey houses with gardens.

- Inability of development to occur

We have ordered a number of registers for properties in the proposed expanded Shirley Centre and it appears that large swathes are incapable of intensified development because they contain restrictive covenants which limit the number of houses to 1 per plot.

We note you have rejected a number of proposed development sites because of the unlikelihood that they can be developed (e.g. A181 - 45 to 81 Church Street, A469 - 234 The Glades, A476 - 1 to 19 Craven Road and many others). We would particularly refer you to A354 (118-148 Tennison Road) which was rejected as a site because of replacing the existing function. This is precisely the situation here.

- Detrimental effect on residents of merging two smaller properties re intensification

On page 132, Croydon Local Plan Detailed Policies and Proposals, it is explained that intensification involving building of medium rise blocks of flats (up to 4 storeys) could be achieved by merging smaller properties.

As noted on page 84 of Croydon Local Plan Policies and Proposals appendix 4, there is "a higher than average proportion of older people" living in Shirley. And some of these may be quite vulnerable.

If a developer succeeds in buying up a semi-detached property, which could potentially be used for building flats on, what pressures could be brought to bear on an elderly owner of the adjoining semi if he or she refuses to sell? What sort of tenant could the developer obtain that might change the mind of the elderly owner? This policy has the potential to result in harassment and substantial distress. It is troubling that the Council could propose such

Further objections to the proposed Intensification of Shirley Local Centre and as outlined in table 11.2 on page 129 of Croydon Local Plan Detailed Proposals and Policies (marked DM43.1)

Shirley Local Centre has a very distinctive character. Almost all the properties were built in the late 1920s or early 1930s and attractively designed. They are also very well maintained by their owners. Many of the residents are active older people who take an interest in the area (and the younger ones do too). They keep the area clean and tidy, volunteer to help out with green spaces such as Miller's Pond, help out with the Spring Park Residents Association, organise the local Neighbourhood Watch etc. The SPRA also publishes a magazine called SPAN (Spring Park Activities News) which provides details of all the events going on in Shirley (and there are pages and pages of them). There are loads of things to do and these are organised and attended by the villagers. There a substantial number of churches in Shirley and they are very well attended. A recent Victorian Carol Concert in the Methodist Church was sold out.

When I came to live in Shirley two years ago, I was invited for coffee or drinks to my neighbours' houses and one neighbour even came and mowed my lawn for me. The welcome was amazing.

There is nothing wrong with the character of this neighbourhood nor does it lack distinctiveness. And this character would be spoilt if our houses were demolished and replaced by anonymous blocks of flats and the sense of community would be lost. And then instead of being able to support each other, residents would be calling on the Council for help instead. And the churches too would suffer if you tried to tinker with the population make-up and the loss of them would also increase the burden on the Council.

You have marked Shirley Library and Hartland Way Surgery as suitable for redevelopment. There has been overwhelming community support for keeping the library open – not only is it a magnificent building but it also plays a huge part in our community. I have already sent you the Land Registry title register for Shirley Library - you can read the agreement between the owner and the Corporation – if a library or public building isn't built there, the land

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

reverts back to only permitting the building of a single dwelling-house. The only option for the Hartland Way Surgery building is either as a private house or as the professional residence of a solicitor, architect, medical practitioner or dentist. That is how it is a doctor's surgery. With the number of older people in the area and an increasingly aging population, there is no way we could do without the surgery. It would be a community disaster if you went ahead with these proposals.

I am writing regarding the Council's plans for a massive redevelopment in the Shirley Area. More houses mean more traffic on our already crowded roads. I no longer go into Croydon because of the journey times. How long would it be before the Council considered bringing in a congestion charge. When you build all these properties do you consider the local amenities and the effect that more people would have on these. Where are the school places for all of these children? Regarding doctors. Unless it is an emergency I have to wait at least a week for an appointment. This waiting time can only increase if there are more patients. Is it the Council's policy to build over green belt land to the detriment of locals? I sincerely hope not. I think you need to seriously reconsider these plans.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. Area of the Shirley  
Road Shopping  
Parade

The response supports the inclusion of the proposed intensification site known as "Area of the Shirley Road Shopping Parade" and confirms that 0.53ha of land, which is underutilised and owned by the respondent - is both deliverable and developable for intensification purposes. The site is deliverable in that our client represents a willing landowner and the site is available for redevelopment now. There is more than a realistic prospect that development will be delivered on the site within five years.

the draft Local Plan identifies two other areas of Shirley as locations where the Council wants to see "focussed intensification associated with gradual change of area's local character" under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals).

The two areas are the Shirley Road Shopping Parade and the Shirley local centre (the area around Shirley Library). The former is quite tightly drawn and I therefore don't object to it, but the latter includes not just the Wickham Road itself but Ridgemount Avenue, Wickham Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Bennetts Way and Devonshire Way (page 166, Croydon Local Plan Detailed Policies & Proposals). The idea that the largely semi-detached buildings in these residential roads should be replaced by medium-rise blocks is unacceptable - it would completely change the character of Shirley and I will be objecting to it very strongly.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. Area of the Shirley  
Road Shopping  
Parade

Policy DM31.4 sets out locations where the Council will support intensification associated with gradual change of the area's local character. As this is a new designation it will need to be shown on the Policies Map. Details of each designation are shown below.

Place-specific development management policy Place Setting of the Shirley Local Centre Shirley Area of the Shirley Road Shopping Parade Shirley

I object to the relaxation of the planning regulations to allow the building of significantly larger structures in close proximity to the existing housing stock, comprising mainly bungalows and two storey semi-detached and detached houses in residential roads in the area described as Shirley Local Centre, i.e. around the Shirley Library, West Way Gardens, Hartland Way, Wickham Rd. Devonshire Way. West Way, Verdayne Ave. Ridgemount Ave. Wickham Ave. and the area around the Shirley Road/Shirley Shopping Parade including the Green Triangle and the Trinity School educational open space. The promoted character types of Medium rise blocks with associated grounds; large buildings with spacing; and Large buildings with strong frontages; at these locations would look out of character and is unacceptable. These types of developments in the wrong locations would adversely affect the character of Shirley both now and for future generations. In the case of the Shirley Road/Shirley park parade shops, the area behind the shopping parade is a site of Nature Conservation Importance (locally called the Green Triangle) which should be preserved for future generations and the area of Educational Open Space for future Trinity School children. If High density residential accommodation were provided there would be insufficient area for communal open space allocation. The local side road network and width could not cope with high residential density proposal and the likely car ownership and on street parking. If these proposals were to become the Croydon Plan adopted policy, it would place Planning blight on all properties as defined in DM31.4 until the year 2036.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Object

DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

Shirley Road Shopping Parade is surely worthy of protecting rather than replacing with medium-rise blocks? Replacing the largely semi-detached buildings in these residential roads with medium-rise blocks would completely change the character of Shirley.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Area of the Shirley  
Road Shopping  
Parade

Policy DM31.4 sets out locations where the Council will support intensification associated with gradual change of the area's local character. As this is a new designation it will need to be shown on the Policies Map. Details of each designation are shown below.

Place-specific development management policy Place Setting of the Shirley Local Centre Shirley Area of the Shirley Road Shopping Parade Shirley

I object to the relaxation of the planning regulations to allow the building of significantly larger structures in close proximity to the existing housing stock, comprising mainly bungalows and two storey semi-detached and detached houses in residential roads in the area described as Shirley Local Centre, i.e. around the Shirley Library, West Way Gardens, Hartland Way, Wickham Rd. Devonshire Way. West Way, Verdayne Ave. Ridgemount Ave. Wickham Ave. and the area around the Shirley Road/Shirley Shopping Parade including the Green Triangle and the Trinity School educational open space. The promoted character types of Medium rise blocks with associated grounds; large buildings with spacing; and Large buildings with strong frontages; at these locations would look out of character and is unacceptable. These types of developments in the wrong locations would adversely affect the character of Shirley both now and for future generations. In the case of the Shirley Road/Shirley park parade shops, the area behind the shopping parade is a site of Nature Conservation Importance (locally called the Green Triangle) which should be preserved for future generations and the area of Educational Open Space for future Trinity School children. If High density residential accommodation were provided there would be insufficient area for communal open space allocation. The local side road network and width could not cope with high residential density proposal and the likely car ownership and on street parking. If these proposals were to become the Croydon Plan adopted policy, it would place Planning blight on all properties as defined in DM31.4 until the year 2036.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. 			<p>I would like to register my objection to the proposals and also to request that the consultation period is extended to allow residents and other interested parties the time to fully research the likely impact of the proposals. There appears to have been very little action on behalf of the council to ensure that those affected by these proposed plans were made aware of them, thus denying them of the opportunity of airing their opinion. It is a pity that the council felt itself unable to be transparent over this matter, perhaps anticipating how unpopular and ill advised the proposal is.</p> <p>I object most strongly to the council planning to change the current face of The area around and including Shirley library. My understanding is that development should only complement and enhance character in an area and this cannot be achieved by building multi occupancy buildings in and around this site. Contrary to statement, it is a characterful, and typical face of 20's and 30s builds and it is this that gives it's welcome open feel. As such, residents have a strong sense of community, care for the area and this in turn contributes to a positive sense of well being and belonging. This destabilising of an area by the proposals should not be underestimated in terms of drain on council services for policing, maintenance, cleansing if this were destroyed by intensified housing.</p> <p>The amenities are a further positive of this part of Shirley, the library and Surgery being two most important parts of the whole and loss of these would impact strongly on the community.</p> <p>In addition, public transport in the locality is inadequate, schools and doctors surgeries oversubscribed, and any remedy would result in even greater loss of land and character.</p> <p>The council should be looking at derelict area and under used sites and areas where conditions for existing residents could be improved, rather than destroying well balanced</p>		

communities.

DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

I am writing to object to Focussed intensification associated with gradual change of the areas local character under policy DM31.4 of the Shirley Shopping Parade and Shirley local centre

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I object to the focussed intensification associated with gradual change of area's local character under Policy DM31.4 of the Shirley Road Shopping Parade and Shirley local centre. Replacing the existing shopping parade and the surrounding semidetached housing with medium-rise blocks would completely change the character of the Shirley area. The traffic congestion on Wickham Road, once limited to rush hour and school times is now so bad that even mid morning traffic tails back from Shirley Library to the roundabout on Shirley Hills Road. The proposed development would exacerbate this to a dangerous level.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

First, the draft Local Plan identifies two areas of Shirley as locations where the Council wants to see “focused intensification associated with gradual change of area’s local character” under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals). The document also explains what this means – that it is the aim of your team to materially change the character of the local area. Please could you explain why? Even if it was an area which had problems, this would be unacceptable. But the area you are talking about is a good residential district with good shops and a pleasant atmosphere. An area to which people move specifically because of its character, an area which people love.

Change

Croydon’s suburbs will have sustainably grown to accommodate homes to contribute to the borough’s housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. 1. Policy DM31.4; Focussed intensification associated with gradual change of area's local character: Shirley Road shopping parade and Shirley local centre:  
i) Whilst some limited intensification in the local centre along Wickham Road may be desirable to provide additional housing, the area around the local centre is far too widely drawn, including roads with quality family housing (Ridgemount Avenue, Wickham Avenue, Firsby Avenue, Hartland Way, Devonshire Way etc.) which should be maintained. Family housing with gardens needs to be retained for young families upsizing from flats to move to, who it is in the borough's interest to retain. Intensification would also lead to increased traffic which Wickham Road cannot support (rush hour delays are already very significant), especially since traffic is already expected to increase with the (admittedly desirable) Westfield development where visitors from Shirley, West Wickham and farther afield from A21/M25 will naturally use the A232 to reach Croydon.

ii) We strongly oppose intensification around the Shirley Road shopping parade. This is an architecturally strong parade which accordingly enjoys very low vacancy rates. In fact we strongly urge you to consider the 1930s parade for local listing, local heritage area or similar protection. Indeed 11.147 states that "each of Shirley's shopping centres has a distinct character which should be enhanced and strengthened" and some form of protection is essential to secure this in the light of intensification proposals. (We would comment similarly in respect of the Sanderstead Local centre also listed under DM31.4) As with the area around the Shirley local centre, we object to the loss of family housing for the reasons already stated. In fact 11.142 notes that the features of Shirley's shopping areas "play a vital role in creating Shirley's sense of place" and yet, in apparent contradiction, the proposed focussed intensification as outlined would seriously undermine this sense of place.

As an aside and instead it would seem that areas in need of regeneration within the borough might be considered for focussed intensification and/or change of use to provide additional housing and where access to transport and other facilities is good. For example the area along Lower Addiscombe Road between Grant Road and Davidson

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Road has several retail units which have been unlet for a long period and a fragmented character which provides the opportunity for redevelopment into a much higher quality and largely residential area, although focus on the quality of development/conversion will be necessary to achieve a good living environment.

We are pleased to note that public realm improvements are planned for the Shirley Local Centre, as these are long overdue.

Area of the Shirley  
Road Shopping  
Parade

Taken at face value, it would appear that many of the residential roads adjoining the Wickham Road are now implicated in the scheme in their entirety including; Ridgemount Avenue, Verdayne Avenue, Wickham Avenue, Firsby Avenue, Orchard Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Bennetts Way and Devonshire Way. This apparent 'land-grab' is totally unacceptable and disruptive for the established community on so many levels, not the the least being that were these proposals to become Croydon Council's adopted policy, they would stultify home-owner development, and possibly blight the sale and value of local properties for many years to come. Unless the Council's intentions are better clarified and more precisely detailed damage to the market will be done.

DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

Existing semi-detached houses  
should not be demolished in favour of  
soulless blocks of flats. People  
require houses to live in, especially  
bringing up families.

Please stick to sensible  
developments and do not destroy  
Croydon with horrendous buildings.  
We are long-term residents  
and care very much about the area in  
which we live.

Change

Croydon's suburbs will have  
sustainably grown to  
accommodate homes to  
contribute to the borough's  
housing need. The challenge  
for the Croydon Local Plan is  
to enable growth and  
regeneration in the local  
context while recognising the  
local character and  
distinctiveness. To achieve  
this this designation will be  
amended so that it applies to  
the buildings along Wickham  
Road and Shirley Road  
(combining the area with that  
of Shirley Local Centre), key  
corner plots and excludes  
the majority of residential  
streets away from the main  
roads. The objective of  
policy DM31.4 is to  
maximise use of the existing  
growth capacity, to focus  
growth in sustainable  
locations and to support a  
smart spatial vision for the  
borough. Spatially,  
additional growth would  
strengthen the potential for  
further development of  
public transport and other  
uses which require a certain  
level of localised demand.  
The proposed areas meet  
criteria referring to  
infrastructure availability and  
accessibility; deliverability of  
growth based on local  
character. The policy opens  
up opportunities for more  
intensive development in  
selected areas and enables  
gradual change of character  
over time. It would also  
positively encourage spatial  
quality and distinctiveness of  
Croydon local and  
neighbourhood centres. The  
complete review is available  
on the Council's website on  
the evidence base pages  
which support the Croydon  
Local Plan.

Area of the Shirley  
Road Shopping  
Parade

Focussed intensification associated with gradual change of an area's local character under Policy DM31.4 of the Shirley Road Shopping Parade, Shirley local centre and Forestdale. Shirley Road Shopping Parade is surely worthy of protecting rather than replacing with medium-rise blocks? Shirley local centre is defined not just as a stretch of the Wickham Road (where some intensification may be appropriate) but Ridgemount Avenue, Wickham Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Bennetts Way and Devonshire Way. Replacing the largely semi-detached buildings in these residential roads with medium-rise blocks would completely change the character of Shirley. Replacing the largely terraced housing and small blocks of flats in Forestdale with medium-sized blocks would completely change that area too;

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

I am writing to you to object to the Focussed intensification associated with the gradual change of area's local character under Policy DM31.4 off the Shirley Road Shopping Parade and Shirley Local Centre.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I am writing to object to the Council's proposed long term plans for certain parts of Croydon, particularly the area around Shirley Library, where I have lived for 30 years.

Apart from the obvious increase in traffic, to an already overburdened Wickham Road, we are starting to see the gradual erosion of traditional residential roads formed of classic semi or detached houses.

To cram more and more houses and flats into the designated areas would destroy their character and to build on existing green belt and back gardens would be completely inappropriate, as well as placing additional stress on local facilities and amenities.

I urge the Council to reconsider these proposals and adopt a more sensitive agenda using only space and land capable of absorbing additional development.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I have lived in Shirley for 22 years and one of the main reasons we moved here was because of the character and charm of the area. Needless to say we were horrified when we were recently made aware of the above document and the proposals involving medium rise housing intensification. When I first read the document I thought it just involved the development of the Shirley Road Parade of Shops, however, when I looked at the line drawing on page 166 the outline boundary stretched further than the parade so I wrote to your planning department asking for the addresses affected by the proposals. I received a reply from Dominique Barnett on 3/12, however, she did not answer my question so I replied on 5/12 and told her that I required a definitive list of addresses - to date I still haven't received a reply, although I spoke to her directly last week and she said she would try to obtain the info. And write to me.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. I have heard from another source that a plot of land known locally as the Green Triangle at the bottom of our gardens is included in the proposals and yet to my knowledge there is no mention of it in the document. None of the local residents know anything about it neither do the Shirley Parade Shops management committee.

Change

The triangle referred to in the representation is a Site of Nature Conservation Importance and not suitable for development. Therefore, it has been removed from the proposed area of focussed intensification.

My other objection relates to the draft Local Plan relating to two other areas in Shirley, i.e. Shirley Shopping Parade and the Shirley local centre, the area around Shirley Library. From the draft plan, the Council wants to see "focussed intensification associated with gradual change of the area's local character" under Policy DM31.4 ....it further describes how this would mean merging smaller properties, medium rise blocks, large buildings with strong frontages. "The introduction of such buildings will alter, over time, the predominant character of the intensified areas"...page 132 of CLP Page 166 CLP...mentions local roads in Shirley..To replace the largely semi detached buidlings in these residential roads with medium rise blocks is not acceptable. It will inevitably change the character of Shirley and I would like register my objection

Change

It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Objections to the proposed Intensification of Shirley Local Centre and Shirley Shopping Parade as outlined in table 11.2 on page 129 of Croydon Local Plan Detailed Proposals and Policies and extensive development in other areas of Shirley.

I wish to lodge my objection to the proposals on the following grounds:-

- Insufficient Notice was given to allow adequate consideration to be given to the proposals
- The intensification of dwelling places in the area will have a negative impact, changing the nature and character of the area
- The transport links in the area are inadequate to cope with a large increase in the population. The A232 Wickham Road is notoriously bad.

A proposal to build flats to replace two bungalows on the corner of Alton Road was turned down on the grounds that it would change the nature and character of the road. Alton Road consists of traditional family homes with gardens. Many similar roads referred to in the Shirley proposal would be affected in the same way.

You only have to look at Pampisford Road in Croydon to see how such developments change the nature and character of a road.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. Also, tearing down semi detached  
housing and putting up blocks of flats  
(as planned in Shirley) is totally  
unacceptable.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I am unaware that I have missed public meetings or been sent details of these plans as it affects my local area. I think that were you to have had a local referendum as I think you should have done, these proposals would receive practically zero support except possibly by those who stand to gain from it.

My wife and I are longstanding Shirley residents. While I understand the need for more housing, the Croydon plan as it affects Shirley seems extreme in extent and its likely impact on Shirley.

I am especially concerned with policy DM31.4 and the proposed focussed intensification of the Shirley Road Shopping parade and Shirley local centre which is tantamount to the destruction of Shirley as it exists and it's replacement by New developments of unknown nature. Apart from the unknown endpoint it is clear that the impact in terms of inconvenience and disruption to local residents would occur over many years during this redevelopment for no benefit to existing residents.

It is also not evident why that part of Shirley as opposed to any other reasonably pleasant suburban area in Croydon should have been chosen for 'intensification'.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Finally, the draft Local Plan identifies two other areas of Shirley as locations where the Council wants to see "focussed intensification associated with gradual change of area's local character" under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals). It goes on to describe what this means:

"New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. The promoted character types are: 'Medium-rise blocks with associated grounds', 'Large buildings with spacing' and 'Large buildings with strong frontages'. Their gradual introduction will alter over time the predominant character of intensified areas" (page 132, Croydon Local Plan Detailed Policies & Proposals).

The two areas are the Shirley Road Shopping Parade and the Shirley local centre (the area around Shirley Library) (page 166, Croydon Local Plan Detailed Policies & Proposals). The idea that the largely semi-detached buildings in these residential roads should be replaced by medium-rise blocks is unacceptable - it would completely change the character of Shirley and we are objecting to it.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

First, the draft Local Plan identifies two areas of Shirley as locations where the Council wants to see “focussed intensification associated with gradual change of area’s local character” under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals). Happily the document also explains what this means. Unhappily, it appears to mean exactly what it says – that it is the aim of your team to materially change the character of the local area. If it was an area which had problems, which needed to be helped up, which was suffering unduly from the privations of the tight financial climate then perhaps, perhaps, it would be understandable, if still unacceptable. But the area you are talking about is none of those things – it is a nice residential district with nice shops and a pleasant atmosphere. An area to which people move specifically because of its character, and area which people love.

Croydon’s suburbs will have sustainably grown to accommodate homes to contribute to the borough’s housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

Policy DM31.4: Positive Character of the Places of Croydon, should be amended so that it does not include the hinterland of many of the areas selected. This policy sets out locations where the Council will support intensification associated with gradual change of the area's local character. This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 – 167 include large areas of hinterland that would not be appropriate for such intensification.

The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries: Shirley, page 166, Shirley Road from Shirley Avenue to the BP Service Station and a further zone on Wickham Road from Verdayne Avenue to Cheston Avenue

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Area of the Shirley  
Road Shopping  
Parade

I have considered details of the proposed Croydon Local Plan and have the following objections on the basis that they will:  
detract from the local areas,  
dramatically change the local areas,  
dramatically change the character of local areas,  
have a significant adverse effect on an already overloaded infrastructure, including roads, public transport, public open space, environment and emergency, health and support services.

3. I object to the proposed replacement of low rise, terraced, semi detached, and detached properties with medium and high rise properties in the Shirley area, Addington and Forestdale area, New Addington area, Addiscombe and East Croydon area.

4. I object to the proposed increased building capacity and density in the Shirley area, Addington and Forestdale area, New Addington area, Addiscombe and East Croydon area.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

We are life long residents of Croydon. With reference to the local plan we would like to object to the following proposals:  
•DM40.1 - A skyscraper in Purley is total out of character for the town. Purley needs development but this is not the way to go about it.  
•DM40.4 - Purley Pool - whilst not objecting to this area being redeveloped it should include a swimming pool. Our children learnt to swim here and it is an important facility to the community. For instance our Farther uses it regularly. It has been vital to maintaining his health and he would not be able to travel to more distant pools.  
•DM44.2 - It is not appropriate to have a travellers site on green belt land. We believe it is important to protect all Green Belt land from development  
•DM31.4 - We are opposed to the intensification of these areas.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The green belt land we have in our areas, in Shirley, Forestdale, Addington and beyond, is a precious resource that should be protected by the council, not placed under threat of development at your whim. Having these green spaces helps the environment, the ecosystem, biodiversity and nature, and local residents, who benefit in many ways from having such places nearby their homes.

Change

Area of the Shirley  
Road Shopping  
Parade

The draft Local Plan identifies two other areas of Shirley as locations where the Council wants to see "focussed intensification associated with gradual change of area's local character" under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals). It goes on to describe what this means: New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. The promoted character types are: 'Medium-rise blocks with associated grounds', 'Large buildings with spacing' and 'Large buildings with strong frontages'. Their gradual introduction will alter over time the predominant character of intensified areas" (page 132, Croydon Local Plan Detailed Policies & Proposals). The two areas are the Shirley Road Shopping Parade and the Shirley local centre (the area around Shirley Library). The former is quite tightly drawn and I therefore don't object to it, but the latter includes not just the Wickham Road itself but Ridgemount Avenue, Wickham Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Bennetts Way and Devonshire Way (page 166, Croydon Local Plan Detailed Policies & Proposals). The idea that the largely semi-detached buildings in these residential roads should be replaced by medium-rise blocks is unacceptable - it would completely change the character of Shirley and I object to this very strongly.

DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

I object to focussed intensification associated with gradual change of areas's local character under Policy DM31.4 of the Shirley Road shopping Parade. Replacing the existing shopping parade and the surrounding semi0detached housing with medium-rise blocks would completely change the character of the Shirley Area.

Change

The policy 31.4 was withdrawn from the final draft of the Croydon Local Plan: Detailed Policies and Proposals in response to the new piece of evidence which was not available prior to consultation. The detailed Level 1 Strategic Flood Risk Assessment identified all six proposed areas of focussed intensification as being of a high risk of flooding (fluvial, surface and groundwater) therefore not suitable for intensification.

---

I am grateful to the Council for consulting on the detailed policies and proposals that will make up the Croydon Local Plan. There is much in the document that I agree with, but some of the proposals would, in my opinion, change the character of parts of Croydon very much for the worse. I hope you will forgive me if I focus on these areas of contention. I am therefore writing to formally object to:

4. focussed intensification associated with gradual change of an area's local character under Policy DM31.4 of the Shirley Road Shopping Parade, Shirley local centre and Forestdale. Shirley Road Shopping Parade is surely worthy of protecting rather than replacing with medium-rise blocks? Shirley local centre is defined not just as a stretch of the Wickham Road (where some intensification may be appropriate) but Ridgemount Avenue, Wickham Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Benneffs Way and Devonshire Way. Replacing the largely semi-detached buildings in these residential roads with medium-rise blocks would completely change the character of Shirley. Area of the Shirley  
Road Shopping  
Parade

I am writing to submit my objection to:

3. Focussed intensification  
associated with gradual change of  
area's local character under Policy  
DM31.4 of the Shirley Road  
Shopping Parade and Shirley local  
centre;

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The focussed intensification associated with the gradual change of area's local character under Policy DM31.4 of the Shirley Road Shopping Parade and the Shirley local centre. The idea that new development located in these areas, including local residential roads, could be significantly larger than existing buildings of up to four storeys is totally out of keeping with the area and would fundamentally change the character of Shirley. Such a significant change is disrespectful to existing residents who have chosen to live, contribute and build a strong local community in an established residential suburban area.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I object to the focussed intensification associated with gradual change of an area's local character under Policy DM31.4 of the Shirley Road Shopping Parade, Shirley local centre and Forestdale. Shirley Road Shopping Parade is surely worthy of protecting rather than replacing with medium-rise blocks? Shirley local centre is defined not just as a stretch of the Wickham Road (where some intensification may be appropriate) but Ridgemount Avenue, Wickham Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Bennetts Way and Devonshire Way. Replacing the largely semi-detached buildings in these residential roads with medium-rise blocks would completely change the character of Shirley. Replacing the largely terraced housing and small blocks of flats in Forestdale with medium-sized blocks would completely change that area too.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it applies to the buildings along Wickham Road and Shirley Road (combining the area with that of Shirley Local Centre), key corner plots and excludes the majority of residential streets away from the main roads. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

As a long term resident of Shirley, since 1969, I am appalled at your proposals for focussed intensification associated with gradual change of area's local character. Although I and other local people appreciate the need for housing, surely it is part of your responsibility as a Council to respect the views of your residents and to conserve good local character, not to bull-doze it in favour of such inappropriate redevelopment? Shirley is recognised as a prime example of excellent inter-war development. It would seem our Council is determined to destroy this asset and replace it with anonymity.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. DM31 (Table 11.2)

Area of the Shirley  
Road Shopping  
Parade

Objection to the focussed  
Intensification - Policy DM31.4 of the  
Shirley Road Shopping Parade and  
Shirley Local Centre. This will totally  
change the character of the Shirley  
area and damage communities  
without consideration for what the  
people of those areas need. It will  
create an artificial town centre by  
removing groups need. It will create  
an artificial town centre by removing  
groups of e.g. villages, a hallmark of  
Shirley.

Change

Croydon's suburbs will have  
sustainably grown to  
accommodate homes to  
contribute to the borough's  
housing need. The challenge  
for the Croydon Local Plan is  
to enable growth and  
regeneration in the local  
context while recognising the  
local character and  
distinctiveness. To achieve  
this this designation will be  
amended so that it applies to  
the buildings along Wickham  
Road and Shirley Road  
(combining the area with that  
of Shirley Local Centre), key  
corner plots and excludes  
the majority of residential  
streets away from the main  
roads. The objective of  
policy DM31.4 is to  
maximise use of the existing  
growth capacity, to focus  
growth in sustainable  
locations and to support a  
smart spatial vision for the  
borough. Spatially,  
additional growth would  
strengthen the potential for  
further development of  
public transport and other  
uses which require a certain  
level of localised demand.  
The proposed areas meet  
criteria referring to  
infrastructure availability and  
accessibility; deliverability of  
growth based on local  
character. The policy opens  
up opportunities for more  
intensive development in  
selected areas and enables  
gradual change of character  
over time. It would also  
positively encourage spatial  
quality and distinctiveness of  
Croydon local and  
neighbourhood centres. The  
complete review is available  
on the Council's website on  
the evidence base pages  
which support the Croydon  
Local Plan.

focussed intensification associated with gradual change of area's local character under Policy DM31.4 of the Shirley Road Shopping Parade and Shirley local centre;  
We do not need intensified build up of the local area: I was walking along the Wickham Road recently and was praying like mad that the Council would do something about the fumes because they are most unpleasant to inhale. When my parents moved from Camberwell to Shirley many years ago, it was in the fond hope that the prevailing atmosphere in Shirley would be a lot healthier than that found in Camberwell. Some hopes! Now the Labour council is just seeking to impose more fumes and a less healthy way of life upon us! I object!

Plan)

We would make the following  
objections to the proposed Draft  
Local Plan which is a poorly  
disguised attack on the southern part  
of the Borough

Policy DM 31.4

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Brighton Road and Sanderstead Road, areas in between and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Brighton Road  
(Sanderstead Road)  
Local Centre with its  
setting (subject to  
development being  
safe from flooding for  
the lifetime of the  
Plan)

Policy DM31.4: Positive Character of the Places of Croydon, should be amended so that it does not include the hinterland of many of the areas selected. This policy sets out locations where the Council will support intensification associated with gradual change of the area's local character. This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 - 167 include large areas of hinterland that would not be appropriate for such intensification.

The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries:  
South Croydon, page 167, Brighton Road from Napier Road to Kingsdown Avenue.

Brighton Road  
(Sanderstead Road)  
Local Centre with its  
setting (subject to  
development being  
safe from flooding for  
the lifetime of the  
Plan)

We have lived in Sanderstead for over 40 years, and have thoroughly enjoyed the areas to the south of Croydon being unspoilt. In our view these ill conceived proposals will change this area beyond recognition and take away that for which it is well known and valued. Please rethink, and do not continue with the proposed policies set out below and which can be found in your Local Plan:  
The loss of Local Area of Special Character protection for many roads such as West Hill, Campden and Spencer Roads, the Woodcote Estate and Hartley Farm will open these roads up to inappropriate development. Roads such as Oakwood Avenue in Purley should also be included as new Local Heritage Areas. In Policy DM31.4 (p126) some parts of Kenley, Sanderstead and South Croydon are earmarked for "intensification" – which is a euphemism for more building. This will change the character of those areas beyond all recognition and I am strongly opposed to any of it.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Brighton Road and Sanderstead Road, areas in between and key corner plots. This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 - 167 include large areas of hinterland that would not be appropriate for such intensification.	The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries: South Croydon, page 167, Brighton Road from Napier Road to Kingsdown Avenue.	Change	Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Brighton Road and Sanderstead Road, areas in between and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Comment

DM31 (Table 11.2)

Forestdale

Furthermore, there must be considerable doubt whether existing home owners would be adequately compensated. I am left with the inevitable but uncomfortable conclusion that many existing owners, dispossessed by the council, will have insufficient funds to buy a similar property either in Croydon or elsewhere in London and will either have to downsize or relocate to another part of the country

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

In addition to changes in the housing stock, these proposals would significantly alter the population density. Most individuals continue to aspire to own a car and for many this is a necessity in order to travel to and from work. Public transport will never cover the needs of all people particularly those that need their vehicles as an integral part of their work. The proposed dramatic increase in dwellings and population density will add to the demand for on-street parking which is already an acute problem in some parts of Forestdale.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. DM31 (Table 11.2)  
Forestdale

When Forestdale was designed by the developers, Wates, it was always intended that the housing stock would provide a range of dwellings for various incomes and different household needs. It remains 'relatively cheap' by current London standards. These proposals would alter that original concept.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

In my opinion the Councils proposals, if approved, would alter the physical appearance of Forestdale changing it from one designed to blend harmoniously with the local rural environment: 'Where Town meets Country' was developers original concept. It is difficult to imagine medium rise flats, perhaps up to 15 storeys high, blending with the existing housing stock or the countryside surrounding Forestdale as the existing area is relatively small and narrow and surrounded by woods and a bird sanctuary.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I wish to object strongly to what I consider are ludicrous proposals bordering on the insane. Referring in particular to Policy DM31.4 I would like to state that myself and many other people moved here because it's quite an open area without large blocks of flats. Already over time the area has changed - parking is a nightmare and amount of litter and fly tipping has increased greatly. How indeed does the Council propose to change small housing into blocks of flats? Will they issue hundreds of Compulsory Purchase Orders or send in the 'Heavies' to force residents out. Public transport around Forestdale is already stretched to breaking point and parking along the Pixton Way is so bad that at certain times of the day and particularly at weekends the high frequency bus service finds the main road virtually impassible. I do believe Abellio the company running the bus service have complained on many occasions. At present Forestdale is served by two schools- Forestdale and Courtwood. Forestdale has recently doubled in size. So what plans for the future when the population on Forestdale virtually doubles? Also there is one small part time Doctors surgery. It's all very well moving in masses of people but what about other services? In my opinion Forestdale is not suitable for your so called 'intensification' But yet again residents with modest amounts of money and property and of course little political influence pay the price again.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Forestdale

1. Focussed intensification associated with gradual change of area's local character under Policy DM31.4 of Forestdale

With regard to policy DM31.4, my wife and I have lived in Forestdale for 40 years and raised our family here, firstly in Hartscroft and then in Brookscroft. I have been a director of Brookscroft Management Ltd for ten years and chairman for eight. I believe that Brookscroft is a valuable asset for Croydon which the Council should be aiming to protect, not threaten:

- a) The houses are relatively low cost, and therefore aspirational homes for first time buyers including those moving from social housing (there are also Housing Association properties in the estate)
- b) Unlike most properties at comparable cost the area is 'green' thanks to shared amenity land, providing a healthy environment for young families with consequential benefit in terms of their children's development and reduced social cost compared with other more 'urban' areas
- c) This is achieved because the amenity land (including roads and street lighting) is owned and maintained by Brookscroft Management Ltd at no cost to the Council, despite all houses paying full Council Tax. If the character was changed this cost (currently £52,000 pa) would fall to the Council
- d) It should also be noted that the current character and legal status of Brookscroft is protected by Trust and Covenants, which we would fight to preserve.

These points apply in varying degree to Forestdale as a whole, of which Brookscroft forms only a small part.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

DM31 (Table 11.2)

Forestdale

Policy DM31.4: Positive Character of the Places of Croydon, should be amended so that it does not include the hinterland of many of the areas selected. This policy sets out locations where the Council will support intensification associated with gradual change of the area's local character. This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 - 167 include large areas of hinterland that would not be appropriate for such intensification.

The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries:  
Selsdon, page 165, Selsdon Park Road from Farnborough Avenue to the roundabout at Kent Gate Way and Holmbury Grove

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I agree with the proposal to include Forestdale in the Selsdon district which is our natural District centre. I also approve of the concept of designating a Neighbourhood centre at the Selsdon Park Road/Featherbed Lane junction. This is a thriving centre and convenient for local residents. It has a small supermarket, two chemists, a newsagent with sub post office, bakery, launderette, GP surgery and dentist so it's good to protect these services. There are also restaurants for fish and chips and Indian food plus daytime cafes and takeaways. The loss of the bank to become a betting shop was a shame although there are cash points at the newsagent and petrol station. There are also good public transport links. Some intensification in this locality may be appropriate if carefully designed and does not adversely affect the existing residents or businesses. Therefore I would not object if the intensification is only in the area shown marked as DM31.4 on the Changes of Policies map of Selsdon indicated in blue (page 165).

My initial worry on learning of the intensification proposal from my MP was that it would apply to all of Forestdale and this has been the impression that he and his supporters have given to me and other residents. The whole of Forestdale is identified in the Detailed Policies and Proposals, Paragraph 11.9, Table 11.2 as marked for intensification.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. Forestdale to see "focussed intensification associated with gradual change of area's local character" under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals)... "New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. The promoted character types are: 'Medium-rise blocks with associated grounds', 'Large buildings with spacing' and 'Large buildings with strong frontages'. Their gradual introduction will alter over time the predominant character of intensified areas"

I have been a resident of Forestdale all my life, having been brought up in our family home there, and subsequently my first flat, and now a 3 bedroom house. I am incensed that the above would even have crossed someone's mind let alone be turned in to a formalised plan. Forestdale is a private housing estate which was built with great consideration to provide a mixture of property types for all, from solo occupancy to family homes. They were built with consideration for the surroundings and with green spaces and play areas incorporated. It is a measure of its success that many like myself have chosen to stay there over moving elsewhere as we have moved through the property chain. The proposal to rip up areas of Forestdale to replace the well thought out considerate planning with mid-rise blocks of flats, which would sit like high-rise amongst their surroundings, is beyond ludicrous. The way to increase housing is not to rip up good housing and destroy an area through a complete change of character, it is to build houses on unused brownfield sites and develop waste ground or derelict areas.

"Focused intensification...change of local character" – How is changing the character of a well thought out housing development a positive move? Focussed intensification is just a flowery way of saying cram people in. Forestdale already is used to capacity as far as vehicles and parking spaces is concerned, and has the facilities in place such as primary schools and local shops for the size it is, it was designed and built that way. Increasing the volume would just break these facilities and destroy the environment.

"Significantly larger than existing", "large buildings with strong frontages" – This sounds like the worst decision that could be made. Rip out areas of

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. existing housing that serves the community well and replace with vast facades that dominate their surroundings and destroy the area.

I cannot object strongly enough to these proposals and find them incredibly insulting as a way of developing the area and providing housing solutions. Croydon is a huge town covering a large area, and the best that can be come up with is to rip out existing homes in nice areas and destroy communities and the character of area. That is to say nothing of the utilities such as water /drainage which has been put in to serve the existing environment and would have to be ripped out and replaced ruining many surrounding roads and areas whilst that was being done.

---

I object to the focussed intensification associated with gradual change of the area's local character under policy DM31.4 of Forestdale. With reference to making Forestdale any bigger, is madness as already too big and sprawling. Forestdale already has a lot of crime going on, not to mention drugs and break ins.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. DM31 (Table 11.2)

Forestdale

I have lived on Forestdale for some thirty years, twenty-six of those years at my present address. Forestdale is a well-planned, pleasant estate largely in private ownership and it horrifies me that the Local Plan identifies it as a location where the Council wants to see "focussed intensification associated with gradual change of the area's local character". The idea that the largely terraced housing and small blocks of flats should be replaced by medium-rise blocks or even large buildings is quite unacceptable. Forestdale is complete in itself and the Council's proposals would completely change the character of the whole area.

Forestdale - I have lived on Forestdale for over 20 years and it has become a mature and well structured area of housing that is completely conducive to its local environment and surrounding areas. To remove some of the current housing and replace with medium to large story flats is neither in keeping nor is required in this area and would change the character beyond recognition. I object to this proposal.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I am also concerned about Forestdale being identified for a gradual change of the area's local character (Policy DM31.4, page 129 Local Plan) by allowing new development to be significantly larger than that in existence and which may be associated with merging smaller properties eg gradually introducing larger, taller buildings. The idea that the existing terraced housing and small blocks of flats should be replaced by medium-rise blocks is unacceptable and would change the character of the area. This area has already changed over the years with more and more cars and not enough parking spaces - the recent introduction of double-decker buses to replace the single decker ones has also been a retrograde step already as the poor drivers find it very difficult to get between the rows of parked cars

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Forestdale

The idea that the largely terraced housing and small blocks of flats in Forestdale should be replaced by medium-rise blocks is unacceptable - it would completely change the character of the area and I will be objecting to it very strongly.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I live in crofters mead forestdale and cannot see any benefits to the areas mentioned in the above proposals. I am sure it would be better to refurbish existing properties in the area concerned and create more green areas for residents and their children to enjoy. create more sensible car parking areas people will buy cars regardless of not having a parking space and simply park in an existing space thus creating a problem for somebody else. transport for London have already created a problem by their introduction of double yellow lines which in some areas are not required. why anybody would want to create a traveller camp at pear tree farm is beyond me surely a nice new housing complex would be more suitable. forestdale and surrounding area is a very nice place to live and I cannot see any improvement to the area in your proposals. i understand that these proposals are inappropriate and unacceptable these are my views on the matter.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Equally concerning, the draft Plan identifies Forestdale as a location where the Council wants to see "focussed intensification associated with gradual change of area's local character" under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals). "New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. The promoted character types are: 'Medium-rise blocks with associated grounds', 'Large buildings with spacing' and 'Large buildings with strong frontages'. Their gradual introduction will alter over time the predominant character of intensified areas" (page 132, Croydon Local Plan Detailed Policies & Proposals). The idea that the largely terraced housing and small blocks of flats in Forestdale should be replaced by medium-rise blocks is unacceptable - it would completely change the character of the area. Forestdale is a lovely place to live and the character does not require changing.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I am also worried about the plan stating it wants to change the areas local character. I am not exactly sure what this means but my understanding is that it is building bigger blocks of flats. Having lived in this quiet, safe area for over 30 years I find this very worrying. There is no space to put these extra larger buildings and any building would change the area adversely. If more people move into the area there will need to be more infrastructure needed. Things such as schools, doctors, dentists, shops and improved travel infrastructure. The councils intention seems to be to try and discourage the use of cars. Many older people need their own transport as they cannot use public transport and carry say food shopping. Most people will have a car even if they do not use it all the time, myself included. The parking situation in this area is dire as it is with the council removing car parking spaces the whole time. All these changes that you are proposing will be detrimental to the area and will not encourage people to move to the area.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. DM31 (Table 11.2)

Forestdale

Existing semi-detached houses should not be demolished in favour of soulless blocks of flats. People require houses to live in, especially bringing up families.

Please stick to sensible developments and do not destroy Croydon with horrendous buildings. We are long-term residents and care very much about the area in which we live.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The draft Local Plan identifies Forestdale as a location where the Council intends to implement a policy of focussed intensification associated with the gradual change of the area's local character. This apparently means that new developments in the area would be significantly larger than those in the existing street scene with medium-rise blocks and large buildings increasingly predominant in the area. This is objectionable because, to the detriment of existing residents, it would totally change the friendly cul-de-sac defined, local neighbourhood character of the largely terraced housing in Forestdale.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. Object	Soundness - Justified	DM31 (Table 11.2) Forestdale	Policy DM31.4: Positive Character of the Places of Croydon, should be amended so that it does not include the hinterland of many of the areas selected. This policy sets out locations where the Council will support intensification associated with gradual change of the area's local character. This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 - 167 include large areas of hinterland that would not be appropriate for such intensification.	The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries: Selsdon, page 165, Selsdon Park Road from Farnborough Avenue to the roundabout at Kent Gate Way and Holmbury Grove	Change	Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.
--------	-----------------------	---------------------------------	---	---	--------	--

Focussed intensification associated with gradual change of an area's local character under Policy DM31.4 of the Shirley Road Shopping Parade, Shirley local centre and Forestdale. Shirley Road Shopping Parade is surely worthy of protecting rather than replacing with medium-rise blocks? Shirley local centre is defined not just as a stretch of the Wickham Road (where some intensification may be appropriate) but Ridgemount Avenue, Wickham Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Bennetts Way and Devonshire Way. Replacing the largely semi-detached buildings in these residential roads with medium-rise blocks would completely change the character of Shirley. Replacing the largely terraced housing and small blocks of flats in Forestdale with medium-sized blocks would completely change that area too;

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The idea that the largely terraced housing and small blocks of flats in Forestdale should be replaced by medium-rise blocks is unacceptable - it would completely change the character of the area and I will be objecting to it very strongly.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

DM31 (Table 11.2)  
Forestdale

I would like you to note my strong objection to the granting of any Planning Application relating to the following Policy Ref. DM31.4.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

About 20 years ago I decided to move from Woodpecker Mount to Brookscroft on Forestdale. My decision was made because Brookscroft is a well managed estate with plenty of green spaces. When I brought the house, took on board that strict covenants were in place and that a management charge was in required to cover the cost of our lighting, gardening, upkeep of the roads and other maintenance issues. From time to time we have had problems from ill disciplined youths on quad bikes and misbehaving in the adjoining playground but I feel making areas of Forestdale more dense would make the security problem of this quiet part of the estate worse.

I suggest that changing the format of the Forestdale estate be dropped. Any further development of denser housing would make the current congestion on the roads at peak times even worse than it is at present. The proposed reduction in parking spaces is not a good idea as parking is already at a premium and the suggestion that more people would not have a private vehicle is quite ridiculous. Parking problems are made worse due to so many workers having to park their vans on the estate. Safety on Forestdale roads is bad enough at present. We have already had one fatality on Linton Glade which resulted in the parking spaces in the area being removed.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I have been made aware that Croydon Council has recently published proposals which, if approved and implemented, will fundamentally alter the existing housing density and adversely change the appearance of my local area, Forestdale. Specifically, if approved, it is proposed that existing terraced housing and small blocks of flats will be replaced by medium sized blocks of flats perhaps 8,10 or 15 storeys high (Policy DM31.4 Croydon Local Plan - focused Intensification associated with gradual changes of area's local character). My objection is based on my experience of living in Forestdale since 26th June 2015 when I purchased my property in Markfield. I am shocked that this planning proposal was not found in my solicitors searches prior to purchase. The area is popular with all ages as the existing area is relatively small and narrow and surrounded by woods and a bird sanctuary. My neighbour in Markfield has lived in her property since it was built in the 1970's and is proud of her home, as I am sure there are many more in Forestdale. Since moving here there is a real community spirit. The only negativity is the parking as many home owners who initially moved here and had small children, have now young adults who drive and have vehicle. I moved to this area with my son his partner and their three year old son as it has good schools and was ideal with the woods and nature surroundings. So I urge you as a new resident to this community to reject this planning application and the prospect of destroying a community and my home.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I am writing to object to the following proposals in the Croydon Local Plan. The plans that will lead to a change in character of Forestdale Estate (Policy DM31.4). As a Forestdale resident I am somewhat at a loss as to how the Council can influence the intensity of development on a privately owned estate, unless they are going to sell off Forestdale Primary School's playground, or the triangle down by Featherbed Lane. How can you support the 'merging of smaller properties', or the knocking down of blocks of flats to build taller ones, when those properties are owner occupied?

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

We have lived in the Borough of Croydon for 30 years and value its vibrancy and diversity.

As Croydon ratepayers we object to the de-designation of Metropolitan Open Land generally, especially land detailed above, which will change forever Croydon's character.

We would ask you to encourage policies/development to:

1. Build new housing on brown field sites by all means AND preserve invaluable green space for the benefit of the community of Croydon;
  2. Protect green belt land and preserve the green corridors we desperately vital for wildlife and biodiversity;
  3. Amend the tall buildings policy and keep the tall building zone where it is suited in the centre of town;
  4. Utilise brownfield sites for new low-level housing only where it can be developed alongside new GP surgeries, schools and improved public transport;
- "Nowadays people know the price of everything and the value of nothing". Green Belt is vital and precious. Once lost for future generations and will not be replaced by developers. We understand the need for housing, schools, hospitals and infrastructure. Are the Developers investing these also alongside their building investments?  
Please protect our few remaining green spaces on the borough map, by making better use of brown field sites.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Equally concerning, is that the draft Plan identifies Forestdale as a location where the Council wants to see "focussed intensification associated with gradual change of area's local character" under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals). It goes on to describe what this means: "New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. The promoted character types are: 'Medium-rise blocks with associated grounds', 'Large buildings with spacing' and 'Large buildings with strong frontages'. Their gradual introduction will alter over time the predominant character of intensified areas" (page 132, Croydon Local Plan Detailed Policies & Proposals)". The idea that the largely terraced housing and small blocks of flats in Forestdale should be replaced by medium-rise blocks is unacceptable and would completely change the character of the area and I object to it most strongly.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. Forestdale

The idea of knocking down semi-detached houses and replacing with medium-rise blocks is totally unacceptable and I object to most strongly as it will completely destroy the area and character of Shirley, and Forestdale. This again increases pressure on local roads, public transport, schools and NHS facilities.

Change

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Policy DM31.4: Positive Character of the Places of Croydon, should be amended so that it does not include the hinterland of many of the areas selected. This policy sets out locations where the Council will support intensification associated with gradual change of the area's local character. This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 - 167 include large areas of hinterland that would not be appropriate for such intensification. The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries: Selsdon, page 165, Selsdon Park Road from Farnborough Avenue to the roundabout at Kent Gate Way and Holmbury Grove;

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

We are life long residents of Croydon. With reference to the local plan we would like to object to the following proposals:

- DM40.1 - A skyscraper in Purley is total out of character for the town. Purley needs development but this is not the way to go about it.
- DM40.4 - Purley Pool - whilst not objecting to this area being redeveloped it should include a swimming pool. Our children learnt to swim here and it is an important facility to the community. For instance our Farther uses it regularly. It has been vital to maintaining his health and he would not be able to travel to more distant pools.
- DM44.2 - It is not appropriate to have a travellers site on green belt land. We believe it is important to protect all Green Belt land from development
- DM31.4 - We are opposed to the intensification of these areas.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. The green belt land we have in our areas, in Shirley, Forestdale, Addington and beyond, is a precious resource that should be protected by the council, not placed under threat of development at your whim. Having these green spaces helps the environment, the ecosystem, biodiversity and nature, and local residents, who benefit in many ways from having such places nearby their homes.

The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Change of "local Character" of Forestdale  
The draft Plan identifies Forestdale as a location where the Council wants to see "focussed intensification associated with gradual change of area's local character" under Policy DM31.4 (page 129, Croydon Local Plan Detailed Policies & Proposals). It goes on to describe what this means:

"New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. The promoted character types are: 'Medium-rise blocks with associated grounds', 'Large buildings with spacing' and 'Large buildings with strong frontages'. Their gradual introduction will alter over time the predominant character of intensified areas" (page 132, Croydon Local Plan Detailed Policies & Proposals).

The idea that the largely terraced housing and small blocks of flats in Forestdale should be replaced by medium-rise blocks is unacceptable - it would completely change the character of the area. Forestdale is a tight knit community, people tend to move here and stay as their families grow up and it would completely change the dynamic of the area.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. I've lived on Forestdale for 33 years - it has become over populated as it is - parking is a nightmare and Pixton Way is being used for parking, with vehicles parked right and left. At certain times vehicles speed on this road making it a hazard - more properties would be madness. I also don't agree to changing the landscaped areas in and around Forestdale for more properties. People in flats don't have gardens but Management companies keep the areas pleasant for us to enjoy.

It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I am grateful to the Council for consulting on the detailed policies and proposals that will make up the Croydon Local Plan. There is much in the document that I agree with, but some of the proposals would, in my opinion, change the character of parts of Croydon very much for the worse. I hope you will forgive me if I focus on these areas of contention. I am therefore writing to formally object to:

4. focussed intensification associated with gradual change of an area's local character under Policy DM31.4 of the Shirley Road Shopping Parade, Shirley local centre and Forestdale. Shirley Road Shopping Parade is surely worthy of protecting rather than replacing with medium-rise blocks? Shirley local centre is defined not just as a stretch of the Wickham Road (where some intensification may be appropriate) but Ridgemount Avenue, Wickham Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Benneffs Way and Devonshire Way. Replacing the largely semi-detached buildings in these residential roads with medium-rise blocks would completely change the character of Shirley. Replacing the largely terraced housing and small blocks of flats in Forestdale with medium-sized blocks would completely change that area too;

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I object to the focussed intensification associated with gradual change of an area's local character under Policy DM31.4 of the Shirley Road Shopping Parade, Shirley local centre and Forestdale. Shirley Road Shopping Parade is surely worthy of protecting rather than replacing with medium-rise blocks? Shirley local centre is defined not just as a stretch of the Wickham Road (where some intensification may be appropriate) but Ridgemount Avenue, Wickham Avenue, Peregrine Gardens, West Way Gardens, the northern section of Hartland Way and the western parts of Bennetts Way and Devonshire Way. Replacing the largely semi-detached buildings in these residential roads with medium-rise blocks would completely change the character of Shirley. Replacing the largely terraced housing and small blocks of flats in Forestdale with medium-sized blocks would completely change that area too.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I understand the need for regeneration, new housing and for spaces for travellers to rest. However I am deeply concerned as to your current plans in using Croydon's fabulous green spaces and encroaching on and changing existing, thriving communities with vague plans for developments. We have brownfield sites that could be used for these purposes as well as alternative proposals. I am writing to strongly object to; 1. The focused intensification with gradual change of area's local character under policy DM31.4 of Forestdale and Policy DM2 development of garden land. Forestdale is currently a family estate with young couples and families living in small maisonettes and family houses. Why on earth would we want to 'alter over time,' have 'large buildings with strong frontage's and 'development on garden land' in this wonderful green estate with protected trees? The centre of Croydon has fantastic new developments of some such homes which are urban living for those who desire it- you do not need to encroach on family housing and gardens to do this. It would completely change the character of the homes and family areas where children still play safely outside to have 'Medium Rise blocks with associated grounds.'

The Policy DM2 clearly assumes that garden land will not be developed and therefore the arguments that it will 'complement the local character' to lose such small gardens as they are in small terraced houses has no valid argument on the estate as it stands and they are inappropriate and weak. There is absolutely no detail as to how 'biodiversity' is to protected- vague and weak again.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. To achieve this this designation will be amended so that it does not include homes on smaller plots of land focussing instead on Selsdon Park Road, Gravel Hill, parts of Featherbed Lane and key corner plots. The objective of policy DM31.4 is to maximise use of the existing growth capacity, to focus growth in sustainable locations and to support a smart spatial vision for the borough. Spatially, additional growth would strengthen the potential for further development of public transport and other uses which require a certain level of localised demand. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. Forestdale

Furthermore, we totally object to the Councils plan to Intensify Forestdale. Replacing the terraced houses and small flats with much larger properties will completely ruin the lovely nature of Forestdale and this is the reason so many Families enjoy living here. It is unbelievable that Councils always want to ruin nice places to live and create monstrosities. We live near open spaces and Nature reserves and doing this will not Compliment the Local Character of the area but ruin it, and doing this will definitely not ensure that biodiversity is protected! Both of these are the criteria for permitting new dwellings so these plans need to be scrapped NOW

It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

I am writing to express concern about the following proposals for Forestdale which have been brought to my attention namely New development located in designated areas would be significantly larger than existing and may be associated with merging smaller properties. The promoted character types are: 'Medium-rise blocks with associated grounds', 'Large buildings with spacing' and 'Large buildings with strong frontages'. Their gradual introduction will alter over time the predominant character of intensified areas" (page 132, Croydon Local Plan Detailed Policies & Proposals).  
As a long term resident of Forestdale and Chair of Sorrel Bank Management Company I am opposed to the idea that the largely terraced housing and small blocks of flats in Forestdale should be replaced by medium-rise blocks in time. This would completely change the character of the area.

Croydon's suburbs will have sustainably grown to accommodate homes to contribute to the borough's housing need. The challenge for the Croydon Local Plan is to enable growth and regeneration in the local context while recognising the local character and distinctiveness. The proposed areas meet criteria referring to infrastructure availability and accessibility; deliverability of growth based on local character. The policy opens up opportunities for more intensive development in selected areas and enables gradual change of character over time. It would also positively encourage spatial quality and distinctiveness of Croydon local and neighbourhood centres. The complete review is available on the Council's website on the evidence base pages which support the Croydon Local Plan.

Policy DM31.4: Positive Character of the Places of Croydon, should be amended so that it does not include the hinterland of many of the areas selected. This policy sets out locations where the Council will support intensification associated with gradual change of the area's local character. This policy seems to focus around existing shopping parades where they may well be scope for intensification. However, the areas as detailed on pages 163 - 167 include large areas of hinterland that would not be appropriate for such intensification.

The boundaries should be re-drawn to remove the predominantly two storey residential roads that should not be subject to change and should instead show the following boundaries: Sanderstead, page 164, Limsfield Road from the roundabout at Sanderstead Hill to Riding Hill and Cranleigh Close;
